## City of Rockwall

*The New Horizon*

October 12, 2020

To the Honorable Mayor,  
Members of the City Council,  
And the Citizens of the City of Rockwall, Texas:

The Comprehensive Annual Financial Report (CAFR) of the City of Rockwall for the fiscal year ended September 30, 2019, is hereby submitted in accordance with Section 7.18 of the City Charter. The financial statements are presented in conformity with generally accepted accounting principles (GAAP) and audited in accordance with generally accepted auditing standards by a firm of licensed certified public accountants.

Management assumes full responsibility for both the completeness and reliability of all of the information presented in this report. Fairness of the presentation, including all disclosures, rests with the City. To the best of our knowledge and belief, the enclosed data is accurate in all material respects and is reported in a manner designed to present fairly the financial position and results of operations of the various funds in the City. All disclosures necessary to enable the reader to gain an understanding of the City's financial activities have been included.

To provide a reasonable basis for making these representations, management of the City of Rockwall has established a comprehensive internal control framework that is designed both to protect the government's assets from loss, theft, or misuse and to compile sufficient reliable information for the preparation of the City of Rockwall's financial statements in conformity with GAAP. The internal control structure is designed to provide reasonable, but not absolute, assurance that these objectives are met. The concept of reasonable assurance recognizes that:

- (1) the cost of a control should not exceed the benefits likely to be derived; and
- (2) The valuation of costs and benefits requires estimates and judgments by management.

Because the cost of internal controls should not outweigh their benefits, the City of Rockwall's comprehensive framework of internal controls has been designed to provide reasonable rather than absolute assurance that the financial statements will be free from material misstatement. As management, we assert that, to the best of our knowledge and belief, this financial report is complete and reliable in all material respects. The internal control structure is subject to periodic evaluation by City management.

The City of Rockwall's financial statements have been audited by Brooks, Watson & Co., a firm of licensed certified public accountants. The goal of the independent audit was to provide reasonable assurance that the financial statements of the City of Rockwall for the fiscal year ended September 30, 2019, are free of material misstatement. The independent audit involved examining, on a test basis, evidence supporting the amounts and disclosures in the financial

statements; assessing the accounting principles used and significant estimates made by management; and evaluating the overall financial statement presentation. The independent auditor concluded, based upon the audit, that there was a reasonable basis for rendering an unmodified opinion that the City of Rockwall's financial statements for the fiscal year ended September 30, 2019, are fairly presented in conformity with GAAP. The independent auditors' report is presented as the first component of the financial section of this report.

Management's discussion and analysis (MD&A) immediately follows the independent auditor's report and provides a narrative introduction, overview and analysis of the financial statements as required by GAAP. MD&A complements this letter of transmittal and should be read in conjunction with it.

## **PROFILE OF THE GOVERNMENT**

The City of Rockwall, Texas, county seat of Rockwall County, Texas was incorporated in 1874. Its name is derived from an underground rock wall discovered in 1854. The unusual rock formations are found throughout the county. The City is located on the eastern shore of Lake Ray Hubbard, 22 miles east of downtown Dallas on Interstate Highway 30. The Dallas/Fort Worth area is recognized as one of the top growth areas in the country. The Dallas/Fort Worth International Airport and Love Field in Dallas meet the air transportation needs of the region.

The City currently has a land area of approximately 29.97 square miles and an estimated population of 44,520.

The City of Rockwall adopted a home rule charter in 1985 which established a council-manager form of government. Charter amendments were adopted in 2005 and again in 2015. Policy making and legislative authority is vested in the City Council, which consists of a Mayor and six Council Members, all elected at large. The City Manager is responsible for carrying out the policies and ordinances of the City Council, overseeing the day-to-day operations of the City and for appointing the heads of the various departments. The mayor and six council members are elected to two year staggered terms. The government is empowered to levy a property tax on both real and personal property located within its boundaries. The government also has the power by state statute to extend its corporate limits by annexation, which is done periodically when deemed appropriate by the City Council.

The City of Rockwall provides a full range of services, including police and fire protection; the construction and maintenance of streets and other infrastructure; planning and zoning, parks and recreational activities and general administrative services. Additionally, the City provides water and sewer services as an enterprise function.

Discretely presented component units are legally separate entities and are not part of the primary government's operations. The City of Rockwall is financially accountable for its component units. Accordingly, the Rockwall Economic Development Corporation (REDC) and Rockwall Technology Park Association are included in these financial statements and are explained in more detail in Note 1 of the Notes to the Financial Statements.

### **Factors Affecting Financial Condition**

The information presented in the financial statements is best understood when considered from the broader perspective of the specific environment within which the City of Rockwall operates.

#### **Local Economy**

The City of Rockwall is situated in the Dallas/Fort Worth Consolidated Metropolitan Statistical Area. With its concentration of commercial and retail development, the City of Rockwall has long drawn shoppers from surrounding areas. As the national economy began to improve over the last year, Rockwall's local economy benefitted from a mix of new businesses and the renewed success of others. Rockwall saw an increase of 8.62% in our local sales tax revenues. The city has a varied tax base including a mix of residential, commercial and light industrial properties. Total property values rose by 8.76%. The most recent five-year average is 9.25% per annum. The City's largest taxpayers are varied and include industry, retail developments, multi-family properties, and medical facilities. Table D-12 in the Statistical Section provides further information on the principal taxpayers. The Rockwall Economic Development Corporation continues to successfully market Rockwall and assist companies looking to locate their business in the City. The year's highlights included:

- Interstate Wire and Agave Wire commenced construction on their 227,610 square foot facility which will produce electronic and electrical wire and cabling.
- Karat by Lollicup USA completed construction on their project in 2019. The building is in excess of 600,000 square feet with taxable value expected to exceed \$59,000,000 after the first full year of operations.
- The Harbor retail development, under new ownership and significant new investment has welcomed several new restaurant tenants and seen the expansion and modernization of the Cinemark Theatre. A new Condo project in the immediate vicinity will begin leasing in early 2020.
- Downtown Rockwall has become the destination that the downtown renovation project was undertaken to create. The area includes a mix of professional, retail,

restaurant, and service locations. City staff work closely with the merchants association to sponsor multiple shopping – entertainment events and more than 75 free live concerts per year. The City has seen a 13.48% increase in sales taxes in the downtown area in the last five years.

### Long-term Planning

The City Council and staff recognize the need for long-range planning. It is the goal of the City government to provide responsible leadership, services, and infrastructure to achieve a safe environment and provide for a high quality of life.

### Financial Policies

The City Council adopted financial policies in 2001 which have guided the City, allowing us to build a strong fund balance, and reinforcing the city’s philosophy to budget conservatively for both revenues and expenditures. The general fund reserve policy is reviewed annually. The policy states the City should maintain no less than 3 months of reserves and will allow reserves in excess of 3.5 months of recurring operating expenditures to be transferred to a capital projects fund to be used to fund future projects. The City has maintained reserves at or above this level for many years. This allows the City to respond to emergencies or downturns while not overburdening the taxpayers. Reserves over the 3.5 month level were available to fund capital purchases in 2019.

### Budget Overview

The City Manager proposes a balanced budget to the City Council each year by August 1. Public hearings are conducted to receive comments and priorities of the community at large. The City Council must adopt the operating budget and set the City’s tax rate for the next year by October 1<sup>st</sup> of each year.

### Capital Improvement Planning

In May 2018, voters approved a proposition to begin the rehabilitation and reconstruction of \$85,000,000 of aging residential streets which would include utility relocations and drainage system improvement. A pavement assessment was conducted on all city streets and alleys which gave an index score to each one. This coupled with traffic load data and the condition of the drainage system are factors in the streets chosen for the program. Design work began in 2019 on several of the projects and construction work will be phased over several years to minimize the impact of the debt issuance. The remaining street rehabilitation projects which were approved in the 2012 bond election saw construction begin in early 2019 and take approximately 24 months for each to be completed.

## Strategic Planning

The City Council and staff worked on an updated strategic planning document with the goal of a simplified, easy to understand final product. The initial stage of the plan included looking at the current breakdown between the residential and commercial tax base and whether or not the current land use plan will allow that mix to be maintained or improved in order to decrease the tax burden on residential properties. It was determined that sufficient non-residential land uses are planned but that any change from non-residential to residential zoning needs to be evaluated in light of the city's strategic goals. The City receives higher sales taxes per capita than other area cities, pointing to the City's long standing status as a regional shopping destination. As cities to the east grow and add retailers the City will strive to add specialty retailers to continue the regional draw. A citizen committee was formed to work with the City Planning Department staff to make amendments to the Comprehensive Plan and develop an I-30 Corridor plan both of which were adopted in 2019. This work resulted in a guide for future developers which broke the City into sub-districts with design principles and density guidelines for each area. The impending reconstruction project for I-30 (details below) will result in the largest public works investment in Rockwall County's history. The project's impact to area businesses will be extensive. Recognizing this, the City of Rockwall will be working with area retailers, shopping center owners, the Chamber of Commerce and the other cities along the route to develop a coordinated marketing approach to ensure shoppers know the area is still open for business during the several years of construction activities.

## Future Development

### Transportation

The majority of the City's main thoroughfares are state facilities. TxDOT has been planning for the widening of SH205 in the 3 counties it serves. The City Council and staff worked closely with TxDOT to come to agreement to move the current SH205 to existing John King Boulevard to the East. This had long been the City's desire but previous attempts had not come to fruition. This change will allow the present course of SH205 to become a city street with the ability for traffic flow and speed limits to be managed by the City.

TxDOT has been working on the plans for I-30 which runs through Rockwall County and is the link between the eastern counties and downtown Dallas. The project will add main travel lanes in both directions as well as three-lane service roads extending across Lake Ray Hubbard. This is expected to ease traffic issues when accidents occur on the main lanes. The project is expected to be ready to let in 2022 and is fully funded by TxDOT

The City is a member of a County-wide Consortium which allows County government officials to work with officials of each of the seven cities in the county to further transportation planning efforts. The Consortium meets monthly to discuss funding alternatives for the County's transportation needs, which also involve planning and state participation. The County's bond initiatives allows funding for the advance planning and design of several major roadway projects. This allows the projects to be ready to commence as soon as state funding is allocated for construction. The Consortium was successful in securing new state funding for both SH276 and FM 3549 widening projects after the state-wide referendums provided new dollars for the state's highway system. The projects are both under construction with expected completion in 2021. The work of the Consortium which allows projects to be designed and ready to bid when dollars are available is crucial in getting these new funds.

### Retail / Entertainment

"The Harbor" development is situated on the shores of Lake Ray Hubbard at I-30 and had new restaurant openings in 2019 including Giovanni and Rodeo Goat. The Marriott Springhill Suites with 105 suites and conference space added to the area's existing full service Hilton Hotel and Conference Center which recently underwent updating to all rooms and common areas has fostered synergies in their efforts to attract conferences which benefit the development and the City

In 2019 construction began on 245 luxury condo units overlooking the Harbor area with residents expected to begin moving in during early 2020 adding the residential component which has been long anticipated. Two additional condo projects are in design and should break ground in 2020.

In conjunction with private development, the City established a tax increment financing (TIF) zone on an approximately 103 acre tract which allowed the financing and development of public open space to complement the development and allow citizens access to the Lake Ray Hubbard shore line.

The City designation as the "Free Live Music Capital of North Texas" by the Texas Legislature is supported by the more than 100 concerts at the public venues at the Harbor and San Jacinto Plaza in Downtown Rockwall. The Main Street Advisory Board and "Friends of Downtown Rockwall", citizen volunteer group, work to plan special events to bring shoppers downtown. The many shops in the Downtown area provide a wide variety of shopping opportunities and vacancies are rare and filled quickly.

### Utilities

The water and wastewater rates were increased in 2019. The City purchases treated water as a founding member city of the North Texas Municipal Water District. Water

consumption in fiscal year 2019 consumption remained relatively flat when compared to the prior year, while sales decreased by 6% over the prior fiscal year. The City’s water system is recognized with the Texas Commission on Environmental Quality’s “Superior” rating.

The City actively works to acquire the right to serve recently annexed areas which are currently served by wholesale water supply corporations. It remains the City’s desire to be the water provider for all residents in our city limits.

Debt Administration: Two ratios traditionally used to analyze the debt structure of municipalities are presented below.

Outstanding General Obligation Debt at 9-30-19 (net of Debt Service)	\$102,251,178
Estimated Population	44,520
G.O. Debt Per Capita	\$2,297
Net G.O. Debt per Assessed Value	1.79%

The City seeks a bond rating update as new debt is issued. The current ratings are shown below:

	<u>General Obligation</u>	<u>Sales Tax (REDC)</u>
Standard & Poor’s Rating Group	AA+	A-
Moody’s Investor Service Inc.	Aa2	A1

**ACKNOWLEDGEMENTS**

The preparation of the comprehensive annual financial report was made possible by the dedicated service of the entire staff of the Finance Department. Each member of the department has our sincere appreciation for the contributions made in the preparation of this report.

In closing, without the leadership and support of the governing body of the City, preparation of this report would not have been possible.

Sincerely,

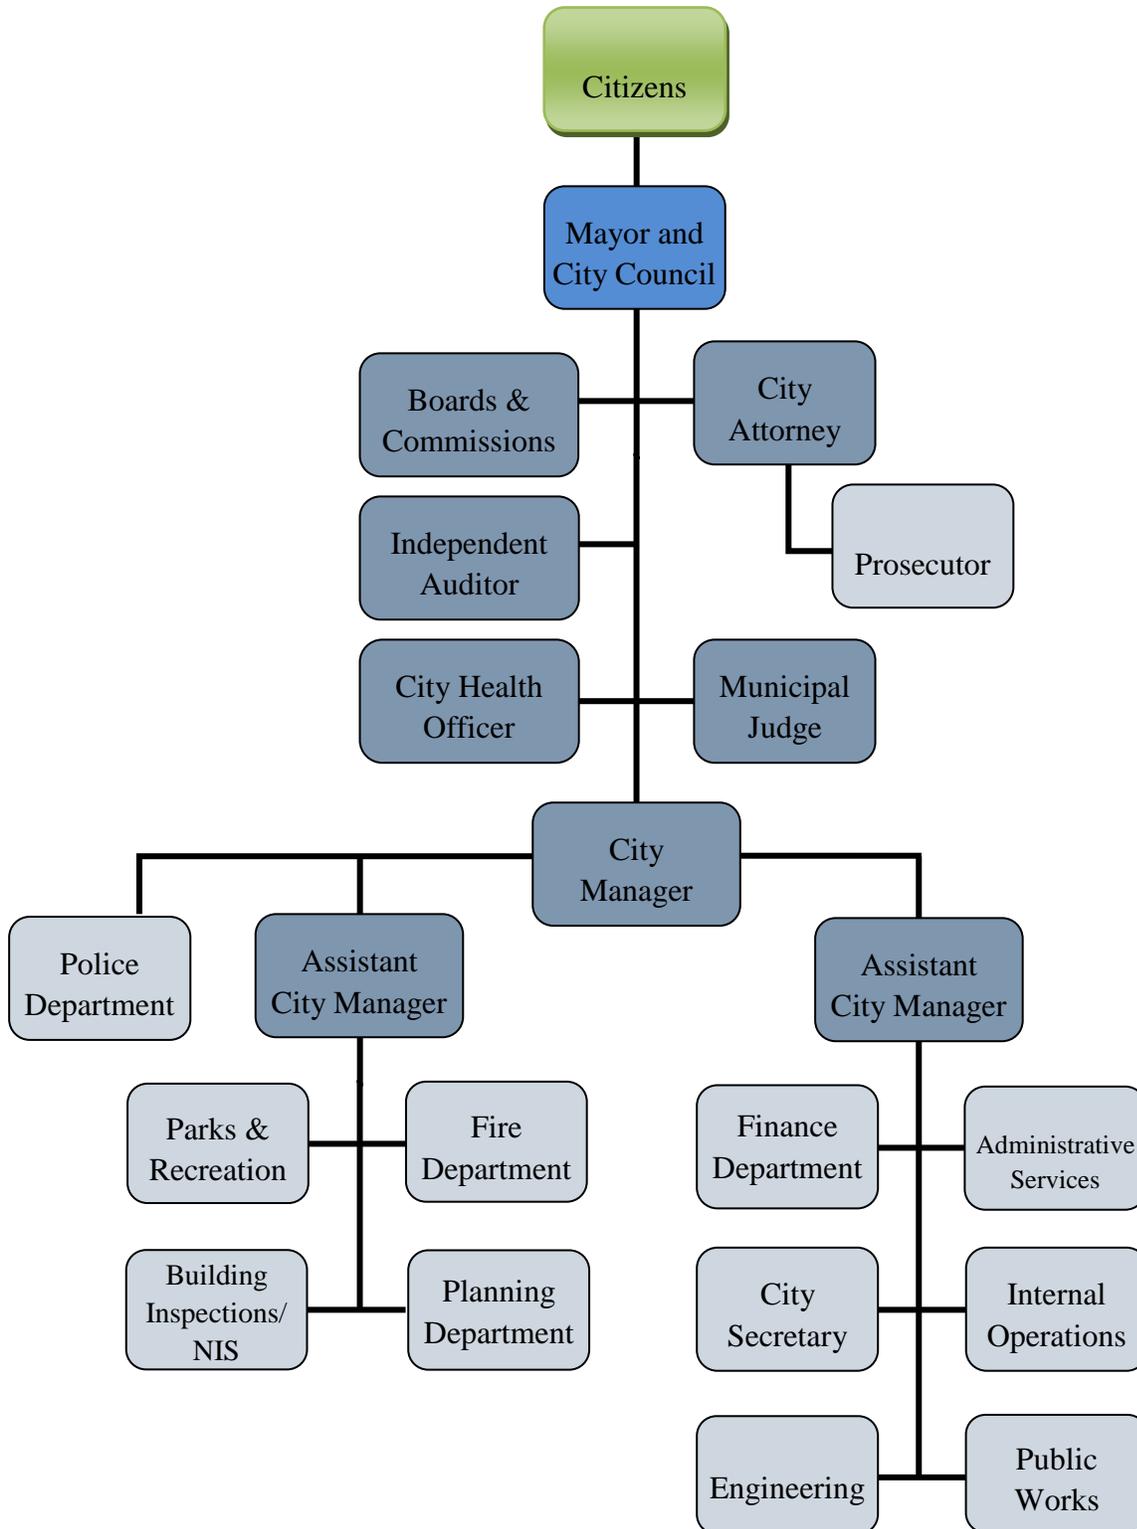

Richard R. Crowley  
City Manager

## *INDEPENDENT AUDITOR'S REPORT*

To the Honorable Mayor and  
Members of the City Council  
City of Rockwall, Texas:

### **Report on the Financial Statements**

We have audited the accompanying financial statements of the governmental activities, the business-type activities, the discretely presented component units, each major fund, and the aggregate remaining fund information of the City of Rockwall, Texas (the "City") as of and for the year ended September 30, 2019, and the related notes to the financial statements, which collectively comprise the City's basic financial statements as listed in the table of contents.

### **Management's Responsibility for the Financial Statements**

The City's management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

### **Auditor's Responsibility**

Our responsibility is to express opinions on these financial statements based on our audit. We conducted our audit in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

## **Opinion**

In our opinion, the financial statements referred to above present fairly, in all material respects, the respective financial position of the governmental activities, the business-type activities, the discretely presented component units, each major fund, and the aggregate remaining fund information of the City, as of September 30, 2019, and the respective changes in financial position and, where applicable, cash flows thereof for the year then ended in accordance with accounting principles generally accepted in the United States of America.

## **Emphasis of Matter**

As discussed in Note V.D. to the financial statements, the City has restated beginning fund balance/net position within governmental, business-type, discretely presented component unit activities, the general fund, and the G/O bonds capital projects fund due to various accounting errors occurring in the prior year. Our opinion is not modified with respect to these matters.

## **Other Matters**

### *Required Supplementary Information*

Accounting principles generally accepted in the United States of America require that the management's discussion and analysis, schedule of changes in net pension liability and related ratios, schedule of employer contributions to pension plan, schedule of changes in other postemployment benefits liability and related ratios, and budgetary comparison information be presented to supplement the basic financial statements. Such information, although not a part of the basic financial statements, is required by the Governmental Accounting Standards Board who considers it to be an essential part of financial reporting for placing the basic financial statements in an appropriate operational, economic, or historical context. We have applied certain limited procedures to the required supplementary information in accordance with auditing standards generally accepted in the United States of America, which consisted of inquiries of management about the methods of preparing the information and comparing the information for consistency with management's responses to our inquiries, the basic financial statements, and other knowledge we obtained during our audit of the basic financial statements. We do not express an opinion or provide any assurance on the information because the limited procedures do not provide us with sufficient evidence to express an opinion or provide any assurance.

### *Other Information*

Our audit was conducted for the purpose of forming opinions on the financial statements that collectively comprise the City's basic financial statements. The combining and individual nonmajor fund financial statements are presented for purposes of additional analysis and are not a required part of the basic financial statements.

This accompanying supplementary information is the responsibility of management and was derived from and relates directly to the underlying accounting and other records used to prepare the basic financial statements. Such information has been subjected to the auditing procedures applied in the audit of the basic financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the basic financial statements or to the basic financial statements themselves, and other additional procedures in accordance with auditing standards generally accepted in the United States of America. In our opinion, the accompanying supplementary information is fairly stated, in all material respects, in relation to the basic financial statements as a whole.

The introductory and statistical sections have not been subjected to the auditing procedures applied in the audit of the basic financial statements, and accordingly, we do not express an opinion or provide any assurance on it.

## MANAGEMENT'S DISCUSSION AND ANALYSIS

### September 30, 2019

Hey The discussion and analysis of the City of Rockwall's financial performance provides an overview and analysis of the City's financial activities for the fiscal year ended September 30, 2019. Please read it in conjunction with the City's financial statements, which follow this section.

#### FINANCIAL HIGHLIGHTS

- The City's total net position was \$232,662,692 as of September 30, 2019. The City had an overall increase in net position of \$5,807,852.
- During the year, the City's governmental activities expenses were \$2,883,353 less than the \$56,276,305 generated in program revenues, taxes, other revenues and transfers.
- The assets of the City of Rockwall attributable to governmental activities exceeded its liabilities, net of deferred inflows and deferred outflows of resources at the close of the fiscal year ending September 30, 2019 by \$131,863,978 (net position).
- At the end of this fiscal year, the unassigned fund balance for the general fund was \$14,692,432 or approximately 38.5 percent of the total general fund operating expenditures and transfers out.
- The City's total outstanding general obligation bonds and certificates of obligation for governmental activities decreased by \$7,095,000 during fiscal year 2019. More detailed information is given in the notes section.

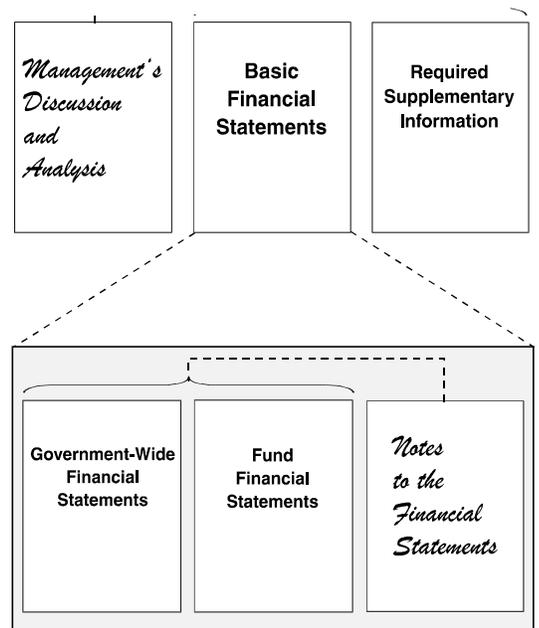

#### OVERVIEW OF THE FINANCIAL STATEMENTS

This annual report consists of three parts—management's discussion and analysis (this section), the basic financial statements, and required supplementary information. The basic financial statements include two kinds of statements presenting different views of the City:

The first two statements are government-wide financial statements that provide both long-term and short-term information about the City's overall financial status.

The remaining statements are fund financial statements that focus on individual parts of the government, reporting the City's operations in more detail than the government-wide statements.

**Figure A-1, Required Components of the City's Annual Financial Report**

# City of Rockwall, Texas

## MANAGEMENT'S DISCUSSION AND ANALYSIS, *Continued*

### September 30, 2019

The governmental fund statements tell how general government services were financed in the short-term as well as what remains for future spending.

Proprietary fund statements offer short-term and long-term financial information about the activities the government operates like businesses.

Fiduciary fund statements provide information about the financial relationships in which the City acts solely as a trustee or agent for the benefit of others, to whom the resources in question belong.

The financial statements also include notes that explain some of the information in the financial statements and provide more detailed data. The statements, followed by a section of required supplementary information, further explain and support the information in the financial statements. Figure A-1 shows how the required parts of this annual report are arranged and relate to one another.

**Figure A-2. Major Features of the City of Rockwall's Government-wide and Fund Financial Statements**

<i>Type of Statements</i>	<b>Fund Statements</b>		
	<b>Government-wide</b>	<b>Governmental Funds</b>	<b>Proprietary Funds</b>
<i>Scope</i>	Entire City government (except fiduciary funds) and the City's component units	Activities of the City that are not proprietary or fiduciary, such as police, fire and parks	Activities the City operates similar to private business.
<i>Required financial statements</i>	◆ Statement of net position	◆ Balance Sheet	◆ Statement of net position
	◆ Statement of activities	◆ Statement of revenues, expenditures & changes in fund balances	◆ Statement of revenues, expenses & changes in fund net position ◆ Statement of cash flows
<i>Accounting basis and measurement focus</i>	Accrual accounting and economic resources focus	Modified accrual accounting and current financial resources focus	Accrual accounting and economic resources focus
<i>Type of asset/liability information</i>	All assets and liabilities, both financial and capital, short-term and long-term	Only assets expected to be used up and liabilities that come due during the year or soon thereafter; no capital assets included	All assets and liabilities, both financial and capital, short-term and long-term
<i>Type of inflow/outflow information</i>	All revenues and expenses during year, regardless of when cash is received or paid	Revenues for which cash is received during or soon after the end of the year; expenditures when goods or services have been received and payment is due during the year or soon thereafter	All revenues and expenses during year, regardless of when cash is received or paid

### **Government-Wide Financial Statements**

The government-wide statements are designed to provide readers with a broad overview of the City of Rockwall's finances, in a manner similar to private-sector business.

**City of Rockwall, Texas**  
**MANAGEMENT'S DISCUSSION AND ANALYSIS, *Continued***  
**September 30, 2019**

The *statement of net position* presents information on all of the city of Rockwall's assets and liabilities, with the difference between the two reported as *net position*. Over time, increases or decreases in net position may serve as a useful indicator of whether the financial condition of the City of Rockwall is improving or deteriorating. The statement of net position combines and consolidates governmental funds current financial resources (short-term spendable resources) with capital assets and long-term obligations. Other non-financial factors should also be taken into consideration, such as changes in the City's property tax base and the condition of the City's infrastructure, to assess the overall health or financial condition of the City.

The *statement of activities* presents information showing how the City's net position changed during the most recent fiscal year. All of the current year's revenues and expenses are taken into account regardless of when cash is received or paid. Thus, revenues and expenses are reported in this statement for some items that will only result in cash flows in future fiscal periods; for example uncollected taxes and earned but unused vacation leave. Both the statement of net position and the statement of activities are prepared utilizing the accrual basis of accounting.

In the Statement of Net Position and the Statement of Activities, the City is divided into three kinds of activities:

*Governmental activities* – Most of the City's basic services are reported here, including administration, police, fire, planning and zoning, finance, parks and recreation, municipal court and engineering. Property taxes, sales taxes, franchise fees and charges for services provide funds for most of the activities.

*Business-type activities* – The City charges fees to customers to help it cover all or most of the cost of certain services it provides. We report the City's water and sewer system here.

*Component Units* – The City of Rockwall (the primary government) includes two discretely presented component units. The City's Type A Sales Tax Corporation known as the Rockwall Economic Development Corporation and the Rockwall Technology Park Association. Although legally separate, The City of Rockwall is financially accountable for these component units. The City Council appoints the component unit's Board of Directors, sets the budget and approves any debt issuance.

The government-wide financial statements are found on pages 20-25 of this report.

**City of Rockwall, Texas**  
*MANAGEMENT'S DISCUSSION AND ANALYSIS, Continued*  
September 30, 2019

**Reporting the City's Most Significant Funds**

Fund Financial Statements

The fund financial statements provide more detailed information about the City's most significant funds—not the City as a whole. *Funds* are accounting devices the City uses to keep track of specific sources of funding and spending for particular purposes. Some funds are required by State law and by bond covenants. However, the City establishes other funds to control and manage money for particular purposes or to show that it is properly using certain taxes and grants.

The City has the following types of funds:

*Governmental funds*—Most of the City's basic services are included in governmental funds, which focus on (1) how cash and other financial assets that can readily be converted to cash flow in and out and (2) the balances left at year-end that are available for spending. Consequently, the governmental fund statements provide a detailed short-term view that helps users of the financial statements determine whether there are more or fewer financial resources that can be spent in the near future to finance the City's programs. By comparing information presented for governmental funds with similar information presented for governmental activities in the government-wide financial statements, readers may better understand the long-term impact of the government's near-term financing decisions. Because this information does not encompass the additional long-term focus of the government-wide statements, we provide additional information at the bottom of the governmental funds statement, or on the subsequent page, that explain the relationship (or differences) between them.

The City of Rockwall maintains twenty individual governmental funds. Information is presented separately in the governmental funds balance sheet and in the governmental funds statement of revenues, expenditures and changes in fund balances for the General fund, Debt Service fund, and G.O. Bonds Capital Projects fund, which are considered major funds. Data from the other 17 governmental funds are combined into a single, aggregated presentation. Individual fund data for each of these non-major governmental funds is provided in the form of combining statements elsewhere in this report.

*Proprietary funds*—Services for which the City charges customers a fee are generally reported in proprietary funds. Proprietary funds, like the government-wide statements, provide both long-term and short-term financial information. The City's enterprise funds (a component of proprietary funds) are identical to the business type activities that are reported in the government-wide statement but provide more detail and additional information such as cash flows, for proprietary funds. The Internal Service funds (the other component of proprietary funds) are utilized to report activities that provide services for the City's self-insurance funds.

# City of Rockwall, Texas

## MANAGEMENT'S DISCUSSION AND ANALYSIS, *Continued*

September 30, 2019

The Internal Service funds are reported as governmental activities in the government-wide financial statements.

The City of Rockwall maintains an Enterprise Fund to account for water and sewer services provided to the City's retail and wholesale customers. All activities associated with providing such services are accounted for in this fund, including administration, operations, maintenance, debt service, capital improvements, billing and collection. The City's intent is that all costs of providing the services to the public on a continuing basis are financed through user charges in a manner similar to a private business enterprise.

The City maintains two internal service funds to account for funds accumulated to self-insure for health and workers compensation claims. Individual fund data for each of these business-type funds is provided in the form of combining statements elsewhere in this report.

*Fiduciary funds*—The City is the trustee, or *fiduciary*, for certain funds. It is also responsible for other assets that - because of a trust arrangement - can be used only for the trust beneficiaries. The City is responsible for ensuring that the assets reported in these funds are used for their intended purposes. All of the City's fiduciary activities are reported in a separate statement of assets and liabilities of the agency fund. We exclude these activities from the City's government-wide financial statements because the City cannot use these assets to finance its operations.

*Notes to the financial statements*-The notes provide additional information that is essential to a full understanding of the data provided in the government-wide and fund financial statements.

### **Other Information**

In addition to the basic financial statements and accompanying notes, this report presents certain *required supplementary information* concerning the City of Rockwall, Texas. This information is required by accounting principles generally accepted in the United States of America.

**CONDENSED GOVERNMENT-WIDE FINANCIAL INFORMATION**

At the end of fiscal year 2019, the City's net position (assets exceeding liabilities) totaled \$232,662,692. The table below reflects the condensed Statement of Net Position.

The largest portion of the City's net position (87%) reflects its investment in capital assets (i.e., land, buildings, machinery, equipment, and infrastructure); less any related debt used to acquire those assets, which is still outstanding. The City uses these capital assets to provide services to citizens; consequently, these assets are not available for future spending. Although the City's investment in its capital assets is reported net of related debt, it should be noted that the resources needed to repay this debt must be provided from other sources, since the capital assets themselves cannot be used to liquidate these liabilities.

# City of Rockwall, Texas

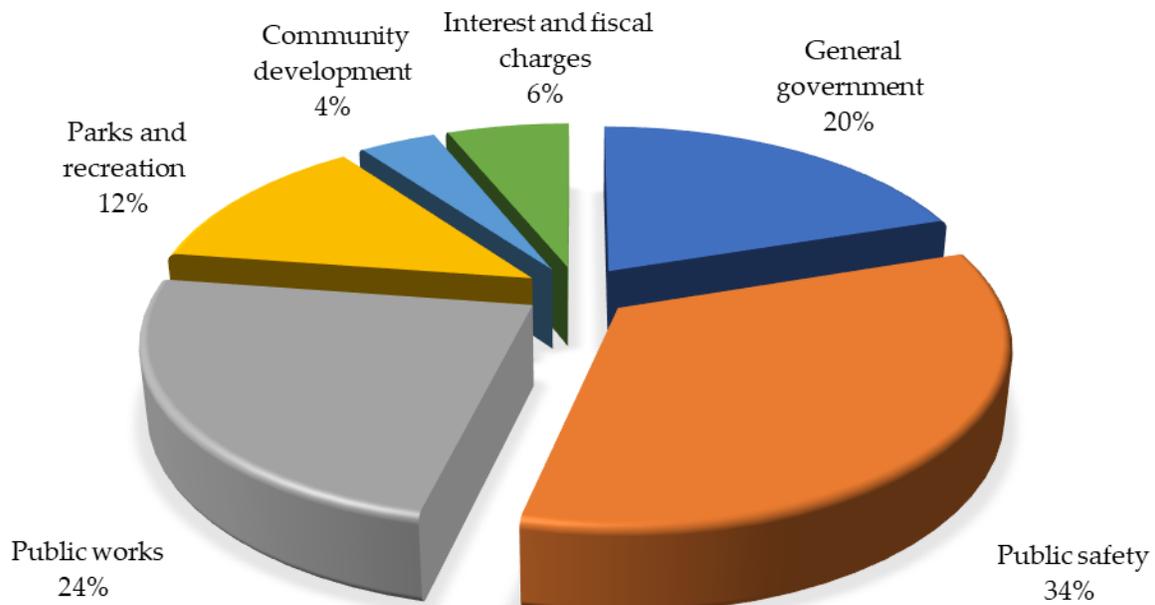

## MANAGEMENT'S DISCUSSION AND ANALYSIS, *Continued*

September 30, 2019

### Governmental Activities

The City's total revenues of governmental activities, including transfers, were \$56,276,305. A significant portion 41%, of the City's revenues came from property taxes. Another 35% of revenue came from sales taxes. Ad valorem property tax revenues as a percent of revenues remains stable as the City responds to the increases in assessed value of existing properties by reducing the ad valorem tax rate to a rate sufficient to generate the same revenues in the new year as were generated in the prior year. The City Council has chosen to lower the tax rate each of the last five years. Total assessed values of the properties in the City increased by 9%. The City adopted a property tax rate of 40.21 cents per \$100 of assessed valuation for fiscal year 2019. Growth in the assessed valuation and conservative budgets allowed the City to lower the rate for fiscal year 2018 by 2.15 cents per hundred dollars of assessed valuation. Sales tax revenue increased over the prior year by 11% which was most influenced by increases in same stores sales and the growing regional population. Housing starts were consistent with recent years and remain predominately the construction of larger homes on larger tracts resulting in significantly higher price points. Developers started infrastructure work on several projects including additional phases of Stone Creek, Breezy Hill, and the new subdivision, Ladera Rockwall and Saddle Star South in 2019. The permit revenues increased by 4% due in large part to projects in the Technology Park and the Harbor area. Over the past several years, Rockwall County, of which the City of Rockwall is the County seat, was one of the fastest growing counties in America, and named the wealthiest county in Texas.

### Governmental Activities - Expenses

# City of Rockwall, Texas

## MANAGEMENT'S DISCUSSION AND ANALYSIS, *Continued*

September 30, 2019

The total cost of all programs and services were \$53,392,952. Of this total, \$18,040,820 (34%) were for the public safety functions in the Police and Fire Departments. The Fire department continues to increase staffing adding 6 firefighter positions as the city grows and mature the combined paid/volunteer department. The city's strategic planning was accepted by Council in 2018 and includes an ongoing focus on the staffing ratios and service needs of the area. The Public Works Department represents 24% of the City's costs due to street construction and rehabilitation projects underway in 2019. A study was previously funded to determine the pavement condition of all streets and alleys in the City limits. The results were evaluated and employed in the budget process for 2019 to determine priorities for maintenance projects which could reasonably be expected to improve the roadway and extend the time before more extensive repairs or replacement would be required in future capital projects.

### **Business-Type Activities**

The City's business-type activities recorded an increase of \$2,924,499 in net position. Retail water sales decreased by 6% due to an extremely wet summer resulting in decreased consumption for irrigation purposes. The City's rates were increased to be effective in January 2019. The City implemented a conservation focused water rate structure in 2001 and increases the rate tiers each time new rates are adopted. The rates for sewer were also increased for January 2019. Total sewer charges increased by 15% for the fiscal year. The city employs winter averaging to calculate sewer billing so revenues were largely not affected by restrictions on irrigating lawns. Water and sewer charges were \$30,374,422 which is an increase of \$3,270,539 over the prior year.

Water and sewer impact fees (Capital recovery fees) totaled \$1,394,910 for the fiscal year. Impact fees, paid by developers, are designed to reduce the system's initial costs in building assets to serve new growth. Residential development is assessed an impact fee at the building permit stage while commercial projects are assessed at the beginning of site development.

### **Component Units**

The Rockwall Economic Development Corporation (REDC) reported revenues including the ½-cent sales tax, authorized under the Type A Corporation statutes, of \$6,392,464. Assets managed by the corporation include an inventory of 218 acres of land, zoned for light industrial uses and available for sale. The REDC continues to attract companies to the City through its marketing efforts and ability to match businesses to available land.

### **ANALYSIS OF INDIVIDUAL FUNDS**

The City's *General Fund* reported an ending unassigned fund balance of \$14,692,432. The largest source of general fund revenue is sales tax, it accounted for \$19,135,026 (48%) of total general fund revenue. Ad valorem property taxes account for \$12,356,485 (31%) of general fund

# City of Rockwall, Texas

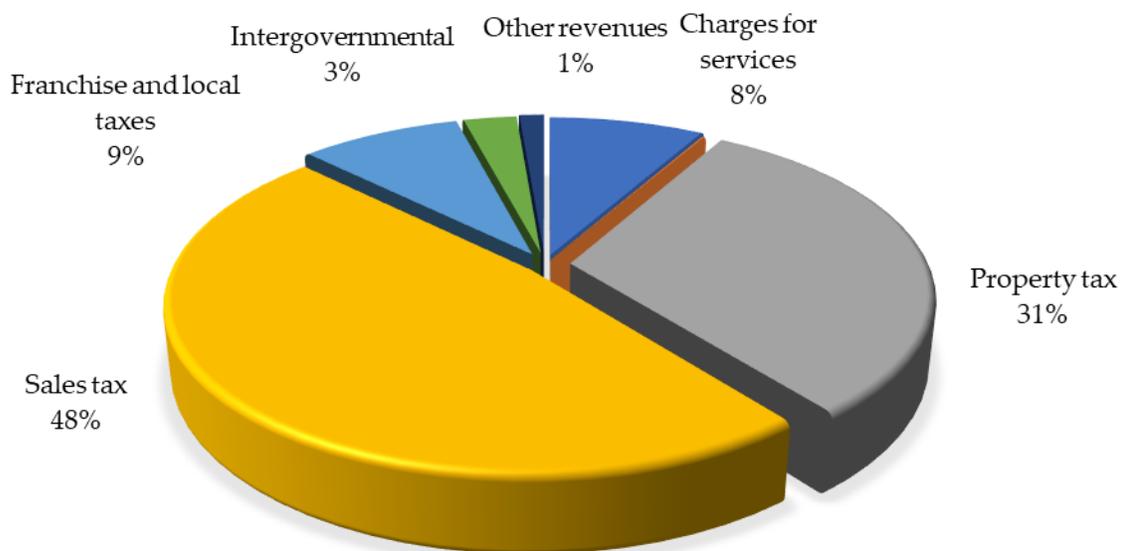

## MANAGEMENT'S DISCUSSION AND ANALYSIS, *Continued*

September 30, 2019

revenues. The City's property tax rate is split between maintenance/operations and debt service. The City maintains the unassigned fund balance at or above acceptable levels as defined within the City's financial policies. This "reserve" balance allows the City Council to elect to fund projects unforeseen during the budgeting process and provides a measure of security against changes in the economy and the timing of cash flows. The unassigned balance increased by \$1,807,154 or 15% due to stronger than anticipated sales tax and permit revenue sources as well as less than appropriated expenditures in each department.

### Revenues by Source – General Fund

#### General Fund - Revenues

The City's *Debt Service Fund* reported an increase in fund balance of \$1,352,256. Property tax collections for debt service requirements were \$9,943,010. This is required in order to pay debt service payments on bonds issued to construct numerous road and parks projects completed since the City's bond election in 2005 and again in 2012 which authorized more than \$92,831,000 in projects. After extensive study, the City adopted a Roadway Impact Fee which was updated in 2014, will be evaluated again in 2019 and from which generated \$635,812 in new revenue to this fund in fiscal year 2019. The City Council chooses to budget a portion of this fund balance each year toward meeting the City's current debt service obligations. This allows the use of the debt service fund reserves to lessen the effect of new debt issues on the property tax rate each year.

# City of Rockwall, Texas

## MANAGEMENT'S DISCUSSION AND ANALYSIS, *Continued*

September 30, 2019

The *G.O. Bonds Capital Projects Fund* reported a restricted fund balance of \$494,102, a decrease of \$5,556,781 from the prior year. For the final two road projects approved in the 2012 election, engineering design was completed and bids were received. The construction commenced in early 2019 and will continue for 23 months.

### GENERAL FUND BUDGETARY HIGHLIGHTS

During fiscal year 2019, the City Council of the City of Rockwall amended the budget to provide funding for several unforeseen projects and to recognize salary savings over the year, as well as increases or decreases in revenues when compared to original projections. With the adjustments made to the budget, the original budgeted expenditures of \$36,516,850 increased to \$36,853,000 while revenue estimates increased from \$37,902,500 to \$38,483,800. The City of Rockwall had originally estimated the ending general fund unassigned balance to be \$11,119,928 however due to the budget adjustments mentioned above the fund balance was re-estimated to be \$11,395,228.

General fund revenues ultimately were \$39,863,514, a positive variance of \$1,379,714 over the amended budget estimate, reflecting a greater than anticipated increase in sales tax collections and construction permits late in the budget year. Actual general fund total expenditures were \$34,932,792 or \$1,920,208 less than final projections. Final expenditures in each department were generally less than anticipated. The City ended the year with a fund balance of \$14,695,155, or \$1,810,377 more than the prior year. The increase is due to sales taxes and permit revenues exceeding early estimates and departments spending less than anticipated.

### Capital Assets

At the end of the fiscal year 2019 the City had \$311,863,507 (Table 3) invested in a broad range of capital assets, including buildings, parks facilities, roads, police and fire equipment and water and sewer lines. The balances shown below are net of accumulated depreciation.

**Table 3**

# City of Rockwall, Texas

## MANAGEMENT'S DISCUSSION AND ANALYSIS, *Continued*

September 30, 2019

The results of the street and alley condition assessment conducted in 2016 were used to develop a capital improvement program which included \$85 million of street reconstruction projects which was approved by the voters in May 2018. Projects have been prioritized and design will be undertaken on many of the projects in 2019 with construction timing and debt issuance phased over the next 8-10 years.

Additional information regarding the City's capital assets is found in note IV-D on pages 62-64.

### Debt

At year-end, the City had \$107,008,374 in bonds and capitalized leases shown in Table 4.

**Table 4**  
**City of Rockwall Outstanding Debt**

	Governmental Activities		Business-Type Activities		Total Primary Government	
	2019	2018	2019	2018	2019	2018
General obligation bonds	\$ 73,500,000	\$ 79,880,000	\$ 16,700,000	\$ 18,705,000	\$ 90,200,000	\$ 98,585,000
Certificates of obligation	6,305,000	7,020,000	6,995,000	7,565,000	13,300,000	14,585,000

	<u>\$ 79,805,000</u>	<u>\$ 86,900,000</u>	<u>\$ 27,203,374</u>	<u>\$ 30,151,713</u>	<u>\$ 107,008,374</u>	<u>\$ 117,051,713</u>

The City is permitted by Article XI, Section 5, of the State of Texas Constitution to levy taxes up to \$2.50 per \$100 of assessed valuation for general governmental services including the payment of principal and interest on general obligation long-term debt. The current ratio of net tax-supported bonded debt to assessed value of all taxable property is 1.79% or \$2,297 per capita.

The City's bond ratings at September 30, 2019 were as follows:

	<u>General Obligation</u>	<u>Sales Tax(REDC)</u>
Standard & Poor's Rating Group	AA+	A-
Moody's Investor Service Inc.	Aa2	A1

Additional information on long-term debt may be found in note IV-F, on pages 65-71 of this report.

### ECONOMIC FACTORS AND NEXT YEAR'S BUDGETS AND RATES

The City's elected and appointed officials considered many factors when setting the fiscal year 2020 budget, tax rate, and fees that will be charged for the business-type activities. The City conservatively budgeted a 3% increase in sales tax revenue and modest increases in other revenues.

# City of Rockwall, Texas

## MANAGEMENT'S DISCUSSION AND ANALYSIS, *Continued*

September 30, 2019

The City of Rockwall's citizens enjoy above-average income levels per household. This combined with the City's proximity to major highways, and the Dallas-Fort Worth SMSA make Rockwall an attractive city in which to locate. The City prides itself on a quality school district

and "hometown" atmosphere. The Rockwall Economic Development Corporation works to attract businesses with relocation incentives as well as business retention incentives such as workforce training opportunities. The City's unemployment rate was 3.1%, below national levels.

The City of Rockwall considered these factors when adopting the General Fund budget for fiscal year 2020. The budgeted revenues for fiscal year 2020 total \$37,905,500 for the general fund. Ad valorem tax revenue is determined by two factors, the total assessed value established by the Rockwall Central Appraisal District and the tax rate established by the Rockwall City Council. The property tax rate was reduced to 38.7990 cents per hundred dollars of assessed value due to growth in assessed values.

The City adopted written financial policies in 2001, which require that revenues and expenditures be projected conservatively. The policies include debt level guidelines. These policies were reviewed by the City Council in 2009 and certain provisions related to the City's fund balance were changed. The amended policy provides that the General Fund reserves should be no less than 3 months of recurring operating appropriations. In addition, the policies provide that should an audited fund balance at the end of the fiscal year exceed 3.5 months, the City Council may elect to transfer a portion to a Capital Projects Fund. The projected ending general fund balance for 2019 provides approximately 4.3 months of reserves for the City. The 2019 budget reflects planned expenditures from reserves including multiple vehicle replacements and parking lot repairs. Street and alley maintenance funding was increased by \$1.1million dollars as well.

The 2020 budget expenditures include the addition of a mental health officer in the Police department, 4 maintenance workers for the Parks department, and 3 new firefighters. The fire department continues to grow its paid staff with the addition of these 3 full-time firefighters along with three Captain position promotions. These changes were made in the Fire department as a result of strategic planning work finalized during the year.

A comprehensive water and sewer rate study was developed during 2018 with rate recommendations over the next several years. This included looking at the North Texas Municipal Water District projected rates for treated water over the next five years and well as budget planning and capital planning for the City's own operations and projects. Infrastructure asset management software was implemented in 2018 as well. A phased program to add generators to each wastewater lift station will continue in 2020 as well as the addition on one new maintenance employee.

## RECONCILIATION OF THE BALANCE SHEET TO THE STATEMENT OF NET POSITION GOVERNMENTAL FUNDS

September 30, 2019

<b>Fund Balances - Total Governmental Funds</b>	\$	25,384,605
 <b>Adjustments for the Statement of Net Position:</b>		
Capital assets used in governmental activities are not current financial resources and, therefore, not reported in the governmental funds.		
Capital assets - non-depreciable		23,642,491
Capital assets - net depreciable		173,219,684
Other long-term assets are not available to pay for current-period expenditures and, therefore, are deferred in the governmental funds.		
		1,846,201
Deferred inflows of resources, represents an acquisition of net position that applies to a future period(s) and so will not be recognized as an inflow of resources (revenues) until that time		
Pension assumption changes		(1,846,415)
OPEB assumption changes		(9,969)
Deferred outflows of resources, represent a consumption of net position that applies to a future period(s) and is not recognized as an outflow of resources (expense/ expenditures) until then		
Pension contributions		2,095,814
Pension investment experience		3,620,638
OPEB contributions		2,587
Internal service funds are used by management to charge the cost of employee benefits and workers' compensation to individual funds. The assets and liabilities of the internal service funds are included in governmental activities in the statement of net position		
Net position - governmental activities		1,797,161
Some liabilities, including bonds payable and deferred charges, are not reported as liabilities in the governmental funds.		
Accrued interest		(509,648)
Deferred charges:		
On refunding		47,717
Bond discount		155,635
Bond premium		(1,529,045)
Net pension liability		(13,985,533)
OPEB liability		(484,615)
Compensated absences		(1,778,330)
Non-current liabilities due in one year		(6,690,000)
Non-current liabilities due in more than one year		(73,115,000)
<b>Net Position of Governmental Activities</b>	<b>\$</b>	<b><u>131,863,978</u></b>

## *RECONCILIATION OF THE STATEMENT OF REVENUES, EXPENDITURES, AND CHANGES IN FUND BALANCES OF GOVERNMENTAL FUNDS TO THE STATEMENT OF ACTIVITIES*

**For the Year Ended September 30, 2019**

Amounts reported for governmental activities in the statement of activities are different because:

Net changes in fund balances - total governmental funds	\$	(1,351,880)
---	----	-------------

Governmental funds report capital outlays as expenditures. However, in the statement of activities the cost of those assets is allocated over their estimated useful lives and reported as depreciation expense.

Capital outlay		8,352,381
Capital contributions		134,895
Depreciation expense		(11,862,743)
Adjustment for capital asset disposals		(23,051)

Revenues in the statement of activities that do not provide current financial resources are not reported as revenues in the funds.		723,141
--	--	---------

Some expenses reported in the statement of activities do not require the use of current financial resources and, therefore, are not reported as expenditures in governmental funds.

Compensated absences		3,439
Accrued interest		49,656
Pension expense		(707,495)
OPEB expense		(43,524)

Internal service funds are used by management to charge the cost of employee benefits and workers' compensation to individual funds. The net revenue of certain activities of internal service funds is reported with governmental activities		409,485
---	--	---------

The issuance of long-term debt (e.g., bonds, leases, certificates of obligation) provides current financial resources to governmental funds, while the repayment of the principal of long-term debt consumes the current financial resources of governmental funds. Neither transaction, however, has any effect on net position. Also, governmental funds report the effect of premiums, discounts, and similar items when they are first issued; whereas, these amounts are deferred and amortized in the statement of activities. This amount is the net effect of these differences in the treatment of long-term debt and related items.

Amortization of deferred charges on refunding		(8,109)
Amortization of debt premium/discount		112,158
Principal payments		7,095,000

**City of Rockwall, Texas**  
**NOTES TO THE FINANCIAL STATEMENTS**  
**September 30, 2019**

**I. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES**

The City of Rockwall, Texas (the "City") was founded in 1854 and incorporated in 1874. The City operates under the Council-Manager form of government as adopted by a home rule charter approved January 21, 1985. The City provides a full range of municipal services including public safety (police and fire), highway and streets, parks and recreation, health and social services, planning and zoning, and general administrative services. In addition, the City provides water and sewer services as a proprietary function of the City.

The accounting policies of the City conform to generally accepted accounting principles (GAAP) applicable to government units. The following is a summary of the more significant accounting policies.

**A. Description of Government-Wide Financial Statements**

The government-wide financial statements (i.e., the statement of net position and the statement of activities) report information on all of the nonfiduciary activities of the primary government and its component units. All fiduciary activities are reported only in the fund financial statements. *Governmental activities*, which normally are supported by taxes, intergovernmental revenues, and other nonexchange transactions, are reported separately from *business-type activities*, which rely to a significant extent on fees and charges to external customers for support. Likewise, the *primary government* is reported separately from certain legally separate *component units* for which the primary government is financially accountable.

**B. Reporting Entity**

For financial reporting purposes, management has considered all potential component units. Component units are legally separate organizations for which the elected officials of the primary government are financially accountable. The decision to include a potential component unit in the reporting entity was made by applying the criteria set forth in GAAP. The criteria used are as follows:

Financial Accountability – The primary government is deemed to be financially accountable if it appoints a voting majority of the organization's governing body and (1) it is able to impose its will on that organization or (2) there is a potential for the organization to provide specific financial benefits or impose specific financial burdens on the primary government. Additionally, the primary government may be financially accountable if an organization is fiscally dependent on the primary government and there is a potential for the organization to provide specific financial benefits or impose specific financial burdens on the primary government regardless of whether the organization has a separately elected governing board, a governing board appointed by a higher level of government or a jointly appointed board.

# City of Rockwall, Texas

## NOTES TO THE FINANCIAL STATEMENTS, *Continued*

September 30, 2019

### Discretely Presented Component Units

#### Rockwall Economic Development Corporation ("REDC")

The Rockwall Economic Development Corporation ("REDC") is governed by a seven-member Board of Directors appointed, at will, by the City Council. REDC represents the City by promoting it as a location for new business; it also acquires and develops land for that purpose. REDC collects a half-cent sales tax to support its activities. The funds of REDC are composed of governmental fund types. Stand-alone financial statements for REDC as of and for the fiscal year ended September 30, 2019 are not prepared.

#### Rockwall Technology Park Association ("RTPA")

The Rockwall Technology Park Association ("RTPA") provides repair and maintenance of the common area within the park being developed by REDC. RTPA's Board of Directors is composed of representatives of the landowners. At September 30, 2019, REDC owned the majority of the land and the Board was therefore composed of REDC board members. When the park becomes 75% or more owned by private landowners, it will become an entity independent of the City. Until then, it is controlled by REDC, a discretely presented component unit of the City. RTPA, is effectively controlled by the City through REDC and thus provides a potential financial benefit or burden to the City. The funds of RTPA are composed of governmental fund types. Stand-alone financial statements RTPA as of and for the fiscal year ended September 30, 2019 are not prepared.

### C. Basis of Presentation - Government-Wide and Fund Financial Statements

While separate government-wide and fund financial statements are presented, they are interrelated. The governmental activities column incorporates data from governmental funds while business-type activities incorporate data from the government's enterprise funds. Separate financial statements are provided for governmental funds and the proprietary funds.

As discussed earlier, the government has two discretely presented component units which are shown in separate columns in the government-wide financial statements.

As a general rule, the effect of interfund activity has been eliminated from the government-wide financial statements. Exceptions to this general rule are payments where the amounts are reasonably equivalent in value to the interfund services provided and other charges between the various other functions of the government. Elimination of these charges would distort the direct costs and program revenues reported for the various functions concerned.

The fund financial statements provide information about the government's funds, including its fiduciary funds and blended component units. Separate statements for each fund category;

# City of Rockwall, Texas

## NOTES TO THE FINANCIAL STATEMENTS, *Continued*

September 30, 2019

governmental and proprietary are presented. The emphasis of fund financial statements is on major governmental and enterprise funds, each displayed in a separate column. All remaining governmental and enterprise funds are aggregated and reported as nonmajor funds. Major individual governmental and enterprise funds are reported as separate columns in the fund financial statements.

The City reports the following major governmental funds:

### **General Fund**

The General Fund is the City's primary operating fund. It accounts for all financial resources of the general government, except those required to be accounted for in another fund.

### **Debt Service Fund**

The Debt Service Fund accounts for the resources accumulated and payments made for principal and interest on long-term debt of governmental funds.

### **G.O. Bonds Capital Projects Fund**

The G.O. Bonds Capital Projects Fund accounts for the acquisition or construction of capital assets used in the operation of governmental funds.

The City reports the following major proprietary fund:

### **Water and Sewer Fund**

The Water and Sewer Fund operates the water distribution system and the wastewater treatment plants, wastewater pumping stations, and collection systems.

Additionally, the City reports the following fund types:

### **Internal Service Funds**

The Internal Service Funds account for employees' health insurance and workers' compensation coverage services provided to other departments or agencies of the government on a cost-reimbursement basis.

# City of Rockwall, Texas

## NOTES TO THE FINANCIAL STATEMENTS, *Continued*

September 30, 2019

### Special Revenue Funds

The Special Revenue Funds account for specific revenue sources that are legally restricted to expenditures for specified purposes (not including expendable trusts or major capital projects.)

### Fiduciary Funds

The Fiduciary Funds account for assets held by the City in a trustee capacity or as an agent on behalf of others. The Agency Fund is custodial in nature and does not present results of operations or have a measurement focus. Agency funds are accounted for using the accrual basis of accounting. This fund is used to account for developer contributions for infrastructure projects related to various developments to be constructed at a later date.

During the course of operations the government has activity between funds for various purposes. Any residual balances outstanding at year end are reported as due from/to other funds and advances to/from other funds. While these balances are reported in fund financial statements, certain eliminations are made in the preparation of the government-wide financial statements. Balances between the funds included in governmental activities (i.e., the governmental and internal service funds) are eliminated so that only the net amount is included as internal balances in the governmental activities column. Similarly, balances between the funds included in business-type activities (i.e., the enterprise funds) are eliminated so that only the net amount is included as internal balances in the business-type activities column.

Further, certain activity occurs during the year involving transfers of resources between funds. In fund financial statements these amounts are reported at gross amounts as transfers in/out. While reported in fund financial statements, certain eliminations are made in the preparation of the government-wide financial statements. Transfers between the funds included in governmental activities are eliminated so that only the net amount is included as transfers in the governmental activities column. Similarly, balances between the funds included in business-type activities are eliminated so that only the net amount is included as transfers in the business-type activities column.

### D. Measurement focus and basis of accounting

The accounting and financial reporting treatment is determined by the applicable measurement focus and basis of accounting. Measurement focus indicates the type of resources being measured such as *current financial resources* or *economic resources*. The basis of accounting indicates the timing of transactions or events for recognition in the financial statements.

The government-wide financial statements are reported using the *economic resources measurement focus* and the *accrual basis of accounting*. Revenues are recorded when earned and expenses are

# City of Rockwall, Texas

## NOTES TO THE FINANCIAL STATEMENTS, *Continued*

September 30, 2019

recorded when a liability is incurred, regardless of the timing of related cash flows. Property taxes are recognized as revenues in the year for which they are levied. Grants and similar items are recognized as revenue as soon as all eligibility requirements imposed by the provider have been met.

The governmental fund financial statements are reported using the *current financial resources measurement focus* and the *modified accrual basis of accounting*. Revenues are recognized as soon as they are both measurable and available. Revenues are considered to be available when they are collectible within the current period or soon enough thereafter to pay liabilities of the current period. For this purpose, the government considers revenues to be available if they are collected within 60 days of the end of the current fiscal period. Expenditures generally are recorded when a liability is incurred, as under accrual accounting. However, debt service expenditures, as well as expenditures related to compensated absences, and claims and judgments, are recorded only when payment is due. General capital asset acquisitions are reported as expenditures in governmental funds. Issuance of long-term debt and acquisitions under capital leases are reported as other financing sources.

Property taxes, sales taxes, franchise taxes, licenses, and interest associated with the current fiscal period are all considered to be susceptible to accrual and so have been recognized as revenues of the current fiscal period. Entitlements are recorded as revenues when all eligibility requirements are met, including any time requirements, and the amount is received during the period or within the availability period for this revenue source (within 60 days of year end). Expenditure-driven grants are recognized as revenue when the qualifying expenditures have been incurred and all other eligibility requirements have been met, and the amount is received during the period or within the availability period for this revenue source (within 60 days of year end). All other revenue items are considered to be measurable and available only when cash is received by the government.

Proprietary, pension and other postemployment benefit trust funds are reported using the *economic resources measurement focus* and the *accrual basis of accounting*. Agency funds have no measurement focus but utilize the *accrual basis of accounting* for reporting its assets and liabilities.

**City of Rockwall, Texas**  
*NOTES TO THE FINANCIAL STATEMENTS, Continued*  
September 30, 2019

**E. Assets, Liabilities, Deferred Outflows/Inflows, and Fund Equity or Net Position**

**1. Deposits and Investments**

The City's cash and cash equivalents are considered to be cash on hand, demand deposits and short term investments with original maturities of three months or less from the date of acquisition. For the purpose of the statement of cash flows, the proprietary fund types consider temporary investments with maturity of three months or less when purchased to be cash equivalents.

In accordance with GASB Statement No. 31, *Accounting and Reporting for Certain Investments and External Investment Pools*, the City reports all investments at fair value, except for "money market investments" and "2a7-like pools." Money market investments, which are short-term highly liquid debt instruments that may include U.S. Treasury and agency obligations, are reported at amortized costs. Investment positions in external investment pools that are operated in a manner consistent with the SEC's Rule 2a7 of the Investment Company Act of 1940, such as TexPool, are reported using the pools' share price.

The City has adopted a written investment policy regarding the investment of its funds as defined in the Public Funds Investment Act, Chapter 2256, of the Texas Governmental Code. In summary, the City is authorized to invest in the following:

- Direct obligations of the U.S. Government
- Fully collateralized certificates of deposit and money market accounts
- Statewide investment pools
- SEC registered, no load money market mutual funds

**2. Fair Value**

The City has applied Governmental Accounting Standards Board ("GASB") Statement No. 72, Fair Value Measurement and Application. GASB Statement No. 72 provides guidance for determining a fair value measurement for reporting purposes and applying fair value to certain investments and disclosures related to all fair value measurements.

**3. Receivables and Interfund Transactions**

Transactions between funds that are representative of lending/borrowing arrangements outstanding at the end of the year are referred to as either "interfund receivables/payables" (i.e., the current portion of interfund loans) or "advances to/from other funds" (i.e., the non-current portion of interfund loans). All other outstanding balances between funds are reported as "due to/from other funds" in the fund financial statements. If the transactions are between the primary government and its component unit, these receivables and payables are classified as "due to/from

# City of Rockwall, Texas

## NOTES TO THE FINANCIAL STATEMENTS, *Continued*

September 30, 2019

component unit/primary government.” Any residual balances outstanding between the governmental activities and business-type activities are reported in the government-wide financial statements as “internal balances.”

Advances between funds are offset by a nonspendable fund balance account in the applicable governmental fund to indicate they are not available for appropriation and are not expendable available financial resources.

All trade receivables are shown net of any allowance for uncollectible amounts.

#### **4. Inventories and Prepaid Items**

The costs of governmental fund type inventories are recorded as expenditures when the related liability is incurred, (i.e., the purchase method). The inventories are valued at the lower of cost or market using the first-in/first-out method. Certain payments to vendors reflect costs applicable to future accounting periods (prepaid expenditures) are recognized as expenditures when utilized.

#### **5. Restricted Assets**

Certain proceeds of enterprise fund certificates of obligation are classified as restricted assets on the statement of net position because their use is limited by applicable bond covenants.

#### **6. Capital Assets**

Capital assets, which include property, plant, equipment, and infrastructure assets (e.g., roads, bridges, sidewalks, and similar items) are reported in the applicable governmental or business-type activities columns in the government-wide financial statements. Capital assets are defined by the government, as assets with an initial individual cost of more than \$5,000 and an estimated useful life in excess of one year. Such assets are recorded at historical cost or estimated historical cost if purchased or constructed. Donated capital assets, donated works of art, and capital items received in a service concession arrangement are reported at acquisition value. Major outlays for capital assets and improvements are capitalized as projects are constructed. Interest costs incurred in connection with construction of enterprise fund capital assets are capitalized when the effects of capitalization materially impact the financial statements.

The costs of normal maintenance and repairs that do not add to the value of the asset or materially extend assets' lives are not capitalized.

# City of Rockwall, Texas

## NOTES TO THE FINANCIAL STATEMENTS, *Continued*

September 30, 2019

Property, plant, and equipment of the primary government, as well as the component units, are depreciated using the straight-line method over the following estimated useful years.

<u>Asset Description</u>	<u>Estimated Useful Life</u>
Buildings	20 to 30 years
Building Improvements	20 to 50 years
Public domain infrastructure	20 years
System infrastructure	50 years
Equipment	3 to 10 years

### 7. Deferred Outflows/Inflows of Resources

In addition to assets, the statement of financial position will sometimes report a separate section for deferred outflows / inflows of resources. This separate financial statement element, *deferred outflows of resources*, represents a consumption of net position that applies to a future period(s) and so will *not* be recognized as an outflow of resources (expense/ expenditure) until then. The government only has three items that qualify for reporting in this category. One example is the deferred charge on refunding reported in the government-wide statement of net position. A deferred charge on refunding results from the difference in the carrying value of refunded debt and its reacquisition price. This amount is deferred and amortized over the shorter of the life of the refunded or refunding debt.

In addition to liabilities, the statement of financial position will sometimes report a separate section for *deferred inflows of resources*. This separate financial statement element, deferred inflows of resources, represents an acquisition of net position that applies to a future period(s) and so will not be recognized as an inflow of resources (revenue) until that time. The government has only one type of item, which arises only under a modified accrual basis of accounting that qualifies for reporting in this category. Accordingly, the item, *unavailable revenue*, is reported only in the governmental funds balance sheet. The governmental funds report unavailable revenues from property taxes, fines and forfeitures and ambulance fees. These amounts are deferred and recognized as an inflow of resources in the period that the amounts become available. Deferred inflows of resources can also occur at the government wide level due to differences between investment gains and losses realized on pension investments compared to assumption used within the pension actuarial valuation model.

### 8. Long-Term Obligations

In the government-wide financial statements, long-term debt and other long-term obligations are reported as liabilities in the applicable governmental activities statement of net position. The long-term debt consists primarily of bonds payable and accrued compensated absences.

# City of Rockwall, Texas

## NOTES TO THE FINANCIAL STATEMENTS, *Continued*

September 30, 2019

Long-term debt for governmental funds is not reported as liabilities in the fund financial statements until due. The debt proceeds are reported as other financing sources, net of the applicable premium or discount and payments of principal and interest reported as expenditures. In the governmental fund types, issuance costs, even if withheld from the actual net proceeds received, are reported as debt service expenditures. However, claims and judgments paid from governmental funds are reported as a liability in the fund financial statements only for the portion expected to be financed from expendable available financial resources.

Long-term debt and other obligations, financed by proprietary funds, are reported as liabilities in the appropriate funds. For proprietary fund types, bond premiums and discounts are deferred and amortized over the life of the bonds using the effective interest method, if material. Bonds payable are reported net of the applicable bond premium or discount. Issuance costs are expensed when incurred.

Net Pension Liability is valued using an actuarial model and represents the difference between the plan fiduciary net position and the net pension liability consistent with GASB statement no. 68. The portion of this liability presented as a current liability is based on actuarially calculations for estimated future payments of benefits and refunds over the twelve months following yearend.

Assets acquired under the terms of capital leases are recorded as liabilities and capitalized in the government-wide financial statements at the present value of net minimum lease payments at inception of the lease. In the year of acquisition, capital lease transactions are recorded as other financing sources and as capital outlay expenditures in the general fund. Lease payments representing both principal and interest are recorded as expenditures in the general fund upon payment with an appropriate reduction of principal recorded in the government-wide financial statements.

### **9. Pensions**

For purposes of measuring the net pension liability, deferred outflows of resources and deferred inflows of resources related to pensions, and pension expense, information about the Fiduciary Net Position of the Texas Municipal Retirement System (TMRS) and additions to/deductions from TMRS's Fiduciary Net Position have been determined on the same basis as they are reported by TMRS. For this purpose, plan contributions are recognized in the period that compensation is reported for the employee, which is when contributions are legally due. Benefit payments and refunds are recognized when due and payable in accordance with the benefit terms. Investments are reported at fair value.

# City of Rockwall, Texas

## NOTES TO THE FINANCIAL STATEMENTS, *Continued*

September 30, 2019

### **10. Other Postemployment Benefits (“OPEB”)**

The City has implemented GASB Statement No. 75, Accounting and Financial Reporting for Postemployment Benefits Other Than Pensions. This statement applies to the individual employers (TMRS cities) in the TMRS Supplemental Death Benefits (SDB) plan, with retiree coverage. The TMRS SDBF covers both active and retiree benefits with no segregation of assets, and therefore doesn't meet the definition of a trust under GASB No. 75 (i.e., no assets are accumulated for OPEB) and as such the SDBF is considered to be an unfunded OPEB plan. For purposes of reporting under GASB 75, the retiree portion of the SDBF is not considered a cost sharing plan and is instead considered a single employer, defined benefit OPEB plan. The death benefit for active employees provides a lump-sum payment approximately equal to the employee's annual salary, calculated based on the employee's actual earnings on which TMRS deposits are made, for the 12-month period preceding the month of death. The death benefit amount for retirees is \$7,500. GASB No. 75 requires the liability of employers and nonemployer contributing entities to employees for defined benefit OPEB (net OPEB liability) to be measured as the portion of the present value of projected benefit payments to be provided to current active and inactive employees that is attributed to those employees' past periods of service (total OPEB liability), less the amount of the OPEB plan's fiduciary net position.

### **11. Net Position Flow Assumption**

Sometimes the government will fund outlays for a particular purpose from both restricted (e.g., restricted bond or grant proceeds) and unrestricted resources. In order to calculate the amounts to report as restricted – net position and unrestricted – net position in the government-wide and proprietary fund financial statements, a flow assumption must be made about the order in which the resources are considered to be applied. It is the government's policy to consider restricted – net position to have been depleted before unrestricted – net position is applied.

### **12. Fund Balance Flow Assumptions**

Sometimes the government will fund outlays for a particular purpose from both restricted and unrestricted resources (the total of committed, assigned, and unassigned fund balance). In order to calculate the amounts to report as restricted, committed, assigned, and unassigned fund balance in the governmental fund financial statements a flow assumption must be made about the order in which the resources are considered to be applied. It is the government's policy to consider restricted fund balance to have been depleted before using any of the components of unrestricted fund balance. Further, when the components of unrestricted fund balance can be used for the same purpose, committed fund balance is depleted first, followed by assigned fund balance. Unassigned fund balance is applied last.

# City of Rockwall, Texas

## NOTES TO THE FINANCIAL STATEMENTS, *Continued*

September 30, 2019

### 13. Fund Balance Policies

Fund balance of governmental funds is reported in various categories based on the nature of any limitations requiring the use of resources for specific purposes. The government itself can establish limitations on the use of resources through either a commitment (committed fund balance) or an assignment (assigned fund balance).

The committed fund balance classification includes amounts that can be used only for the specific purposes determined by a formal action of the government's highest level of decision-making authority. The governing council is the highest level of decision-making authority for the government that can, by adoption of an ordinance prior to the end of the fiscal year, commit fund balance. Once adopted, the limitation imposed by the ordinance remains in place until a similar action is taken (the adoption of another ordinance) to remove or revise the limitation.

Amounts in the assigned fund balance classification are intended to be used by the government for specific purposes but do not meet the criteria to be classified as committed. The governing body (Council) has by resolution authorized the finance director to assign fund balance. The council may also assign fund balance as it does when appropriating fund balance to cover a gap between estimated revenue and appropriations in the subsequent year's appropriated budget. Unlike commitments, assignments generally only exist temporarily. In other words, an additional action does not normally have to be taken for the removal of an assignment. Conversely, as discussed above, an additional action is essential to either remove or revise a commitment.

### 14. Estimates

The preparation of financial statements, in conformity with generally accepted accounting principles, requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenditures/expenses during the reporting period. Actual results could differ from those estimates.

## F. Revenues and Expenditures/Expenses

### 1. Program Revenues

Amounts reported as program revenues include 1) charges to customers or applicants who purchase, use, or directly benefit from goods, services, or privileges provided by a given function or segment and 2) grants and contributions (including special assessments) that are restricted to meeting the operational or capital requirements of a particular function or segment. All taxes, including those dedicated for specific purposes, and other internally dedicated resources are reported as general revenues rather than as program revenues.

# City of Rockwall, Texas

## NOTES TO THE FINANCIAL STATEMENTS, *Continued*

September 30, 2019

### 2. Property Taxes

Property taxes are levied by October 1 on the assessed value listed as of the prior January 1 for all real and business personal property in conformity with Subtitle E, Texas Property Tax Code. Taxes are due on receipt of the tax bill and are delinquent if not paid before February 1 of the year following the year in which imposed. Under state law, property taxes levied on real property constitute a lien on the real property which cannot be forgiven without specific approval of the State Legislature. The lien expires at the end of twenty years. Taxes levied on personal property can be deemed uncollectible by the City.

Property taxes at the fund level are recorded as receivables and deferred revenues at the time the taxes are assessed. Revenues are recognized as the related ad valorem taxes are collected. Additional amounts estimated to be collectible in time to be a resource for payment of obligations incurred during the fiscal year and therefore susceptible to accrual in accordance with Generally Accepted Accounting Principles have been recognized as revenue.

### 3. Compensated Absences

It is the City's policy to permit employees to accumulate earned but unused vacation pay benefits up to specified limits. Sick leave is accrued at 6.67 hours per month. However, once an employee has accrued 120 days of sick leave, earned sick leave in excess of 120 days may be converted to vacation leave at a ratio of three days of sick leave to one day of vacation leave up to a maximum of 15 sick leave days per year. Upon termination, any accumulated sick leave over 120 days shall be converted to vacation leave at a ratio of three days of sick leave to one day of vacation leave to be paid to the employee in accordance with the vacation leave policy. Upon retirement from the City, all accrued sick leave shall be converted to vacation pay at a ratio of three days of sick leave to one day of vacation leave and shall be paid to the employee if he/she has 10 or more years of service to the City. Unused compensatory time for nonexempt employees is paid on termination. All vacation pay is accrued when incurred in the government-wide, proprietary, and fiduciary fund financial statements. Compensated absences are reported in governmental funds only if they have matured for example, as a result of employee's resignation and retirement.

### 4. Proprietary Funds Operating and Nonoperating Revenues and Expenses

Proprietary funds distinguish *operating* revenues and expenses from *nonoperating* items. Operating revenues and expenses generally result from providing services and producing and delivering goods in connection with a proprietary fund's principal ongoing operations. The principal operating revenues of the water and sewer fund, is charges to customers for sales and services. The water and sewer fund also recognizes as operating revenue the portion of tap fees intended to recover the cost of connecting new customers to the system. Operating expenses for enterprise funds include the cost of sales and services, administrative expenses, and depreciation

# City of Rockwall, Texas

## NOTES TO THE FINANCIAL STATEMENTS, *Continued*

September 30, 2019

on capital assets. All revenues and expenses not meeting this definition are reported as nonoperating revenues and expenses.

### II. RECONCILIATION OF GOVERNMENT-WIDE AND FUND FINANCIAL STATEMENTS

#### A. Explanation of certain differences between the governmental fund balance sheet and the government-wide statement of net position.

The governmental fund balance sheet includes reconciliation between *fund balance-total governmental funds* and *net position-governmental activities* as reported in the government-wide statement of net position. One element of that reconciliation explains that long-term liabilities, including bonds, are not due and payable in the current period and, therefore, are not reported in the funds.

#### B. Explanation of certain differences between the governmental fund statement of revenues, expenditures, and changes in fund balances and the government-wide statement of activities.

The governmental fund statement of revenues, expenditures, and changes in fund balances includes a reconciliation between net changes in fund balances – total governmental funds and changes in net position of governmental states that, “the issuance of long-term debt (e.g., bonds) provides current financial resources to governmental funds, while the repayment of the principal of long-term debt consumes the current financial resources of governmental funds. Also, governmental funds report the effect of premiums, discounts, and similar items when debt is first issued, whereas these amounts are deferred and amortized in the statement of activities.”

### III. STEWARDSHIP, COMPLIANCE, AND ACCOUNTABILITY

The legally adopted budgets for the General Fund, certain special revenue funds and the Debt Service Fund are adopted on a basis consistent with generally accepted accounting principles. The City did not adopt budgets for the following special revenue funds: Emergency Siren, Art in Public Places, and Vehicle Acquisition funds. Budgeted amounts are as originally adopted or as amended by the City Council. The City Manager is authorized to transfer budgeted amounts between departments within any fund; however, any revisions that alter the total expenditures of any fund must be approved by the City Council, therefore, the fund level is the legal level of control. Any budgeted amounts appropriated at fiscal year-end and not spent automatically lapse.

#### A. Restricted Net Position

The City records restricted net position on amounts with externally imposed restrictions (e.g., through debt covenants or by grantors) or restrictions imposed by law through constitutional

**City of Rockwall, Texas**  
**NOTES TO THE FINANCIAL STATEMENTS, Continued**  
**September 30, 2019**

provisions or enabling legislation. Total restricted fund balance for governmental funds was \$6,397,622, of which, \$820,050 is restricted by enabling legislation.

**IV. DETAILED NOTES ON ALL FUNDS**

**A. Deposits and Investments**

Deposits - State statutes require that all deposits in financial institutions be fully collateralized by U.S. Government obligations or its agencies and instrumentalities or direct obligations of Texas or its agencies and instrumentalities that have a market value of not less than the principal amount of the deposits. In addition, irrevocable letters of credit at 100% of the principal amounts of the deposits may be used to collateralize deposits. The City's deposits, as well as those of the City's component units, including certificates of deposit, were fully insured or collateralized as required by the state statutes at September 30, 2019.

As of September 30, 2019, the primary government had the following investments:

<u>Investment Type</u>	<u>Value</u>	<u>Weighted Average Maturity (Years)</u>
US Treasury bills	\$ 7,266,071	2.03
External investment pools	20,879,350	0.09
Total value	<u>\$ 28,145,421</u>	
Portfolio weighted average maturity		0.59

As of September 30, 2019, the Rockwall Economic Development Corporation had the following investments:

<u>Investment Type</u>	<u>Carrying Value</u>	<u>Weighted Average Maturity (Years)</u>
Certificates of deposits	\$ 300,000	0.38
External investment pools	8,023,246	0.09
Total value	<u>\$ 8,323,246</u>	
Portfolio weighted average maturity		0.09

*Interest rate risk:* In compliance with the City's Investment Policy, as of September 30, 2019, the City minimized the interest rate risk, related to current events market turmoil in the portfolio by: limiting the effective duration of security types not to exceed two years with the exception of securities purchases related to reserve funds; structuring the investment portfolio so that securities matured to meet cash requirements for ongoing operations, thereby avoiding the need

# City of Rockwall, Texas

## NOTES TO THE FINANCIAL STATEMENTS, *Continued*

September 30, 2019

to sell securities on the secondary market prior to maturity; monitoring credit ratings of portfolio positions to assure compliance with rating requirements imposed by the Public Funds Investment Act; and investing operating funds primarily in short-term securities, money market mutual funds, or similar government investment pools.

*Credit risk:* The City's investment policy limits investments to obligations of the United States, State of Texas, or their agencies and instrumentalities with an investment quality rating of not less than "A" or its equivalent, by a nationally recognized investment rating firm. Other obligations must be unconditionally guaranteed (either express or implied) by the full faith and credit of the United States Government or the issuing U.S. agency and investment pools with an investment quality not less than AAA or AAA-m, or equivalent, by at least one nationally recognized rating service.

*Custodial credit risk – deposits:* In the case of deposits, this is the risk that in the event of a bank failure, the City's deposits may not be returned to it. State statutes require that all deposits in financial institutions be insured or fully collateralized by U.S. government obligations or its agencies and instrumentalities or direct obligations of Texas or its agencies and instrumentalities that have a market value of not less than the principal amount of the deposits. As of September 30, 2019, the market values of pledged securities and FDIC exceeded bank balances.

*Custodial credit risk – investments:* For an investment, this is the risk that, in the event of the failure of the counterparty, the City will not be able to recover the value of its investments or collateral securities that are in the possession of an outside party. The City's investment policy requires that it will seek to safekeeping securities at financial institutions, avoiding physical possession. Further, all trades, where applicable, are executed by delivery versus payment to ensure that securities are deposited in the City's safekeeping account prior to the release of funds.

### **TexasTERM**

TexasTERM is an external investment pool operated by a private asset management corporation and is not SEC registered. The Texas Interlocal Cooperation Act and the Texas Public Investments Act provide for the creation of public funds investment pools and permit eligible governmental entities to jointly invest their funds in authorized investments. The City participates in both investment options operated by TexasTERM – a daily investment pool (TexasDAILY) and a long-term investment pool (TexasTERM). At September 30, 2019, the fair value of the position in both the TexasTERM and the TexasDAILY approximate fair value of the shares. There were no limitations or restrictions on withdrawals.

# City of Rockwall, Texas

## *NOTES TO THE FINANCIAL STATEMENTS, Continued*

September 30, 2019

Long-term liabilities applicable to the City's governmental activities are not due and payable in the current period and accordingly, are not reported as fund liabilities in the governmental funds. Interest on long-term debt is not accrued in governmental funds, but rather is recognized as an expenditure when due. The City intends to retire all of its general long-term liabilities, plus accrued interest, from property taxes and other current revenues from the debt service fund as has been done in prior years. The proprietary fund type long-term debt will be repaid, plus accrued interest, from operating revenues of the respective fund.

**City of Rockwall, Texas**  
**NOTES TO THE FINANCIAL STATEMENTS, Continued**

Nonmajor governmental	7,018	-	-	-	7,018
Internal service funds	500	-	-	251,184	251,684
<b>Total</b>	<b>\$ 7,518</b>	<b>\$ 1,386</b>	<b>\$ 15,604</b>	<b>\$ 252,009</b>	<b>\$ 276,517</b>

The compositions of primary government and component unit due to/from balances as of the year ended September 30, 2019 were as follows:

<u>Receivable fund:</u>	<u>Payable fund:</u>		<u>Total</u>
	<u>Rockwall EDC</u>	<u>Technology Park</u>	
General	\$ 19,639	\$ 6,971	\$ 26,610
<b>Total</b>	<b>\$ 19,639</b>	<b>\$ 6,971</b>	<b>\$ 26,610</b>

Interfund balances resulted from the timing difference between the dates that (1) interfund goods and services are provided or reimbursable expenditures occur, (2) transactions are recorded in the accounting system, and (3) payments between funds are made. All balances are expected to be paid in the subsequent year.

# City of Rockwall, Texas

## NOTES TO THE FINANCIAL STATEMENTS, *Continued*

September 30, 2019

Transfers between the primary government during the 2019 year were as follows:

Transfer In:	Transfer Out					Total
	General	G/O Bonds	Nonmajor Governmental	Water & Sewer	Employee Benefits - ISF	
General	\$ -	\$ -	\$ 77,655	\$ -	\$ -	\$ 77,655
Nonmajor governmental	518,000	63,688	-	68,100	-	649,788
Employee Benefits - ISF	2,500,000	-	-	900,000	-	3,400,000
Workers' Compensation - ISF	180,000	-	-	55,000	250,000	485,000
<b>Total</b>	<b>\$ 3,198,000</b>	<b>\$ 63,688</b>	<b>\$ 77,655</b>	<b>\$ 1,023,100</b>	<b>\$ 250,000</b>	<b>\$ 4,612,443</b>

Transfers between funds were primarily to support debt service requirements and operation of funds.

### H. North Texas Municipal Water District

The District is a conservation and reclamation district and political subdivision of the State of Texas, created and functioning under Chapter 62, Acts of 1951, 52nd Legislature, Regular Session, as amended, originally compiled as Vernon's Article 8270-141 (the "Act"), pursuant to Article 16, Section 59 of the Texas Constitution. The District comprises all of the territory of its member cities, viz., Allen, Garland, Princeton, Plano, Mesquite, Wylie, Rockwall, Farmersville, McKinney, Richardson, Forney, Royse City, and Frisco (the "Member Cities"). The District was created for the purpose of providing a source of water supply for municipal, domestic and industrial use and for the treatment, processing, and transportation of such water to its Member Cities and to its other customers located in North Central Texas, all within the Dallas Standard Metropolitan Statistical Area.

Under the Act, including specifically Section 27 thereof, and under the Constitution and Statutes of the State of Texas, the District has broad powers to: (1) impound, control, store, preserve, treat, transmit and use storm and flood water, the water of rivers and streams, and underground water for irrigation, power and all other useful purposes and to supply water for municipal, domestic, power, industrial and commercial uses and purposes and all other beneficial uses and purposes; and (2) collect, transport, process, treat, dispose of, and control all municipal, domestic, industrial or commercial waste whether in fluid, solid or composite state, including specifically the control, abatement or reduction of all types of pollution. The City retains no ongoing financial interest, equity investments, and/or responsibilities for the District other than the contractual arrangements discussed more fully herein.

The District has long-term contracts with the City to supply treated water and sewer treatment. The City's water contract with the District provides that the City pay a predetermined annual amount for treated water in twelve monthly installments. The amount of this annual payment is

# City of Rockwall, Texas

## NOTES TO THE FINANCIAL STATEMENTS, *Continued*

September 30, 2019

based upon an annually established rate per thousand gallons and the largest annual amount of water consumption of past years. The City owns one sewage treatment facility, Squabble Creek, and in 1978 entered into an agreement with the District for the construction of a second facility, Buffalo Creek. Under the terms of this agreement, the District issued contractually secured bonds in its name to construct and operate this sewage disposal plant for the City. In subsequent years, similar contractual agreements have been made to enable the District to expand the sewage treatment facilities and continue to provide sewage treatment services to the City. Under the terms of these contracts, the City's payments, which began when the facilities were first utilized, are equal to the operating and maintenance expenses for the next ensuing calendar year, as shown in the annual budget. The contracts further provide that the debt service payments will be equal to the principal and/or interest coming due on the bonds on the next succeeding interest payment date, plus the fees and charges of the paying agent and the registrar.

These contractual obligations have been included as capital lease obligations in amounts equal to the bonds outstanding under these agreements. Accordingly, the related assets have been capitalized and are being depreciated over the estimated life of the facilities.

The outstanding principal balance on the debt issues as of September 30, 2019, is \$3,508,374. See Note IV.D. for the annual requirements to amortize the bonds as of September 30, 2019.

With respect to the ground storage reservoir discussed above, the Cities of Rockwall and Heath are contractually obligated to make timely payments to the District representing 66.67% and 33.33%, respectively, of the related operating expenses and debt service payments. While the City anticipates its share of these payments to be 66.67%, the Cities of Rockwall and Heath are each contractually obligated to make any payments which the other party is required, but is unable, to make to the District.

## V. OTHER INFORMATION

### A. Risk Management

The City is exposed to various risks of loss related to torts; theft of, damage to, and destruction of assets; errors and omissions; injuries to employees; employee health benefits; and other claims of various natures.

The City uses a medical self-insurance fund to pay medical and dental claims of City employees and their covered dependents and minimize the total cost of annual medical insurance to the City. Medical claims in any one year exceeding \$100,000 per covered individual, or approximately \$2,698,472 in the aggregate for the group, are covered through a private insurance carrier. Additionally, life insurance policy premiums for each employee are paid through the fund. The self-insurance fund is funded by operating transfers from other funds and

# City of Rockwall, Texas

## NOTES TO THE FINANCIAL STATEMENTS, *Continued*

September 30, 2019

charges to employees for extended benefits at their option. The City does not believe there are material claims incurred but not reported as of September 30, 2019.

The City uses a Self-Insurance and Risk Management Program (as permitted by law and its home rule charter) to insure itself against the various risks of liability or loss to which it is exposed, either through an insurance provider or through a defined self-insurance program. The City issued certificates of obligation, based on an actuarial analysis, to fund a self-insured workers' compensation plan. Under this plan, workers' compensation insurance is provided in accordance with state statutes to all City employees. To protect the assets of the plan from a catastrophic claim, the City has purchased stop loss coverage in the amount of \$100,000 per occurrence with a maximum City liability of \$300,000 per year.

The Workers' Compensation Fund (an internal service fund) accounts for the activity of this plan. The City establishes claim liabilities based on estimates of the ultimate cost of claims reported but unsettled and of claims incurred but not reported. Any claims incurred and not reported are not believed to be significant to the City's financial statements.

Changes in the balances of claims liabilities during the past two years are as follows:

	Employee Benefits		Workers' Compensation	
	2019	2018	2019	2018
Claims payable, beg. of the year	\$ 357,782	\$ 395,627	\$ 93,948	\$ 76,389
Claims incurred	3,343,065	2,863,449	(102)	137,856
Payment on claims	(3,243,093)	(2,901,294)	(48,267)	(120,297)
<b>Total</b>	\$ 457,754	\$ 357,782	\$ 45,579	\$ 93,948

Commercial insurance is purchased for the other risks of loss to which the City is exposed. There have been no significant reductions in insurance coverage and settlement amounts have not exceeded insurance coverage for the current year or the three prior years.

### B. Contingent Liabilities

The City is involved in lawsuits with other parties from time to time. While the ultimate result of these matters cannot be predicted with certainty, the City does not expect them to have a materially adverse effect on the basic financial statements.

Amounts received or receivable from granting agencies are subject to audit and adjustment by grantor agencies, principally the federal government. Any disallowed claims, including amounts already collected, may constitute a liability of the applicable funds. The amounts of

# City of Rockwall, Texas

## NOTES TO THE FINANCIAL STATEMENTS, *Continued*

September 30, 2019

expenditures which may be disallowed by the grantor cannot be determined at this time although the City expects such amounts, if any, to be immaterial.

Amounts received or receivable from grantor agencies are subject to audit and adjustment by such agencies. Any disallowed claims, including amounts already collected, may constitute a liability of the applicable funds. The amounts, if any, of expenditures which may be disallowed by the grantor cannot be determined at this time although the City expects such amounts, if any, to be immaterial.

### C. Pension Plans

#### Texas Municipal Retirement Systems

##### **Plan Description**

The City of Rockwall participates as one of 887 plans in the nontraditional, joint contributory, hybrid defined benefit pension plan administered by the Texas Municipal Retirement System (TMRS). TMRS is an agency created by the State of Texas and administered in accordance with the TMRS Act, Subtitle G, Title 8, Texas Government Code (the TMRS Act) as an agent multiple-employer retirement system for municipal employees in the State of Texas. The TMRS Act places the general administration and management of the System with a six-member Board of Trustees. Although the Governor, with the advice and consent of the Senate, appoints the Board, TMRS is not fiscally dependent on the State of Texas. TMRS's defined benefit pension plan is a tax-qualified plan under Section 401 (a) of the Internal Revenue Code. TMRS issues a publicly available comprehensive annual financial report (CAFR) that can be obtained at [www.tmr.com](http://www.tmr.com).

All eligible employees of the city are required to participate in TMRS.

##### **Benefits Provided**

TMRS provides retirement, disability, and death benefits. Benefit provisions are adopted by the governing body of the city, within the options available in the state statutes governing TMRS. At retirement, the benefit is calculated as if the sum of the employee's contributions, with interest, and the city-financed monetary credits with interest were used to purchase an annuity. Members may choose to receive their retirement benefit in one of seven payments options. Members may also choose to receive a portion of their benefit as a Partial Lump Sum Distribution in an amount equal to 12, 24, or 36 monthly payments, which cannot exceed 75% of the member's deposits and interest.

# City of Rockwall, Texas

## NOTES TO THE FINANCIAL STATEMENTS, *Continued*

September 30, 2019

The plan provisions are adopted by the governing body of the City, within the options available in the state statutes governing TMRS. Plan provisions for the City were as follows:

	<u>Plan Year 2018</u>	<u>Plan Year 2017</u>
Employee deposit rate	7%	7%
Matching ratio (city to employee)	2 to 1	2 to 1
Years required for vesting	5	5
Service retirement eligibility (expressed as age / years of service)	60/5, 0/20	60/5, 0/20
Updated service credit	100% Repeating Transfers	100% Repeating Transfers
Annuity increase (to retirees)	70% of CPI repeating	70% of CPI repeating

### Employees covered by benefit terms

At the December 31, 2018 valuation and measurement date, the following employees were covered by the benefit terms:

Inactive employees or beneficiaries currently receiving benefits	108
Inactive employees entitled to but not yet receiving benefits	98
Active employees	273
<b>Total</b>	<b>479</b>

### Contributions

The contribution rates for employees in TMRS are either 5%, 6%, or 7% of employee gross earnings, and the city matching percentages are either 100%, 150%, or 200%, both as adopted by the governing body of the City. Under the state law governing TMRS, the contribution rate for each city is determined annually by the actuary, using the Entry Age Normal (EAN) actuarial cost method. The actuarially determined rate is the estimated amount necessary to finance the cost of benefits earned by employees during the year, with an additional amount to finance any unfunded accrued liability.

Employees for the City of Rockwall were required to contribute 7% of their annual gross earnings during the fiscal year. The contribution rates for the City of Rockwall were 16.14% and 15.61% in calendar years 2018 and 2019, respectively. The City voluntarily elected to contribute 16.21% which is more than the required rates. The City's contributions to TMRS for the year ended September 30, 2019, totaled \$3,261,764, and were \$91,082 more than the required contributions.

# City of Rockwall, Texas

## NOTES TO THE FINANCIAL STATEMENTS, *Continued*

September 30, 2019

### Net Pension Liability

The City's Net Pension Liability (NPL) was measured as of December 31, 2018, and the Total Pension Liability (TPL) used to calculate the Net Pension Liability was determined by an actuarial valuation as of that date.

### Actuarial assumptions:

The Total Pension Liability in the December 31, 2019 actuarial valuation was determined using the following actuarial assumptions:

Inflation	2.5% per year
Overall payroll growth	3.0% per year
Investment Rate of Return	6.75%, net of pension plan investment expense, including inflation

Salary increases were based on a service-related table. Mortality rates for active members, retirees, and beneficiaries were based on the gender-distinct RP2000 Combined Healthy Mortality Tables with Blue Collar Adjustment, with male rates multiplied by 109% and female rates multiplied by 103%. The rates are projected on a fully generational basis by scale BB to account for future mortality improvements. For disabled annuitants, the gender-distinct RP2000 Combined Healthy Mortality Tables with Blue Collar Adjustment are used with males rates multiplied by 109% and female rates multiplied by 103% with a 3-year set-forward for both males and females. In addition, a 3% minimum mortality rate is applied to reflect the impairment for younger members who become disabled. The rates are projected on a fully generational basis by scale BB to account for future mortality improvements subject to the 3% floor.

The actuarial assumptions were developed primarily from the actuarial investigation of the experience of TMRS over the four year period from December 31, 2010 to December 31, 2014. They were adopted in 2015 and first used in the December 31, 2015 actuarial valuation. The post-retirement mortality assumption for healthy annuitants and Annuity Purchase Rate (APRs) are based on the Mortality Experience Investigation Study covering 2009 through 2011 and dated December 31, 2013. In conjunction with these changes first used in the December 31, 2013 valuation, the System adopted the Entry Age Normal actuarial cost method and a one-time change to the amortization policy.

Plan assets are managed on a total return basis with an emphasis on both capital appreciation as well as the production of income in order to satisfy the short-term and long-term funding needs of TMRS.

# City of Rockwall, Texas

## NOTES TO THE FINANCIAL STATEMENTS, *Continued*

September 30, 2019

The long-term expected rate of return on pension plan investments was determined using a building-block method in which best estimate ranges of expected future real rates of return (expected returns, net of pension plan investment expense and inflation) are developed for each major asset class. These ranges are combined to produce the long-term expected rate of return by weighting the expected future real rates of return by the target asset allocation percentage and by adding expected inflation. In determining their best estimate of a recommended investment return assumption under the various alternative asset allocation portfolios, GRS focused on the area between (1) arithmetic mean (aggressive) without an adjustment for time (conservative) and (2) the geometric mean (conservative) with an adjustment for time (aggressive).

The target allocation and best estimates of real rates of return for each major asset class in fiscal year 2019 are summarized in the following table:

<b>Asset Class</b>	<b>Target Allocation</b>	<b>Long-Term Expected Real Rate of Return (Arithmetic)</b>
Domestic Equity	17.5%	4.30%
International Equity	17.5%	6.10%
Core Fixed Income	10.0%	1.00%
Non-Core Fixed Income	20.0%	3.39%
Real Return	10.0%	3.78%
Real Estate	10.0%	4.44%
Absolute Return	10.0%	3.56%
Private Equity	5.0%	7.75%
Total	100.0%	

### **Discount Rate:**

The discount rate used to measure the Total Pension Liability was 6.75%. The projection of cash flows used to determine the discount rate assumed that employee and employer contributions will be made at the rates specified in statute. Based on that assumption, the pension plan's Fiduciary Net Position was projected to be available to make all projected future benefit payments of current active and inactive employees. Therefore, the long-term expected rate of return on pension plan investments was applied to all periods of projected benefit payments to determine the Total Pension Liability. Of the total pension liability, \$15,516,104 is related to the primary government and \$189,004 is attributable to discretely presented component units.

1% Decrease 5.75%	Current Single Rate Assumption 6.75%	1% Increase 7.75%
<u>\$ 29,907,592</u>	<u>\$ 15,705,108</u>	<u>\$ 4,126,762</u>

# City of Rockwall, Texas

## NOTES TO THE FINANCIAL STATEMENTS, *Continued*

September 30, 2019

### Pension Plan Fiduciary Net Position:

Detailed information about the pension plan's Fiduciary Net Position is available in a separately-issued TMRS financial report. That report may be obtained on the internet at [www.tmr.com](http://www.tmr.com).

### Pension Expense and Deferred Outflows of Resources and Deferred Inflows of Resources Related to Pensions:

For the year ended September 30, 2019, the City recognized pension expense of \$4,056,161. Of this amount, \$4,007,347 is related to the primary government and \$48,814 is attributable to discretely presented component units.

At September 30, 2019, the City reported deferred outflows of resources and deferred inflows of resources related to pensions from the following sources:

	Deferred Outflows of Resources		Deferred Inflows of Resources
<b>Primary Government:</b>			
Difference between projected and actual investment earnings	\$ -	\$	2,048,486
Pension investment experience	4,016,879		-
Contributions subsequent to the measurement date	2,325,179		-
<b>Component Units:</b>			
Difference between projected and actual investment earnings	-		24,953
Pension investment experience	48,930		-
Contributions subsequent to the measurement date	28,323		-
<b>Total</b>	\$ 6,419,311	\$	2,073,439

The primary government and component units reported \$2,325,179 and \$28,323, respectively, as deferred outflows of resources related to pensions resulting from contributions subsequent to the measurement date that will be recognized as a reduction of the net pension liability for the year ending September 30, 2020.

# City of Rockwall, Texas

## NOTES TO THE FINANCIAL STATEMENTS, *Continued*

September 30, 2019

Other amounts reported as deferred outflows and inflows of resources related to pensions will be recognized in pension expense as follows:

<b>Year ended December 31:</b>	
2019	\$ 917,032
2020	112,692
2021	128,899
2022	1,181,927
2023	(287,230)
Thereafter	(60,950)
	\$ 1,992,370

### **Other Postemployment Benefits**

The City also participates in the cost sharing multiple-employer defined benefit group-term life insurance plan operated by the Texas Municipal Retirement System (TMRS) known as the Supplemental Death Benefits Fund (SDBF). The City elected, by ordinance, to provide group-term life insurance coverage to both current and retired employees. The City may terminate coverage under and discontinue participation in the SDBF by adopting an ordinance before November 1 of any year to be effective the following January 1.

The death benefit for active employees provides a lump-sum payment approximately equal to the employee’s annual salary (calculated based on the employee’s actual earnings, for the 12-month period preceding the month of death); retired employees are insured for \$7,500; this coverage is an “other postemployment benefit,” or OPEB.

The City contributes to the SDBF at a contractually required rate as determined by an annual actuarial valuation. The rate is equal to the cost of providing one-year term life insurance. The funding policy for the SDBF program is to assure that adequate resources are available to meet all death benefit payments for the upcoming year; the intent is not to pre-fund retiree term life insurance during employees’ entire careers.

### **Employees covered by benefit terms**

At the December 31, 2018 valuation and measurement date, the following employees were covered by the benefit terms:

Inactive employees or beneficiaries currently receiving benefits	76
Inactive employees entitled to but not yet receiving benefits	27
Active employees	273
<b>Total</b>	<b>376</b>

# City of Rockwall, Texas

## NOTES TO THE FINANCIAL STATEMENTS, *Continued*

September 30, 2019

The City's contributions to the TMRS SDBF for the years ended 2019 and 2018 were \$4,024 and \$4,100, respectively, which equaled the required contributions each year.

Schedule of Contribution Rates  
(*RETIREE-only portion of the rate*)

Plan/ Calendar Year	Annual Required Contribution (Rate)	Actual Contribution Made (Rate)	Percentage of ARC Contributed
2017	0.03%	0.03%	100.0%
2018	0.02%	0.02%	100.0%
2019	0.02%	0.02%	100.0%

### Total OPEB Liability

The City's Postemployment Benefits Other Than Pensions Liability (OPEB) was measured as of December 31, 2018, and the Total OPEB Liability was determined by an actuarial valuation as of that date.

### Actuarial assumptions:

The Total OPEB Liability in the December 31, 2018 actuarial valuation was determined using the following actuarial assumptions:

Inflation	2.5% per year
Overall payroll growth	3.5% to 10.5%, including inflation per year
Discount rate	3.71%
Retirees' share of benefit-related costs	\$0
Administrative expenses	All administrative expenses are paid through the Pension Trust and accounted for under reporting requirements under GASB Statement No. 68

Salary increases were based on a service-related table. Mortality rates for active members, retirees, and beneficiaries were based on the gender-distinct RP2000 Combined Healthy Mortality Tables with Blue Collar Adjustment, with male rates multiplied by 109% and female rates multiplied by 103%. The rates are projected on a fully generational basis by scale BB to account for future mortality improvements. For disabled annuitants, the gender-distinct RP2000 Combined Healthy Mortality Tables with Blue Collar Adjustment are used with males rates multiplied by 109% and female rates multiplied by 103% with a 3-year set-forward for both males and females. In addition, a 3% minimum mortality rate is applied to reflect the impairment for younger members who become disabled. The rates are projected

# City of Rockwall, Texas

## NOTES TO THE FINANCIAL STATEMENTS, *Continued*

September 30, 2019

on a fully generational basis by scale BB to account for future mortality improvements subject to the 3% floor.

**Discount Rate:**

The discount rate used to measure the Total OPEB Liability was 3.71%. The discount rate was based on the Fidelity Index's "20-Year Municipal GO AA Index" rate as of December 31, 2018.

**Sensitivity of the Total OPEB Liability to Changes in the Discount Rate**

The following presents the total OPEB liability of the City, calculated using the discount rate of 3.71%, as well as what the City's total OPEB liability (asset) would be if it were calculated using a discount rate that is 1-percentage-point lower (2.71%) or 1-percentage-point higher (4.71%) than the current rate:

1% Decrease (2.71%)	Current Discount Rate Assumption 3.71%	1% Increase (4.71%)
\$ 664,348	\$ 544,200	\$ 451,968

**Changes in the Total OPEB Liability:**

	Total OPEB Liability
<b>Balance at 12/31/17</b>	\$ 548,790
Changes for the year:	
Service Cost	34,671
Interest	18,675
Difference between expected and actual experience	(9,879)
Changes of assumptions	(44,205)
Benefit payments	(3,852)
Net changes	(4,590)
<b>Balance at 12/31/18</b>	<b>\$ 544,200</b>

## NOTES TO THE FINANCIAL STATEMENTS, *Continued*

September 30, 2019

### Pension Expense and Deferred Outflows of Resources and Deferred Inflows of Resources Related to Pensions

For the year ended September 30, 2019, the City recognized pension expense of \$52,611. Of this amount, \$51,978 is related to the primary government and \$633 is attributable to discretely presented component units.

At September 30, 2019, the City reported deferred outflows of resources and deferred inflows of resources related to the OPEB liability from the following sources:

	Deferred Outflows of Resources	Deferred Inflows of Resources
<b>Primary Government:</b>		
Assumption changes	\$ -	\$ 11,060
Contributions subsequent to the measurement date	2,870	-
<b>Component Units:</b>		
Assumption changes	-	135
Contributions subsequent to the measurement date	35	-
<b>Total</b>	\$ 2,905	\$ 11,195

The primary government and component units reported \$2,870 and \$35, respectively, as deferred outflows of resources related to pensions resulting from contributions subsequent to the measurement date that will be recognized as a reduction of the net pension liability for the year ending September 30, 2020.

Other amounts reported as deferred outflows of resources related to OPEB will be recognized in pension expense as follows:

<b>Year ended December 31:</b>	
2019	\$ (735)
2020	(735)
2021	(735)
2022	(735)
2023	(735)

	\$ (11,195)

**City of Rockwall, Texas**  
**NOTES TO THE FINANCIAL STATEMENTS, Continued**  
**September 30, 2019**

**D. Restatement**

The City restated its beginning net position within governmental activities, business-type activities, discrete component unit activities to properly reflect corrections of accounting errors relating to pension liability balances, compensated absences, bonds payable, deferred charges on debt, and property tax balances.

The restatement of beginning net position/fund balance is as follows:

	<u>Governmental Activities</u>	<u>General</u>	<u>G/O Bonds - Debt Service</u>
Prior year ending net position/fund balance, as reported	\$ 129,548,821	\$ 12,825,308	\$ 3,277,958
Correction to pension liability balances	(296,385)	-	-
Correction to bond payables	(72,042)	-	-
Correction to deferred charge on debt	(16,217)	-	-
Correction to property tax balances	(183,552)	59,470	6,449
Restated beginning net position/fund balance	<u>\$ 128,980,625</u>	<u>\$ 12,884,778</u>	<u>\$ 3,284,407</u>

	<u>Business-Type Activities</u>	<u>Water &amp; Sewer</u>
Prior year ending net position/fund balance, as reported	\$ 97,790,274	\$ 97,790,274
Correction to pension liability balances	(46,470)	(46,470)
Correction to deferred charges on debt	130,411	130,411
Restated beginning net position/fund balance	<u>\$ 97,874,215</u>	<u>\$ 97,874,215</u>

	<u>Rockwall EDC</u>
Prior year ending net position/fund balance, as reported	\$ 40,069
Correction to pension liability balances	90,705
Restated beginning net position/fund balance	<u>\$ 130,774</u>

**F. Subsequent Events**

On November 5, 2019, the City purchased two 2018 rescue pumper trucks totaling \$1,241,700.

On January 7, 2020, the REDC issued sales tax revenue refunding and improvement bonds totaling \$9,780,000 due in semi-annual installments through 2039, with interest rates from 3-3.15%

There were no additional subsequent events through October 12, 2020, the date the financial statements were issued.

Employer contributions as a percentage of covered payroll	15.76%	16.36%	16.22%

1) This schedule is presented to illustrate the requirement to show information for ten years. However, until a full ten-year trend is compiled, only available information is shown.

### NOTES TO SCHEDULE OF EMPLOYER CONTRIBUTIONS TO PENSION PLAN

**Valuation Date:**

Notes Actuarially determined contribution rates are calculated as of December 31 and become effective in January 13 months later.

**Methods and Assumptions Used to Determine Contribution Rates:**

Actuarial Cost Method	Entry Age Normal
Amortization Method	Level Percentage of Payroll, Closed
Remaining Amortization Period	28 years
Asset Valuation Method	10 Year smoothed market; 15% soft corridor
Inflation	2.5%
Salary Increases	3.50% to 10.5%, including inflation
Investment Rate of Return	6.75%
Retirement Age	Experience-based table of rates that are specific to the City's plan of benefits. Last updated for the 2015 valuation pursuant to an experience study of the period 2010 - 2014
Mortality	RP2000 Combined Mortality Table with Blue Collar Adjustment with male rates multiplied by 109% and female rates multiplied by 103% and projected on a fully generational basis with scale BB

**Other Information:**

Notes There were no benefit changes during the year.

<u>9/30/2016</u>	<u>9/30/2015</u> <sup>1</sup>
\$ 2,950,480	\$ 2,761,413
<u>\$ 2,950,480</u>	<u>\$ 2,761,413</u>

## STATISTICAL SECTION

Tables in the statistical section present detailed information as a context for understanding what the information in the financial statements, note disclosures, and required supplementary information says about the overall financial health of the City.

<b>Contents</b>	<b>Page</b>
Financial Trends - These schedules contain trend information to help the reader understand how the City's financial performance and well-being have changed over time.	122
Revenue Capacity - These schedules contain information to help the reader assess the City's most significant local revenue source, the property tax.	134
Debt Capacity - These schedules present information to help the reader assess the affordability of the City's current levels of outstanding debt and the City's ability to issue additional debt in the future.	148
Demographic and Economic Information - These schedules offer demographics and economic indicators to help the reader understand the environment within which the City's financial activities take place.	159
Operating Information - These schedules contain service and infrastructure data to help the reader understand how the information in the City's financial report relates to the services the City provides and the activities it performs.	162

*Sources: Unless otherwise noted, the information in these schedules is derived from the comprehensive annual financial reports for the relevant year.*

Source: Municipal Advisory Council of Texas Annual Report

- (1) Includes all Governmental Activities General Obligation Bonds, Contractual Obligations, Certificates of Obligation and Capital Leases

The percentage of overlapping debt applicable is estimated using taxable assessed property values.

- (2) Applicable percentages were estimated by determining the portion of each governmental unit's taxable value that is within the city's boundaries and dividing it by each unit's total taxable value.

**City of Rockwall, Texas**  
**LEGAL DEBT MARGIN INFORMATION**  
**Last Ten Fiscal Years (Unaudited)**

The City of Rockwall, Texas does not have a legal debt limit prescribed by state law. However, Article XI, Section 5 of the Texas Constitution applicable to cities of more than 5,000 population limits ad valorem tax rates to \$2.50 per \$100 assessed valuation for cities operating under a Home Rule Charter. Accordingly, the City's tax margin for the previous ten years was:

	<u>2019</u>	<u>2018</u>	<u>2017</u>	<u>2016</u>	<u>2015</u>	<u>2014</u>
Maximum Rate	2.50	2.50	2.50	2.50	2.50	2.50

***INTRODUCTORY SECTION***

July 8, 2019

To the Honorable Mayor,  
Members of the City Council,  
And the Citizens of the City of Rockwall, Texas:

The Comprehensive Annual Financial Report (CAFR) of the City of Rockwall for the fiscal year ended September 30, 2018, is hereby submitted in accordance with Section 7.18 of the City Charter. The financial statements are presented in conformity with generally accepted accounting principles (GAAP) and audited in accordance with generally accepted auditing standards by a firm of licensed certified public accountants.

Management assumes full responsibility for both the completeness and reliability of all of the information presented in this report. Fairness of the presentation, including all disclosures, rests with the City. To the best of our knowledge and belief, the enclosed data is accurate in all material respects and is reported in a manner designed to present fairly the financial position and results of operations of the various funds in the City. All disclosures necessary to enable the reader to gain an understanding of the City's financial activities have been included.

To provide a reasonable basis for making these representations, management of the City of Rockwall has established a comprehensive internal control framework that is designed both to protect the government's assets from loss, theft, or misuse and to compile sufficient reliable information for the preparation of the City of Rockwall's financial statements in conformity with GAAP. The internal control structure is designed to provide reasonable, but not absolute, assurance that these objectives are met. The concept of reasonable assurance recognizes that:

- (1) the cost of a control should not exceed the benefits likely to be derived; and
- (2) The valuation of costs and benefits requires estimates and judgments by management.

Because the cost of internal controls should not outweigh their benefits, the City of Rockwall's comprehensive framework of internal controls has been designed to provide reasonable rather than absolute assurance that the financial statements will be free from material misstatement. As management, we assert that, to the best of our knowledge and belief, this financial report is complete and reliable in all material respects. The internal control structure is subject to periodic evaluation by City management.

The City of Rockwall's financial statements have been audited by Fox, Byrd & Company P.C., a firm of licensed certified public accountants. The goal of the independent audit was to provide reasonable assurance that the financial statements of the City of Rockwall for the fiscal year ended September 30, 2018, are free of material misstatement. The independent audit involved examining, on a test basis, evidence supporting the amounts and disclosures in the financial

statements; assessing the accounting principles used and significant estimates made by management; and evaluating the overall financial statement presentation. The independent auditor concluded, based upon the audit, that there was a reasonable basis for rendering an unqualified opinion that the City of Rockwall's financial statements for the fiscal year ended September 30, 2018, are fairly presented in conformity with GAAP. The independent auditors' report is presented as the first component of the financial section of this report.

Management's discussion and analysis (MD&A) immediately follows the independent auditor's report and provides a narrative introduction, overview and analysis of the financial statements as required by GAAP. MD&A complements this letter of transmittal and should be read in conjunction with it.

## **PROFILE OF THE GOVERNMENT**

The City of Rockwall, Texas, county seat of Rockwall County, Texas was incorporated in 1874. Its name is derived from an underground rock wall discovered in 1854. The unusual rock formations are found throughout the county. The City is located on the eastern shore of Lake Ray Hubbard, 22 miles east of downtown Dallas on Interstate Highway 30. The Dallas/Fort Worth area is recognized as one of the top growth areas in the country. The Dallas/Fort Worth International Airport and Love Field in Dallas meet the air transportation needs of the region.

The City currently has a land area of approximately 29.824 square miles and an estimated population of 43,750.

The City of Rockwall adopted a home rule charter in 1985 which established a council-manager form of government. Charter amendments were adopted in 2005 and again in 2015. Policy making and legislative authority is vested in the City Council, which consists of a Mayor and six Council Members, all elected at large. The City Manager is responsible for carrying out the policies and ordinances of the City Council, overseeing the day-to-day operations of the City and for appointing the heads of the various departments. The mayor and six council members are elected to two year staggered terms. The government is empowered to levy a property tax on both real and personal property located within its boundaries. The government also has the power by state statute to extend its corporate limits by annexation, which is done periodically when deemed appropriate by the City Council.

The City of Rockwall provides a full range of services, including police and fire protection; the construction and maintenance of streets and other infrastructure; planning and zoning, parks and recreational activities and general administrative services. Additionally, the City provides water and sewer services as an enterprise function.

Discretely presented component units are legally separate entities and are not part of the primary government's operations. The City of Rockwall is financially accountable for its component units. Accordingly, the Rockwall Economic Development Corporation (REDC) and Rockwall Technology Park Association are included in these financial statements and are explained in more detail in Note 1 of the Notes to the Financial Statements.

## **Factors Affecting Financial Condition**

The information presented in the financial statements is best understood when considered from the broader perspective of the specific environment within which the City of Rockwall operates.

### **Local Economy**

The City of Rockwall is situated in the Dallas/Fort Worth Consolidated Metropolitan Statistical Area. With its concentration of commercial and retail development, the City of Rockwall has long drawn shoppers from surrounding areas. As the national economy began to improve over the last year, Rockwall's local economy benefitted from a mix of new businesses and the renewed success of others. Rockwall saw an increase of 4.91% in our local sales tax revenues. The City has a varied tax base including a mix of residential, commercial and light industrial properties. Total property values rose by 9.35%. The most recent five-year average is 6.85% per annum. During the downturn in the economy, 2008 – 2012, growth in the tax base slowed but remained positive each year. The City's largest taxpayers are varied and include industry, retail developments, multi-family properties, and medical facilities. Table D-12 in the Statistical Section provides further information on the principal taxpayers. The Rockwall Economic Development Corporation continues to successfully market Rockwall and assist companies looking to locate their business in the City. The year's highlights included:

- Pratt Industries completed construction on their 391,600 square foot facility which serves the recycled paper goods industry providing shipping ready boxes to customers including Amazon.
- Lollicup USA commenced construction on their project mid-2018. The building will be in excess of 600,000 square feet and the taxable value is projected to be approximately \$30,000,000 in the first full year of operation.
- The Harbor retail development, under new ownership and significant investment has welcomed several new restaurant tenants and seen the expansion and modernization of the Cinemark Theatre.
- Downtown Rockwall has become the destination that the downtown renovation project was undertaken to create. The area includes a mix of professional, retail, restaurant, and service locations. City staff work closely with the merchants association to sponsor multiple shopping – entertainment events and more than 75 free live concerts per year. The City has seen a 23.71% increase in sales taxes in the downtown area in the last five years.

### **Long-term Planning**

The City Council and staff recognize the need for long-range planning. It is the goal of the City government to provide responsible leadership, services, and infrastructure to achieve a safe environment and provide for a high quality of life.

### **Financial Policies**

The City Council adopted financial policies in 2001 which have guided the City, allowing us to build a strong fund balance, and reinforcing the City's philosophy to budget conservatively for

both revenues and expenditures. The general fund reserve policy is reviewed annually and updated most recently in 2009. The policy states the City should maintain no less than 3 months of reserves and will allow reserves in excess of 3.5 months of recurring operating expenditures to be transferred to a capital projects fund to be used to fund future projects. The City has maintained reserves at or above this level for many years. This allows the City to respond to emergencies or downturns while not overburdening the taxpayers. Reserves over the 3.5 month level were available to fund capital purchases in 2018.

### Budget Overview

The City Manager proposes a balanced budget to the City Council each year by August 1. Public hearings are conducted to receive comments and priorities of the community at large. The City Council must adopt the operating budget and set the City's tax rate for the next year by October 1<sup>st</sup> of each year.

### Capital Improvement Planning

In May 2018, voters approved a proposition to begin the rehabilitation and reconstruction of \$85,000,000 of aging residential streets and to include utility relocations and drainage system improvement. A pavement assessment was conducted on all city streets and alleys which gave an index score to each one. This coupled with traffic load data and the condition of the drainage system will be factors in the streets chosen for the program. Design work will begin immediately on several of the projects and construction work will be phased over several years to minimize the impact of the debt issuance. The remaining street rehabilitation projects which were approved in the 2012 bond election have been engineered and construction will commence in early 2019 and take approximately 24 months for each to be completed.

### Strategic Planning

The City Council and staff worked on an updated strategic planning document with the goal of a simplified, easy to understand final product. The initial stage of the plan included looking at the current breakdown between the residential and commercial tax base and whether or not the current land use plan will allow that mix to be maintained or improved in order to decrease the tax burden on residential properties. It was determined that sufficient non-residential land uses are planned but that any change from non-residential to residential zoning needs to be evaluated in light of the City's strategic goals. The City receives higher sales taxes per capita than other area cities, pointing to the City's long standing status as a regional shopping destination. As cities to the east grow and add retailers, the City will strive to add specialty retailers to continue the regional draw. A citizen committee was formed to work with the City Planning Department staff to make amendments to the Comprehensive Plan and develop an I-30 Corridor plan. This work has resulted in a guide for future developers and has the City broken down into sub-districts with design principles and density guidelines for each area. The I-30 Corridor plan is being finalized and will be considered by Council in early 2019. The impending reconstruction project for I-30 (details below) will result in the largest public works investment in Rockwall County's history. The project's impact to area businesses will be extensive. Recognizing this, the City of Rockwall will be working with area retailers, shopping center owners, the Chamber of Commerce and the other cities along the route to develop a coordinated marketing approach to ensure shoppers know the area is still open for business during the several years of construction activities.

## Future Development

### Transportation

The majority of the City's main thoroughfares are state facilities. TxDOT has been planning for the widening of SH205 in the 3 counties it serves. The City Council and staff worked closely with TxDOT to come to agreement to move the current SH205 to existing John King Boulevard to the East. This had long been the City's desire but previous attempts had not come to fruition. This change will allow the present course of SH205 to become a city street with the ability for traffic flow and speed limits to be managed by the City.

TxDOT has been working on the widening of I-30 which runs through Rockwall County and is the link between the eastern counties and downtown Dallas. The project will add main travel lanes in both directions as well as three-lane service roads extending across Lake Ray Hubbard. This is expected to ease traffic issues when accidents occur on the main lanes. The project is expected to be ready to let in 2022.

The City is a member of a County-wide Consortium which allows County government officials to work with officials of each of the seven cities in the county to further transportation planning efforts. The Consortium meets monthly to discuss funding alternatives for the County's transportation needs, which also involve planning and state participation. The County's bond initiatives allow funding for the advance planning and design of several major roadway projects. This allows the projects to be ready to commence as soon as state funding is allocated for construction. The Consortium was successful in securing new state funding for both SH276 and FM 3549 widening projects after the state-wide referendums provided new dollars for the state's highway system. The fact that the projects were in design and would be ready to bid when dollars were made available was crucial in getting these new funds.

### Retail / Entertainment

"The Harbor" development is situated on the shores of Lake Ray Hubbard at I-30. The retail center came under new ownership in 2017 with many positive changes being pursued. Several new restaurant openings were celebrated in 2018. The addition of a Marriott Springhill Suites with 105 suites and conference space to the area's existing full service Hilton Hotel and Conference Center has fostered synergies in their efforts to attract conferences which benefit the development and the City.

In conjunction with private development, the City established a tax increment financing (TIF) zone on an approximately 103 acre tract which allowed the financing and development of public open space to complement the development and allow citizens access to the Lake Ray Hubbard shore line.

The City's extremely successful 12-week Concert on the Lake Series managed by the City's Recreation Department draws more than 5,000 attendees each Thursday evening for a free concert. The term "Free Live Music Capital of North Texas" has been coined and officially designated by the Texas Legislature to describe the many opportunities available year round in public venues.

The annual Founder's Day activities and headliner concert draws thousands to enjoy a day of free activities each May. A Farmer's Market brings visitors downtown Saturdays from May to October. The annual "Rib Rub and Run" BBQ contest draws more than 50 teams to the

downtown square. The Main Street Advisory Board and “Friends of Downtown Rockwall”, citizen volunteer group, worked to plan more special events to bring shoppers downtown. Live musical entertainment each Thursday, Friday and Saturday evening on the newly opened San Jacinto Plaza brings people out to enjoy a relaxing evening downtown. The many shops in the Downtown area provide a wide variety of shopping opportunities and vacancies are rare and filled quickly.

Utilities

The water and wastewater rates were last increased in 2017. The City purchases treated water as a founding member city of the North Texas Municipal Water District. Recovery from years of drought and conservation restrictions has taken several years to occur. Water consumption in fiscal year 2018 consumption increased by 15.2% over its previous high year in 2012 while sales increased 11.5% over the prior fiscal year. The City’s water system is recognized with the Texas Commission on Environmental Quality’s “Superior” rating.

The City actively works to acquire the right to serve recently annexed areas which are currently served by wholesale water supply corporations. It remains the City’s desire to be the provider for all residents in our city limits.

Debt Administration: Two ratios traditionally used to analyze the debt structure of municipalities are presented below.

Outstanding General Obligation Debt at 9-30-18 (net of Debt Service)	\$111,377,610
Estimated Population	42,120
G.O. Debt Per Capita	\$2,546
Net G.O. Debt per Assessed Value	2.12%

The City seeks a bond rating update as new debt is issued. The current ratings are shown below:

	<u>General Obligation</u>	<u>Sales Tax (REDC)</u>
Standard & Poor’s Rating Group	AA+	A-
Moody’s Investor Service Inc.	Aa2	A1

**ACKNOWLEDGEMENTS**

The preparation of the comprehensive annual financial report on a timely basis was made possible by the dedicated service of the entire staff of the Finance Department. Each member of the department has our sincere appreciation for the contributions made in the preparation of this report.

In closing, without the leadership and support of the governing body of the City, preparation of this report would not have been possible.

Sincerely,

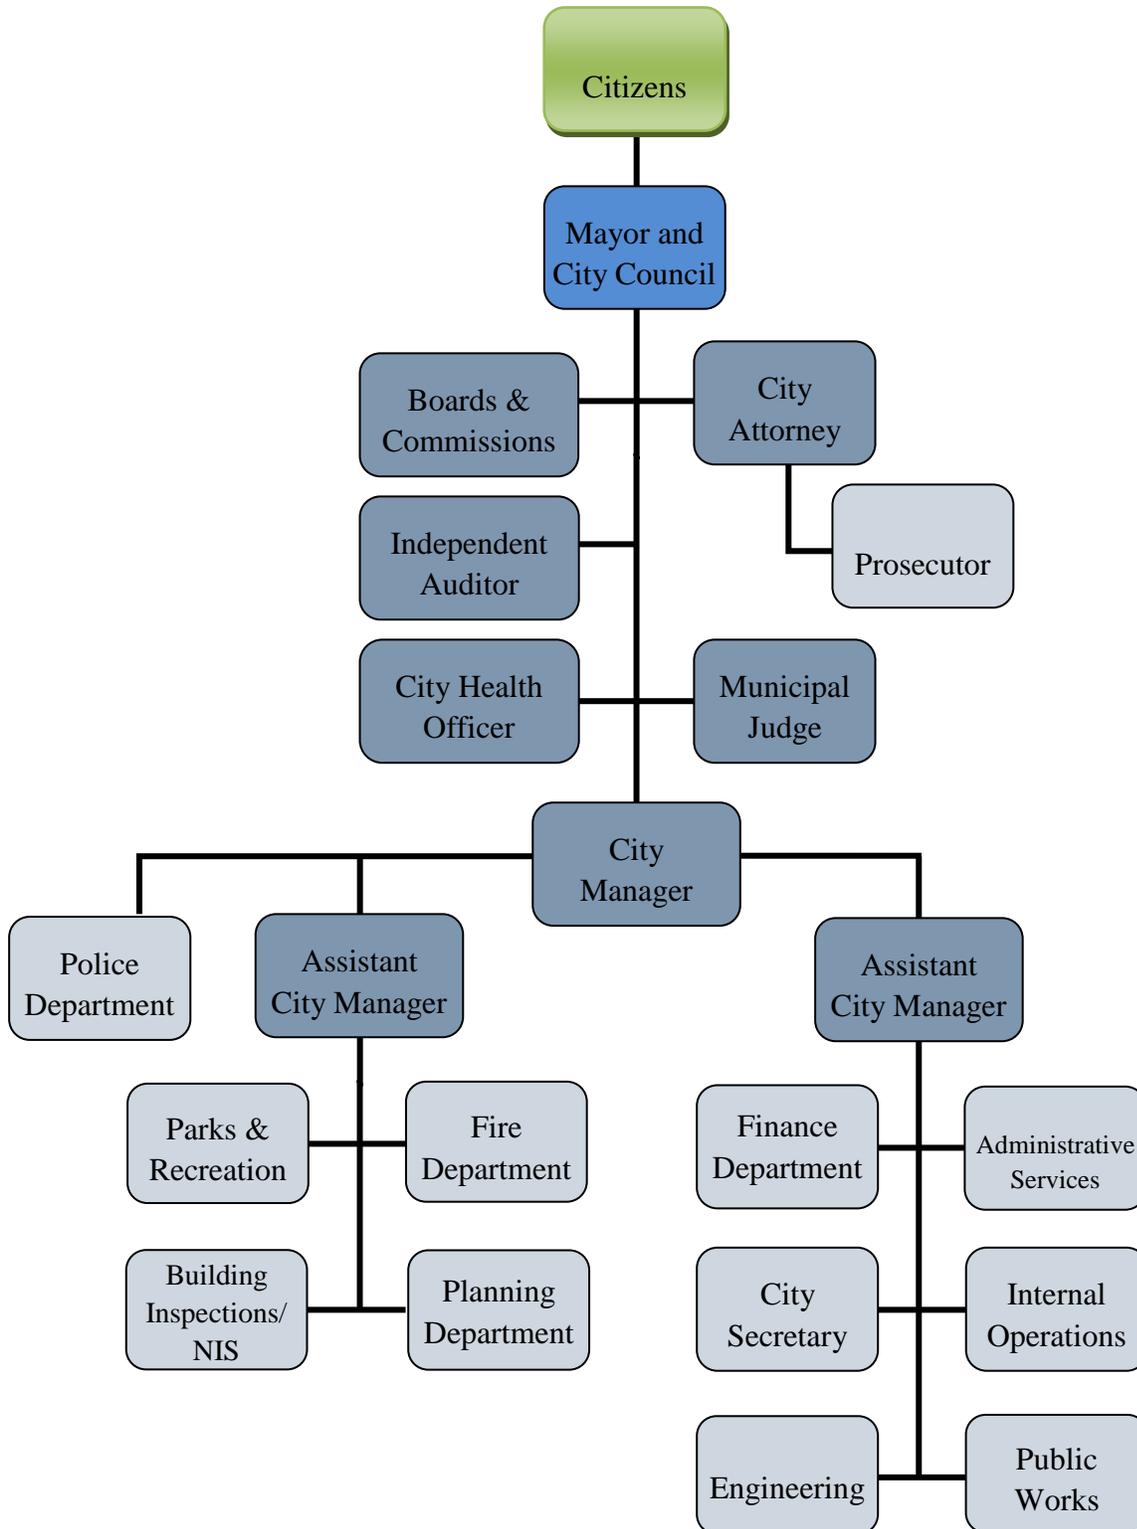

Richard R. Crowley

## INDEPENDENT AUDITOR'S REPORT

To the City Council  
City of Rockwall, Texas

We have audited the accompanying financial statements of the governmental activities, the business-type activities, the aggregate discretely presented component units, each major fund, and the aggregate remaining fund information of the City of Rockwall, Texas, as of and for the year ended September 30, 2018, and the related notes to the financial statements, which collectively comprise the City's basic financial statements as listed in the table of contents.

### **Management's Responsibility for the Financial Statements**

Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

### **Auditor's Responsibility**

Our responsibility is to express opinions on these financial statements based on our audit. We conducted our audit in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditors' judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinions.

## Opinions

In our opinion, the financial statements referred to above present fairly, in all material respects, the respective financial position of the governmental activities, the business-type activities, the aggregate discretely presented component units, each major fund, and the aggregate remaining fund information of the City of Rockwall, Texas, as of September 30, 2018, and the respective changes in financial position and, where applicable, cash flows thereof for the year then ended in accordance with accounting principles generally accepted in the United States of America.

## Other Matters

### *Required Supplementary Information*

Accounting principles generally accepted in the United States of America require that the management's discussion and analysis, the budgetary comparison information and the Texas Municipal Retirement System Schedule of changes in Net Pension Liability (Asset) and Related Ratios on pages 12-22 and 69-72 be presented to supplement the basic financial statements. Such information, although not a part of the basic financial statements, is required by the Governmental Accounting Standards Board, who considers it to be an essential part of financial reporting for placing the basic financial statements in an appropriate operational, economic, or historical context. We have applied certain limited procedures to the required supplementary information in accordance with auditing standards generally accepted in the United States of America, which consisted of inquiries of management about the methods of preparing the information and comparing the information for consistency with management's responses to our inquiries, the basic financial statements, and other knowledge we obtained during our audit of the basic financial statements. We do not express an opinion or provide any assurance on the information because the limited procedures do not provide us with sufficient evidence to express an opinion or provide any assurance.

### *Other Information*

Our audit was conducted for the purpose of forming opinions on the financial statements that collectively comprise the City of Rockwall, Texas' basic financial statements. The introductory section, combining and individual non-major fund financial statements and schedules, and statistical section are presented for purposes of additional analysis and are not a required part of the basic financial statements.

The combining and individual non-major fund financial statement and schedules are the responsibility of management and were derived from and relate directly to the underlying accounting and other records used to prepare the basic financial statements. Such information has been subjected to the auditing procedures applied in the audit of the basic financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the basic financial statements or to the basic financial statements themselves, and other additional procedures in accordance with auditing standards generally accepted in the United states of America. In our opinion, the combining and individual non-major fund financial statements are fairly stated, in all material respects, in relation to the basic financial statements as a whole.

The introductory and statistical section have not been subjected to the auditing procedures applied in the audit of the basic financial statements, and accordingly, we do not express an opinion or provide any assurance on them.

## MANAGEMENT’S DISCUSSION AND ANALYSIS

The discussion and analysis of the City of Rockwall’s financial performance provides an overview and analysis of the City’s financial activities for the fiscal year ended September 30, 2018. Please read it in conjunction with the City’s financial statements, which follow this section.

### FINANCIAL HIGHLIGHTS

- The City’s total net position was \$227,339,096 at September 30, 2018.
- During the year, the City’s governmental activities expenses were \$7,383,474 less than the \$50,922,265 generated in program revenues, taxes, other revenues and transfers.
- The assets of the City of Rockwall attributable to governmental activities exceeded its liabilities, net of deferred inflows and deferred outflows of resources at the close of the fiscal year ending September 30, 2018 by \$129,548,822 (net position).
- At the end of this fiscal year, the unassigned fund balance for the general fund was \$12,825,308 or approximately 36.7 percent of the total general fund operating expenditures and transfers out.
- The City’s total outstanding general obligation bonds and certificates of obligation (excluding enterprise and component unit debt) decreased by \$6,040,000 during fiscal year 2018. More detailed information is given in the notes section.

### OVERVIEW OF THE FINANCIAL STATEMENTS

This annual report consists of three parts—management’s discussion and analysis (this section), the basic financial statements, and required supplementary information. The basic financial statements include two kinds of statements presenting different views of the City:

The first two statements are government-wide financial statements that provide both long-term and short-term information about the City’s overall financial status.

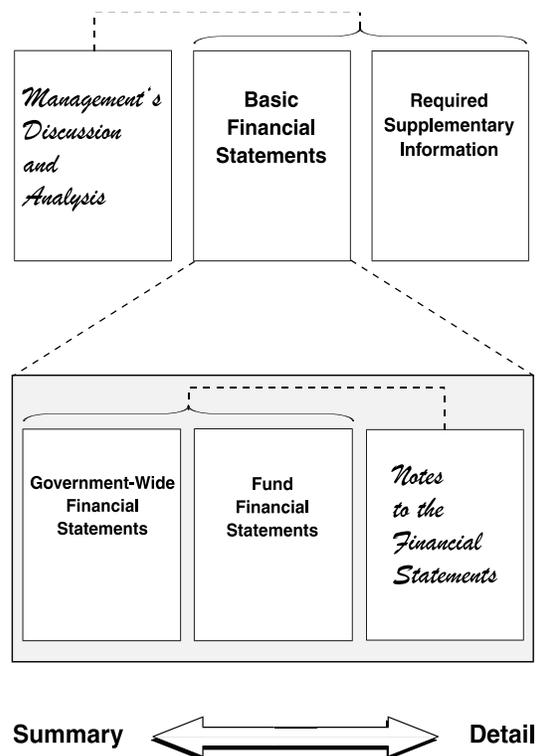

The remaining statements are fund financial statements that focus on individual parts of the government, reporting the City’s operations in more detail than the government-wide statements.

The governmental fund statements tell how general government services were financed in the short-term as well as what remains for future spending.

Proprietary fund statements offer short-term and long-term financial information about the activities the government operates like businesses.

Fiduciary fund statements provide information about the financial relationships in which the City acts solely as a trustee or agent for the benefit of others, to whom the resources in question belong.

Figure A-1, Required Components of the City’s Annual Financial Report

The financial statements also include notes that explain some of the information in the financial statements and provide more detailed data. The statements, followed by a section of required supplementary information, further explain and support the information in the financial statements. Figure A-1 shows how the required parts of this annual report are arranged and relate to one another.

**Figure A-2. Major Features of the City of Rockwall’s Government-wide and Fund Financial Statements**

<i>Type of Statements</i>	<b>Fund Statements</b>		
	<b>Government-wide</b>	<b>Governmental Funds</b>	<b>Proprietary Funds</b>
<i>Scope</i>	Entire City government (except fiduciary funds) and the City's component units	Activities of the City that are not proprietary or fiduciary, such as police, fire and parks	Activities the City operates similar to private business.
<i>Required financial statements</i>	◆ Statement of net position	◆ Balance Sheet	◆ Statement of net position
	◆ Statement of activities	◆ Statement of revenues, expenditures & changes in fund balances	◆ Statement of revenues, expenses & changes in fund net position ◆ Statement of cash flows
<i>Accounting basis and measurement focus</i>	Accrual accounting and economic resources focus	Modified accrual accounting and current financial resources focus	Accrual accounting and economic resources focus
<i>Type of asset/liability information</i>	All assets and liabilities, both financial and capital, short-term and long-term	Only assets expected to be used up and liabilities that come due during the year or soon thereafter; no capital assets included	All assets and liabilities, both financial and capital, short-term and long-term
<i>Type of inflow/outflow information</i>	All revenues and expenses during year, regardless of when cash is received or paid	Revenues for which cash is received during or soon after the end of the year; expenditures when goods or services have been received and payment is due during the year or soon thereafter	All revenues and expenses during year, regardless of when cash is received or paid

### **Government-wide Financial Statements**

The government-wide statements are designed to provide readers with a broad overview of the City of Rockwall’s finances, in a manner similar to private-sector business.

The *statement of net position* presents information on all of the City of Rockwall’s assets and liabilities, with the difference between the two reported as *net position*. Over time, increases or decreases in net position may serve as a useful indicator of whether the financial condition of the City of Rockwall is improving or deteriorating. The statement of net position combines and consolidates governmental funds current financial resources (short-term spendable resources) with capital assets and long-term obligations. Other non-financial factors should also be taken into consideration, such as changes in the City’s property tax base and the condition of the City’s infrastructure, to assess the overall health or financial condition of the City.

The *statement of activities* presents information showing how the City’s net position changed during the most recent fiscal year. All of the current year’s revenues and expenses are taken into account regardless of when cash is received or paid. Thus, revenues and expenses are reported in this statement for some items that will only result in cash flows in future fiscal periods; for example uncollected taxes and earned but unused vacation leave. Both the statement of net position and the statement of activities are prepared utilizing the accrual basis of accounting.

In the Statement of Net Position and the Statement of Activities, the City is divided into three kinds of activities:

*Governmental activities* – Most of the City’s basic services are reported here, including administration, police, fire, planning and zoning, finance, parks and recreation, municipal court and engineering. Property taxes, sales taxes, franchise fees and charges for services provide funds for most of the activities.

*Business-type activities* – The City charges fees to customers to help it cover all or most of the cost of certain services it provides. We report the City’s water and sewer system here.

*Component Units* – The City of Rockwall (the primary government) includes two discretely presented component units. The City’s Type A Sales Tax Corporation known as the Rockwall Economic Development Corporation and the Rockwall Technology Park Association. Although legally separate, The City of Rockwall is financially accountable for these component units. The City Council appoints the component unit’s Board of Directors, sets the budget and approves any debt issuance.

The government-wide financial statements are found on pages 23-24 of this report.

## **Reporting the City’s Most Significant Funds**

### Fund Financial Statements

The fund financial statements provide more detailed information about the City’s most significant funds—not the City as a whole. *Funds* are accounting devices the City uses to keep track of specific sources of funding and spending for particular purposes. Some funds are required by State law and by bond covenants. However, the City establishes other funds to control and manage money for particular purposes or to show that it is properly using certain taxes and grants.

The City has the following types of funds:

*Governmental funds*—Most of the City’s basic services are included in governmental funds, which focus on (1) how cash and other financial assets that can readily be converted to cash flow in and out and (2) the balances left at year-end that are available for spending. Consequently, the governmental fund statements provide a detailed short-term view that helps users of the financial statements determine whether there are more or fewer financial resources that can be spent in the near future to finance the City’s programs. By comparing information presented for governmental funds with similar information presented for governmental activities in the government-wide financial statements, readers may better understand the long-term impact of the government’s near-term financing decisions. Because this information does not encompass the additional long-term focus of the government-wide statements, we provide additional information at the bottom of the governmental funds statement, or on the subsequent page, that explain the relationship (or differences) between them.

The City of Rockwall maintains 21 individual governmental funds. Information is presented separately in the governmental funds balance sheet and in the governmental funds statement of revenues, expenditures and changes in fund balances for the General fund, Debt Service fund, and G.O. Bonds Capital Projects fund, which are considered major funds. Data from the other 18 governmental funds are combined into a single, aggregated presentation. Individual fund data for each of these non-major governmental funds is provided in the form of combining statements elsewhere in this report.

*Proprietary funds*—Services for which the City charges customers a fee are generally reported in proprietary funds. Proprietary funds, like the government-wide statements, provide both long-term and short-term financial information. The City's enterprise funds (a component of proprietary funds) are identical to the business type activities that are reported in the government-wide statement but provide more detail and additional information such as cash flows, for proprietary funds. The Internal Service funds (the other component of proprietary funds) are utilized to report activities that provide services for the City's self-insurance funds. The Internal Service funds are reported as governmental activities in the government-wide financial statements.

The City of Rockwall maintains an Enterprise Fund to account for water and sewer services provided to the City's retail and wholesale customers. All activities associated with providing such services are accounted for in this fund, including administration, operations, maintenance, debt service, capital improvements, billing and collection. The City's intent is that all costs of providing the services to the public on a continuing basis are financed through user charges in a manner similar to a private business enterprise.

The City maintains two internal service funds to account for funds accumulated to self-insure for health and workers compensation claims. Individual fund data for each of these business-type funds is provided in the form of combining statements elsewhere in this report.

*Fiduciary funds*—The City is the trustee, or *fiduciary*, for certain funds. It is also responsible for other assets that - because of a trust arrangement - can be used only for the trust beneficiaries. The City is responsible for ensuring that the assets reported in these funds are used for their intended purposes. All of the City's fiduciary activities are reported in a separate statement of assets and liabilities of the agency fund. We exclude these activities from the City's government-wide financial statements because the City cannot use these assets to finance its operations.

*Notes to the financial statements*-The notes provide additional information that is essential to a full understanding of the data provided in the government-wide and fund financial statements.

## **Other Information**

In addition to the basic financial statements and accompanying notes, this report presents certain *required supplementary information* concerning the City of Rockwall. This information is required by accounting principles generally accepted in the United States of America.

## CONDENSED GOVERNMENT-WIDE FINANCIAL INFORMATION

At the end of fiscal year 2018, the City's net position (assets exceeding liabilities) totaled \$227,339,096. This analysis focuses on the net position (Table 1) and changes in net position (Table 2).

The largest portion of the City's net position (87.1%) reflects its investment in capital assets (i.e., land, buildings, machinery, equipment, and infrastructure); less any related debt used to acquire those assets, which is still outstanding. The City uses these capital assets to provide services to citizens; consequently, these assets are not available for future spending. Although the City's investment in its capital assets is reported net of related debt, it should be noted that the resources needed to repay this debt must be provided from other sources, since the capital assets themselves cannot be used to liquidate these liabilities.

**Table 1**  
**Net Position**

	Governmental Activities		Business-Type Activities		Total Primary Government	
	2018	2017	2018	2017	2018	2017

## Governmental Activities

The City's total revenues of governmental activities were \$51,582,165. A significant portion 42.6%, of the City's revenues came from property taxes. Another 34.8% of revenue came from sales taxes. Ad valorem property tax revenues as a percent of revenues continue to increase each year due to the addition of new - properties and increases in assessed valuation throughout the City. The City Council has chosen to lower the tax rate each of the last five years. Total assessed values of the properties in the City increased by 12.2%. The City adopted a property tax rate of 42.36 cents per \$100 of assessed valuation for fiscal year 2018. Growth in the assessed valuation and conservative budgets allowed the City to lower the rate for fiscal year 2018 by 3.07 cents per hundred dollars of assessed valuation. Sales tax revenue increased over the prior year by 4.77% which was most influenced by increases in same stores sales. Housing starts were consistent with recent years and remain predominately the construction of larger homes on larger tracts resulting in significantly higher price points. Developers started infrastructure work on several projects including additional phases of Stone

Creek, Breezy Hill, and the new subdivision, Lakes of Somerset in 2018. The permit revenues increased by 19.1% due in large part to projects in the Technology Park. Over the past several years, Rockwall County, of which the City of Rockwall is the County seat, was one of the fastest growing counties in America, and named the wealthiest county in Texas.

### Comparative Expenses – Governmental Activities

The total cost of all programs and services were \$43,868,741. Of this total, \$11,605,343 (26.5%) was for the Police Department. The department decreased expenditures for fiscal year 2018 when compared to the prior year due to the addition of several pieces of equipment and vehicles in 2017. Fire Department costs were \$5,214,304 (11.9%) which was an increase of 10.3% over the prior year and was reflective of the City’s efforts to continue to grow and mature our combination paid/volunteer Fire Department. The City’s strategic planning was accepted by Council in 2018 and includes an ongoing focus on the staffing ratios and service needs of the area. The Public Works Department represents 7.28% of the City’s costs due to street construction and rehabilitation projects underway in 2018. A study was previously funded to determine the pavement condition of all streets and alleys in the City limits. The results were evaluated and employed in the budget process for 2018 to determine priorities for maintenance projects which could reasonably be expected to improve the roadway and extend the time before more extensive repairs or replacement would be required in future capital projects.

### Business-Type Activities

The City’s business-type activities recorded an increase of \$12,585,051 in net position. Retail water sales increased by 11.5% due to increased rates and stronger demand. After years of lower water consumption due to drought restrictions, the City’s water consumption increased beyond previously set maximums by 15.2%. The City’s rates were increased each year from 2013 - 2017. With higher sales, the City did not have to increase rates for 2018. The City implemented a conservation focused water rate structure in 2001 and

increases the rate tiers each time new rates are adopted. The rates for sewer were also increased each of those years and not changed for 2018. Total sewer charges increased by 3.6% for the fiscal year. The City employs winter averaging to calculate sewer billing so revenues were largely not affected by restrictions on irrigating lawns. Water and sewer charges were \$22,341,393, which is an increase of \$1,805,825 over the prior year.

Water and sewer impact fees (Capital recovery fees) totaled \$1,604,521 for the fiscal year. Impact fees, paid by developers, are designed to reduce the system’s initial costs in building assets to serve new growth. Residential development is assessed an impact fee at the building permit stage while commercial projects are assessed at the beginning of site development.

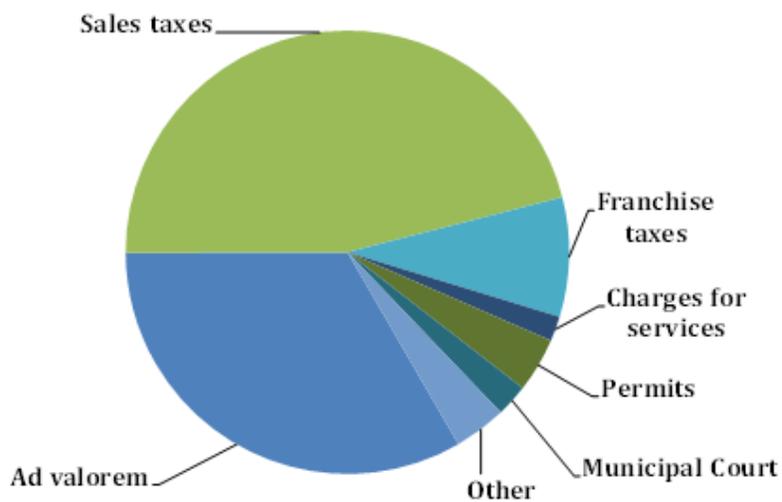

**Component Units**

The Rockwall Economic Development Corporation (REDC) reported revenues including the ½-cent sales tax, authorized under the Type A Corporation statutes, of \$5,756,918. Assets managed by the corporation include an inventory of 218 acres of land, zoned for light industrial uses and available for sale. The REDC continues to attract companies to the City through its marketing efforts and ability to match businesses to available land.

**ANALYSIS OF INDIVIDUAL FUNDS**

The City’s *General Fund* reported an ending unassigned fund balance of \$12,825,308. The largest source of general fund revenue is sales tax, it accounted for \$17,236,307 (46.1%) of total general fund revenue. Ad valorem property taxes account for \$12,454,267 (33.3%) of general fund revenues. The City’s property tax rate is split between maintenance/operations and debt service. The City maintains the unassigned fund balance at or above acceptable levels as defined within the City’s financial policies. This “reserve” balance allows the City Council to elect to fund projects unforeseen during the budgeting process and provides a measure of security against changes in the economy and the timing of cash flows. The unassigned balance increased by \$1,998,257 or 18.5% due to stronger than anticipated sales tax and permit revenue sources as well as less than appropriated expenditures in each department.

**Revenues by Source – General Fund**

The City's *Debt Service Fund* reported an increase in fund balance of \$794,109 before transfers out. Property tax collections for debt service requirements were \$9,075,928. This is required in order to pay debt service payments on bonds issued to construct numerous road and parks projects completed since the City's bond election in 2005 and again in 2012 which authorized more than \$92,831,000 in projects. After extensive study, the City adopted a Roadway Impact Fee which was updated in 2014, will be evaluated again in 2019 and from which generated \$865,874 in new revenue to this fund in fiscal year 2018. The City Council chooses to budget a portion of this fund balance each year toward meeting the City's current debt service obligations. This allows the use of the debt service fund reserves to lessen the effect of new debt issues on the property tax rate each year.

The *Recreation Development Fund* was established to assign funding from certain recreation programs and concessions to the development of new recreation opportunities across the City. The City was successful in leveraging developer provided park land and equipment fees for grant match in order to be awarded two state grants for the development of Stone Creek and Breezy Hill neighborhood parks in 2018.

The *G.O. Bonds Capital Projects Fund* reported an assigned fund balance of \$6,050,883, a decrease of \$3,747,860 from the prior year. For the final two road projects approved in the 2012 election, engineering design is nearing completion and bidding is expected to occur in the Fall 2018 with construction beginning shortly thereafter.

## **GENERAL FUND BUDGETARY HIGHLIGHTS**

During fiscal year 2018, the City Council of the City of Rockwall amended the budget to provide funding for several unforeseen projects and to recognize salary savings over the year, as well as increases or decreases in revenues when compared to original projections. With the adjustments made to the budget, the original budgeted expenditures of \$32,943,030 increased to \$33,155,000 while revenue estimates increased from \$36,066,050 to \$37,218,050. The City of Rockwall had originally estimated the ending general fund unassigned balance to be \$10,822,071 however due to the budget adjustments mentioned above the fund balance was re-estimated to be \$11,699,601.

General fund revenues ultimately were \$37,419,597, a positive variance of \$201,547 over the amended budget estimate, reflecting a greater than anticipated increase in sales tax collections and construction permits late in the budget year. Actual general fund total expenditures were \$32,230,840 or \$924,160 less than final projections. Final expenditures in each department were generally less than anticipated. The City ended the year with a fund balance of \$12,825,308, or 1,998,257 more than the prior year. The increase is due to sales taxes and permit revenues exceeding early estimates and departments spending less than anticipated.

### Capital Assets

At the end of the fiscal year 2018 the City had \$315,101,679 (Table 3) invested in a broad range of capital assets, including buildings, parks facilities, roads, police and fire equipment and water and sewer lines. The balances shown below are net of accumulated depreciation.

**Table 3  
Capital Assets at Year-End**

The results of the street and alley condition assessment conducted in 2016 were used to develop a capital improvement program which included \$85 million of street reconstruction projects which was approved by the voters in May 2018. Projects have been prioritized and design will be undertaken on most of the projects in 2019 with construction timing and debt issuance phased over the next 8-10 years.

Additional information regarding the City’s capital assets is found in note III-D on pages 46-48.

Debt

At year-end, the City had \$117,051,713 in bonds and capitalized leases shown in Table 4.

**Table 4

	<u>\$ 86,900,000</u>	<u>\$ 92,940,000</u>	<u>\$ 30,151,713</u>	<u>\$ 32,973,385</u>	<u>\$ 117,051,713</u>	<u>\$ 125,913,385</u>

The City is permitted by Article XI, Section 5, of the State of Texas Constitution to levy taxes up to \$2.50 per \$100 of assessed valuation for general governmental services including the payment of principal and interest on general obligation long-term debt. The current ratio of net tax-supported bonded debt to assessed value of all taxable property is 2.12% or \$2,546 per capita.

The City’s bond ratings at September 30, 2018 were as follows:

	<u>General Obligation</u>	<u>Sales Tax(REDC)</u>
Standard & Poor’s Rating Group	AA+	A-
Moody’s Investor Service Inc.	Aa2	A1

Additional information on long-term debt may be found in note III-F, on pages 50-56 of this report.

## **ECONOMIC FACTORS AND NEXT YEAR'S BUDGETS AND RATES**

The City's elected and appointed officials considered many factors when setting the fiscal year 2019 budget, tax rate, and fees that will be charged for the business-type activities. The City conservatively budgeted a 3% increase in sales tax revenue and modest increases in other revenues.

The City of Rockwall's citizens enjoy above-average income levels per household. This combined with the City's proximity to major highways, and the Dallas-Fort Worth SMSA make Rockwall an attractive city in which to locate. The City prides itself on a quality school district and "hometown" atmosphere. The Rockwall Economic Development Corporation works to attract businesses with relocation incentives as well as business retention incentives such as workforce training opportunities. The City's unemployment rate was 3.3%, below national levels.

The City of Rockwall considered these factors when adopting the General Fund budget for fiscal year 2019. The budgeted revenues for fiscal year 2019 total \$37,902,500 for the general fund. Ad valorem tax revenue is determined by two factors, the total assessed value established by the Rockwall Central Appraisal District and the tax rate established by the Rockwall City Council. The property tax rate was reduced to 40.21 cents per hundred dollars of assessed value due to growth in assessed values.

The City's financial policies require that revenues and expenditures be projected conservatively. The fund balance policy provides that the General Fund reserves should be no less than 3 months of recurring operating appropriations. In addition, the policies provide that should an audited fund balance at the end of the fiscal year exceed 3.5 months, the City Council may elect to transfer a portion to a Capital Projects Fund. The projected ending general fund balance for 2019 provides approximately 3.7 months of reserves for the City. The 2019 budget reflects planned expenditures from reserves including multiple vehicle replacements, parking lot repairs, and new permit and inspections software. Street and alley maintenance funding was increased by \$1.1million dollars as well.

The 2019 budget expenditures include the addition of three school resource officers (SRO) and a sergeant for that unit. The SRO expenses are shared with Rockwall ISD which reimburses the City for 75% of those expenses. The fire department continues to grow its paid staff with the addition of 6 full-time firefighters along with three Lieutenant positions and a Training Officer. These changes were made in the Fire department as a result of strategic planning work finalized during the year.

A comprehensive water and sewer rate study was developed during 2018 with rate recommendations over the next several years. This included looking at the North Texas Municipal Water District projected rates for treated water over the next five years as well as budget planning and capital planning for the City's own operations and projects. Infrastructure asset management software was implemented in 2018 as well. A phased program to add generators to each wastewater lift station will continue in 2019.

## **REQUESTS FOR INFORMATION**

This financial report is designed to provide our citizens, taxpayers, customers, and creditors with a general overview of the City's finances. For more information, contact the City's Assistant City Manager/Director of Finance, Mary Smith at (972) 771-7701; City of Rockwall; 385 South Goliad Street, Rockwall TX 75087. Email: msmith@rockwall.com.

CITY OF ROCKWALL, TEXAS  
RECONCILIATION OF THE STATEMENT OF REVENUES, EXPENDITURES,  
AND CHANGES IN FUND BALANCES OF GOVERNMENTAL FUNDS  
TO THE STATEMENT OF ACTIVITIES  
FOR THE YEAR ENDED SEPTEMBER 30, 2018

Net change in fund balances - governmental funds	\$ (1,365,748)
Amounts reported for governmental activities in the statement of activities are different because:	
The net revenue (expense) of internal service funds is reported with governmental activities in the statement of net assets.	623,043
Certain assets are not available to pay for current period expenditures and are not reported as revenues in the funds. The following amounts represent the changes in these assets during the year:	
Property taxes receivable	95,205
Assessments receivable	6,689
Franchise taxes receivable	93,336
Court fines receivable	(10,836)
Governmental funds report capital outlays as expenditures. However, in the statement of activities the cost of these assets is allocated over their estimated useful lives and reported as depreciation expense. This is the amount by which depreciation exceeded capital outlays, net of donated capital assets and retirements in the current period.	2,164,107
Governmental funds report debt issuance costs as expenditures. However, in the statement of activities these costs are allocated over the term of the underlying debt and reported as amortization expense. This is the amount of amortization in the current period, net of additions for debt issue cost incurred.	(126,100)
Expenditures are recognized in the governmental fund when paid. However, the Statement of Activities is presented on an accrual basis and expenses are reported when incurred. The following is the net difference in pension & OPEB costs	(28,342)
Accrued interest payable on long-term debt does not require the use of current financial resources and is not reported in the funds. This is the amount of the change in accrued interest payable during the year.	(38,351)
Bond proceeds provide current financial resources to governmental funds, but issuing debt increases long-term liabilities in the statement of net assets. Repayment of debt principal is an expenditure in the governmental funds, but the repayment reduces long-term liabilities in the statement of net assets. This is the amount of repayments (\$6,040,000) and bond premium amortization (\$13,941) in the current period.	6,053,941
Compensated absences payable do not require the use of current financial resources and are not reported as expenditures in governmental funds. This is the amount of the change in accrued compensated absences during the year.	<u>(83,470)</u>
	<u>\$ 7,383,474</u>

The accompanying notes are an integral part of this statement.

CITY OF ROCKWALL, TEXAS

NOTES TO THE FINANCIAL STATEMENTS

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

*Reporting Entity*

The City of Rockwall, Texas (the "City") was founded in 1854 and incorporated in 1874. The City operates under the Council-Manager form of government as adopted by a home rule charter approved January 21, 1985. The City provides a full range of municipal services including public safety (police and fire), highway and streets, parks and recreation, health and social services, planning and zoning, and general administrative services. In addition, the City provides water and sewer services as a proprietary function of the City.

The accounting policies of the City conform to generally accepted accounting principles issued by the Governmental Accounting Standards Board (GASB) which is the recognized financial accounting standard setting body for governmental entities. The notes to the financial statements are an integral part of the City's basic financial statements.

The City is a home rule municipality governed by an elected Mayor and six-member City Council who appoint a City Manager. The City's (primary government) financial statements include its component units. The accompanying basic financial statements comply with the provisions of GASB Statement No. 14, *The Financial Reporting Entity*, in that the financial statements include all organizations, activities, functions and component units for which the City (the "primary government") is financially accountable. Financial accountability is defined as the appointment of a voting majority of a legally separate organization's governing body and either: (1) the City's ability to impose its will on the organization, or (2) the potential that the organization will provide a financial benefit to, or impose a financial burden on, the City.

*Discretely Presented Component Units*

The Rockwall Economic Development Corporation (REDC) is governed by a seven member Board of Directors appointed, at will, by the City Council. REDC represents the City by promoting it as a location for new business; it also acquires and develops land for that purpose. REDC collects a half-cent sales tax to support its activities.

The Rockwall Technology Park Association (RTPA) provides repair and maintenance of the common area within the park being developed by REDC. RTPA's Board of Directors is composed of representatives of the landowners. At September 30, 2018, REDC owned the majority of the land and the Board was therefore composed of REDC board members. When the park becomes 75% or more owned by private landowners, it will become an entity independent of the City. Until then, it is controlled by REDC, a discrete component unit of the City. RTPA, is effectively controlled by the City through REDC and thus provides a potential financial benefit or burden to the City.

The funds of both REDC and RTPA are composed of governmental fund types. Stand-alone financial statements for REDC and RTPA as of and for the fiscal year ended September 30, 2018 are not prepared.

## NOTES TO THE FINANCIAL STATEMENTS

## 1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES – continued

*Government-wide and Fund Financial Statements*

The government-wide financial statements (i.e. the statement of net position and the statement of activities) report information on all of the non-fiduciary activities of the primary government and its component units. For the most part, the effect of inter-fund activity has been removed from these statements. *Governmental activities*, which normally are supported by taxes and intergovernmental revenues, are reported separately from *business-type activities*, which rely, to a significant extent, on fees and charges for support. Likewise, the *primary government* is reported separately from certain legally separate *component units* for which the primary government is financially accountable.

The statement of activities demonstrates the degree to which the direct expenses of a given function or segment are offset by program revenues. *Direct expenses* are those that are clearly identifiable with a specific function or segment. *Program revenues* include: (1) charges to customers or applicants who purchase, use, or directly benefit from goods, services, or privileges provided by a given function or segment, and (2) grants and contributions that are restricted to meeting the operational or capital requirements of a particular function or segment. Taxes and other items not properly included among program revenues are reported instead as *general revenues*.

Separate financial statements are provided for governmental funds, proprietary funds, and fiduciary funds, even though the latter are excluded from the government-wide financial statements. Major individual governmental funds and major individual enterprise funds are reported as separate columns in the fund financial statements.

*Measurement Focus, Basis of Accounting, and Financial Statement Presentation*

The government-wide financial statements are reported using the *economic resources measurement focus* and the *accrual basis of accounting*, as are the proprietary fund and fiduciary fund financial statements. Revenues are recorded when earned and expenses are recorded when a liability is incurred, regardless of the timing of related cash flows. Property taxes are recognized as revenues in the year for which they are levied. Grants and similar items are recognized as revenue as soon as all eligibility requirements imposed by the provider have been met.

Governmental fund financial statements are reported using the *current financial resources measurement focus* and the *modified accrual basis of accounting*. Revenues are recognized as soon as they are both measurable and available. Revenues are considered to be *available* when they are collectible within the current period or soon enough thereafter to pay liabilities of the current period. For this purpose, the City considers revenues to be available if they are collected within 60 days of the end of the current fiscal period. Expenditures generally are recorded when a liability is incurred, as under accrual accounting. However, debt service expenditures, as well as expenditures related to compensated absences and claims and judgments, are recorded only when payment is due.

Property taxes, franchise taxes, licenses, and interest associated with the current fiscal period are all considered to be susceptible to accrual and so have been recognized as revenues of the current fiscal period. Only the portion of special assessments receivable due within the current fiscal period is considered to be susceptible to accrual as revenue of the current period. All other revenue items are considered to be measurable and available only when cash is received by the City.

CITY OF ROCKWALL, TEXAS

NOTES TO THE FINANCIAL STATEMENTS

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES – continued

*Measurement Focus, Basis of Accounting, and Financial Statement Presentation – continued*

The City reports the following major governmental funds:

The *General Fund* is the City's primary operating fund. It accounts for all financial resources of the general government, except those required to be accounted for in another fund.

The *Debt Service Fund* accounts for the resources accumulated and payments made for principal and interest on long-term debt of governmental funds.

The *G.O. Bonds Capital Projects Fund* accounts for the acquisition or construction of capital assets used in the operation of governmental funds.

The City reports the following major proprietary fund:

The *Water and Sewer Fund* operates the water distribution system and the wastewater treatment plants, wastewater pumping stations, and collection systems.

Additionally, the City reports the following fund types:

Internal Service Funds account for employees' health insurance and workers' compensation coverage services provided to other departments or agencies of the government on a cost-reimbursement basis.

Special Revenue Funds account for specific revenue sources that are legally restricted to expenditures for specified purposes (not including expendable trusts or major capital projects).

Capital Projects Funds account for the acquisition of capital assets or the construction of major capital projects (such as streets and sidewalks) not being financed by proprietary funds.

Fiduciary Funds account for assets held by the City in a trustee capacity or as an agent on behalf of others. The Agency Fund is custodial in nature and does not present results of operations or have a measurement focus. Agency funds are accounted for using the accrual basis of accounting. This fund is used to account for developer contributions for infrastructure projects related to various developments to be constructed at a later date.

Private-sector standards of accounting and financial reporting issued prior to December 1, 1989, generally are followed in both the government-wide and proprietary fund financial statements to the extent that those standards do not conflict with or contradict guidance of the Governmental Accounting Standards Board. Governments also have the *option* of following subsequent private-sector guidance for their business-type activities and enterprise funds, subject to this same limitation. The City has elected not to follow subsequent private-sector guidance.

NOTES TO THE FINANCIAL STATEMENTS

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES – continued

*Measurement Focus, Basis of Accounting, and Financial Statement Presentation – continued*

As a general rule the effect of inter-fund activity has been eliminated from the government-wide financial statements. Exceptions to this general rule are payments-in-lieu of taxes and other charges between the City's water and sewer function and various other functions of the City. Elimination of these charges would distort the direct costs and program revenues reported for the various functions concerned.

Amounts reported as *program revenues* include: (1) charges to customers or applicants for goods, services, or privileges provided, (2) operating grants and contributions, and (3) capital grants and contributions, including special assessments. Internally dedicated resources are reported as *general revenues* rather than as program revenues. Likewise, general revenues include all taxes, miscellaneous revenue, and interest income.

Proprietary funds distinguish *operating* revenues and expenses from *non-operating* items. Operating revenues and expenses generally result from providing services and producing and delivering goods in connection with a proprietary fund's principal ongoing operations. The principal operating revenues of the Water and Sewer enterprise fund are charges to customers for sales and services. The enterprise utility fund also recognizes as operating revenue the portion of tap fees intended to recover the cost of connecting new customers to the system. Operating expenses for the enterprise fund include the cost of sales and services, administrative expenses, and depreciation on capital assets. All revenues and expenses not meeting this definition are reported as non-operating revenues and expenses.

*Assets, liabilities, and net position or equity*

Deposits and investments

The City maintains various accounts for each fund at its depository. The City also has cash maintained by agents for debt payments and reserves, construction reserves and workers' compensation claims. For purposes of the statement of cash flows, the City considers all highly liquid debt instruments purchased with a maturity of three months or less to be cash equivalents.

The City's investment policy authorizes the Director of Finance to invest in the following types of investments:

- a. Obligations of the United States or its agencies and instrumentalities with finite maturity dates, with a maximum maturity of not greater than five (5) years. Laddering of investments should be considered.
- b. Direct obligations of the State of Texas or its agencies and instrumentalities, with stated finite maturity dates.
- c. Other obligations, with finite maturity dates, the principal and interest of which are unconditionally guaranteed or insured by the State of Texas or the United States or their respective agencies or instrumentalities.
- d. Obligations of states, agencies, counties, cities and other political subdivisions of any state having been rated as to investment quality by a nationally recognized investment rating firm and having received a rating of not less than "A" or its equivalent.

CITY OF ROCKWALL, TEXAS

NOTES TO THE FINANCIAL STATEMENTS

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES – continued

*Assets, liabilities, and net assets or equity – continued*

Deposits and investments - continued

- e. Certificates of deposit issued by a state or national bank domiciled in the State of Texas or a savings bank domiciled in the State of Texas provided that they are:
  - (1) Guaranteed or insured by the Federal Deposit Insurance Corporation or its successor,
  - (2) Secured by obligations outlined in items "a" through "d" above. The market value of all collateral must be marked to market on a daily basis and shall not be less than 102% of the principal amount of the certificate plus accrued interest, or
  - (3) Secured in any other manner in an amount provided by law for deposits of the City.
- f. Repurchase agreements which are fully collateralized by obligations of the United States or its agencies and instrumentalities, marked to market on a daily basis with a market value of at least 102% of the principal invested, including accrued interest. The securities being purchased must be pledged to the City and held in the City's name by a third party selected and approved by the City. The repurchase agreement must have a defined termination date and be placed through a primary government securities dealer or a financial institution doing business in the State of Texas. The repurchase agreements should be secured by obligations approved in this policy.
- g. Banker's acceptances having a stated maturity of 270 days or less, to be liquidated in full at maturity, which are rated not less than "A-1" or "P-1" (or an equivalent rating) by at least one nationally recognized credit rating agency provided that it is eligible for borrowing from a Federal Reserve Bank.
- h. Commercial paper having a stated maturity of 270 days or less and rated not less than "A-1" or "P-1" (or an equivalent rating) by at least two nationally recognized rating agencies or one nationally recognized rating agency and is fully secured by an irrevocable letter of credit issued by a bank organized and existing under the laws of the United States.
- i. No-load money market mutual fund registered with and regulated by the SEC, which has a dollar-weighted average stated maturity of 90 days or less. It must have included in its investment objectives its intent to maintain a stable net asset value of \$1 for each share. The fund must provide the City with a prospectus and other information required by the SEC.
- j. No-load mutual funds, registered with and regulated by the SEC, having weighted maturity of less than two years, and which invests exclusively in investments approved by this policy.
- k. Investment pools which are approved by the City Council, provided they meet all the criteria for investment pools outlined in Chapter 2256, Texas Local Government Code, and maintain a continuous rating not lower than AAA or AAA-m (or an equivalent rating) from at least one nationally recognized rating service.

CITY OF ROCKWALL, TEXAS

NOTES TO THE FINANCIAL STATEMENTS

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES – continued

*Assets, liabilities, and net assets or equity – continued*

Deposits and investments - continued

The City holds various mortgage-backed securities that offer higher yields but are sensitive to changes in interest rates and other market conditions. Timely payment of interest and principal are guaranteed by federal agencies. The City will not be required to sell these securities prior to maturity barring an event that would be isolated, nonrecurring, unusual, and could not reasonably be anticipated by the City. The City has no borrowed funds used for investing or reverse repurchase agreements.

Investments having a maturity of one year or more, when purchased, are stated at fair value. Short-term investments are stated at cost or amortized cost.

The City categorizes its fair value measurements within the fair value hierarchy established by generally accepted accounting principles. The hierarchy is based on the valuation inputs used to measure the fair value of the asset. Level 1 inputs are quoted prices in active markets for identical assets; Level 2 inputs are significant other observable inputs; Level 3 inputs are significant unobservable inputs.

As of September 30, 2018, the City has the recurring fair value measurements for coupon and discount agencies and treasury notes of \$6,971,170 valued using quoted prices for similar assets in active markets. (Level 2 inputs).

Receivables and payables

Activity between funds that are representative of lending/borrowing arrangements outstanding at the end of the fiscal year are referred to as either "due to/from other funds" (i.e., the current portion of interfund loans) or "advances to/from other funds" (i.e., the non-current portion of interfund loans). All other outstanding balances between funds are reported as "due to/from other funds." Any residual balances outstanding between the governmental activities and business-type activities are reported in the government-wide financial statements as "internal balances."

Advances between funds, as reported in the fund financial statements, are offset by a fund balance reserve account in applicable governmental funds to indicate that they are not available for appropriation and are not expendable available financial resources.

All trade receivables are shown net of an allowance for un-collectibles. Trade accounts receivable in excess of 60 days comprise the trade accounts receivable allowance for un-collectibles.

Property taxes are levied on October 1st by the City based on the January 1st property values as assessed by the Rockwall Central Appraisal District. Taxes are due without penalty until January 31st of the next calendar year. After January 31st the City has an enforceable lien with respect to both real and personal property. Under state law, property taxes levied on real property constitute a perpetual lien on the real property which cannot be forgiven without specific approval of the State Legislature. Taxes applicable to personal property can be deemed uncollectible by the City.

CITY OF ROCKWALL, TEXAS

NOTES TO THE FINANCIAL STATEMENTS

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES – continued

*Assets, liabilities, and net assets or equity – continued*

Inventories and prepaid items

All inventories are valued at cost using the first in/first out (FIFO) method. Inventories of governmental funds are recorded as expenditures when consumed rather than when purchased.

Certain payments to vendors reflect costs applicable to future accounting periods and are recorded as prepaid items in both government-wide and fund financial statements.

Restricted assets

Certain proceeds of enterprise fund revenue bonds are classified as restricted assets on the statement of net assets because their use is limited by applicable bond covenants.

Capital assets

Capital assets, which include property, plant, equipment, and infrastructure assets (e.g., roads, bridges, sidewalks, and similar items), are reported in the applicable governmental or business-type activities columns in the government-wide financial statements. Capital assets are defined by the City as assets with an initial individual cost of more than \$5,000 (amount not rounded) and an estimated useful life in excess of two years. Such assets are recorded at historical cost or estimated historical cost if purchased or constructed. Donated capital assets are recorded at estimated fair market value at the date of donation.

The costs of normal maintenance and repairs that do not add to the value of the asset or materially extend asset lives are not capitalized.

Major outlays for capital assets and improvements are capitalized as projects are constructed. Interest incurred during the construction phase of capital assets of business-type activities is included as part of the capitalized value of the assets constructed.

Capital assets of the primary government, as well as the component units, are depreciated using the straight-line method over the following estimated useful lives:

Buildings	20 - 30 years
Building improvements	20 - 50 years
Public domain infrastructure	20 years
System infrastructure	50 years
Equipment	3 - 10 years

CITY OF ROCKWALL, TEXAS

NOTES TO THE FINANCIAL STATEMENTS

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES – continued

*Assets, liabilities, and net assets or equity – continued*

Compensated absences

It is the City's policy to permit employees to accumulate earned but unused vacation pay benefits up to specified limits. Sick leave is accrued at 6.67 hours per month. However, once an employee has accrued 120 days of sick leave, earned sick leave in excess of 120 days may be converted to vacation leave at a ratio of three days of sick leave to one day of vacation leave up to a maximum of 15 sick leave days per year. Upon termination, any accumulated sick leave over 120 days shall be converted to vacation leave at a ratio of three days of sick leave to one day of vacation leave to be paid to the employee in accordance with the vacation leave policy. Upon retirement from the City, all accrued sick leave shall be converted to vacation pay at a ratio of three days of sick leave to one day of vacation leave and shall be paid to the employee if he/she has 10 or more years of service to the City. Unused compensatory time for nonexempt employees is paid on termination. All vacation pay is accrued when incurred in the government-wide, proprietary, and fiduciary fund financial statements. Compensated absences are reported in governmental funds only if they have matured for example, as a result of employee's resignation and retirement.

Long-term obligations

In the government-wide financial statements, and proprietary fund type in the fund financial statements, long-term debt and other long-term obligations are reported as liabilities in the applicable governmental activities, business-type activities, or proprietary fund type statement of net position. Bond premiums and discounts, as well as issuance costs, are deferred and amortized over the life of the bonds using the straight-line method which approximates the effective interest method. Bonds payable are reported net of the applicable bond premium or discount. Bond issuance costs are reported as deferred charges and amortized over the term of the related debt.

In the fund financial statements, governmental fund types recognize bond premiums and discounts, as well as bond issuance costs, during the current period. The face amount of debt issued is reported as other financing sources. Premiums received on debt issuances are reported as other financing sources while discounts on debt issuances are reported as other financing uses. Issuance costs, whether or not withheld from the actual debt proceeds received, are reported as debt service expenditures.

Fund equity

Fund balance of governmental funds is reported in various categories based on the nature of any limitations requiring the use of resources for specific purposes. The government itself can establish limitations on the use of resources through either a commitment (committed fund balance) or an assignment (assigned fund balance). The committed fund balance classification includes amounts that can be used only for the specific purposes determined by a formal action of the government's highest level of decision-making authority. The governing council is the highest level of decision-making authority for the government that can, by adoption of an ordinance prior to the end of the fiscal year, commit fund balance. Once adopted, the limitation imposed by the ordinance remains in place until a similar action is taken (the adoption of another ordinance) to remove or revise the limitation.

CITY OF ROCKWALL, TEXAS

NOTES TO THE FINANCIAL STATEMENTS

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES – continued

*Assets, liabilities, and net assets or equity – continued*

Amounts in the assigned fund balance classification are intended to be used by the government for specific purposes but do not meet the criteria to be classified as committed. The Council may also assign fund balance as it does when appropriating fund balance to cover a gap between estimated revenue and appropriations in the subsequent year's appropriated budget. Unlike commitments, assignments generally only exist temporarily. In other words, an additional action does not normally have to be taken for the removal of an assignment. Conversely, as discussed above, an additional action is essential to either remove or revise a commitment.

Amounts that cannot be spent because they are either not in a spendable form or are legally or contractually required to be maintained intact are classified as non-spendable fund balance.

Amounts that can be spent only for specific purposes because of constraints imposed by external providers, or imposed by constitutional provisions or enabling legislation are classified as restricted fund balance.

Amounts that are available for any purpose are classified as unassigned fund balance; these amounts can be reported only in the City's General Fund.

Fund balance amount represent the nature of the net resources that are reported in a governmental fund. The City fund balance classifications include non-spendable resources, restricted, and non-restricted (committed, assigned and unassigned) amounts. When the City incurs an expenditure and both restricted and unrestricted amounts are available, the City considers restricted amounts to have been spent first. When the City incurs an expenditure for an unrestricted amount, committed amounts are reduced first, followed by assigned amounts and then unassigned amounts for purposes in which any of those unrestricted fund balance classifications could be used. The City has not established a formal policy to set forth a minimum level for fund balances.

2. STEWARDSHIP, COMPLIANCE, AND ACCOUNTABILITY

A. Budgetary information

The City follows the following procedures in establishing the budgetary data reflected in the financial statements:

1. Public hearings are conducted to obtain taxpayer comments.
2. Prior to October 1st, the budget is legally enacted through passage of an ordinance.
3. The City Manager is authorized to transfer budgeted amounts between departments within any fund; however, any revisions that alter the total expenditures of any fund must be approved by the City Council. Therefore the fund level is the legal level of control.
4. Formal budgetary integration is employed as a management control device during the year. The legally adopted budgets for the General Fund, certain special revenue funds and the Debt Service Fund are adopted on a basis consistent with generally accepted accounting principles.

CITY OF ROCKWALL, TEXAS

NOTES TO THE FINANCIAL STATEMENTS

2. STEWARDSHIP, COMPLIANCE, AND ACCOUNTABILITY – continued

5. Budgeted amounts are as originally adopted or as amended by the City Council. During 2018, individual amendments were not material in relation to the original appropriations. Any budgeted amounts appropriated at fiscal year-end and not spent automatically lapse.
6. The City did not adopt budgets for certain Special Revenue Funds. These unbudgeted Special Revenue Funds were as follows:

Emergency Siren Fund  
Art in Public Places Fund  
Vehicle Acquisition

7. Capital project funds were not budgeted. Since project-length financial plans usually extend into two or more fiscal years, annual comparisons would be confusing and misleading.

B. Excess of expenditures over appropriations

Expenditures exceeded appropriations by \$20,852 in the Public Safety fund due to an unforeseen computer equipment failure which necessitated the purchase of new hardware for the Municipal Court from court technology fees accounted for in this fund.

3. DETAILED NOTES ON ALL FUNDS

A. Deposits and investments

Deposits

Custodial credit risk for deposits is the risk that in the event of a bank failure, the City's deposits may not be returned or the City will not be able to recover collateral securities in the possession of an outside party. At September 30, 2018, the City's deposits were entirely insured or collateralized with securities held by the pledging financial institution's trust department or agent in the City's name; as a result, the City's deposits were not exposed to custodial credit risk.

Under a contractual agreement with North Texas Municipal Water District (NTMWD), depository accounts are maintained by NTMWD for interest and sinking, debt, and construction reserves totaling \$783,226, which are separately insured or secured by collateral pledged by NTMWD's depository. This amount is included in restricted cash on the statement of net assets.

The deposits of REDC and RTPA are covered by the City's depository contract and, therefore, at September 30, 2018, these deposits were entirely insured or collateralized with securities held by the pledging financial institution's trust department or agent in the City's name; as a result, the deposits of REDC and RTPA were not exposed to custodial credit risk.

E. Inter-fund receivables, payables, and transfers

The composition of inter-fund balances as of September 30, 2018 is as follows:

<u>Fund</u>	<u>Receivable</u>	<u>Payable</u>
General Fund	\$ 532,890	\$ -
Non-major Governmental Funds	-	401,622
Internal Service Funds	-	131,026
Discretely Presented Component Unit	<u>-</u>	<u>242</u>
Totals	<u>\$ 532,890</u>	<u>\$ 532,890</u>

The outstanding balances between funds result primarily from the time delay between the dates that inter-fund goods and services are provided and payments between funds are made. Also, working capital loans are made to capital projects funds in advance of debt issuances. These are expected to be collected within one year.

The composition of inter-fund transfers for the year ended September 30, 2018 is as follows:

<u>Fund</u>	<u>Transfer In</u>	<u>Transfer Out</u>
Major Governmental Funds		
General Fund	\$ 25,000	\$ 3,215,500
Non-major Governmental Funds	1,255,466	2,024,916
Water and Sewer Enterprise Fund	1,345,000	1,015,050
Internal Service Funds	<u>3,880,000</u>	<u>250,000</u>
Total	<u>\$ 6,505,466</u>	<u>\$ 6,505,466</u>

Transfers are used to move unrestricted revenues to finance various programs or capital projects that the City must account for in other funds in accordance with budgetary authorizations.

CITY OF ROCKWALL, TEXAS

F. Long-term debt

General obligation debt

The City issues general obligation debt (in the form of general obligation bonds, certificates of obligation, contractual obligations, and notes payable) to provide funds for the acquisition and construction of major capital facilities. General obligation debt has been issued for both governmental and business-type activities. These issues are direct obligations and pledge the full faith and credit of the City. General obligation debt outstanding as of September 30, 2018 is as follows:

Purpose	Original Amount	Year of Issue	Final Maturity	Interest Rate	Balance 9/30/2018
<b>Governmental Activities</b>

4. OTHER INFORMATION

A. Risk management

The City is exposed to various risks of loss related to torts; theft of, damage to, and destruction of assets; errors and omissions; injuries to employees; employee health benefits; and other claims of various natures.

The City uses a medical self-insurance fund to pay medical and dental claims of City employees and their covered dependents and minimize the total cost of annual medical insurance to the City. Medical claims in any one year exceeding \$100,000 per covered individual, or approximately \$2,698,472 in the aggregate for the group, are covered through a private insurance carrier. Additionally, life insurance policy premiums for each employee are paid through the fund. The self-insurance fund is funded by operating transfers from other funds and charges to employees for extended benefits at their option. The City does not believe there are material claims incurred but not reported as of September 30, 2018.

The City uses a Self-Insurance and Risk Management Program (as permitted by law and its home rule charter) to insure itself against the various risks of liability or loss to which it is exposed, either through an insurance provider or through a defined self-insurance program. The City issued certificates of obligation, based on an actuarial analysis, to fund a self-insured workers' compensation plan. Under this plan, workers' compensation insurance is provided in accordance with state statutes to all City employees. To protect the assets of the plan from a catastrophic claim, the City has purchased stop loss coverage in the amount of \$200,000 per occurrence with a maximum City liability of \$600,000 per year.

CITY OF ROCKWALL, TEXAS

NOTES TO THE FINANCIAL STATEMENTS

4. OTHER INFORMATION – continued

A. Risk management – continued

The Workers' Compensation Fund (an internal service fund) accounts for the activity of this plan. The City establishes claim liabilities based on estimates of the ultimate cost of claims reported but unsettled and of claims incurred but not reported. Any claims incurred and not reported are not believed to be significant to the City's financial statements.

Changes in the balances of claims liabilities during the past two years are as follows:

	Employee Benefits		Worker's Compensation	
	2018	2017	2018	2017
Claims payable beginning of the year	\$ 395,627	\$ 179,290	\$ 76,389	\$ 152,373
Claims incurred	2,863,449	4,161,875	137,856	177,722
Payment on claims	<u>(2,901,294)</u>	<u>(3,945,538)</u>	<u>(120,297)</u>	<u>(253,706)</u>
	<u>\$ 357,782</u>	<u>\$ 395,627</u>	<u>\$ 93,948</u>	<u>\$ 76,389</u>

Commercial insurance is purchased for the other risks of loss to which the City is exposed. There have been no significant reductions in insurance coverage and settlement amounts have not exceeded insurance coverage for the current year or the three prior years.

B. North Texas Municipal Water District

The District is a conservation and reclamation district and political subdivision of the State of Texas, created and functioning under Chapter 62, Acts of 1951, 52nd Legislature, Regular Session, as amended, originally compiled as Vernon's Article 8270-141 (the "Act"), pursuant to Article 16, Section 59 of the Texas Constitution. The District comprises all of the territory of its member cities, viz., Allen, Garland, Princeton, Plano, Mesquite, Wylie, Rockwall, Farmersville, McKinney, Richardson, Forney, Royse City, and Frisco (the "Member Cities"). The District was created for the purpose of providing a source of water supply for municipal, domestic and industrial use and for the treatment, processing, and transportation of such water to its Member Cities and to its other customers located in North Central Texas, all within the Dallas Standard Metropolitan Statistical Area.

Under the Act, including specifically Section 27 thereof, and under the Constitution and Statutes of the State of Texas, the District has broad powers to: (1) impound, control, store, preserve, treat, transmit and use storm and flood water, the water of rivers and streams, and underground water for irrigation, power and all other useful purposes and to supply water for municipal, domestic, power, industrial and commercial uses and purposes and all other beneficial uses and purposes; and (2) collect, transport, process, treat, dispose of, and control all municipal, domestic, industrial or commercial waste whether in fluid, solid or composite state, including specifically the control, abatement or reduction of all types of pollution. The City retains no ongoing financial interest, equity investments, and/or responsibilities for the District other than the contractual arrangements discussed more fully herein.

CITY OF ROCKWALL, TEXAS

NOTES TO THE FINANCIAL STATEMENTS

4. OTHER INFORMATION – continued

B. North Texas Municipal Water District – continued

The District has long-term contracts with the City to supply treated water and sewer treatment. The City's water contract with the District provides that the City pay a predetermined annual amount for treated water in twelve monthly installments. The amount of this annual payment is based upon an annually established rate per thousand gallons and the largest annual amount of water consumption of past years. The City owns one sewage treatment facility, Squabble Creek, and in 1978 entered into an agreement with the District for the construction of a second facility, Buffalo Creek. Under the terms of this agreement, the District issued contractually secured bonds in its name to construct and operate this sewage disposal plant for the City. In subsequent years, similar contractual agreements have been made to enable the District to expand the sewage treatment facilities and continue to provide sewage treatment services to the City. Under the terms of these contracts, the City's payments, which began when the facilities were first utilized, are equal to the operating and maintenance expenses for the next ensuing calendar year, as shown in the annual budget. The contracts further provide that the debt service payments will be equal to the principal and/or interest coming due on the bonds on the next succeeding interest payment date, plus the fees and charges of the paying agent and the registrar.

These contractual obligations have been included as capital lease obligations in amounts equal to the bonds outstanding under these agreements. Accordingly, the related assets have been capitalized and are being depreciated over the estimated life of the facilities.

The outstanding principal balance on the bond issues as of September 30, 2018, is \$3,881,713 See Note 3F for the annual requirements to amortize the bonds as of September 30, 2018.

With respect to the ground storage reservoir discussed above, the Cities of Rockwall and Heath are contractually obligated to make timely payments to the District representing 66.67% and 33.33%, respectively, of the related operating expenses and debt service payments. While the City anticipates its share of these payments to be 66.67%, the Cities of Rockwall and Heath are each contractually obligated to make any payments which the other party is required, but is unable, to make to the District.

C. Contingent liabilities and commitments

Amounts received or receivable from grantor agencies are subject to audit and adjustment by such agencies. Any disallowed claims, including amounts already collected, may constitute a liability of the applicable funds. The amounts, if any, of expenditures which may be disallowed by the grantor cannot be determined at this time although the City expects such amounts, if any, to be immaterial.

The City is a defendant in various lawsuits. Although the outcome of these lawsuits is not presently determinable, it is the opinion of the City's management that the resolution of these matters will not have a material adverse effect on the financial condition of the City.

As described in Note 3F above, the general revenues of the City are contingently liable in the amount of \$26,270,000 for general obligation bonds and certificates of obligation which are currently outstanding and recorded as obligations of the Enterprise Fund.

CITY OF ROCKWALL, TEXAS

NOTES TO THE FINANCIAL STATEMENTS

4. OTHER INFORMATION – continued

C. Contingent liabilities and commitments – continued

The City contracts for solid waste disposal with a third party. Under the terms of the agreement, the City bills and collects the residential billing and remits that amount to the contracting party. The contractor bills the commercial customers and remits a franchise fee to the City based on total revenues received from the contract.

The Rockwall Economic Development Corporation provides monetary incentives to companies to relocate within the City of Rockwall. At September 30, 2018, these commitments totaled \$5,604,454.

D. Defined Benefit Pension Plans

Plan Description:

The City participates as one of 866 plans in the nontraditional, joint contributory, hybrid defined benefit pension plan administered by the Texas Municipal Retirement System (TMRS). TMRS is an agency created by the State of Texas and administered in accordance with the TMRS Act, Subtitle G, Title 8, Texas Government Code (the TMRS Act) as an agent multiple-employer retirement system for municipal employees in the State of Texas. The TMRS Act places the general administration and management of the System with a six-member Board of Trustees. Although the Governor, with the advice and consent of the Senate, appoints the Board, TMRS is not fiscally dependent on the State of Texas. TMRS's defined benefit pension plan is a tax-qualified plan under Section 401 (a) of the Internal Revenue Code. TMRS issues a publicly available comprehensive annual financial report (CAFR) that can be obtained at [www.tmrs.com](http://www.tmrs.com).

All eligible employees of the City are required to participate in TMRS.

Benefits Provided:

TMRS provides retirement, disability, and death benefits. Benefit provisions are adopted by the governing body of the City, within the options available in the state statutes governing TMRS.

At retirement, the benefit is calculated as if the sum of the employee's contributions, with interest, and the city-financed monetary credits with interest were used to purchase an annuity. Members may choose to receive their retirement benefit in one of seven actuarially equivalent payments options. Members may also choose to receive a portion of their benefit as a Partial Lump Sum Distribution in an amount equal to 12, 24, or 36 monthly payments, which cannot exceed 75% of the member's deposits and interest.

At the date the plan began, the City granted monetary credits for service rendered before the plan began of a theoretical amount equal to two times what would have been contributed by the employee, with interest, prior to establishment of the plan. Monetary credits, also known as the matching ratio, are 200% of the employee's accumulated contributions and are only payable in the form of an annuity.

CITY OF ROCKWALL, TEXAS

NOTES TO THE FINANCIAL STATEMENTS

4. OTHER INFORMATION – continued

D. Defined Benefit Pension Plans - continued

Benefits Provided - continued:

Beginning in 1993, the City granted an annually repeating (automatic) basis for a monetary credit referred to as an updated service credit (USC) which is a theoretical amount which takes into account salary increases or plan improvements. If at any time during their career an employee earns a USC, this amount remains in their account earning interest at 5% until retirement. At retirement, the benefit is calculated as if the sum of the employee's accumulated contributions with interest and the employer match plus employer-financed monetary credits, such as USC, with interest were used to purchase an annuity. Additionally, initiated in 1993, the City provided an annually repeating (automatic) basis cost of living adjustments (COLA) for retirees equal to a percentage of the change in the consumer price index. (CPI).

A summary of plan provisions for the City are as follows:

Employee Deposit Rate	7%
Matching Ratio (City to Employee)	2 to 1
Years required for vesting	5
Service retirement eligibility	20 years at any age, 5 years at age 60 and above
Updated Service Cost	100% Repeating
Annuity Increase to retirees	70% of CPI Repeating

The City does not participate in Social Security.

Employees covered by benefit terms –

At the December 31, 2017 valuation and measurement date, the following employees were covered by the benefit terms:

Retirees or beneficiaries currently receiving benefits	92
Inactive employees entitled to but not yet receiving benefits	90
Active employees	271
	<u>453</u>

CITY OF ROCKWALL, TEXAS

NOTES TO THE FINANCIAL STATEMENTS

4. OTHER INFORMATION – continued

D. Defined Benefit Pension Plans - continued

Contributions:

Under the state law governing TMRS, the contribution rate for each city is determined annually by the consulting actuary, using the Entry Age Normal (EAN) actuarial cost method. The actuarially determined rate is the estimated amount necessary to finance the cost of benefits earned by employees during the year, with an additional amount to finance any unfunded accrued liability.

Employees for the City of Rockwall were required to contribute 7% of their annual gross earnings during the fiscal year. For fiscal year 2018, the City made contributions of 16.58%, for calendar year 2017 and 16.36% in 2018 which exceeded the actuarially determined city contribution by .05%.

Net Pension Liability:

The City's Net Pension Liability (NPL) was measured as of December 31, 2017, and the Total Pension Liability (TPL) used to calculate the Net Pension Liability was determined by an actuarial valuation as of that date.

Actuarial assumptions –

The Total Pension Liability in the December 31, 2017 actuarial valuation was determined using the following actuarial assumptions:

Inflation	2.5% per year
Overall payroll growth	3.0% per year
Investment Rate of Return	6.75%, net of pension plan investment expense, including inflation

Salary increases were based on a service-related table. Mortality rates for active members, retirees, and beneficiaries were based on the gender-distinct RP2000 Combined Healthy Mortality Table, with male rates multiplied by 109% and female rates multiplied by 103%. The rates are projected on a fully generational basis by scale BB to account for future mortality improvements. For disabled annuitants, the gender-distinct RP2000 Combined Health Mortality Tables with Blue Collar Adjustment are used with males rates multiplied by 109% and female rates multiplied by 103% with a 3-year set-forward for both males and females. In addition, a 3% minimum mortality rate is applied to reflect the impairment for younger members who become disabled. The rates are projected on a fully generational basis by scale BB to account for future mortality improvements subject to the 3% floor.

CITY OF ROCKWALL, TEXAS

NOTES TO THE FINANCIAL STATEMENTS

4. OTHER INFORMATION – continued

D. Defined Benefit Pension Plans - continued

Actuarial assumptions used in the December 31, 2017 valuation were based on the results of actuarial experience studies. This experience study was for the period December 31, 2010 through December 31, 2014. Healthy post-retirement mortality rates and annuity purchase rates were updated based on a Mortality Experience Investigation Study covering 2009 through 2011, and dated December 31, 2013. These assumptions were first used in the December 31, 2013 valuation, along with a change to the Entry Age Normal (EAN) actuarial cost method. Assumptions are reviewed annually. No additional changes were made for the 2017 valuation. After the Asset Allocation Study analysis and experience investigation study, the Board amended the long-term expected rate of return on pension plan investments from 7% to 6.75% effective January 1, 2018. Plan assets are managed on a total return basis with an emphasis on both capital appreciation as well as the production of income, in order to satisfy the short-term and long-term needs of TMRS.

The pension plan’s policy in regard to the allocation of invested assets is established and may be amended by the TMRS Board of Trustees.

The long-term expected rate of return on pension plan investments was determine using a building-block method in which best estimate ranges of expected future real rates of return (expected returns, net of pension plan investment expense and inflation) are developed for each major asset class. These ranges are combined to produce the long-term expected rate of return by weighting the expected future real rates of return by the target asset allocation percentage and by adding expected inflation. The target allocation and best estimates of arithmetic real rates of return for each major asset class are summarized in the following table:

<u>Asset Class</u>	<u>Target Allocation</u>	<u>Long-Term Expected Real Rate of Return (Arithmetic)</u>
Domestic Equity	17.50%	4.55%
International Equity	17.50%	6.35%
Core Fixed Income	10.00%	1.00%
Non-Core Fixed Income	20.00%	3.90%
Real Return	10.00%	3.80%
Real Estate	10.00%	4.50%
Absolute Return	10.00%	3.75%
Private Equity	5.00%	7.50%
Total	<u>100.00%</u>	

Discount Rate –

The discount rate used to measure the Total Pension Liability was 6.75%. The projection of each cash flows used to determine the discount rate assumed that employee contributions will remain at the current 7% and employer contributions will be made at the rates specified in statute. Based on that assumption, the pension plan’s Fiduciary Net Position was projected to be available to make all projected future benefit payments of current plan members. Therefore, the long-term expected rate of return on pension plan investments was applied to all periods of projected benefit payments to determine the Total Pension Liability.

Pension Plan Fiduciary Net Position –

Detailed information about the pension plan’s Fiduciary Net Position is available in a separately-issued TMRS financial report. That report may be obtained on the Internet at [www.tmr.com](http://www.tmr.com). Pension Expense and Deferred Outflows of Resources and Deferred Inflows of Resources Related to Pensions:

For the year ended September 30, 2018, the City recognized pension expense of \$3,158,177. This amount is included as part of Personnel Services expenses within the functional program activities.

At September 30, 2018, the City reported deferred outflow and inflows of resources related to pensions from the following sources:

	Deferred Outflows of Resources	Deferred Inflows of Resources
	<u>                    </u>	<u>                    </u>
Contributions subsequent to the measurement date	\$ 2,236,003	\$ -
Difference between projected and actual investment earnings	-	2,094,880

Texas Statewide Emergency Services Personnel Retirement Fund

The City acts as agent for the Texas Statewide Emergency Services Personnel Retirement Fund (the "Fund") which is a component unit of the State of Texas. The City reimbursed the Fund \$15,775 for benefits paid on a pay-as-you-go basis during the year in recognition of services provided to the City by volunteer emergency services personnel. The Fund has a Board of Directors not designated by City officials and is administered by the State Fire Fighters' Pension Commissioner. There are 2 active participants currently covered by the Fund and payments are being made to 36 retirees or their survivors. The Fund does not prepare separate financial statements for participating departments; however, financial statements for the Fund as a whole may be obtained from the administrator at Fire Fighters' Pension Commissioner, P.O. Box 12577, Austin, Texas 78711.

E. Post-Employment Benefits Other Than Pensions

Benefit Plan Description

Texas Municipal Retirement System (TMRS) administers a defined benefit group-term life insurance plan known as the Supplemental Death Benefits Fund (SDBF). This is a voluntary program in which participating cities may elect, by ordinance, to provide group-term life insurance coverage for their active members, including retirees. The City may terminate coverage under and discontinue participation in the SDBF by adopting an ordinance before November 1 of any year to be effective the following January 1. The SDBF covers both active and retiree benefits with no segregation of assets, and therefore doesn't meet the definition of a trust under GASB 75 (i.e., no assets are accumulated for OPEB) and as such the SDBF is considered to be an unfunded OPEB plan. For purposes of reporting under GASB 75, the retiree portion of the SDBF is not considered a cost sharing plan and is instead considered a single-employer, defined benefit OPEB plan with benefit payments treated as being equal to the employer's yearly contribution for retirees.

Benefits Provided

The death benefit for active employees provides a lump-sum payment approximately equal to the employee's actual salary (calculated based on the employee's actual earnings, for the 12-month period preceding the month of death); retired employees are insured for \$7,500; this coverage is an "other postemployment benefit" or OPEB.

CITY OF ROCKWALL, TEXAS

Employees Covered by Benefit Terms

At the December 31, 2017 valuation and measurement date, the following employees were covered by the benefit terms:

Membership \*

Number of

- Inactive employees or beneficiaries currently receiving benefits	64
- Inactive employees entitled to but not yet receiving benefits	27
- Active employees	<u>271</u>
- Total	<u><u>362</u></u>

\* Membership counts for inactive employees currently receiving or entitled to but not yet receiving benefits will differ from GASB 68 as they include only those eligible for a SDBF benefit (i.e. excludes beneficiaries, non-vested terminations due a refund, etc.)

Total OPEB Liability

The City’s total OPEB liability of \$548,790 was measured as of December 31, 2017, and was determined by an actuarial valuation as of that date.

Actuarial assumptions –

The total OPEB liability in the December 31, 2017 actuarial valuation was determined using the following actuarial assumptions applied to all periods included in the measurement, unless otherwise specified:

Salary increases	3.50% to 10.5% including inflation
Discount rate	3.31%
Retirees' share of benefit related costs	\$ 0

The discount rate was based on the Fidelity Index’s “20-Year Municipal GO AA Index” rate as of December 31, 2017.

Mortality rates – service retirees

RP 2000 Combined Mortality Table with Blue Collar Adjustment with male rates multiplied by 109% and female rates multiplied by 103% and projected on a fully generational basis with scale BB.

CITY OF ROCKWALL, TEXAS

NOTES TO THE FINANCIAL STATEMENTS

SCHEDULE OF CHANGES IN NET PENSION LIABILITY (ASSET) AND RELATED RATIOS  
LAST FOUR FISCAL YEARS (PREVIOUS YEARS ARE NOT AVAILABLE)

Plan Year	2014	2015	2016	2017
Actuarially Determined Contribution	\$ 2,761,413	\$ 2,950,480	\$ 2,897,712	\$ 3,102,508
Contributions in relation to the actuarially determined contribution	\$ 2,761,413	\$ 2,950,480	\$ 2,897,712	\$ 3,102,508
Contribution deficiency (excess)	\$ -	\$ -	\$ -	\$ -
Covered employee payroll	\$ 16,626,112	\$ 17,936,037	\$ 17,865,058	\$ 19,127,677
Contributions as a percentage of covered employee payroll	16.61%	16.45%	16.22%	16.22%

**Notes to Schedule of Contributions**

Notes Actuarially determined contribution rates are calculated as of December 31 and become effective in January 13 months later

**Methods and Assumptions Used to Determine Contribution Rates:**

Actuarial Cost Method	Entry Age Normal
Amortization Method	Level Percentage of Payroll, Closed
Remaining Amortization Period	28 years
Asset Valuation Method	10 Year smoothed market; 15% soft corridor
Inflation	2.50%
Salary Increases	3.50% to 10.50% including inflation
Investment Rate of Return	6.75%
Retirement Age	Experienced-based table of rates that are specific to the City's plan of benefits. Last updated for the 2015 valuation pursuant to an experience study of the period 2010 - 2014.
Mortality	RP2000 Combined Mortality Table with Blue Collar Adjustment with males rates multiplied by 109% and female rates multiplied by 103% and projected on a fully generational basis with scale BB.

**Other Information**

Notes There were no benefit changes during the year.

Total OPEB Liability - beginning of year	\$ 455,919
Changes for the year	
Service Cost	30,604
Interest on Total OPEB Liability	17,740
Changes in assumptions or other inputs	48,353
Benefit payments **	<u>(3,826)</u>
Net Changes	<u>92,871</u>
Total OPEB Liability - end of year	<u>\$ 548,790</u>

Texas Municipal Retirement System (TMRS) administers a defined benefit group-term life insurance plan known as the Supplemental Death Benefits Fund (SDBF). The SDBF covers both active and retiree benefits with no segregation of assets, and therefore doesn't meet the definition of a trust under GASB 75 (i.e., no assets are accumulated for OPEB) and as such the SDBF is considered to be an unfunded OPEB plan.

Changes in assumptions reflect a change in the discount rate from 3.78% as of December 31, 2016 to 3.31% as of December 31, 2017.

\*\* Due to the SDBF being considered an unfunded OPEB plan under GASB 75, benefit payments are treated as being equal to the employer's yearly contributions for retirees.

## NONMAJOR GOVERNMENTAL FUNDS

### *SPECIAL REVENUE FUNDS*

**Special revenue funds are used to account for specific revenues that are legally restricted to expenditures for particular purposes.**

Cemetery – established to account for the annual income from the sale of plots and cemetery maintenance costs.

Public Safety – established to account for donations, court fees, and other public safety committed revenues.

Recreational Development – established to account for the annual lease income from marinas and golf course.

Radio System – established to account for revenues and expenditures for the support of the City's radio system.

Street Improvements – established to account for the proceeds of street improvement assessments.

Hotel Occupancy Tax – established to account for the annual income from hotel occupancy taxes.

Fire Equipment – established to account for funds to be used for the purchase of fire equipment for the volunteer fire department.

Aviation – established to account for funds received from airport operations and related expenses.

Recycling – established to account for funds to be used for the City's recycling program.

Emergency Siren – established to account for revenues accumulated and expenditures to add emergency sirens within the City.

Downtown Improvement – established to account for revenues and expenditures related to the City's efforts to revitalize the downtown square.

Art in Public Places – established to account for donations received for developing art displays in public areas such as parks.

Narcotics Unit – established to account for revenues and expenditures related to a seized funds and forfeitures.

## *CAPITAL PROJECTS FUNDS*

**Capital projects funds are used to account for the acquisition and construction of major capital facilities other than those financed by proprietary funds and trust funds.**

Capital Projects – established to account for miscellaneous street and drainage projects which are financed with contributions from the General Fund and the Rockwall Economic Development Corporation.

Equipment Acquisition – established to account for capital equipment acquisition using operating transfers from benefiting funds and residual proceeds from miscellaneous debt.

205 Bypass Project – established to account for revenues and expenditures related to the construction of the 205 Bypass roadway project.

The Harbor/TIF Capital Projects Fund – established to account for improvements in the Tax Increment Reinvestment Zone using the proceeds from the issuance of bonds.

CITY OF ROCKWALL, TEXAS  
RECONCILIATION OF THE DISCRETELY PRESENTED COMPONENT UNITS  
BALANCE SHEET TO THE STATEMENT OF NET POSITION  
SEPTEMBER 30, 2018

Total fund balances - discretely presented component units	\$ 20,196,577
Amounts reported for discretely presented component units in the statement of net assets are different because:	
Capital assets used in governmental activities are not reported in the funds.	18,159
Payables for bond principal which are not due in the current period are not reported in the funds.	(19,822,295)
Payables for bond interest which are not due in the current period are not reported in the funds.	(108,095)
Payables for compensated absences which are not due in the current period are not reported in the funds.	(13,422)
Payables for pension & OPEB liabilities which are not due in the current period are not reported in the funds	(214,371)
Deferred outflows of resources are not considered available funds and are not recorded in governmental funds:	
Pension contributions	(51,646)
Investment experience	55,076
Charges on refunding	16,292
OPEB contributions after 12/31/17	56
Change in Assumptions - OPEB	864
Deferred inflows or resources are not considered available funds and are not recorded in governmental funds	
Pension actual experience vs assumptions	<u>(18,156)</u>
Net assets of discretely presented component units	<u><u>\$ 59,039</u></u>

CITY OF ROCKWALL, TEXAS

CITY OF ROCKWALL, TEXAS  
RECONCILIATION OF THE STATEMENT OF REVENUES, EXPENDITURES,  
AND CHANGES IN FUND BALANCES OF DISCRETELY PRESENTED  
COMPONENT UNITS TO THE STATEMENT OF ACTIVITIES  
FOR THE YEAR ENDED SEPTEMBER 30, 2018

Net change in fund balances - discretely presented component units	\$	1,255,692
<p>Amounts reported for discretely presented component units in the statement of activities ("SOA") are different because:</p>		
<p>Expenditures are recognized in the governmental funds when paid. The Statement of Activities is presented on an accrual basis and expenses are reported when incurred. This is the net difference in pension &amp; OPEB costs.</p>		(653)
<p>The depreciation of capital assets used in governmental activities is not reported in the funds.</p>		(4,657)
<p>Repayment of bond principal is an expenditure in the funds but is not an expense in the SOA.</p>		1,697,857
<p>Bond issuance costs and similar items are amortized in the SOA but not in the funds.</p>		(14,977)
<p>Increase (decrease) in accrued interest from beginning of period to end of period.</p>		(42,595)
<p>Compensated absences are reported as the amount earned in the SOA but as the amount paid in the funds.</p>		<u>7,043</u>
Change in net assets of discretely presented component units	\$	<u><u>2,897,710</u></u>

CITY OF ROCKWALL, TEXAS  
 COMPUTATION OF DIRECT AND OVERLAPPING DEBT  
 SEPTEMBER 30, 2018  
 (unaudited)

TABLE D-17

Jurisdiction	Net General Obligation Bonded Debt Outstanding (1)	Percentage Applicable to the City of Rockwall (2)	Amounts Applicable to the City of Rockwall
Direct:			
City of Rockwall - debt repaid with property taxes	\$ 86,900,000	100.00%	\$ 86,900,000
Indirect:			
Rockwall Independent School District	480,596,636	66.61%	320,125,419
Rockwall County	99,520,000	51.09%	50,844,768
Total Indirect	580,116,636		370,970,187
Total Direct and Overlapping Bonded Debt	\$ 667,016,636		\$ 457,870,187
Average debt per capita			\$ 11,814

Source: Municipal Advisory Council of Texas Annual Report

(1) Includes all Governmental Activities General Obligation Bonds, Contractual Obligations, Certificates of Obligation and Capital Leases

(2) The percentage of overlapping debt applicable is estimated using taxable assessed property values. Applicable percentages were estimated by determining the portion of each governmental unit's taxable value that is within the city's boundaries and dividing it by each unit's total taxable value.

CITY OF ROCKWALL, TEXAS  
 COMPUTATION OF LEGAL DEBT MARGIN  
 LAST TEN FISCAL YEARS  
 (unaudited)

TABLE D-18

The City of Rockwall, Texas does not have a legal debt limit prescribed by state law. However, Article XI, Section 5 of the Texas Constitution applicable to cities of more than 5,000 population limits ad valorem tax rates to \$2.50 per \$100 assessed valuation for cities operating under a Home Rule Charter. Accordingly, the City's tax margin for the previous ten years was:

	Fiscal Year									
	2018	2017	2016	2015	2014	2013	2012	2011	2010	2009
Maximum Rate	2.50	2.50	2.50	2.50	2.50	2.50	2.50	2.50	2.50	2.50

***INTRODUCTORY SECTION***

June 18, 2018

To the Honorable Mayor,  
Members of the City Council,  
and the Citizens of the City of Rockwall, Texas:

The Comprehensive Annual Financial Report (CAFR) of the City of Rockwall for the fiscal year ended September 30, 2017, is hereby submitted in accordance with Section 7.18 of the City Charter. The financial statements are presented in conformity with generally accepted accounting principles (GAAP) and audited in accordance with generally accepted auditing standards by a firm of licensed certified public accountants.

Management assumes full responsibility for both the completeness and reliability of all of the information presented in this report. Fairness of the presentation, including all disclosures, rests with the City. To the best of our knowledge and belief, the enclosed data is accurate in all material respects and is reported in a manner designed to present fairly the financial position and results of operations of the various funds in the City. All disclosures necessary to enable the reader to gain an understanding of the City's financial activities have been included.

To provide a reasonable basis for making these representations, management of the City of Rockwall has established a comprehensive internal control framework that is designed both to protect the government's assets from loss, theft, or misuse and to compile sufficient reliable information for the preparation of the City of Rockwall's financial statements in conformity with GAAP. The internal control structure is designed to provide reasonable, but not absolute, assurance that these objectives are met. The concept of reasonable assurance recognizes that:

- (1) the cost of a control should not exceed the benefits likely to be derived; and
- (2) the valuation of costs and benefits requires estimates and judgments by management.

Because the cost of internal controls should not outweigh their benefits, the City of Rockwall's comprehensive framework of internal controls has been designed to provide reasonable rather than absolute assurance that the financial statements will be free from material misstatement. As management, we assert that, to the best of our knowledge and belief, this financial report is complete and reliable in all material respects. The internal control structure is subject to periodic evaluation by City management.

The City of Rockwall's financial statements have been audited by Fox, Byrd & Company P.C., a firm of licensed certified public accountants. The goal of the independent audit was to provide reasonable assurance that the financial statements of the City of Rockwall for the fiscal year ended September 30, 2017, are free of material misstatement. The independent audit involved examining, on a test basis, evidence supporting the amounts and disclosures in the financial

statements; assessing the accounting principles used and significant estimates made by management; and evaluating the overall financial statement presentation. The independent auditor concluded, based upon the audit, that there was a reasonable basis for rendering an unqualified opinion that the City of Rockwall's financial statements for the fiscal year ended September 30, 2017, are fairly presented in conformity with GAAP. The independent auditors' report is presented as the first component of the financial section of this report.

Management's discussion and analysis (MD&A) immediately follows the independent auditor's report and provides a narrative introduction, overview and analysis of the financial statements as required by GAAP. MD&A complements this letter of transmittal and should be read in conjunction with it.

## **PROFILE OF THE GOVERNMENT**

The City of Rockwall, Texas, county seat of Rockwall County, Texas was incorporated in 1874. Its name is derived from an underground rock wall discovered in 1854. The unusual rock formations are found throughout the county. The City is located on the eastern shore of Lake Ray Hubbard, 22 miles east of downtown Dallas on Interstate Highway 30. The Dallas/Fort Worth area is recognized as one of the top growth areas in the country. The Dallas/Fort Worth International Airport and Love Field in Dallas meet the air transportation needs of the region.

The City currently has a land area of approximately 29.79 square miles and an estimated population of 42,120.

The City of Rockwall adopted a home rule charter in 1985 which established a council-manager form of government. Charter amendments were adopted in 2005 and again in 2015. Policy making and legislative authority is vested in the City Council, which consists of a Mayor and six Council Members, all elected at large. The City Manager is responsible for carrying out the policies and ordinances of the City Council, overseeing the day-to-day operations of the City and for appointing the heads of the various departments. The mayor and six council members are elected to two year staggered terms. The government is empowered to levy a property tax on both real and personal property located within its boundaries. The government also has the power by state statute to extend its corporate limits by annexation, which is done periodically when deemed appropriate by the City Council.

The City of Rockwall provides a full range of services, including police and fire protection; the construction and maintenance of streets and other infrastructure; planning and zoning, parks and recreational activities and general administrative services. Additionally, the City provides water and sewer services as an enterprise function.

Discretely presented component units are legally separate entities and are not part of the primary government's operations. The City of Rockwall is financially accountable for its component units. Accordingly, the Rockwall Economic Development Corporation (REDC) and Rockwall Technology Park Association are included in these financial statements and are explained in more detail in Note 1 of the Notes to the Financial Statements.

## **Factors Affecting Financial Condition**

The information presented in the financial statements is best understood when considered from the broader perspective of the specific environment within which the City of Rockwall operates.

### **Local Economy**

The City of Rockwall is situated in the Dallas/Fort Worth Consolidated Metropolitan Statistical Area. With its concentration of commercial and retail development, the City of Rockwall has long drawn shoppers from surrounding areas. As the national economy began to improve over the last year, Rockwall's local economy benefitted from a mix of new businesses and the renewed success of others. Rockwall saw an increase of 4.91% in our local sales tax revenues. The city has a varied tax base including a mix of residential, commercial and light industrial properties. Total property values rose by 9.35%. The most recent five-year average is 6.85% per annum. During the downturn in the economy, 2008 – 2012, growth in the tax base slowed but remained positive each year. The City's largest taxpayers are varied and include industry, retail developments, multi-family properties, and medical facilities. Table D-12 in the Statistical Section provides further information on the principal taxpayers. The Rockwall Economic Development Corporation continues to successfully market Rockwall and assist companies looking to locate their business in the City. The year's highlights included:

- Pratt Industries began construction on their 391,600 square foot facility which serves the recycled paper goods industry providing shipping ready boxes to customers including Amazon.
- Lollicup USA has announced their corporate move to Rockwall and will commence construction on their project mid-2018. The building will be in excess of 600,000 square feet and the taxable value is projected to be approximately \$30,000,000 in the first full year of operation.
- The Harbor retail development is under new ownership and significant investment is being made in the property. A number of new tenants are expected in 2018 as well as an expansion and modernization of the Cinemark Theatre.
- Downtown Rockwall underwent extensive reconstruction in recent years. Several new stores have moved into the downtown square following the completion adding to the mix of professional, retail, restaurant and service locations. The City benefits from the attention garnered from Rockwall's being a Texas Main Street City. The City has seen a 39.29% increase in sales taxes in the downtown area in the last five years.

### **Long-term Planning**

The City Council and staff recognize the need for long-range planning. It is the goal of the City government to provide responsible leadership, services, and infrastructure to achieve a safe environment and provide for a high quality of life.

## Financial Policies

The City Council adopted financial policies in 2001 which have guided the City, allowing us to build a strong fund balance, and reinforcing the city's philosophy to budget conservatively for both revenues and expenditures. The general fund reserve policy is reviewed annually and updated most recently in 2009. The policy states the City should maintain no less than 3 months of reserves and will allow reserves in excess of 3.5 months of recurring operating expenditures to be transferred to a capital projects fund to be used to fund future projects. The City has maintained reserves at or above this level for many years. This allows the City to respond to emergencies or downturns while not overburdening the taxpayers. Reserves over the 3.5 month level were available to fund capital projects in 2017. The City had, for many years, financed vehicle additions and replacements with short-term debt. A healthy reserve allowed the City to purchase all vehicles on a pay-as-you-go basis.

## Budget Overview

The City Manager proposes a balanced budget to the City Council each year by August 1. Public hearings are conducted to receive comments and priorities of the community at large. The City Council must adopt the operating budget and set the City's tax rate for the next year by October 1<sup>st</sup> of each year.

## Planning Projects

The City Council values long-range planning and have supported a number of efforts outlined below.

## Capital Improvement Planning

In May 2012, voters approved propositions to provide downtown accessibility projects, roadway rehabilitation and Interstate 30 ramp adjustments. The City hired design and construction management professionals to work with staff and City Council to develop the vision for the projects and cost estimates to ensure the projects as approved can move forward and be completed within budget. Engineering firms were selected for each of the street rehabilitation projects and the planning and design work is nearing completion. Construction should begin on several road improvement projects in 2018.

## Strategic Planning

The City Council and staff worked on an updated strategic planning document with the goal of a simplified, easy to understand final product. The initial stage of the plan included looking at the current breakdown between the residential and commercial tax base and whether or not the current land use plan will allow that mix to be maintained or improved in order to decrease the tax burden on residential properties. It was determined that sufficient non-residential land uses are planned but that any change from non-residential to residential zoning needs to be evaluated in light of the city's strategic goals. The City receives higher sales taxes per capita than other area cities, pointing to the City's long standing status as a regional shopping destination. As cities to the east grow and add retailers the City will strive to add specialty retailers to continue the regional draw. The remaining I-30 corridor development will need to be well-planned and executed. A citizen committee was formed to work with the City Planning Department staff to make amendments to the Comprehensive Plan and develop an I-30 Corridor plan. The long-term infrastructure needs of the City including streets, water and sewer will need to be planned and

funded. A study was conducted in late 2016 to assess the condition of each street and alley in the city to determine the remaining useful life of each one. The findings will then be evaluated to determine the level at which preventive maintenance will forestall more extensive repairs or replacement. The next stages of the strategic planning focused on the individual departments of the City and how they address both the goals of the larger plan and strategic needs within the department. The final plan was used as a resource in the budget planning process in 2017.

## **Future Development**

### **Transportation**

The majority of the City's main thoroughfares are state facilities. TxDOT contractors began construction of the FM3549 overpass project which is a 24-month project. FM 3097 – Horizon Road – a heavily traveled roadway in the retail and medical corridor has been under construction in 2017 with substantial completion expected in late calendar 2017. The City and TxDOT jointly funded the project. The City funded and TxDOT managed the construction of a project to reverse two ramps on I-30 improving access to John King Boulevard and alleviating pressure on other intersections during the FM 3549 overpass project. TxDOT has begun planning for the widening of SH205 in the 3 counties it serves. The City Council and staff worked closely with TxDOT to come to agreement to move the current SH205 to existing John King Boulevard to the East. This had long been the City's desire but previous attempts had not reached fruition. This change will allow the present course of SH205 to become a city street with the ability for traffic flow and speeds to be managed by the City

The City is a member of a County-wide Consortium which allows County government officials to work with officials of each of the seven cities in the county to further transportation planning efforts. The Consortium meets monthly to discuss funding alternatives for the County's transportation needs, which also involve planning and state participation. The County's bond initiatives allow funding for the advance planning and design of several major roadway projects. This allows the projects to be ready to commence as soon as state funding is allocated for construction. The Consortium was successful in securing new state funding for both SH276 and FM 3549 widening projects after the state-wide referendums provided new dollars for the state's highway system. The fact that the projects were in design and would be ready to bid when dollars were made available was crucial in getting these new funds. The Consortium is continuing to look at other roadways in the County to get the next list of projects vetted and serves as a positive model for neighboring areas to see the successes that this collaboration has achieved.

### **Medical Services**

The presence of acute care at Presbyterian Hospital of Rockwall kicked off growth in the medical corridor. Several new medical buildings with Doctor's suites and state of the art out-patient diagnostic imaging facilities have allowed Rockwall to become a regional medical services destination with new offices continuing to open each year. The medical destination drives other growth in the area and is an important boost to the City as visitors spend time dining and shopping while in town.

## Retail / Entertainment

“The Harbor” development is situated on the shores of Lake Ray Hubbard at I-30. A public/private partnership provided opportunities for new retailers in the Bella Harbor development as well as public open space and a full-service Hilton Hotel and Conference Center. The Conference Center continues to attract events including numerous corporate training and retreat sessions and expects many which are scheduled for 2017. The retail center is under new ownership in 2017 with many positive changes being pursued. A new Marriott Springhill Suites with 105 suites and conference space broke ground with its grand opening in late summer 2017. The hotel is locally owned and operated and employs a sales director to market the property to mid-size regional conferences and meetings. The two hotel properties are working together where opportunities to collaborate allow conferences to be attracted to Rockwall.

In conjunction with private development, the City established a tax increment financing (TIF) zone on an approximately 103 acre tract which allowed the financing and development of public open space to complement the development and allow citizens access to the Lake Ray Hubbard shore line. The City partnered with Rockwall County, and the Rockwall Economic Development Corporation to establish the TIF to finance the public projects. In a second project, the City collaborated with the Trend Tower developer on construction of the seven-story, 85,000 square foot office tower overlooking the lake. Trend Tower offered Class-A office space to its corporate tenants as it opened in 2014. The City has signed a lease agreement with Trend on use of the parking garage offering much needed public parking for the Harbor events.

The City’s extremely successful 12-week Concert on the Lake Series managed by the City’s Recreation Department draws more than 5,000 attendees each Thursday evening for a free concert. Surveys conducted during the events gather data regarding the distance from which visitors traveled and approximate retail and restaurant dollars expended while here. The term “Free Live Music Capital of North Texas” has been coined to describe the many opportunities available year round in both public and restaurant venues.

Founder’s Day held annually in Myers Park allows residents and visitors to shop merchant’s wares, enjoy free concerts and children’s activities all day. The event culminates with a concert by a nationally recognized artist, also free to all who attend. This year the downtown merchants sponsored an art exhibit and sale during the day and shuttle service was provided between the two event locations.

A Farmer’s Market brings visitors downtown Saturdays from May to October. The annual “Rib Rub and Run” BBQ contest draws more than 50 teams to the downtown square. The Main Street Advisory Board and “Friends of Downtown Rockwall”, citizen volunteer group, worked to plan more special events to bring shoppers downtown. A late evening shopping event called “Night Owls” added late evening hours and live musical entertainment each Thursday, Friday and Saturday evening on the newly opened San Jacinto Plaza bringing people out to enjoy a relaxing evening downtown. The many shops in the Downtown area provide a wide variety of shopping opportunities and vacancies are rare and filled quickly.

Utilities

The water and wastewater rates were increased in 2017. The City purchases treated water as a founding member city of the North Texas Municipal Water District. With extremely heavy 2015 rains the drought which had extended over several years and seemed to be worsening was broken and the area lakes filled completely. As the drought had worsened the NTMWD asked its member and customer cities to reduce consumption by a minimum of 10%. Rockwall residents were so receptive to the call for conservation that actual consumption was reduced by more than 37%. While consumption has increased as time passes, it remains more than 25% below our peak year in 2012. Sales for the City’s water system increased by 5.53%. The City’s water system is recognized with the Texas Commission on Environmental Quality’s “Superior” rating.

The City actively works to acquire the right to serve recently annexed areas which are currently served by wholesale water supply corporations. It remains the City’s desire to be the provider for all residents in our city limits.

Debt Administration: Two ratios traditionally used to analyze the debt structure of municipalities are presented below. Revenue debt has been excluded since system charges are used to retire the debt.

Outstanding General Obligation Debt at 9-30-17 (net of Debt Service)	\$119,448,877
Estimated Population	42,120
G.O. Debt Per Capita	\$2,836
Net G.O. Debt per Assessed Value	2.53%

The City seeks a bond rating update as new debt is issued. The current ratings are shown below:

	<u>General Obligation</u>	<u>Sales Tax(REDC)</u>
Standard & Poor’s Rating Group	AA+	A-
Moody’s Investor Service Inc.	Aa2	A1

ACKNOWLEDGEMENTS

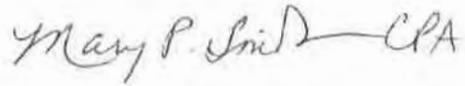

The preparation of the comprehensive annual financial report on a timely basis was made possible by the dedicated service of the entire staff of the Finance Department. Each member of the department has our sincere appreciation for the contributions made in the preparation of this report.

In closing, without the leadership and support of the governing body of the City, preparation of this report would not have been possible.

Sincerely,

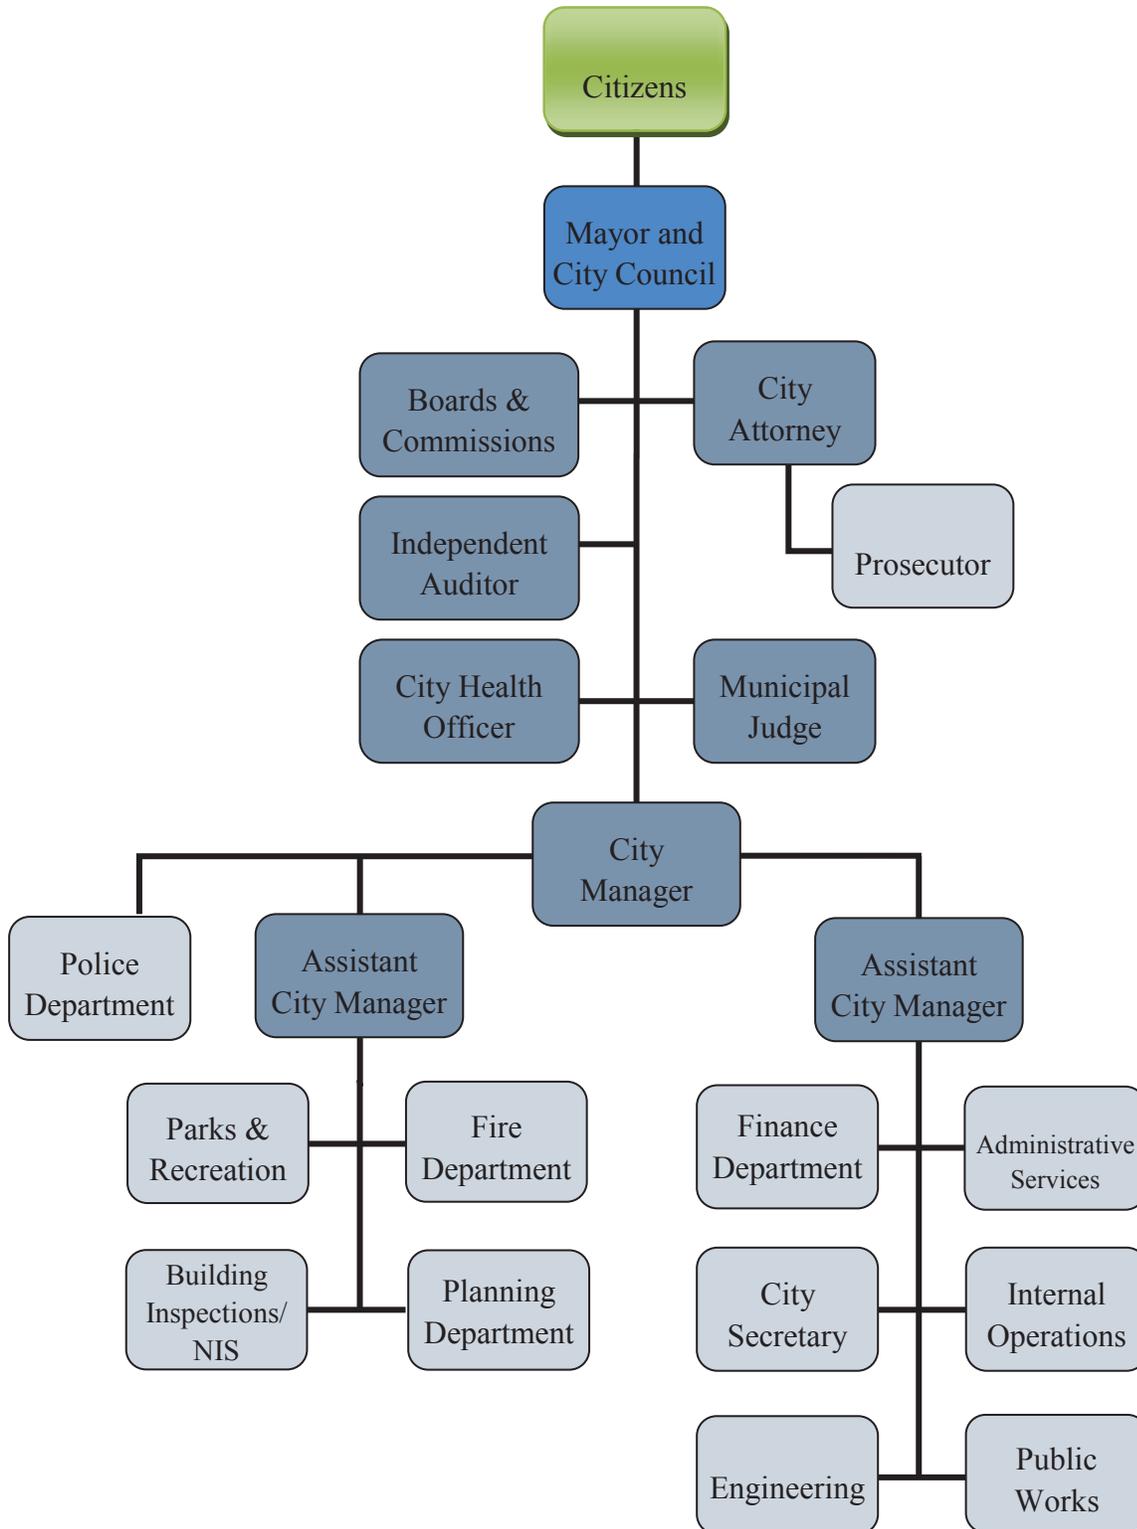

Richard R. Crowley

## INDEPENDENT AUDITOR'S REPORT

To the City Council  
City of Rockwall, Texas

We have audited the accompanying financial statements of the governmental activities, the business-type activities, the aggregate discretely presented component units, each major fund, and the aggregate remaining fund information of the City of Rockwall, Texas, as of and for the year ended September 30, 2017, and the related notes to the financial statements, which collectively comprise the City's basic financial statements as listed in the table of contents.

### **Management's Responsibility for the Financial Statements**

Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

### **Auditor's Responsibility**

Our responsibility is to express opinions on these financial statement based on our audit. We conducted our audit in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditors' judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessment, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinions.

## Opinions

In our opinion, the financial statements referred to above present fairly, in all material respects, the respective financial position of the governmental activities, the business-type activities, the aggregate discretely presented component units, each major fund, and the aggregate remaining fund information of the City of Rockwall, Texas, as of September 30, 2017, and the respective changes in financial position and, where applicable, cash flows thereof for the year then ended in accordance with accounting principles generally accepted in the United States of America.

## Other Matters

### *Required Supplementary Information*

Accounting principles generally accepted in the United States of America require that the management's discussion and analysis, the budgetary comparison information and the Texas Municipal Retirement System Schedule of changes in Net Pension Liability (Asset) and Related Ratios on pages 13-24 and 69-71 be presented to supplement the basic financial statements. Such information, although not a part of the basic financial statements, is required by the Governmental Accounting Standards Board, who considers it to be an essential part of financial reporting for placing the basic financial statements in an appropriate operational, economic, or historical context. We have applied certain limited procedures to the required supplementary information in accordance with auditing standards generally accepted in the United States of America, which consisted of inquiries of management about the methods of preparing the information and comparing the information for consistency with management's responses to our inquiries, the basic financial statements, and other knowledge we obtained during our audit of the basis financial statements. We do not express an opinion or provide any assurance on the information because the limited procedures do not provide us with sufficient evidence to express an opinion or provide any assurance.

### *Other Information*

Our audit was conducted for the purpose of forming opinions on the financial statements that collectively comprise the City of Rockwall, Texas' basic financial statements. The introductory section, combining and individual non-major fund financial statements and schedules, and statistical section are presented for purposes of additional analysis and are not a required part of the basic financial statements.

The combining and individual non-major fund financial statement and schedules are the responsibility of management and were derived from and relate directly to the underlying accounting and other records used to prepare the basic financial statements. Such information has been subjected to the auditing procedures applied in the audit of the basic financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the basic financial statements or to the basic financial statements themselves, and other additional procedures in accordance with auditing standards generally accepted in the United states of America. In our opinion, the combining and individual non-major fund financial statements are fairly stated, in all material respects, in relation to the basic financial statements as a whole.

The introductory and statistical section have not been subjected to the auditing procedures applied in the audit of the basic financial statements, and accordingly, we do not express an opinion or provide any assurance on them.

## MANAGEMENT’S DISCUSSION AND ANALYSIS

The discussion and analysis of the City of Rockwall’s financial performance provides an overview and analysis of the City’s financial activities for the fiscal year ended September 30, 2017. Please read it in conjunction with the City’s financial statements, which follow this section.

### FINANCIAL HIGHLIGHTS

- The City’s total net position was \$207,814,536 at September 30, 2017.
- During the year, the City’s governmental activities expenses were \$10,714,957 less than the \$52,616,041 generated in program revenues, taxes, other revenues and transfers.
- The assets of the City of Rockwall attributable to governmental activities exceeded its liabilities, net of deferred inflows and deferred outflows of resources at the close of the fiscal year ending September 30, 2017 by \$122,568,746 (net position).
- At the end of this fiscal year, the unassigned fund balance for the general fund was \$10,827,051 or approximately 30.5 percent of the total general fund operating expenditures and transfers out.
- The City’s total outstanding general obligation bonds and certificates of obligation (excluding enterprise and component unit debt) decreased by \$6,040,000 during fiscal year 2017. More detailed information is given in the notes section.

### OVERVIEW OF THE FINANCIAL STATEMENTS

This annual report consists of three parts—management’s discussion and analysis (this section), the basic financial statements, and required supplementary information. The basic financial statements include two kinds of statements presenting different views of the City:

The first two statements are government-wide financial statements that provide both long-term and short-term information about the City’s overall financial status.

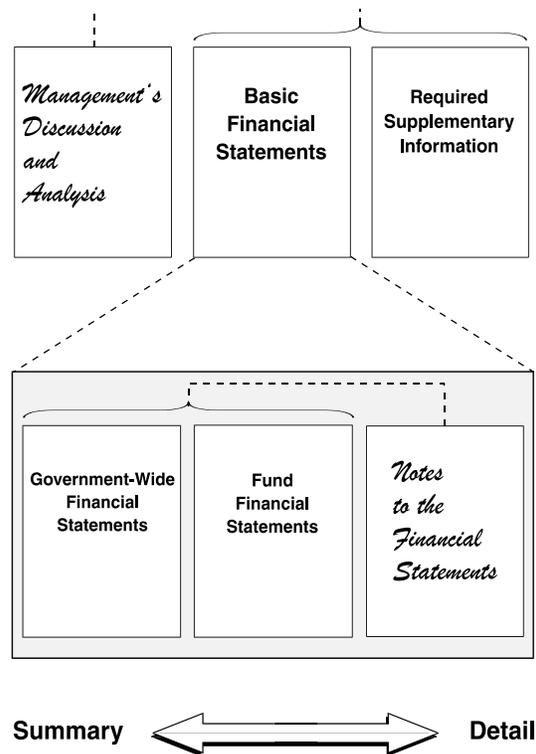

The remaining statements are fund financial statements that focus on individual parts of the government, reporting the City’s operations in more detail than the government-wide statements.

The governmental fund statements tell how general government services were financed in the short-term as well as what remains for future spending.

Proprietary fund statements offer short-term and long-term financial information about the activities the government operates like businesses.

Fiduciary fund statements provide information about the financial relationships in which the City acts solely as a trustee or agent for the benefit of others, to whom the resources in question belong.

Figure A-1, Required Components of the City’s Annual Financial Report

The financial statements also include notes that explain some of the information in the financial statements and provide more detailed data. The statements, followed by a section of required supplementary information, further explain and support the information in the financial statements. Figure A-1 shows how the required parts of this annual report are arranged and relate to one another.

**Figure A-2. Major Features of the City of Rockwall’s Government-wide and Fund Financial Statements**

<i>Type of Statements</i>	<b>Fund Statements</b>		
	<b>Government-wide</b>	<b>Governmental Funds</b>	<b>Proprietary Funds</b>
<i>Scope</i>	Entire City government (except fiduciary funds) and the City's component units	Activities of the City that are not proprietary or fiduciary, such as police, fire and parks	Activities the City operates similar to private business.
<i>Required financial statements</i>	◆ Statement of net position	◆ Balance Sheet	◆ Statement of net position
	◆ Statement of activities	◆ Statement of revenues, expenditures & changes in fund balances	◆ Statement of revenues, expenses & changes in fund net position ◆ Statement of cash flows
<i>Accounting basis and measurement focus</i>	Accrual accounting and economic resources focus	Modified accrual accounting and current financial resources focus	Accrual accounting and economic resources focus
<i>Type of asset/liability information</i>	All assets and liabilities, both financial and capital, short-term and long-term	Only assets expected to be used up and liabilities that come due during the year or soon thereafter; no capital assets included	All assets and liabilities, both financial and capital, short-term and long-term
<i>Type of inflow/outflow information</i>	All revenues and expenses during year, regardless of when cash is received or paid	Revenues for which cash is received during or soon after the end of the year; expenditures when goods or services have been received and payment is due during the year or soon thereafter	All revenues and expenses during year, regardless of when cash is received or paid

### **Government-wide Financial Statements**

The government-wide statements are designed to provide readers with a broad overview of the City of Rockwall’s finances, in a manner similar to private-sector business.

The *statement of net position* presents information on all of the city of Rockwall’s assets and liabilities, with the difference between the two reported as *net position*. Over time, increases or decreases in net position may serve as a useful indicator of whether the financial condition of the City of Rockwall is improving or deteriorating. The statement of net position combines and consolidates governmental funds current financial resources (short-term spendable resources) with capital assets and long-term obligations. Other non-financial factors should also be taken into consideration, such as changes in the City’s property tax base and the condition of the City’s infrastructure, to assess the overall health or financial condition of the City.

The *statement of activities* presents information showing how the City’s net position changed during the most recent fiscal year. All of the current year’s revenues and expenses are taken into account regardless of when cash is received or paid. Thus, revenues and expenses are reported in this statement for some items that will only result in cash flows in future fiscal periods; for example uncollected taxes and earned but unused vacation leave. Both the statement of net position and the statement of activities are prepared utilizing the accrual basis of accounting.

In the Statement of Net Position and the Statement of Activities, the City is divided into three kinds of activities:

*Governmental activities* – Most of the City’s basic services are reported here, including administration, police, fire, planning and zoning, finance, parks and recreation, municipal court and engineering. Property taxes, sales taxes, franchise fees and charges for services provide funds for most of the activities.

*Business-type activities* – The City charges fees to customers to help it cover all or most of the cost of certain services it provides. We report the City’s water and sewer system here.

*Component Units* – The City of Rockwall (the primary government) includes two discretely presented component units. The City’s Type A Sales Tax Corporation known as the Rockwall Economic Development Corporation and the Rockwall Technology Park Association. Although legally separate, The City of Rockwall is financially accountable for these component units. The City Council appoints the component unit’s Board of Directors, sets the budget and approves any debt issuance.

The government-wide financial statements are found on pages 25-26 of this report.

## **Reporting the City’s Most Significant Funds**

### Fund Financial Statements

The fund financial statements provide more detailed information about the City’s most significant funds—not the City as a whole. *Funds* are accounting devices the City uses to keep track of specific sources of funding and spending for particular purposes. Some funds are required by State law and by bond covenants. However, the City establishes other funds to control and manage money for particular purposes or to show that it is properly using certain taxes and grants.

The City has the following types of funds:

*Governmental funds*—Most of the City’s basic services are included in governmental funds, which focus on (1) how cash and other financial assets that can readily be converted to cash flow in and out and (2) the balances left at year-end that are available for spending. Consequently, the governmental fund statements provide a detailed short-term view that helps users of the financial statements determine whether there are more or fewer financial resources that can be spent in the near future to finance the City’s programs. By comparing information presented for governmental funds with similar information presented for governmental activities in the government-wide financial statements, readers may better understand the long-term impact of the government’s near-term financing decisions. Because this information does not encompass the additional long-term focus of the government-wide statements, we provide additional information at the bottom of the governmental funds statement, or on the subsequent page, that explain the relationship (or differences) between them.

The City of Rockwall maintains 23 individual governmental funds. Information is presented separately in the governmental funds balance sheet and in the governmental funds statement of revenues, expenditures and changes in fund balances for the General fund, Debt Service fund, and G.O. Bonds Capital Projects fund, which are considered major funds. Data from the other 20 governmental funds are combined into a single, aggregated presentation. Individual fund data for each of these non-major governmental funds is provided in the form of combining statements elsewhere in this report.

*Proprietary funds*—Services for which the City charges customers a fee are generally reported in proprietary funds. Proprietary funds, like the government-wide statements, provide both long-term and short-term financial information. The City's enterprise funds (a component of proprietary funds) are identical to the business type activities that are reported in the government-wide statement but provide more detail and additional information such as cash flows, for proprietary funds. The Internal Service funds (the other component of proprietary funds) are utilized to report activities that provide services for the City's self-insurance funds. The Internal Service funds are reported as governmental activities in the government-wide financial statements.

The City of Rockwall maintains an Enterprise Fund to account for water and sewer services provided to the City's retail and wholesale customers. All activities associated with providing such services are accounted for in this fund, including administration, operations, maintenance, debt service, capital improvements, billing and collection. The City's intent is that all costs of providing the services to the public on a continuing basis are financed through user charges in a manner similar to a private business enterprise.

The City maintains two internal service funds to account for funds accumulated to self-insure for health and workers compensation claims. Individual fund data for each of these business-type funds is provided in the form of combining statements elsewhere in this report.

*Fiduciary funds*—The City is the trustee, or *fiduciary*, for certain funds. It is also responsible for other assets that - because of a trust arrangement - can be used only for the trust beneficiaries. The City is responsible for ensuring that the assets reported in these funds are used for their intended purposes. All of the City's fiduciary activities are reported in a separate statement of assets and liabilities of the agency fund. We exclude these activities from the City's government-wide financial statements because the City cannot use these assets to finance its operations.

*Notes to the financial statements*-The notes provide additional information that is essential to a full understanding of the data provided in the government-wide and fund financial statements.

## **Other Information**

In addition to the basic financial statements and accompanying notes, this report presents certain *required supplementary information* concerning the City of Rockwall. This information is required by accounting principles generally accepted in the United States of America.

## CONDENSED GOVERNMENT-WIDE FINANCIAL INFORMATION

At the end of fiscal year 2017, the City's net position (assets exceeding liabilities) totaled \$207,814,536. This analysis focuses on the net position (Table 1) and changes in net position (Table 2).

The largest portion of the City's net position (86.1 percent) reflects its investment in capital assets (i.e., land, buildings, machinery, equipment, and infrastructure); less any related debt used to acquire those assets, which is still outstanding. The City uses these capital assets to provide services to citizens; consequently, these assets are not available for future spending. Although the City's investment in its capital assets is reported net of related debt, it should be noted that the resources needed to repay this debt must be provided from other sources, since the capital assets themselves cannot be used to liquidate these liabilities.

**Table 1**  
**Net Position**

	Governmental Activities		Business-Type Activities		Total Primary Government	
	2017	2016	2017	2016	2017	2016

## Governmental Activities

The City's total revenues of governmental activities were \$52,616,041. A significant portion 40.8%, of the City's revenues came from property taxes. Another 32.6% of revenue came from sales taxes. Ad valorem property tax revenues as a percent of revenues continue to increase each year due to the addition of new properties and increases in assessed valuation throughout the City. The City Council has chosen to either maintain the current rate or lower the tax rate each of the last five years. Total assessed values of the properties in the City increased by 9.35%. The City adopted a property tax rate of 45.43 cents per \$100 of assessed valuation for fiscal year 2017. Growth in the assessed valuation and conservative budgets allowed the City to lower the rate for fiscal year 2017 by 3.10 cents per hundred dollars of assessed valuation. Sales tax revenue increased over the prior year by 4.91% which was most influenced by increases in same stores sales. While housing starts will not return to pre-downturn levels, they are trending upward and are reflective of larger homes on larger tracts resulting in significantly higher price points. Developers started infrastructure work on several projects including additional phases of Stone Creek, Breezy Hill, and the new subdivision, Lakes of Somerset in 2017. The permit revenues increased by 43.7% due in large part to projects in the Technology Park and increasing home sales. Over the past several years, Rockwall County, of which the City of Rockwall is the County seat, was one of the fastest growing counties in America, and named the wealthiest county in Texas.

## Comparative Expenses – Governmental Activities

The total cost of all programs and services were \$41,901,084. Of this total, \$11,279,010 (26.9%) was for the Police Department. The department marginally increased expenditures for fiscal year 2017 when compared to the prior year. Staffing was realigned in the Police Department and an officer was promoted to a Sergeant position without filling the vacancy he created. In addition, officer salaries were increased to stay competitive

in our area job market. Fire Department costs were \$4,652,974 (11.1%) and reflected the City's efforts to continue grow and mature our combination paid/volunteer Fire Department. The City's strategic planning will include an ongoing focus on the staffing ratios and service needs of the area. The Public Works Department represents 8.89% of the City's costs due to increased funding for road rehabilitation projects. A study was previously funded to evaluate the pavement condition of all streets, alleys and sidewalks in the City limits. The results were evaluated and employed in the budget process for 2017 to determine priorities for maintenance projects which could reasonably be expected to improve the roadway and extend the time before more extensive repairs or replacement would be required in future capital projects. Administrative departments including Administration, Human Resources, and Internal Operations which is responsible for building maintenance, the public safety radio system and IT had combined costs of \$6,145,346 (13.9%).

### **Business-Type Activities**

The City's business-type activities recorded an increase of \$8,159,026 in net position. Retail water sales increased by 5.53% in part due to increased rates and stronger demand. Despite the lack of mandatory conservation measures, the City's water consumption has not returned to pre-drought levels. The City's rates were increased in 2013, 2014, 2015, 2016 and 2017. The City implemented a conservation focused water rate structure in 2001 and increases the rate tiers each time new rates are adopted. The rates for sewer were also increased and total sewer charges increased by 11.5% for the fiscal year. The city employs winter averaging to calculate sewer billing so revenues are largely not affected by restrictions on irrigating lawns. Water and sewer charges were \$20,535,568 which is an increase of \$1,436,530 over the prior fiscal year.

Water and wastewater impact fees (Capital recovery fees) revenue totaled \$1,562,188 for the fiscal year. Impact fees, paid by developers, are designed to reduce the system's initial costs in building assets to serve new growth. Residential development is assessed an impact fee at the building permit stage while commercial projects are assessed at the beginning of site development.

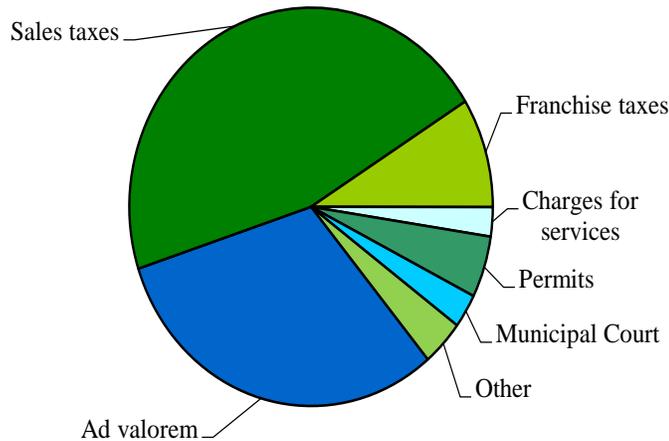

### **Component Units**

The Rockwall Economic Development Corporation (REDC) reported revenues including the ½-cent sales tax, authorized under the Type A Corporation statutes, of \$5,454,154. Assets managed by the corporation include an inventory of over 263 acres of land, zoned for light industrial uses and available for sale. The REDC continues to attract companies to the City through its marketing efforts and ability to match businesses to available land.

### **ANALYSIS OF INDIVIDUAL FUNDS**

The City's *General Fund* reported an ending unassigned fund balance of \$10,827,051. The largest source of general fund revenue is sales tax, it accounted for \$16,364,797 (46.15%) of total general fund revenue. Ad valorem property taxes account for \$11,023,225 (31.1%) of general fund revenues. The City's property tax rate is split between maintenance/operations and debt service. The City maintains the unassigned fund balance at or above acceptable levels as defined within the City's financial policies. This "reserve" balance allows the City Council to elect to fund projects unforeseen during the budgeting process and provides a measure of security against changes in the economy and the timing of cash flows. The City Council elected to use reserves to purchase equipment for the Police and Fire departments as well as additional funding for street maintenance. This planned use of reserves totaled \$2,091,150. The unassigned balance actually decreased by only \$338,821 or 3.13% due to stronger than anticipated sales tax and permit revenue sources.

## Revenues by Source – General Fund

The City's *Debt Service Fund* reported an increase in fund balance of \$1,627,413. Property tax collections for debt service requirements were \$9,983,143. This is required in order to pay debt service payments on bonds issued to construct numerous road and parks projects completed since the City's bond election in 2005 and again in 2012 authorized more than \$92,831,000 in projects. After extensive study, the City adopted a Roadway Impact Fee which was updated in 2014 and which provided \$813,253 in new revenue to this fund in fiscal year 2017. The City Council chooses to budget a portion of this fund balance each year toward meeting the debt service obligations. This allows the use of the debt service fund reserves to lessen the effect of new debt issues on the property tax rate each year.

The *Recreation Development Fund* was established to assign funding from certain recreation programs and concessions to the development of new recreation opportunities across the City. The City was successful in leveraging developer paid park land and equipment fees for grant match in order to be awarded two state grants for the development of Stone Creek and Breezy Hill neighborhood parks in 2017.

The *G.O. Bonds Capital Projects Fund* reported an assigned fund balance of \$9,798,743, a decrease of \$120,911 from the prior year. Engineering design is underway on several roadway improvement projects approved in the 2012 election.

### GENERAL FUND BUDGETARY HIGHLIGHTS

During fiscal year 2017, the City Council of the City of Rockwall amended the budget to provide funding for several unforeseen projects and to recognize salary savings over the year, as well as increases or decreases in revenues when compared to original projections. With the adjustments made to the budget, the original budgeted expenditures of \$32,935,700 increased to \$33,323,220 while revenue estimates increased from \$34,019,150 to \$35,275,450. The City of Rockwall had originally estimated the ending general fund unassigned balance to be \$8,945,822 however due to the budget adjustments mentioned above the fund balance was re-estimated to be \$9,814,602.

General fund revenues ultimately were \$35,459,361, a positive variance of \$183,911 over the amended budget estimate, reflecting a greater than anticipated increase in sales tax collections and construction permits late in the budget year. Actual general fund total expenditures were \$32,482,064 or \$841,156 less than final projections. Final expenditures in each department were generally less than anticipated. The City ended the

year with a fund balance of \$10,827,051, or \$338,821 less than the prior year. The lower fund balance is due to planned expenditures of capital items to reduce the fund balance in keeping with the City's financial policies. City Council intended to reduce the fund balance by more than \$2,000,000 but the conservative projections of both revenues and expenditures resulted in a significantly lesser change in fund balance.

**CAPITAL ASSET AND DEBT ADMINISTRATION**

Capital Assets

At the end of the fiscal year 2017 the City had \$304,942,585 (Table 3) invested in a broad range of capital assets, including buildings, parks facilities, roads, police and fire equipment and water and sewer lines. The balances shown below are net of accumulated depreciation.

**Table 3  
Capital Assets at Year-End**

	Governmental Activities		Business-Type Activities		Total Primary Government	
	2017	2016	2017	2016	2017	2016

Construction in progress	<u>2,534,984</u>	<u>13,354,326</u>	<u>1,191,129</u>	<u>1,881,337</u>	<u>3,726,113</u>	<u>15,235,663</u>
	<u>\$ 198,678,101</u>	<u>\$ 194,092,169</u>	<u>\$ 106,264,480</u>	<u>\$ 102,274,734</u>	<u>\$ 304,942,581</u>	<u>\$ 296,366,903</u>

The City held a bond election in May 2012 during which voters approved propositions to fund several street reconstruction projects as well as infrastructure and accessibility projects in the downtown area in excess of \$27,800,000. Roadway rehabilitation projects for city streets including Lakeshore Drive, Summit Ridge Drive, Throckmorton Street, Boydston Avenue and County Line Road are all under design in 2017. Construction on the combined Boydston/Throckmorton project is expected to begin in early December 2017 and will take approximately one year to complete. The remaining projects should be ready to bid later in 2018.

Additional information regarding the City's capital assets is found in note III-D on pages 48-50.

Debt

At year-end, the City had \$125,913,385 in bonds and capitalized leases shown in Table 4.

**Table 4  
City of Rockwall Outstanding Debt**

	Governmental Activities		Business-Type Activities		Total Primary Government	
	2017	2016	2017	2016	2017	2016
General obligation bonds	\$ 85,235,000	\$ 90,400,000	\$ 19,830,000	\$ 20,540,000	\$ 105,065,000	\$ 110,940,000
Certificates of obligation	7,705,000	8,580,000	8,910,000	10,690,000	16,615,000	19,270,000

	<u>\$ 92,940,000</u>	<u>\$ 98,980,000</u>	<u>\$ 32,973,385</u>	<u>\$ 35,801,724</u>	<u>\$ 125,913,385</u>	<u>\$ 134,781,724</u>

The City is permitted by Article XI, Section 5, of the State of Texas Constitution to levy taxes up to \$2.50 per \$100 of assessed valuation for general governmental services including the payment of principal and interest on general obligation long-term debt. The current ratio of net tax-supported bonded debt to assessed value of all taxable property is 2.53% or \$2,836 per capita.

The City’s bond ratings at September 30, 2017 were as follows:

	<u>General Obligation</u>	<u>Sales Tax(REDC)</u>
Standard & Poor’s Rating Group	AA+	A-
Moody’s Investor Service Inc.	Aa2	A1

Additional information on the City of Rockwall’s long-term debt may be found in note III-F, on pages 53-59 of this report.

### **ECONOMIC FACTORS AND NEXT YEAR’S BUDGETS AND RATES**

The City’s elected and appointed officials considered many factors when setting the fiscal year 2018 budget, tax rate, and fees that will be charged for the business-type activities. The City conservatively budgeted a 2% increase in sales tax revenue and modest increases in franchise fees. Increases are expected in construction related activity as new subdivision phases are beginning and housing sales continue to improve each year. Local builders encouraged the City leaders to project continued improvement in home starts for the coming year.

The City of Rockwall’s citizens enjoy above-average income levels per household. This combined with the City’s proximity to major highways, and the Dallas-Ft.Worth SMSA make Rockwall an attractive city in which to locate. The City prides itself on a quality school district and “hometown” atmosphere. The Rockwall Economic Development Corporation works to attract businesses with relocation incentives as well as business retention incentives such as workforce training opportunities. The City’s unemployment rate was 3.7%, well below the national levels.

The City of Rockwall considered these factors when adopting the General Fund budget for fiscal year 2018. The budgeted revenues for fiscal year 2018 total \$36,066,050 for the general fund. Ad valorem tax revenue is determined by two factors, the total assessed value established by the Rockwall Central Appraisal District and the tax rate established by the Rockwall City Council. The property tax rate was reduced to 42.36 cents per hundred dollars of assessed value.

The City adopted written financial policies in 2001, which require that revenues and expenditures be projected conservatively. The policies include debt level guidelines. These policies were reviewed by the City Council in 2009 and certain provisions related to the City’s fund balance were changed. The amended policy provides that the General Fund reserves should be no less than 3 months of recurring operating appropriations. In addition, the policies provide that should an audited fund balance at the end of the fiscal year exceed 3.5 months, the City Council may elect to transfer a portion to a Capital Projects Fund. The projected ending general fund balance for 2018 provides approximately 3.60 months of reserves for the City. The 2018 budget reflects continued funding for street maintenance projects and continues the process to fund future vehicle purchases through transfers to a Vehicle Acquisition fund.

The 2018 budget expenditures include the addition of a Police officer for traffic enforcement and an additional employee in the Wastewater division.

The previously developed water and sewer rate study has been updated to reflect increased charges from the North Texas Municipal Water District for treated water and the budget includes funding to have a comprehensive rate study update during 2018. A number of capital projects to replace older lines were undertaken in 2017. A phased program to add generators to each wastewater lift station will continue in 2018 and infrastructure asset management software will be implemented.

## **REQUESTS FOR INFORMATION**

This financial report is designed to provide our citizens, taxpayers, customers, and creditors with a general overview of the City's finances. For more information, contact the City's Assistant City Manager/Director of Finance, Mary Smith at (972) 771-7701; City of Rockwall; 385 South Goliad Street, Rockwall TX 75087. Email: [msmith@rockwall.com](mailto:msmith@rockwall.com).

CITY OF ROCKWALL, TEXAS  
 RECONCILIATION OF THE STATEMENT OF REVENUES, EXPENDITURES,  
 AND CHANGES IN FUND BALANCES OF GOVERNMENTAL FUNDS  
 TO THE STATEMENT OF ACTIVITIES  
 FOR THE YEAR ENDED SEPTEMBER 30, 2017

Net change in fund balances - governmental funds	\$ 1,127,236
Amounts reported for governmental activities in the statement of activities are different because:	
The net revenue (expense) of internal service funds is reported with governmental activities in the statement of net assets.	(54,630)
Certain assets are not available to pay for current period expenditures and are not reported as revenues in the funds. The following amounts represent the changes in these assets during the year:	
Property taxes receivable	108,071
Assessments receivable	6,033
Franchise taxes receivable	3,046
Court fines receivable	2,953
Governmental funds report capital outlays as expenditures. However, in the statement of activities the cost of these assets is allocated over their estimated useful lives and reported as depreciation expense. This is the amount by which depreciation (\$11,356,604) exceeded capital outlays (\$15,957,105) and retirements (\$14,567) in the current period.	
	4,585,934
Donations of capital assets increase net assets in the statement of activities, but are not reported in the funds because they do not provide current financial resources.	
	(1,797,028)
Governmental funds report debt issuance costs as expenditures. However, in the statement of activities these costs are allocated over the term of the underlying debt and reported as amortization expense. This is the amount of amortization in the current period, net of additions for debt issue cost incurred.	
	(126,100)
Expenditures are recognized in the governmental fund when paid. However, the Statement of Activities is presented on an accrual basis and expenses are reported when incurred. The following is the net difference in pension costs	
	866,406
Accrued interest payable on long-term debt does not require the use of current financial resources and is not reported in the funds. This is the amount of the change in accrued interest payable during the year.	
	(33,086)
Bond proceeds provide current financial resources to governmental funds, but issuing debt increases long-term liabilities in the statement of net assets. Repayment of debt principal is an expenditure in the governmental funds, but the repayment reduces long-term liabilities in the statement of net assets. This is the amount of repayments (\$6,040,000) and bond premium amortization (\$13,941) in the current period.	
	6,053,941
Compensated absences payable do not require the use of current financial resources and are not reported as expenditures in governmental funds. This is the amount of the change in accrued compensated absences during the year.	
	<u>(27,819)</u>
	<u>\$ 10,714,957</u>

CITY OF ROCKWALL, TEXAS

NOTES TO THE FINANCIAL STATEMENTS

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

*Reporting Entity*

The City of Rockwall, Texas (the "City") was founded in 1854 and incorporated in 1874. The City operates under the Council-Manager form of government as adopted by a home rule charter approved January 21, 1985. The City provides a full range of municipal services including public safety (police and fire), highway and streets, parks and recreation, health and social services, planning and zoning, and general administrative services. In addition, the City provides water and sewer services as a proprietary function of the City.

The accounting policies of the City conform to generally accepted accounting principles issued by the Governmental Accounting Standards Board (GASB) which is the recognized financial accounting standard setting body for governmental entities. The notes to the financial statements are an integral part of the City's basic financial statements.

The City is a home rule municipality governed by an elected Mayor and six-member City Council who appoint a City Manager. The City's (primary government) financial statements include its component units. The accompanying basic financial statements comply with the provisions of GASB Statement No. 14, *The Financial Reporting Entity*, in that the financial statements include all organizations, activities, functions and component units for which the City (the "primary government") is financially accountable. Financial accountability is defined as the appointment of a voting majority of a legally separate organization's governing body and either: (1) the City's ability to impose its will on the organization, or (2) the potential that the organization will provide a financial benefit to, or impose a financial burden on, the City.

*Discretely Presented Component Units*

The Rockwall Economic Development Corporation (REDC) is governed by a seven member Board of Directors appointed, at will, by the City Council. REDC represents the City by promoting it as a location for new business; it also acquires and develops land for that purpose. REDC collects a half-cent sales tax to support its activities.

The Rockwall Technology Park Association (RTPA) provides repair and maintenance of the common area within the park being developed by REDC. RTPA's Board of Directors is composed of representatives of the landowners. At September 30, 2017, REDC owned the majority of the land and the Board was therefore composed of REDC board members. When the park becomes 75% or more owned by private landowners, it will become an entity independent of the City. Until then, it is controlled by REDC, a discrete component unit of the City. RTPA, is effectively controlled by the City through REDC and thus provides a potential financial benefit or burden to the City.

The funds of both REDC and RTPA are composed of governmental fund types. Stand alone financial statements for REDC and RTPA as of and for the fiscal year ended September 30, 2017, are not prepared.

CITY OF ROCKWALL, TEXAS

NOTES TO THE FINANCIAL STATEMENTS

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES – continued

*Government-wide and Fund Financial Statements*

The government-wide financial statements (i.e. the statement of net position and the statement of activities) report information on all of the non-fiduciary activities of the primary government and its component units. For the most part, the effect of inter-fund activity has been removed from these statements. *Governmental activities*, which normally are supported by taxes and intergovernmental revenues, are reported separately from *business-type activities*, which rely, to a significant extent, on fees and charges for support. Likewise, the *primary government* is reported separately from certain legally separate *component units* for which the primary government is financially accountable.

The statement of activities demonstrates the degree to which the direct expenses of a given function or segment are offset by program revenues. *Direct expenses* are those that are clearly identifiable with a specific function or segment. *Program revenues* include: (1) charges to customers or applicants who purchase, use, or directly benefit from goods, services, or privileges provided by a given function or segment, and (2) grants and contributions that are restricted to meeting the operational or capital requirements of a particular function or segment. Taxes and other items not properly included among program revenues are reported instead as *general revenues*.

Separate financial statements are provided for governmental funds, proprietary funds, and fiduciary funds, even though the latter are excluded from the government-wide financial statements. Major individual governmental funds and major individual enterprise funds are reported as separate columns in the fund financial statements.

*Measurement Focus, Basis of Accounting, and Financial Statement Presentation*

The government-wide financial statements are reported using the *economic resources measurement focus* and the *accrual basis of accounting*, as are the proprietary fund and fiduciary fund financial statements. Revenues are recorded when earned and expenses are recorded when a liability is incurred, regardless of the timing of related cash flows. Property taxes are recognized as revenues in the year for which they are levied. Grants and similar items are recognized as revenue as soon as all eligibility requirements imposed by the provider have been met.

Governmental fund financial statements are reported using the *current financial resources measurement focus* and the *modified accrual basis of accounting*. Revenues are recognized as soon as they are both measurable and available. Revenues are considered to be *available* when they are collectible within the current period or soon enough thereafter to pay liabilities of the current period. For this purpose, the City considers revenues to be available if they are collected within 60 days of the end of the current fiscal period. Expenditures generally are recorded when a liability is incurred, as under accrual accounting. However, debt service expenditures, as well as expenditures related to compensated absences and claims and judgments, are recorded only when payment is due.

Property taxes, franchise taxes, licenses, and interest associated with the current fiscal period are all considered to be susceptible to accrual and so have been recognized as revenues of the current fiscal period. Only the portion of special assessments receivable due within the current fiscal period is considered to be susceptible to accrual as revenue of the current period. All other revenue items are considered to be measurable and available only when cash is received by the City.

CITY OF ROCKWALL, TEXAS

NOTES TO THE FINANCIAL STATEMENTS

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES – continued

*Measurement Focus, Basis of Accounting, and Financial Statement Presentation – continued*

The City reports the following major governmental funds:

The *General Fund* is the City's primary operating fund. It accounts for all financial resources of the general government, except those required to be accounted for in another fund.

The *Debt Service Fund* accounts for the resources accumulated and payments made for principal and interest on long-term debt of governmental funds.

The *G.O. Bonds Capital Projects Fund* accounts for the acquisition or construction of capital assets used in the operation of governmental funds.

The City reports the following major proprietary fund:

The *Water and Sewer Fund* operates the water distribution system and the wastewater treatment plants, wastewater pumping stations, and collection systems.

Additionally, the City reports the following fund types:

Internal Service Funds account for employees' health insurance and workers' compensation coverage services provided to other departments or agencies of the government on a cost-reimbursement basis.

Special Revenue Funds account for specific revenue sources that are legally restricted to expenditures for specified purposes (not including expendable trusts or major capital projects).

Capital Projects Funds account for the acquisition of capital assets or the construction of major capital projects (such as streets and sidewalks) not being financed by proprietary funds.

Fiduciary Funds account for assets held by the City in a trustee capacity or as an agent on behalf of others. The Agency Fund is custodial in nature and does not present results of operations or have a measurement focus. Agency funds are accounted for using the accrual basis of accounting. This fund is used to account for developer contributions for infrastructure projects related to various developments to be constructed at a later date.

Private-sector standards of accounting and financial reporting issued prior to December 1, 1989, generally are followed in both the government-wide and proprietary fund financial statements to the extent that those standards do not conflict with or contradict guidance of the Governmental Accounting Standards Board. Governments also have the *option* of following subsequent private-sector guidance for their business-type activities and enterprise funds, subject to this same limitation. The City has elected not to follow subsequent private-sector guidance.

NOTES TO THE FINANCIAL STATEMENTS

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES – continued

*Measurement Focus, Basis of Accounting, and Financial Statement Presentation – continued*

As a general rule the effect of inter-fund activity has been eliminated from the government-wide financial statements. Exceptions to this general rule are payments-in-lieu of taxes and other charges between the City's water and sewer function and various other functions of the City. Elimination of these charges would distort the direct costs and program revenues reported for the various functions concerned.

Amounts reported as *program revenues* include: (1) charges to customers or applicants for goods, services, or privileges provided, (2) operating grants and contributions, and (3) capital grants and contributions, including special assessments. Internally dedicated resources are reported as *general revenues* rather than as program revenues. Likewise, general revenues include all taxes, miscellaneous revenue, and interest income.

Proprietary funds distinguish *operating* revenues and expenses from *non-operating* items. Operating revenues and expenses generally result from providing services and producing and delivering goods in connection with a proprietary fund's principal ongoing operations. The principal operating revenues of the Water and Sewer enterprise fund are charges to customers for sales and services. The enterprise utility fund also recognizes as operating revenue the portion of tap fees intended to recover the cost of connecting new customers to the system. Operating expenses for the enterprise fund include the cost of sales and services, administrative expenses, and depreciation on capital assets. All revenues and expenses not meeting this definition are reported as non-operating revenues and expenses.

*Assets, liabilities, and net position or equity*

Deposits and investments

The City maintains various accounts for each fund at its depository. The City also has cash maintained by agents for debt payments and reserves, construction reserves and workers' compensation claims. For purposes of the statement of cash flows, the City considers all highly liquid debt instruments purchased with a maturity of three months or less to be cash equivalents.

The City's investment policy authorizes the Director of Finance to invest in the following types of investments:

- a. Obligations of the United States or its agencies and instrumentalities with finite maturity dates, with a maximum maturity of not greater than five (5) years. Laddering of investments should be considered.
- b. Direct obligations of the State of Texas or its agencies and instrumentalities, with stated finite maturity dates.
- c. Other obligations, with finite maturity dates, the principal and interest of which are unconditionally guaranteed or insured by the State of Texas or the United States or their respective agencies or instrumentalities.
- d. Obligations of states, agencies, counties, cities and other political subdivisions of any state having been rated as to investment quality by a nationally recognized investment rating firm and having received a rating of not less than "A" or its equivalent.

CITY OF ROCKWALL, TEXAS

NOTES TO THE FINANCIAL STATEMENTS

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES – continued

*Assets, liabilities, and net assets or equity – continued*

Deposits and investments - continued

- e. Certificates of deposit issued by a state or national bank domiciled in the State of Texas or a savings bank domiciled in the State of Texas provided that they are:
  - (1) Guaranteed or insured by the Federal Deposit Insurance Corporation or its successor,
  - (2) Secured by obligations outlined in items "a" through "d" above. The market value of all collateral must be marked to market on a daily basis and shall not be less than 102% of the principal amount of the certificate plus accrued interest, or
  - (3) Secured in any other manner in an amount provided by law for deposits of the City.
- f. Repurchase agreements which are fully collateralized by obligations of the United States or its agencies and instrumentalities, marked to market on a daily basis with a market value of at least 102% of the principal invested, including accrued interest. The securities being purchased must be pledged to the City and held in the City's name by a third party selected and approved by the City. The repurchase agreement must have a defined termination date and be placed through a primary government securities dealer or a financial institution doing business in the State of Texas. The repurchase agreements should be secured by obligations approved in this policy.
- g. Banker's acceptances having a stated maturity of 270 days or less, to be liquidated in full at maturity, which are rated not less than "A-1" or "P-1" (or an equivalent rating) by at least one nationally recognized credit rating agency provided that it is eligible for borrowing from a Federal Reserve Bank.
- h. Commercial paper having a stated maturity of 270 days or less and rated not less than "A-1" or "P-1" (or an equivalent rating) by at least two nationally recognized rating agencies or one nationally recognized rating agency and is fully secured by an irrevocable letter of credit issued by a bank organized and existing under the laws of the United States.
- i. No-load money market mutual fund registered with and regulated by the SEC, which has a dollar-weighted average stated maturity of 90 days or less. It must have included in its investment objectives its intent to maintain a stable net asset value of \$1 for each share. The fund must provide the City with a prospectus and other information required by the SEC.
- j. No-load mutual funds, registered with and regulated by the SEC, having weighted maturity of less than two years, and which invests exclusively in investments approved by this policy.
- k. Investment pools which are approved by the City Council, provided they meet all the criteria for investment pools outlined in Chapter 2256, Texas Local Government Code, and maintain a continuous rating not lower than AAA or AAA-m (or an equivalent rating) from at least one nationally recognized rating service.

CITY OF ROCKWALL, TEXAS

NOTES TO THE FINANCIAL STATEMENTS

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES – continued

*Assets, liabilities, and net assets or equity – continued*

Deposits and investments - continued

The City holds various mortgage-backed securities that offer higher yields but are sensitive to changes in interest rates and other market conditions. Timely payment of interest and principal are guaranteed by federal agencies. The City will not be required to sell these securities prior to maturity barring an event that would be isolated, nonrecurring, unusual, and could not reasonably be anticipated by the City. The City has no borrowed funds used for investing or reverse repurchase agreements.

Investments having a maturity of one year or more, when purchased, are stated at fair value. Short-term investments are stated at cost or amortized cost.

Receivables and payables

Activity between funds that are representative of lending/borrowing arrangements outstanding at the end of the fiscal year are referred to as either "due to/from other funds" (i.e., the current portion of interfund loans) or "advances to/from other funds" (i.e., the non-current portion of interfund loans). All other outstanding balances between funds are reported as "due to/from other funds." Any residual balances outstanding between the governmental activities and business-type activities are reported in the government-wide financial statements as "internal balances."

Advances between funds, as reported in the fund financial statements, are offset by a fund balance reserve account in applicable governmental funds to indicate that they are not available for appropriation and are not expendable available financial resources.

All trade receivables are shown net of an allowance for un-collectibles. Trade accounts receivable in excess of 60 days comprise the trade accounts receivable allowance for un-collectibles.

Property taxes are levied on October 1st by the City based on the January 1st property values as assessed by the Rockwall Central Appraisal District. Taxes are due without penalty until January 31st of the next calendar year. After January 31st the City has an enforceable lien with respect to both real and personal property. Under state law, property taxes levied on real property constitute a perpetual lien on the real property which cannot be forgiven without specific approval of the State Legislature. Taxes applicable to personal property can be deemed uncollectible by the City.

Inventories and prepaid items

All inventories are valued at cost using the first in/first out (FIFO) method. Inventories of governmental funds are recorded as expenditures when consumed rather than when purchased.

Certain payments to vendors reflect costs applicable to future accounting periods and are recorded as prepaid items in both government-wide and fund financial statements.

CITY OF ROCKWALL, TEXAS

NOTES TO THE FINANCIAL STATEMENTS

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES – continued

*Assets, liabilities, and net assets or equity – continued*

Restricted assets

Certain proceeds of enterprise fund revenue bonds are classified as restricted assets on the statement of net assets because their use is limited by applicable bond covenants.

Capital assets

Capital assets, which include property, plant, equipment, and infrastructure assets (e.g., roads, bridges, sidewalks, and similar items), are reported in the applicable governmental or business-type activities columns in the government-wide financial statements. Capital assets are defined by the City as assets with an initial individual cost of more than \$5,000 (amount not rounded) and an estimated useful life in excess of two years. Such assets are recorded at historical cost or estimated historical cost if purchased or constructed. Donated capital assets are recorded at estimated fair market value at the date of donation.

The costs of normal maintenance and repairs that do not add to the value of the asset or materially extend asset lives are not capitalized.

Major outlays for capital assets and improvements are capitalized as projects are constructed. Interest incurred during the construction phase of capital assets of business-type activities is included as part of the capitalized value of the assets constructed.

Capital assets of the primary government, as well as the component units, are depreciated using the straight-line method over the following estimated useful lives:

Buildings	20 - 30 years
Building improvements	20 - 50 years
Public domain infrastructure	20 years
System infrastructure	50 years
Equipment	3 - 10 years

Compensated absences

It is the City's policy to permit employees to accumulate earned but unused vacation pay benefits up to specified limits. Sick leave is accrued at 6.67 hours per month. However, once an employee has accrued 120 days of sick leave, earned sick leave in excess of 120 days may be converted to vacation leave at a ratio of three days of sick leave to one day of vacation leave up to a maximum of 15 sick leave days per year. Upon termination, any accumulated sick leave over 120 days shall be converted to vacation leave at a ratio of three days of sick leave to one day of vacation leave to be paid to the employee in accordance with the vacation leave policy. Upon retirement from the City, all accrued sick leave shall be converted to vacation pay at a ratio of three days of sick leave to one day of vacation leave and shall be paid to the employee if he/she has 10 or more years of service to the City. Unused compensatory time for nonexempt employees is paid on termination. All vacation pay is accrued when incurred in the government-wide, proprietary, and fiduciary fund financial statements. Compensated absences are reported in governmental funds only if they have matured for example, as a result of employee's resignation and retirement.

CITY OF ROCKWALL, TEXAS

NOTES TO THE FINANCIAL STATEMENTS

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES – continued

*Assets, liabilities, and net assets or equity – continued*

Long-term obligations

In the government-wide financial statements, and proprietary fund type in the fund financial statements, long-term debt and other long-term obligations are reported as liabilities in the applicable governmental activities, business-type activities, or proprietary fund type statement of net position. Bond premiums and discounts, as well as issuance costs, are deferred and amortized over the life of the bonds using the straight-line method which approximates the effective interest method. Bonds payable are reported net of the applicable bond premium or discount. Bond issuance costs are reported as deferred charges and amortized over the term of the related debt.

In the fund financial statements, governmental fund types recognize bond premiums and discounts, as well as bond issuance costs, during the current period. The face amount of debt issued is reported as other financing sources. Premiums received on debt issuances are reported as other financing sources while discounts on debt issuances are reported as other financing uses. Issuance costs, whether or not withheld from the actual debt proceeds received, are reported as debt service expenditures.

Fund equity

Fund balance of governmental funds is reported in various categories based on the nature of any limitations requiring the use of resources for specific purposes. The government itself can establish limitations on the use of resources through either a commitment (committed fund balance) or an assignment (assigned fund balance). The committed fund balance classification includes amounts that can be used only for the specific purposes determined by a formal action of the government's highest level of decision-making authority. The governing council is the highest level of decision-making authority for the government that can, by adoption of an ordinance prior to the end of the fiscal year, commit fund balance. Once adopted, the limitation imposed by the ordinance remains in place until a similar action is taken (the adoption of another ordinance) to remove or revise the limitation.

Amounts in the assigned fund balance classification are intended to be used by the government for specific purposes but do not meet the criteria to be classified as committed. The Council may also assign fund balance as it does when appropriating fund balance to cover a gap between estimated revenue and appropriations in the subsequent year's appropriated budget. Unlike commitments, assignments generally only exist temporarily. In other words, an additional action does not normally have to be taken for the removal of an assignment. Conversely, as discussed above, an additional action is essential to either remove or revise a commitment.

Amounts that cannot be spent because they are either not in a spendable form or are legally or contractually required to be maintained intact are classified as non-spendable fund balance.

Amounts that can be spent only for specific purposes because of constraints imposed by external providers, or imposed by constitutional provisions or enabling legislation are classified as restricted fund balance.

Amounts that are available for any purpose are classified as unassigned fund balance; these amounts can be reported only in the City's General Fund.

CITY OF ROCKWALL, TEXAS

NOTES TO THE FINANCIAL STATEMENTS

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES – continued

*Assets, liabilities, and net assets or equity – continued*

Fund equity - continued

Fund balance amount represent the nature of the net resources that are reported in a governmental fund. The City fund balance classifications include non-spendable resources, restricted, and non-restricted (committed, assigned and unassigned) amounts. When the City incurs an expenditure and both restricted and unrestricted amounts are available, the City considers restricted amounts to have been spent first. When the City incurs an expenditure for an unrestricted amount, committed amounts are reduced first, followed by assigned amounts and then unassigned amounts for purposes in which any of those unrestricted fund balance classifications could be used. The City has not established a formal policy to set forth a minimum level for fund balances.

2. STEWARDSHIP, COMPLIANCE, AND ACCOUNTABILITY

A. Budgetary information

The City follows the following procedures in establishing the budgetary data reflected in the financial statements:

1. Public hearings are conducted to obtain taxpayer comments.
2. Prior to October 1st, the budget is legally enacted through passage of an ordinance.
3. The City Manager is authorized to transfer budgeted amounts between departments within any fund; however, any revisions that alter the total expenditures of any fund must be approved by the City Council. Therefore the fund level is the legal level of control.
4. Formal budgetary integration is employed as a management control device during the year. The legally adopted budgets for the General Fund, certain special revenue funds and the Debt Service Fund are adopted on a basis consistent with generally accepted accounting principles.
5. Budgeted amounts are as originally adopted or as amended by the City Council. During 2017, individual amendments were not material in relation to the original appropriations. Any budgeted amounts appropriated at fiscal year-end and not spent automatically lapse.
6. The City did not adopt budgets for certain Special Revenue Funds. These unbudgeted Special Revenue Funds were as follows:

Emergency Siren Fund  
Art in Public Places Fund

7. Capital project funds were not budgeted. Since project-length financial plans usually extend into two or more fiscal years, annual comparisons would be confusing and misleading.

CITY OF ROCKWALL, TEXAS

NOTES TO THE FINANCIAL STATEMENTS

2. STEWARDSHIP, COMPLIANCE, AND ACCOUNTABILITY – continued

B. Excess of expenditures over appropriations

Expenditures exceeded appropriations by \$3,002 in the Radio Fund due to an unanticipated minor change in the City's contract to move to a county-wide interoperable radio system which occurred after the amended budget was adopted.

Expenditures exceeded appropriations by \$3,840 in the Recycling Fund. A budgeted transfer from this fund was less than anticipated which offset this amount.

3. DETAILED NOTES ON ALL FUNDS

A. Deposits and investments

Deposits

Custodial credit risk for deposits is the risk that in the event of a bank failure, the City's deposits may not be returned or the City will not be able to recover collateral securities in the possession of an outside party. At September 30, 2017, the City's deposits were entirely insured or collateralized with securities held by the pledging financial institution's trust department or agent in the City's name; as a result, the City's deposits were not exposed to custodial credit risk.

Under a contractual agreement with North Texas Municipal Water District (NTMWD), depository accounts are maintained by NTMWD for interest and sinking, debt, and construction reserves totaling \$777,500, which are separately insured or secured by collateral pledged by NTMWD's depository. This amount is included in restricted cash on the statement of net assets.

The deposits of REDC and RTPA are covered by the City's depository contract and, therefore, at September 30, 2017, these deposits were entirely insured or collateralized with securities held by the pledging financial institution's trust department or agent in the City's name; as a result, the deposits of REDC and RTPA were not exposed to custodial credit risk.

C. Deferred/Unearned Revenue

Governmental funds report *deferred revenue* in connection with receivables for revenues that are not considered to be available to liquidate liabilities of the current period. Governmental funds also defer revenue recognition in connection with resources that have been received, but not yet earned. At the end of the current fiscal year, the various components of *deferred revenue* reported in the governmental funds were as follows:

	<u>Unavailable</u>	<u>Unearned</u>
Delinquent property taxes receivable (General Fund)	\$ 291,618	\$ -
Contract receivable not yet due (General Fund)	461,482	-
Fines receivable (General Fund)	101,738	-

Water and Sewer Enterprise Fund	20,605	82,783
Internal Service Funds	-	4,396
Discretely Presented Component Unit	<u>-</u>	<u>264,712</u>
Totals	<u>\$ 408,744</u>	<u>\$ 408,744</u>

CITY OF ROCKWALL, TEXAS

NOTES TO THE FINANCIAL STATEMENTS

3. DETAILED NOTES ON ALL FUNDS – continued

E. Inter-fund receivables, payables, and transfers – continued

The outstanding balances between funds result primarily from the time delay between the dates that inter-fund goods and services are provided and payments between funds are made. Also, working capital loans are made to capital projects funds in advance of debt issuances. These are expected to be collected within one year.

The composition of inter-fund transfers for the year ended September 30, 2017, is as follows:

<u>Fund</u>	<u>Transfer In</u>	<u>Transfer Out</u>
Major Governmental Funds		
General Fund	\$ 278,882	\$ 3,595,000
Non-major Governmental Funds	1,037,805	335,037
Water and Sewer Enterprise Fund	-	986,650
Internal Service Funds	<u>3,850,000</u>	<u>250,000</u>
Total	<u>\$ 5,166,687</u>	<u>\$ 5,166,687</u>

Transfers are used to move unrestricted revenues to finance various programs or capital projects that the City must account for in other funds in accordance with budgetary authorizations.

CITY OF ROCKWALL, TEXAS

F. Long-term debt

General obligation debt

The City issues general obligation debt (in the form of general obligation bonds, certificates of obligation, contractual obligations, and notes payable) to provide funds for the acquisition and construction of major capital facilities. General obligation debt has been issued for both governmental and business-type activities. These issues are direct obligations and pledge the full faith and credit of the City. General obligation debt outstanding as of September 30, 2017, is as follows:

Purpose	Original Amount	Year of Issue	Final Maturity	Interest Rate	Balance 9/30/2017

Capitalized lease obligations

The City has entered into contracts with North Texas Municipal Water District (NTMWD), a conservation and reclamation district and political subdivision of the State of Texas, for the construction and operation of certain water and plants and to provide treated water to the City. The contractual obligations have been treated as capitalized lease obligations.

Capitalized lease obligations outstanding as of September 30, 2017, are as follows:

Purpose	Original Amount	Year of Issue	Final Maturity	Interest Rate	Balance 9/30/2017
Capital Leases					
Business-type activities					
Ground storage facility	\$ 2,013,434	2005	2025	various	\$ 1,023,385

4. OTHER INFORMATION

A. Risk management

The City is exposed to various risks of loss related to torts; theft of, damage to, and destruction of assets; errors and omissions; injuries to employees; employee health benefits; and other claims of various natures.

The City uses a medical self-insurance fund to pay medical and dental claims of City employees and their covered dependents and minimize the total cost of annual medical insurance to the City. Medical claims in any one year exceeding \$100,000 per covered individual, or approximately \$2,472,883 in the aggregate for the group, are covered through a private insurance carrier. Additionally, life insurance policy premiums for each employee are paid through the fund. The self-insurance fund is funded by operating transfers from other funds and charges to employees for extended benefits at their option. The City does not believe there are material claims incurred but not reported as of September 30, 2017.

The City uses a Self-Insurance and Risk Management Program (as permitted by law and its home rule charter) to insure itself against the various risks of liability or loss to which it is exposed, either through an insurance provider or through a defined self-insurance program. The City issued certificates of obligation, based on an actuarial analysis, to fund a self-insured workers' compensation plan. Under this plan, workers' compensation insurance is provided in accordance with state statutes to all City employees. To protect the assets of the plan from a catastrophic claim, the City has purchased stop loss coverage in the amount of \$200,000 per occurrence with a maximum City liability of \$600,000 per year.

CITY OF ROCKWALL, TEXAS

NOTES TO THE FINANCIAL STATEMENTS

4. OTHER INFORMATION – continued

A. Risk management – continued

The Workers' Compensation Fund (an internal service fund) accounts for the activity of this plan. The City establishes claim liabilities based on estimates of the ultimate cost of claims reported but unsettled and of claims incurred but not reported. Any claims incurred and not reported are not believed to be significant to the City's financial statements.

Changes in the balances of claims liabilities during the past two years are as follows:

	Employee Benefits		Worker's Compensation	
	2017	2016	2017	2016
Claims payable beginning of the year	\$ 179,290	\$ 242,921	\$ 152,373	\$ 82,450
Claims incurred	4,161,875	3,927,007	177,722	273,662
Payment on claims	<u>(3,945,538)</u>	<u>(3,990,638)</u>	<u>(253,706)</u>	<u>(203,739)</u>
	<u>\$ 395,627</u>	<u>\$ 179,290</u>	<u>\$ 76,389</u>	<u>\$ 152,373</u>

Commercial insurance is purchased for the other risks of loss to which the City is exposed. There have been no significant reductions in insurance coverage and settlement amounts have not exceeded insurance coverage for the current year or the three prior years.

B. North Texas Municipal Water District

The District is a conservation and reclamation district and political subdivision of the State of Texas, created and functioning under Chapter 62, Acts of 1951, 52nd Legislature, Regular Session, as amended, originally compiled as Vernon's Article 8270-141 (the "Act"), pursuant to Article 16, Section 59 of the Texas Constitution. The District comprises all of the territory of its member cities, viz., Allen, Garland, Princeton, Plano, Mesquite, Wylie, Rockwall, Farmersville, McKinney, Richardson, Forney, Royse City, and Frisco (the "Member Cities"). The District was created for the purpose of providing a source of water supply for municipal, domestic and industrial use and for the treatment, processing, and transportation of such water to its Member Cities and to its other customers located in North Central Texas, all within the Dallas Standard Metropolitan Statistical Area.

Under the Act, including specifically Section 27 thereof, and under the Constitution and Statutes of the State of Texas, the District has broad powers to: (1) impound, control, store, preserve, treat, transmit and use storm and flood water, the water of rivers and streams, and underground water for irrigation, power and all other useful purposes and to supply water for municipal, domestic, power, industrial and commercial uses and purposes and all other beneficial uses and purposes; and (2) collect, transport, process, treat, dispose of, and control all municipal, domestic, industrial or commercial waste whether in fluid, solid or composite state, including specifically the control, abatement or reduction of all types of pollution. The City retains no ongoing financial interest, equity investments, and/or responsibilities for the District other than the contractual arrangements discussed more fully herein.

CITY OF ROCKWALL, TEXAS

NOTES TO THE FINANCIAL STATEMENTS

4. OTHER INFORMATION – continued

B. North Texas Municipal Water District – continued

The District has long-term contracts with the City to supply treated water and sewer treatment. The City's water contract with the District provides that the City pay a predetermined annual amount for treated water in twelve monthly installments. The amount of this annual payment is based upon an annually established rate per thousand gallons and the largest annual amount of water consumption of past years. The City owns one sewage treatment facility, Squabble Creek, and in 1978 entered into an agreement with the District for the construction of a second facility, Buffalo Creek. Under the terms of this agreement, the District issued contractually secured bonds in its name to construct and operate this sewage disposal plant for the City. In subsequent years, similar contractual agreements have been made to enable the District to expand the sewage treatment facilities and continue to provide sewage treatment services to the City. Under the terms of these contracts, the City's payments, which began when the facilities were first utilized, are equal to the operating and maintenance expenses for the next ensuing calendar year, as shown in the annual budget. The contracts further provide that the debt service payments will be equal to the principal and/or interest coming due on the bonds on the next succeeding interest payment date, plus the fees and charges of the paying agent and the registrar.

These contractual obligations have been included as capital lease obligations in amounts equal to the bonds outstanding under these agreements. Accordingly, the related assets have been capitalized and are being depreciated over the estimated life of the facilities.

The outstanding principal balance on the bond issues as of September 30, 2017, is \$4,233,385. See Note 4F for the annual requirements to amortize the bonds as of September 30, 2017.

With respect to the ground storage reservoir discussed above, the Cities of Rockwall and Heath are contractually obligated to make timely payments to the District representing 66.67% and 33.33%, respectively, of the related operating expenses and debt service payments. While the City anticipates its share of these payments to be 66.67%, the Cities of Rockwall and Heath are each contractually obligated to make any payments which the other party is required, but is unable, to make to the District.

C. Contingent liabilities and commitments

Amounts received or receivable from grantor agencies are subject to audit and adjustment by such agencies. Any disallowed claims, including amounts already collected, may constitute a liability of the applicable funds. The amounts, if any, of expenditures which may be disallowed by the grantor cannot be determined at this time although the City expects such amounts, if any, to be immaterial.

The City is a defendant in various lawsuits. Although the outcome of these lawsuits is not presently determinable, it is the opinion of the City's management that the resolution of these matters will not have a material adverse effect on the financial condition of the City.

As described in Note 4F above, the general revenues of the City are contingently liable in the amount of \$28,740,000 for general obligation bonds and certificates of obligation which are currently outstanding and recorded as obligations of the Enterprise Fund.

CITY OF ROCKWALL, TEXAS

NOTES TO THE FINANCIAL STATEMENTS

4. OTHER INFORMATION – continued

C. Contingent liabilities and commitments – continued

The City contracts for solid waste disposal with a third party. Under the terms of the agreement, the City bills and collects the residential billing and remits that amount to the contracting party. The contractor bills the commercial customers and remits a franchise fee to the City based on total revenues received from the contract.

The Rockwall Economic Development Corporation provides monetary incentives to companies to relocate within the City of Rockwall. At September 30, 2017, these commitments totaled \$3,256,666.

D. Defined Benefit Pension Plans

Plan Description:

The City participates as one of 866 plans in the nontraditional, joint contributory, hybrid defined benefit pension plan administered by the Texas Municipal Retirement System (TMRS). TMRS is an agency created by the State of Texas and administered in accordance with the TMRS Act, Subtitle G, Title 8, Texas Government Code (the TMRS Act) as an agent multiple-employer retirement system for municipal employees in the State of Texas. The TMRS Act places the general administration and management of the System with a six-member Board of Trustees. Although the Governor, with the advice and consent of the Senate, appoints the Board, TMRS is not fiscally dependent on the State of Texas. TMRS's defined benefit pension plan is a tax-qualified plan under Section 401 (a) of the Internal Revenue Code. TMRS issues a publicly available comprehensive annual financial report (CAFR) that can be obtained at [www.tmrs.com](http://www.tmrs.com).

All eligible employees of the City are required to participate in TMRS.

Benefits Provided:

TMRS provides retirement, disability, and death benefits. Benefit provisions are adopted by the governing body of the City, within the options available in the state statutes governing TMRS.

At retirement, the benefit is calculated as if the sum of the employee's contributions, with interest, and the city-financed monetary credits with interest were used to purchase an annuity. Members may choose to receive their retirement benefit in one of seven actuarially equivalent payments options. Members may also choose to receive a portion of their benefit as a Partial Lump Sum Distribution in an amount equal to 12, 24, or 36 monthly payments, which cannot exceed 75% of the member's deposits and interest.

At the date the plan began, the City granted monetary credits for service rendered before the plan began of a theoretical amount equal to two times what would have been contributed by the employee, with interest, prior to establishment of the plan. Monetary credits, also known as the matching ratio, are 200% of the employee's accumulated contributions and are only payable in the form of an annuity.

CITY OF ROCKWALL, TEXAS

NOTES TO THE FINANCIAL STATEMENTS

4. OTHER INFORMATION – continued

D. Defined Benefit Pension Plans - continued

Benefits Provided - continued:

Beginning in 1993, the City granted an annually repeating (automatic) basis for a monetary credit referred to as an updated service credit (USC) which is a theoretical amount which takes into account salary increases or plan improvements. If at any time during their career an employee earns a USC, this amount remains in their account earning interest at 5% until retirement. At retirement, the benefit is calculated as if the sum of the employee’s accumulated contributions with interest and the employer match plus employer-financed monetary credits, such as USC, with interest were used to purchase an annuity. Additionally, initiated in 1993, the City provided an annually repeating (automatic) basis cost of living adjustments (COLA) for retirees equal to a percentage of the change in the consumer price index. (CPI).

A summary of plan provisions for the City are as follows:

Employee Deposit Rate	7%
Matching Ratio (City to Employee)	2 to 1
Years required for vesting	5
Service retirement eligibility	20 years at any age, 5 years at age 60 and above
Updated Service Cost	100% Repeating
Annuity Increase to retirees	70% of CPI Repeating

The City does not participate in Social Security.

Employees covered by benefit terms –

At the December 31, 2016 valuation and measurement date, the following employees were covered by the benefit terms:

Retirees or beneficiaries currently receiving benefits	85
Inactive employees entitled to but not yet receiving benefits	83
Active employees	<u>262</u>
	<u><u>430</u></u>

CITY OF ROCKWALL, TEXAS

NOTES TO THE FINANCIAL STATEMENTS

4. OTHER INFORMATION – continued

D. Defined Benefit Pension Plans - continued

Contributions:

Under the state law governing TMRS, the contribution rate for each city is determined annually by the consulting actuary, using the Entry Age Normal (EAN) actuarial cost method. The actuarially determined rate is the estimated amount necessary to finance the cost of benefits earned by employees during the year, with an additional amount to finance any unfunded accrued liability.

Employees for the City of Rockwall were required to contribute 7% of their annual gross earnings during the fiscal year. For fiscal year 2017, the City made contributions of 16.36%, for calendar year 2016 and 16.58% in 2017 which was the actuarially determined city contribution.

Net Pension Liability:

The City's Net Pension Liability (NPL) was measured as of December 31, 2016, and the Total Pension Liability (TPL) used to calculate the Net Pension Liability was determined by an actuarial valuation as of that date.

Actuarial assumptions –

The Total Pension Liability in the December 31, 2016 actuarial valuation was determined using the following actuarial assumptions:

Inflation	2.5% per year
Overall payroll growth	2.9% per year
Investment Rate of Return	6.75%, net of pension plan investment expense, including inflation

Salary increases were based on a service-related table. Mortality rates for active members, retirees, and beneficiaries were based on the gender-distinct RP2000 Combined Healthy Mortality Table, with male rates multiplied by 109% and female rates multiplied by 103%. The rates are projected on a fully generational basis by scale BB to account for future mortality improvements. For disabled annuitants, the gender-distinct RP2000 Combined Health Mortality Tables with Blue Collar Adjustment are used with males rates multiplied by 109% and female rates multiplied by 103% with a 3-year set-forward for both males and females. In addition, a 3% minimum mortality rate is applied to reflect the impairment for younger members who become disables. The rates are projected on a fully generational basis by scale BB to account for future mortality improvements subject to the 3% floor.

Actuarial assumptions used in the December 31, 2016 valuation were based on the results of actuarial experience studies. This experience study was for the period December 31, 2010 through December 31, 2014. Healthy post-retirement mortality rates and annuity purchase rates were updated based on a Mortality Experience Investigation Study covering 2009 through 2011, and dated December 31, 2013. These

CITY OF ROCKWALL, TEXAS

NOTES TO THE FINANCIAL STATEMENTS

4. OTHER INFORMATION – continued

D. Defined Benefit Pension Plans - continued

assumptions were first used in the December 31, 2013 valuation, along with a change to the Entry Age Normal (EAN) actuarial cost method. Assumptions are reviewed annually. No additional changes were made for the 2016 valuation. After the Asset Allocation Study analysis and experience investigation study, the Board amended the long-term expected rate of return on pension plan investments from 7% to 6.75% effective January 1, 2017. Plan assets are managed on a total return basis with an emphasis on both capital appreciation as well as the production of income, in order to satisfy the short-term and long-term needs of TMRS.

The pension plan’s policy in regard to the allocation of invested assets is established and may be amended by the TMRS Board of Trustees.

The long-term expected rate of return on pension plan investments was determine using a building-block method in which best estimate ranges of expected future real rates of return (expected returns, net of pension plan investment expense and inflation) are developed for each major asset class. These ranges are combined to produce the long-term expected rate of return by weighting the expected future real rates of return by the target asset allocation percentage and by adding expected inflation. The target allocation and best estimates of arithmetic real rates of return for each major asset class are summarized in the following table:

<u>Asset Class</u>	<u>Target Allocation</u>	<u>Long-Term Expected Real Rate of Return (Arithmetic)</u>
Domestic Equity	17.50%	4.55%
International Equity	17.50%	6.35%
Core Fixed Income	10.00%	1.00%
Non-Core Fixed Income	20.00%	4.15%
Real Return	10.00%	4.15%
Real Estate	10.00%	4.75%
Absolute Return	10.00%	4.00%
Private Equity	5.00%	7.75%
Total	<u>100.00%</u>	

Discount Rate –

The discount rate used to measure the Total Pension Liability was 6.75%. The projection of each cash flows used to determine the discount rate assumed that employee contributions will remain at the current 7% and employer contributions will be made at the rates specified in statute. Based on that assumption, the pension plan’s Fiduciary Net Position was projected to be available to make all projected future benefit payments of current plan members. Therefore, the long-term expected rate of return on pension plan investments was applied to all periods of projected benefit payments to determine the Total Pension Liability.

D. Defined Benefit Pension Plans - continued

Pension Plan Fiduciary Net Position –

Detailed information about the pension plan’s Fiduciary Net Position is available in a separately-issued TMRS financial report. That report may be obtained on the Internet at [www.tmr.com](http://www.tmr.com). Pension Expense and Deferred Outflows of Resources and Deferred Inflows of Resources Related to Pensions:

For the year ended September 30, 2017, the City recognized pension expense of \$3,065,444. This amount is included as part of Personnel Services expenses within the functional program activities.

At September 30, 2017, the City reported deferred outflow and inflows of resources related to pensions from the following sources:

	Deferred Outflows of Resources	Deferred Inflows of Resources
	<u>                    </u>	<u>                    </u>
Contributions subsequent to the measurement date	\$ 2,207,113	\$ -
Difference between projected and actual investment earnings	2,681,268	-
Differences between actuarial assumptions and actual experience	-	698,747
Changes in actuarial assumptions used	-	77,056
Total	<u>\$ 4,888,381</u>	<u>\$ 775,803</u>

Deferred outflows of resources related to pensions resulting from contributions subsequent to the measurement date of \$2,064,392 will be recognized as a reduction of the net pension liability for the measurement year ending December 31, 2017 (i.e. recognized in the City’s financial statements September 30, 2017). Other amounts reported as deferred outflows and inflows of resources related to pensions will be recognized in pension expense as follows:

Measurement Year Ended December 31,	<u>Amount</u>
2017	\$ 790,058
2018	790,057
2019	652,996
2020	(151,344)
2021	(135,139)
Thereafter	<u>(41,164)</u>
Total	<u>\$ 1,905,464</u>

Texas Statewide Emergency Services Personnel Retirement Fund

The City acts as agent for the Texas Statewide Emergency Services Personnel Retirement Fund (the "Fund") which is a component unit of the State of Texas. The City reimbursed the Fund \$15,775 for benefits paid on a pay-as-you-go basis during the year in recognition of services provided to the City by volunteer emergency services personnel. The Fund has a Board of Directors not designated by City officials and is administered by the State Fire Fighters' Pension Commissioner. There are 2 active participants currently covered by the Fund and payments are being made to 36 retirees or their survivors. The Fund does not prepare separate financial statements for participating departments; however, financial statements for the Fund as a whole may be obtained from the administrator at Fire Fighters' Pension Commissioner, P.O. Box 12577, Austin, Texas 78711.

5. SUBSEQUENT EVENTS

Subsequent events have been evaluated through June 18, 2018, which is the date the financial statements were available to be issued.

On November 21, 2017, The Rockwall Economic Development Corporation refunded the corporation's outstanding series 2008 Sales Tax Revenue bonds in the amount of \$2,975,000 by issuing new Sales Tax Revenue Refunding bonds in the amount of \$3,165,000 to be repaid at 3.00% interest with final maturity on August 1, 2028.

The City of Rockwall held a bond election on May 5, 2018 in which the voters approved the issuance of \$85,000,000 of general obligation bonds for street reconstruction projects. The roads which will be reconstructed include concrete streets which have generally been in place more than 30 years. An independent study of road conditions was conducted in 2016 and the results will be used to decide the street priorities. The City intends to issue the debt in several series over a ten-year period as outstanding principal is retired.

The accompanying notes are an integral part of this statement.

CITY OF ROCKWALL, TEXAS  
REQUIRED SUPPLEMENTARY INFORMATION  
TEXAS MUNICIPAL RETIREMENT SYSTEM (TMRS)  
SCHEDULE OF CHANGES IN NET PENSION LIABILITY (ASSET) AND RELATED RATIOS  
LAST THREE FISCAL YEAR (PREVIOUS YEARS ARE NOT AVAILABLE)

Plan Year	2014	2015	2016
Actuarially Determined Contribution	\$ 2,761,413	\$ 2,950,480	\$ 2,897,712
Contributions in relation to the actuarially determined contribution	\$ 2,761,413	\$ 2,950,480	\$ 2,897,712
Contribution deficiency (excess)	<u>\$ -</u>	<u>\$ -</u>	<u>\$ -</u>
Covered employee payroll	\$ 16,626,112	\$ 17,936,037	\$ 17,865,058
Contributions as a percentage of covered employee payroll	16.61%	16.45%	16.22%

**Notes to Schedule of Contributions**

Notes Actuarially determined contribution rates are calculated as of December 31 and become effective in January 13 months later

**Methods and Assumptions Used to Determine Contribution Rates:**

Actuarial Cost Method	Entry Age Normal
Amortization Method	Level Percentage of Payroll, Closed
Remaining Amortization Period	29 years
Asset Valuation Method	10 Year smoothed market; 15% soft corridor
Inflation	2.50%
Salary Increases	3.50% to 10.50% including inflation
Investment Rate of Return	6.75%
Retirement Age	Experienced-based table of rates that are specific to the City's plan of benefits. Last updated for the 2015 valuation pursuant to an experience study of the period 2010 - 2014.
Mortality	RP2000 Combined Mortality Table with Blue Collar Adjustment with males rates multiplied by 109% and female rates multiplied by 103% and projected on a fully generational basis with scale BB.

**Other Information**

Notes There were no benefit changes during the year.

## NONMAJOR GOVERNMENTAL FUNDS

### *SPECIAL REVENUE FUNDS*

**Special revenue funds are used to account for specific revenues that are legally restricted to expenditures for particular purposes.**

Cemetery – established to account for the annual income from the sale of plots and cemetery maintenance costs.

Public Safety – established to account for donations, court fees, and other public safety committed revenues.

Recreational Development – established to account for the annual lease income from marinas and golf course.

Radio System – established to account for revenues and expenditures for the support of the City's radio system.

Street Improvements – established to account for the proceeds of street improvement assessments.

Hotel Occupancy Tax – established to account for the annual income from hotel occupancy taxes.

Fire Equipment – established to account for funds to be used for the purchase of fire equipment for the volunteer fire department.

Aviation – established to account for funds received from airport operations and related expenses.

Recycling – established to account for funds to be used for the City's recycling program.

Emergency Siren – established to account for revenues accumulated and expenditures to add emergency sirens within the City.

Downtown Improvement – established to account for revenues and expenditures related to the City's efforts to revitalize the downtown square.

Art in Public Places – established to account for donations received for developing art displays in public areas such as parks.

Narcotics Unit – established to account for revenues and expenditures related to a seized funds and forfeitures.

## *CAPITAL PROJECTS FUNDS*

**Capital projects funds are used to account for the acquisition and construction of major capital facilities other than those financed by proprietary funds and trust funds.**

Capital Projects – established to account for miscellaneous street and drainage projects which are financed with contributions from the General Fund and the Rockwall Economic Development Corporation.

Equipment Acquisition – established to account for capital equipment acquisition using operating transfers from benefiting funds and residual proceeds from miscellaneous debt.

205 Bypass Project – established to account for revenues and expenditures related to the construction of the 205 Bypass roadway project.

The Harbor/TIF Capital Projects Fund – established to account for improvements in the Tax Increment Reinvestment Zone using the proceeds from the issuance of bonds.

***STATISTICAL SECTION***

## STATISTICAL SECTION

Tables in the statistical section present detailed information as a context for understanding what the information in the financial statements, note disclosures, and required supplementary information says about the overall financial health of the City.

	<u>Pages</u>
Financial Trends - These schedules contain trend information to help the reader understand how the City's financial performance and well-being have changed over time.	105
Revenue Capacity - These schedules contain information to help the reader assess the City's most significant local revenue source, the property tax.	113
Debt Capacity - These schedules present information to help the reader assess the affordability of the City's current levels of outstanding debt and the City's ability to issue additional debt in the future.	121
Demographic and Economic Information - These schedules offer demographics and economic indicators to help the reader understand the environment within which the City's financial activities take place.	126
Operating Information - These schedules contain service and infrastructure data to help the reader understand how the information in the City's financial report relates to the services the City provides and the activities it performs.	129

Sources: Unless otherwise noted, the information in these schedules is derived from the comprehensive annual financial reports for the relevant year.

CITY OF ROCKWALL, TEXAS  
 COMPUTATION OF DIRECT AND OVERLAPPING DEBT  
 SEPTEMBER 30, 2017  
 (unaudited)

TABLE D-17

Jurisdiction	Net General Obligation Bonded Debt Outstanding (1)	Percentage Applicable to the City of Rockwall (2)	Amounts Applicable to the City of Rockwall
Direct:			
City of Rockwall - debt repaid with property taxes	\$ 92,940,000	100.00%	\$ 92,940,000
Indirect:			
Rockwall Independent School District	490,357,937	61.46%	301,373,988
Rockwall County	<u>105,405,000</u>	50.81%	<u>53,556,281</u>
Total Indirect	<u>595,762,937</u>		<u>354,930,269</u>
Total Direct and Overlapping Bonded Debt	<u><u>\$ 688,702,937</u></u>		<u><u>\$ 447,870,269</u></u>
Average debt per capita			<u><u>\$ 11,556</u></u>

Source: Assessed value data used to estimate applicable percentages provided by Rockwall Central Appraisal District. Debt Outstanding data is provided by each governmental unit.

- (1) Includes all Governmental Activities General Obligation Bonds, Contractual Obligations, Certificates of Obligation and Capital Leases
- (2) The percentage of overlapping debt applicable is estimated using taxable assessed property values. Applicable percentages were estimated by determining the portion of each governmental unit's taxable value that is within the city's boundaries and dividing it by each unit's total taxable value.

CITY OF ROCKWALL, TEXAS  
 COMPUTATION OF LEGAL DEBT MARGIN  
 LAST TEN FISCAL YEARS  
 (unaudited)

TABLE D-18

The City of Rockwall, Texas does not have a legal debt limit prescribed by state law. However, Article XI, Section 5 of the Texas Constitution applicable to cities of more than 5,000 population limits ad valorem tax rates to \$2.50 per \$100 assessed valuation for cities operating under a Home Rule Charter. Accordingly, the City's tax margin for the previous ten years was:

***INTRODUCTORY SECTION***

January 12, 2018

To the Honorable Mayor,  
Members of the City Council,  
and the Citizens of the City of Rockwall, Texas:

The Comprehensive Annual Financial Report (CAFR) of the City of Rockwall for the fiscal year ended September 30, 2016, is hereby submitted in accordance with Section 7.18 of the City Charter. The financial statements are presented in conformity with generally accepted accounting principles (GAAP) and audited in accordance with generally accepted auditing standards by a firm of licensed certified public accountants.

Management assumes full responsibility for both the completeness and reliability of all of the information presented in this report. Fairness of the presentation, including all disclosures, rests with the City. To the best of our knowledge and belief, the enclosed data is accurate in all material respects and is reported in a manner designed to present fairly the financial position and results of operations of the various funds in the City. All disclosures necessary to enable the reader to gain an understanding of the City's financial activities have been included.

To provide a reasonable basis for making these representations, management of the City of Rockwall has established a comprehensive internal control framework that is designed both to protect the government's assets from loss, theft, or misuse and to compile sufficient reliable information for the preparation of the City of Rockwall's financial statements in conformity with GAAP. The internal control structure is designed to provide reasonable, but not absolute, assurance that these objectives are met. The concept of reasonable assurance recognizes that:

- (1) the cost of a control should not exceed the benefits likely to be derived; and
- (2) the valuation of costs and benefits requires estimates and judgments by management.

Because the cost of internal controls should not outweigh their benefits, the City of Rockwall's comprehensive framework of internal controls has been designed to provide reasonable rather than absolute assurance that the financial statements will be free from material misstatement. As management, we assert that, to the best of our knowledge and belief, this financial report is complete and reliable in all material respects. The internal control structure is subject to periodic evaluation by City management.

The City of Rockwall's financial statements have been audited by Fox, Byrd & Company, P.C, a firm of licensed certified public accountants. The goal of the independent audit was to provide reasonable assurance that the financial statements of the City of Rockwall for the fiscal year ended September 30, 2016 are free of material misstatement. The independent audit involved examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements;

assessing the accounting principles used and significant estimates made by management; and evaluating the overall financial statement presentation. The independent auditor concluded, based upon the audit, that there was a reasonable basis for rendering an unqualified opinion that the City of Rockwall's financial statements for the fiscal year ended September 30, 2016 are fairly presented in conformity with GAAP. The independent auditor's report is presented as the first component of the financial section of this report.

Management's discussion and analysis (MD&A) immediately follows the independent auditor's report and provides a narrative introduction, overview and analysis of the financial statements as required by GAAP. MD&A complements this letter of transmittal and should be read in conjunction with it.

## **PROFILE OF THE GOVERNMENT**

The City of Rockwall, Texas, county seat of Rockwall County, Texas was incorporated in 1874. Its name is derived from an underground rock wall discovered in 1854. The unusual rock formations are found throughout the county. The City is located on the eastern shore of Lake Ray Hubbard, 22 miles east of downtown Dallas on Interstate Highway 30. The Dallas/Fort Worth area is recognized as one of the top growth areas in the country. The Dallas/Fort Worth International Airport and Love Field in Dallas meet the air transportation needs of the region.

The City currently has a land area of approximately 29.79 square miles and an estimated population of 41,519.

The City of Rockwall adopted a home rule charter in 1985 which established a council-manager form of government. Charter amendments were adopted in 2005 and again in 2015. Policy making and legislative authority is vested in the City Council, which consists of a Mayor and six Council Members, all elected at large. The City Manager is responsible for carrying out the policies and ordinances of the City Council, overseeing the day-to-day operations of the City and for appointing the heads of the various departments. The mayor and six council members are elected to two-year staggered terms. The government is empowered to levy a property tax on both real and personal property located within its boundaries. The government also has the power by state statute to extend its corporate limits by annexation, which is done periodically when deemed appropriate by the City Council.

The City of Rockwall provides a full range of services, including police and fire protection; the construction and maintenance of streets and other infrastructure; planning and zoning, parks and recreational activities and general administrative services. Additionally, the City provides water and sewer services as an enterprise function.

Discretely presented component units are legally separate entities and are not part of the primary government's operations. The City of Rockwall is financially accountable for its component units. Accordingly, the Rockwall Economic Development Corporation (REDC) and Rockwall Technology Park Association are included in these financial statements and are explained in more detail in Note 1 of the Notes to the Financial Statements.

## **Factors Affecting Financial Condition**

The information presented in the financial statements is best understood when considered from the broader perspective of the specific environment within which the City of Rockwall operates.

### **Local Economy**

The City of Rockwall is situated in the Dallas/Fort Worth Consolidated Metropolitan Statistical Area. With its concentration of commercial and retail development, the City of Rockwall has long drawn shoppers from surrounding areas. As the national economy began to improve over the last year, Rockwall's local economy benefitted from a mix of new businesses and the renewed success of others. Rockwall saw an increase of 7.65% in our local sales tax revenues. The City has a varied tax base including a mix of residential, commercial and light industrial properties. Total property values rose by 4.8%. The most recent five-year average is 9.50% per annum. During the downturn in the economy growth in the tax base slowed but remained positive each year. The City's largest taxpayers are varied and include industry, retail developments, multi-family properties, and medical facilities. Table D-12 in the Statistical Section provides further information on the principal taxpayers. The Rockwall Economic Development Corporation continues to successfully market Rockwall and assist companies looking to locate their business in the City. The year's highlights included:

- Channell Commercial Corporation completed construction on their new corporate headquarters and manufacturing facility, relocating their nearly 100-year old business to Rockwall from their location in southern California. The rail-served facility is 175,000 square feet and includes the largest structural foam machine in Texas. They are an industry leader in thermoplastic enclosures for the telecommunications and broadband industries.
- Col-Met Paint Booths moved their state of the art operations from a leased facility to their new 150,000 square foot building in phase II of the Rockwall Technology Park. This move allows the company to expand current operations and provides room to expand the building further in the future.
- Pratt Industries began construction on their 389,000 square foot facility which will serve the recycled paper goods industry providing shipping ready boxes to customers including Amazon.
- Downtown Rockwall underwent extensive reconstruction with completion occurring in 2016 and marked by a full-day celebration of the end of construction. Several new stores have moved into the downtown square following the completion adding to the mix of retail, restaurant and service locations. The City benefits from the attention garnered from Rockwall's being a Texas Main Street City. The City has seen a 5.4% increase in sales taxes in the downtown area in the last fiscal year and 70.4% in the last five years.

### **Long-term Planning**

The City Council and staff recognize the need for long-range planning. It is the goal of the City government to provide responsible leadership, services, and infrastructure to achieve a safe environment and provide for a high quality of life.

## Financial Policies

The City Council adopted financial policies in 2001 which have guided the City, allowing us to build a strong fund balance, and reinforcing the City's philosophy to budget conservatively for both revenues and expenditures. The general fund reserve policy is reviewed annually and updated most recently in 2009. The policy states the City should maintain no less than 3 months of reserves and will allow reserves in excess of 3.5 months of recurring operating expenditures to be transferred to a capital projects fund to be used to fund future projects. The City has maintained reserves at or above this level for many years. This allows the City to respond to emergencies or downturns while not overburdening the taxpayers. Reserves over the 3.5-month level were available to fund capital projects in 2016 including an erosion repair project. The City had, for many years, financed vehicle additions and replacements with short-term debt. A healthy reserve allowed the City to purchase all vehicles on a pay-as-you-go basis.

## Budget Overview

The City Manager proposes a balanced budget to the City Council each year by August 1. Public hearings are conducted to receive comments and priorities of the community at large. The City Council must adopt the operating budget and set the City's tax rate for the next year by October 1st of each year.

## Planning Projects

The City Council values long-range planning and have supported a number of efforts outlined below.

## Capital Improvement Planning

In May 2012, voters approved propositions to provide downtown accessibility projects, roadway rehabilitation and Interstate 30 ramp adjustments. The City hired design and construction management professionals to work with staff and City Council to develop the vision for the projects and cost estimates to ensure the projects as approved can move forward expeditiously and be completed within budget. Improvements have been completed on the Downtown Square to increase walkability and accessibility. Engineering firms were selected for each of the street rehabilitation projects in 2015 and the planning and design work is being completed. This work will continue through 2017 with construction starting shortly after.

## Strategic Planning

The City Council and staff worked on an updated strategic planning document with the goal of a simplified, easy to understand final product. The initial stage of the plan included looking at the current breakdown between the residential and commercial tax base and whether or not the current land use plan will allow that mix to be maintained or improved in order to decrease the tax burden on residential properties. It was determined that sufficient non-residential land uses are planned but that any change from non-residential to residential zoning needs to be evaluated in light of the City's strategic goals. The City receives higher sales taxes per capita than other area cities, pointing to the City's long-standing status as a regional shopping destination. As cities to the east grow and add retailers the City will strive to add specialty retailers to continue the regional draw. The remaining I-30 corridor development will need to be well-planned and executed. A citizen committee was formed to work with the City Planning Department staff to make amendments to the Comprehensive Plan and develop an I-30 Corridor plan. The long-term infrastructure needs of

the City including streets, water and sewer will need to be planned and funded. A study was conducted in late 2016 to assess the condition of each street and alley in the City to determine the remaining useful life of each one. The findings will then be evaluated to determine the level at which preventive maintenance will forestall more extensive repairs or replacement. The next stages of the strategic planning focused on the individual departments of the City and how they address both the goals of the larger plan and strategic needs within the department. The final plan was used as a resource during the budget planning process in 2106. In 2017, the departments will work on projects outlined in the plan and begin making quarterly reports to Council on their progress.

## Future Development

### Transportation

The majority of the City's main thoroughfares are state facilities. TxDOT has completed design work on the FM3549 overpass project which had unexpected delays due to problems with the construction contract but after rebidding should get underway in early 2017. FM 3097 – Horizon Road – a heavily traveled roadway in the retail and medical corridor has been under construction in 2016 and is a 24-month improvement and widening project. The City and TxDOT have jointly funded the project. The City funded and TxDOT managed the construction of a project to reverse two ramps on I-30 improving access to John King Boulevard and alleviating pressure on other intersections during the FM 3549 overpass project. TxDOT has begun planning for the widening of SH205 in the 3 counties it serves. The City Council and staff have worked closely with TxDOT as planning progresses.

The City is a member of a County-wide Consortium which allows County government officials to work with officials of each of the seven cities in the county to further transportation planning efforts. The Consortium meets monthly to discuss funding alternatives for the County's transportation needs, which also involve planning and state participation. The County's bond initiatives allow funding for the advance planning and design of several major roadway projects. This allows the projects to be ready to commence as soon as state funding is allocated for construction. The Consortium was successful in securing new state funding for both SH 276 and FM 3549 widening projects after the state-wide referendums provided new dollars for the state's highway system. The fact that the projects were in design and would be ready to bid when dollars were made available was crucial in getting these new funds. The Consortium is continuing to look at other roadways in the County to get the next list of projects vetted and serves as a positive model for neighboring areas to see the successes that this collaboration has achieved.

### Medical Services

The presence of acute care at Presbyterian Hospital of Rockwall kicked off growth in the medical corridor. Several new medical buildings with doctors' suites and state of the art out-patient diagnostic imaging facilities have allowed Rockwall to become a regional medical services destination with new offices continuing to open each year. The medical destination drives other growth in the area and is an important boost to the City as visitors spend time dining and shopping while in the area.

## Retail / Entertainment

“The Harbor” development is situated on the shores of Lake Ray Hubbard at I-30. A public/private partnership provided opportunities for new retailers in the Bella Harbor development as well as public open space and a full-service Hilton Hotel and Conference Center. The Conference Center continues to attract events including numerous corporate training and retreat sessions and expects many which are scheduled for 2017. The retail center will be under new ownership in 2017 with many positive changes expected. A new Marriott Springhill Suites with 105 suites and conference space broke ground with completion slated for summer 2017. The hotel will be locally owned and operated and will employ a sales director to market the property to mid-size regional conferences and meetings.

In conjunction with private development, the City established a tax increment financing (TIF) zone on an approximately 103 acre tract which allowed the financing and development of public open space to complement the development and allow citizens access to the Lake Ray Hubbard shore line. The City partnered with Rockwall County, and the Rockwall Economic Development Corporation to establish the TIF to finance the public projects. In a second project, the City collaborated with the Trend Tower developer on construction of the seven-story, 85,000 square foot office tower overlooking the lake. Trend Tower offered Class-A office space to its corporate tenants as it opened in 2014. The City has signed a lease agreement with Trend on use of the parking garage offering much needed public parking for the Harbor events.

The City’s extremely successful 12-week Concert on the Lake Series managed by the City’s Recreation Department draws more than 5,000 attendees each Thursday evening for a free concert. Surveys conducted during the events gather data regarding the distance from which visitors traveled and approximate retail and restaurant dollars expended while here. The term “Live Music Capital of North Texas” has been coined to describe the many opportunities available year round in both public and restaurant venues.

Founder’s Day held annually in Myers Park allows residents and visitors to shop merchants’ wares, enjoy free concerts and children’s activities all day. The event culminates with a concert by a nationally recognized artist, also free to all who attend. This year the downtown merchants sponsored an art exhibit and sale during the day and shuttle service was provided between the two event locations.

A Farmer’s Market brings visitors downtown Saturdays from May to October. The annual “Rib Rub and Run” BBQ contest draws more than 50 teams to the downtown square. The Main Street Advisory Board and “Friends of Downtown Rockwall”, citizen volunteer group, worked to plan more special events to bring shoppers downtown. A late evening shopping event called “Night Owls” added late evening hours and live musical entertainment each Thursday, Friday and Saturday evening on the newly opened San Jacinto Plaza bringing people out to enjoy a relaxing evening downtown. In April 2016, the Downtown merchants partnered with the City to sponsor a day-long grand re-opening celebration as construction was completed on the \$8.6 million walkability and parking improvements to the Downtown square.

## Utilities

The water and wastewater rates were increased in 2016 and the City intends to raise rates in 2017. The City purchases treated water as a founding member city of the North Texas Municipal Water District. With extremely heavy 2015 rains the drought which had extended over several years and seemed to be worsening was broken and the area lakes filled completely. As the drought had

worsened the NTMWD asked its member and customer cities to reduce consumption by a minimum of 10%. Rockwall residents were so receptive to the call for conservation that actual consumption was reduced by more than 37%. While consumption has increased as time passes since the drought broke, it remains more than 25% below our peak year in 2012. Sales for the City’s water system increased by 19.32%. The City’s water system is recognized with the Texas Commission on Environmental Quality’s “Superior” rating.

The City actively works to acquire the right to serve recently annexed areas which are currently served by wholesale water supply corporations. It remains the City’s desire to be the provider for all residents in our city limits.

Debt Administration: Two ratios traditionally used to analyze the debt structure of municipalities are presented below. Revenue debt has been excluded since system charges are used to retire the debt.

Outstanding General Obligation Debt at 9-30-16 (net of Debt Service)	\$129,718,446
Estimated Population	41,519
G.O. Debt Per Capita	\$3,124
Net G.O. Debt per Assessed Value	3.02%

The City seeks a bond rating update as new debt is issued. The current ratings are shown below:

	<u>General Obligation</u>	<u>Revenue</u>	<u>Sales Tax(REDC)</u>
Standard & Poor’s Rating Group	AA+	A-	A-
Moody’s Investor Service Inc.	Aa2	Aa3	A1

**ACKNOWLEDGEMENTS**

The preparation of the comprehensive annual financial report on a timely basis was made possible by the dedicated service of the entire staff of the Finance Department. Each member of the department has our sincere appreciation for the contributions made in the preparation of this report.

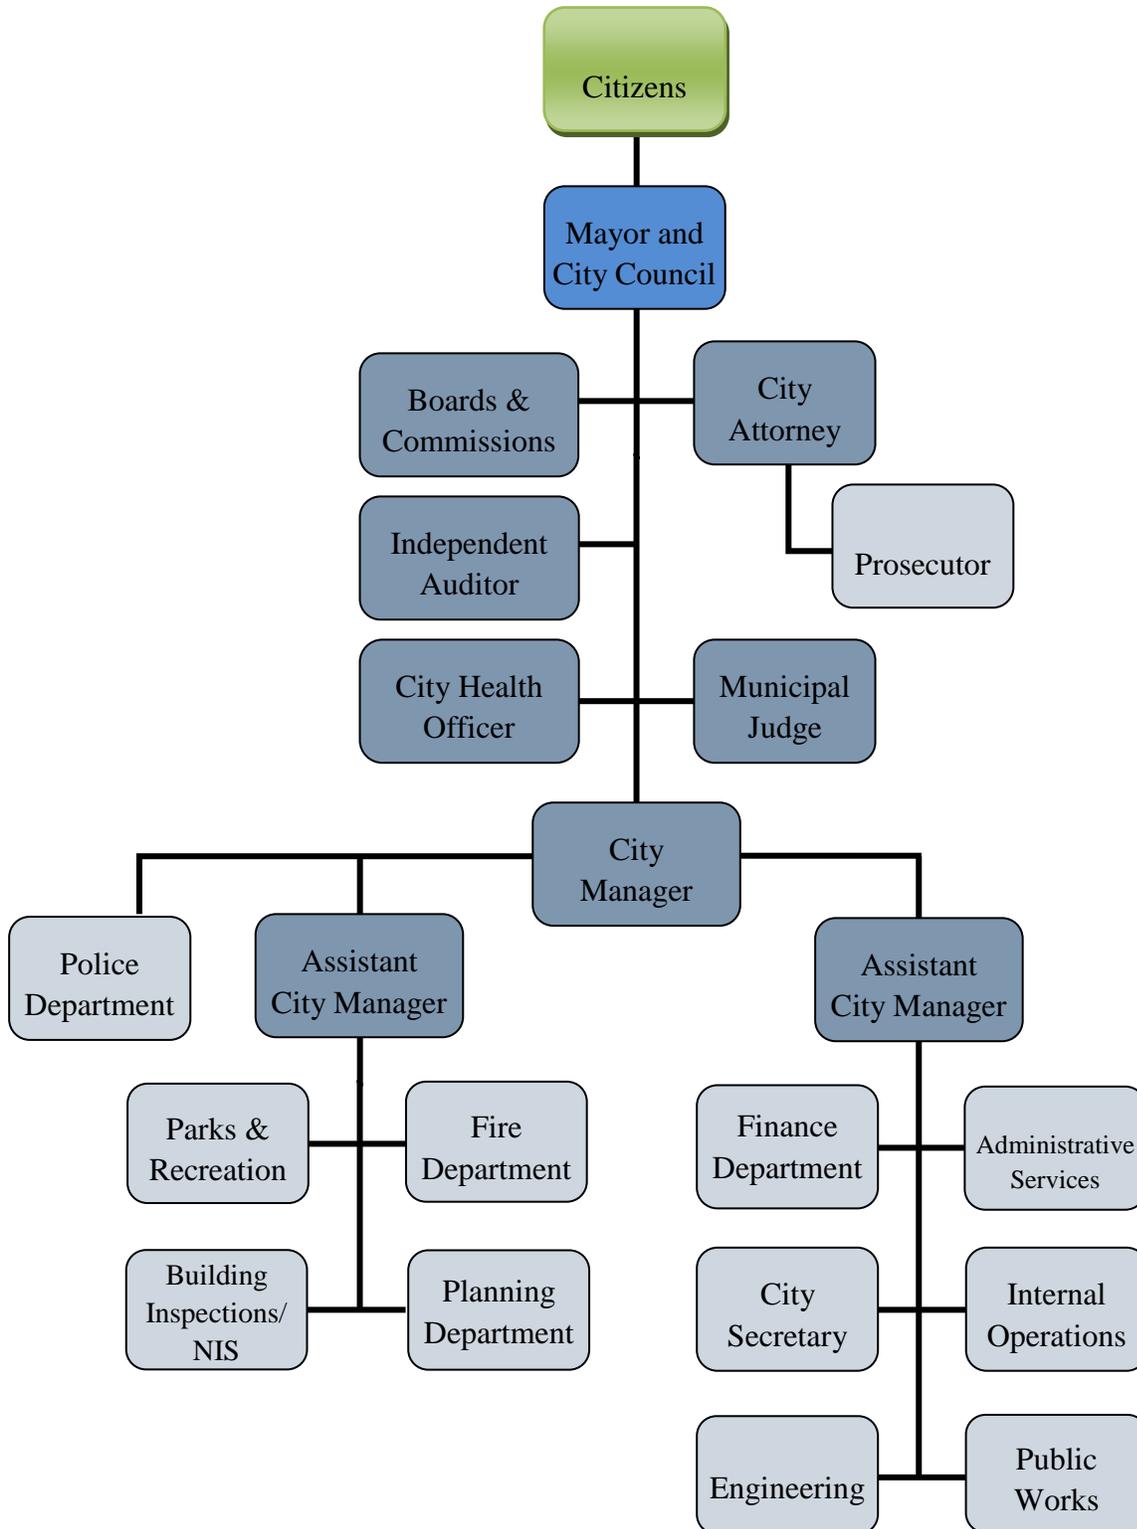

In closing, without the leadership and support of the governing body of the City, preparation of this report would not have been possible.

Sincerely,

Richard R. Crowley

## INDEPENDENT AUDITOR'S REPORT

To the City Council  
City of Rockwall, Texas

We have audited the accompanying financial statements of the governmental activities, the business-type activities, the aggregate discretely presented component units, each major fund, and the aggregate remaining fund information of the City of Rockwall, Texas, as of and for the year ended September 30, 2016, and the related notes to the financial statements, which collectively comprise the City's basic financial statements as listed in the table of contents.

### **Management's Responsibility for the Financial Statements**

Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

### **Auditor's Responsibility**

Our responsibility is to express opinions on these financial statements based on our audit. We conducted our audit in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditors' judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessment, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinions.

## Opinions

In our opinion, the financial statements referred to above present fairly, in all material respects, the respective financial position of the governmental activities, the business-type activities, the aggregate discretely presented component units, each major fund, and the aggregate remaining fund information of the City of Rockwall, Texas, as of September 30, 2016, and the respective changes in financial position and, where applicable, cash flows thereof for the year then ended in accordance with accounting principles generally accepted in the United States of America.

## Other Matters

### *Required Supplementary Information*

Accounting principles generally accepted in the United States of America require that the management's discussion and analysis and budgetary comparison information on pages 19-30 and 74 be presented to supplement the basic financial statements. Such information, although not a part of the basic financial statements, is required by the Governmental Accounting Standards Board, who considers it to be an essential part of financial reporting for placing the basic financial statements in an appropriate operational, economic, or historical context. We have applied certain limited procedures to the required supplementary information in accordance with auditing standards generally accepted in the United States of America, which consisted of inquiries of management about the methods of preparing the information and comparing the information for consistency with management's responses to our inquiries, the basic financial statements, and other knowledge we obtained during our audit of the basic financial statements. We do not express an opinion or provide any assurance on the information because the limited procedures do not provide us with sufficient evidence to express an opinion or provide any assurance.

### *Other Information*

Our audit was conducted for the purpose of forming opinions on the financial statements that collectively comprise the City of Rockwall, Texas' basic financial statements. The introductory section, combining and individual non-major fund financial statements and schedules, and statistical section are presented for purposes of additional analysis and are not a required part of the basic financial statements.

The combining and individual non-major fund financial statement and schedules are the responsibility of management and were derived from and relate directly to the underlying accounting and other records used to prepare the basic financial statements. Such information has been subjected to the auditing procedures applied in the audit of the basic financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the basic financial statements or to the basic financial statements themselves, and other additional procedures in accordance with auditing standards generally accepted in the United states of America. In our opinion, the combining and individual non-major fund financial statements are fairly stated, in all material respects, in relation to the basic financial statements as a whole.

The introductory and statistical section have not been subjected to the auditing procedures applied in the audit of the basic financial statements, and accordingly, we do not express an opinion or provide any assurance on them.

## MANAGEMENT’S DISCUSSION AND ANALYSIS

The discussion and analysis of the City of Rockwall’s financial performance provides an overview and analysis of the City’s financial activities for the fiscal year ended September 30, 2016. Please read it in conjunction with the City’s financial statements, which follow this section.

### FINANCIAL HIGHLIGHTS

- The City’s total net position was \$188,940,553 at September 30, 2016.
- During the year, the City’s governmental activities expenses were \$4,236,060 less than the \$41,701,496 generated in program revenues, taxes, other revenues and transfers.
- The assets of the City of Rockwall attributable to governmental activities exceeded its liabilities, net of deferred inflows and deferred outflows of resources at the close of the fiscal year ending September 30, 2016, by \$111,853,789 (net position).
- At the end of this fiscal year, the unassigned fund balance for the general fund was \$11,165,872 or approximately 35.2 percent of the total general fund operating expenditures and transfers out.
- The City’s total outstanding general obligation bonds and certificates of obligation (excluding enterprise and component unit debt) decreased by \$1,527,938 during fiscal year 2016. More detailed information is given in the notes section.

### OVERVIEW OF THE FINANCIAL STATEMENTS

This annual report consists of three parts - management’s discussion and analysis (this section), the basic financial statements, and required supplementary information. The basic financial statements include two kinds of statements presenting different views of the City:

The first two statements are government-wide financial statements that provide both long-term and short-term information about the City’s overall financial status.

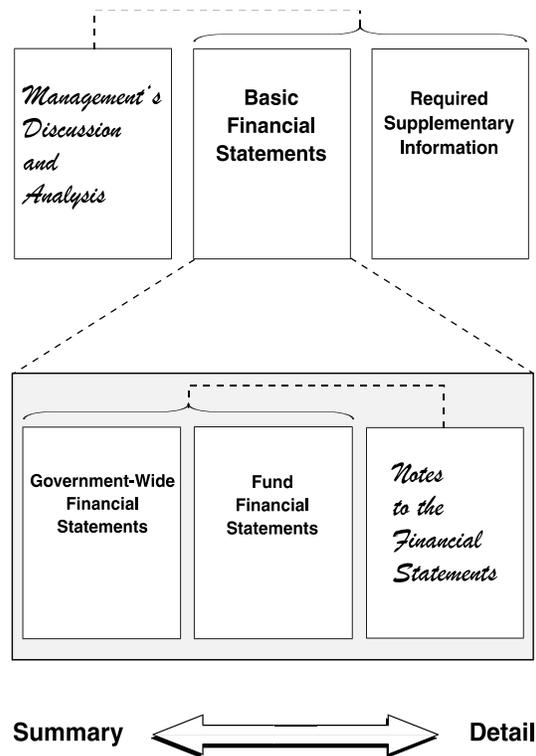

The remaining statements are fund financial statements that focus on individual parts of the government, reporting the City’s operations in more detail than the government-wide statements.

The governmental fund statements tell how general government services were financed in the short-term as well as what remains for future spending.

Proprietary fund statements offer short-term and long-term financial information about the activities the government operates like businesses.

Fiduciary fund statements provide information about the financial relationships in which the City acts solely as a trustee or agent for the benefit of others, to whom the resources in question belong.

Figure A-1, Required Components of the City’s Annual Financial Report

The financial statements also include notes that explain some of the information in the financial statements and provide more detailed data. The statements, followed by a section of required supplementary information, further explain and support the information in the financial statements. Figure A-1 shows how the required parts of this annual report are arranged and relate to one another.

**Figure A-2. Major Features of the City of Rockwall’s Government-wide and Fund Financial Statements**

<i>Type of Statements</i>	<b>Fund Statements</b>		
	<b>Government-wide</b>	<b>Governmental Funds</b>	<b>Proprietary Funds</b>
<i>Scope</i>	Entire City government (except fiduciary funds) and the City's component units	Activities of the City that are not proprietary or fiduciary, such as police, fire and parks	Activities the City operates similar to private business.
<i>Required financial statements</i>	◆ Statement of net position	◆ Balance Sheet	◆ Statement of net position
	◆ Statement of activities	◆ Statement of revenues, expenditures & changes in fund balances	◆ Statement of revenues, expenses & changes in fund net position ◆ Statement of cash flows
<i>Accounting basis and measurement focus</i>	Accrual accounting and economic resources focus	Modified accrual accounting and current financial resources focus	Accrual accounting and economic resources focus
<i>Type of asset/liability information</i>	All assets and liabilities, both financial and capital, short-term and long-term	Only assets expected to be used up and liabilities that come due during the year or soon thereafter; no capital assets included	All assets and liabilities, both financial and capital, short-term and long-term
<i>Type of inflow/outflow information</i>	All revenues and expenses during year, regardless of when cash is received or paid	Revenues for which cash is received during or soon after the end of the year; expenditures when goods or services have been received and payment is due during the year or soon thereafter	All revenues and expenses during year, regardless of when cash is received or paid

### **Government-wide Financial Statements**

The government-wide statements are designed to provide readers with a broad overview of the City of Rockwall’s finances, in a manner similar to private-sector business.

The *statement of net positions* presents information on all of the City of Rockwall’s assets and liabilities, with the difference between the two reported as *net position*. Over time, increases or decreases in net position may serve as a useful indicator of whether the financial condition of the City of Rockwall is improving or deteriorating. The statement of net position combines and consolidates governmental funds current financial resources (short-term spendable resources) with capital assets and long-term obligations. Other non-financial factors should also be taken into consideration, such as changes in the City’s property tax base and the condition of the City’s infrastructure, to assess the overall health or financial condition of the City.

The *statement of activities* presents information showing how the City’s net position changed during the most recent fiscal year. All of the current year’s revenues and expenses are taken into account regardless of when cash is received or paid. Thus, revenues and expenses are reported in this statement for some items that will only result in cash flows in future fiscal periods; for example, uncollected taxes and earned but unused vacation leave. Both the statement of net position and the statement of activities are prepared utilizing the accrual basis of accounting.

In the Statement of Net Position and the Statement of Activities, the City is divided into three kinds of activities:

*Governmental activities* – Most of the City’s basic services are reported here, including administration, police, fire, planning and zoning, finance, parks and recreation, municipal court and engineering. Property taxes, sales taxes, franchise fees and charges for services provide funds for most of the activities.

*Business-type activities* – The City charges fees to customers to help it cover all or most of the cost of certain services it provides. We report the City’s water and sewer system here.

*Component Units* – The City of Rockwall (the primary government) includes two discretely presented component units. The City’s Type A Sales Tax Corporation known as the Rockwall Economic Development Corporation and the Rockwall Technology Park Association. Although legally separate, The City of Rockwall is financially accountable for these component units. The City Council appoints the component unit’s Board of Directors, sets the budget and approves any debt issuance.

The government-wide financial statements are found on pages 24-25 of this report.

## **Reporting the City’s Most Significant Funds**

### Fund Financial Statements

The fund financial statements provide more detailed information about the City’s most significant funds - not the City as a whole. *Funds* are accounting devices the City uses to keep track of specific sources of funding and spending for particular purposes. Some funds are required by State law and by bond covenants. However, the City establishes other funds to control and manage money for particular purposes or to show that it is properly using certain taxes and grants.

The City has the following types of funds:

*Governmental funds* - Most of the City’s basic services are included in governmental funds, which focus on (1) how cash and other financial assets that can readily be converted to cash flow in and out and (2) the balances left at year-end that are available for spending. Consequently, the governmental fund statements provide a detailed short-term view that helps users of the financial statements determine whether there are more or fewer financial resources that can be spent in the near future to finance the City’s programs. By comparing information presented for governmental funds with similar information presented for governmental activities in the government-wide financial statements, readers may better understand the long-term impact of the government’s near-term financing decisions. Because this information does not encompass the additional long-term focus of the government-wide statements, we provide additional information at the bottom of the governmental funds statement, or on the subsequent page, that explain the relationship (or differences) between them.

The City of Rockwall maintains 22 individual governmental funds. Information is presented separately in the governmental funds balance sheet and in the governmental funds statement of revenues, expenditures and changes in fund balances for the General fund, Debt Service fund, and G.O. Bonds Capital Projects fund, which are considered major funds. Data from the other 19 governmental funds are combined into a single, aggregated presentation. Individual fund data for each of these non-major governmental funds is provided in the form of combining statements elsewhere in this report.

*Proprietary funds* - Services for which the City charges customers a fee are generally reported in proprietary funds. Proprietary funds, like the government-wide statements, provide both long-term and short-term financial information. The City's enterprise funds (a component of proprietary funds) are identical to the business type activities that are reported in the governmental-wide statement but provide more detail and additional information such as cash flows, for proprietary funds. The Internal Service funds (the other component of proprietary funds) are utilized to report activities that provide services for the City's self-insurance funds. The Internal Service funds are reported as governmental activities in the government-wide financial statements.

The City of Rockwall maintains an Enterprise Fund to account for water and sewer services provided to the City's retail and wholesale customers. All activities associated with providing such services are accounted for in this fund, including administration, operations, maintenance, debt service, capital improvements, billing and collection. The City's intent is that all costs of providing the services to the public on a continuing basis are financed through user charges in a manner similar to a private business enterprise.

The City maintains two internal service funds to account for funds accumulated to self-insure for health and workers compensation claims. Individual fund data for each of these business-type funds is provided in the form of combining statements elsewhere in this report.

*Fiduciary funds* - The City is the trustee, or *fiduciary*, for certain funds. It is also responsible for other assets that - because of a trust arrangement - can be used only for the trust beneficiaries. The City is responsible for ensuring that the assets reported in these funds are used for their intended purposes. All of the City's fiduciary activities are reported in a separate statement of assets and liabilities of the agency fund. We exclude these activities from the City's government-wide financial statements because the City cannot use these assets to finance its operations.

*Notes to the financial statements* - The notes provide additional information that is essential to a full understanding of the data provided in the government-wide and fund financial statements.

## **Other Information**

In addition to the basic financial statements and accompanying notes, this report presents certain *required supplementary information* concerning the City of Rockwall. This information is required by accounting principles generally accepted in the United States of America.

## CONDENSED GOVERNMENT-WIDE FINANCIAL INFORMATION

At the end of fiscal year 2016, the City's net position (assets exceeding liabilities) totaled \$188,940,533. This analysis focuses on the net position (Table 1) and changes in net position (Table 2).

The largest portion of the City's net position (85.7 percent) reflects its investment in capital assets (i.e., land, buildings, machinery, equipment, and infrastructure); less any related debt used to acquire those assets, which is still outstanding. The City uses these capital assets to provide services to citizens; consequently, these assets are not available for future spending. Although the City's investment in its capital assets is reported net of related debt, it should be noted that the resources needed to repay this debt must be provided from other sources, since the capital assets themselves cannot be used to liquidate these liabilities.

## Governmental Activities

The City's total revenues of governmental activities were \$47,540,166. A significant portion 44.10%, of the City's revenues came from property taxes. Another 34.35% of revenue came from sales taxes. Ad valorem property tax revenues as a percent of revenues continue to increase each year due to the addition of new properties and increases in assessed valuation throughout the City. The City Council has chosen to either maintain the current rate or lower the tax rate each of the last five years. Total assessed values of the properties in the City increased by 6.9%. The City adopted a property tax rate of 48.53 cents per \$100 of assessed valuation for fiscal year 2016. Growth in the assessed valuation and conservative budgets allowed the City to lower the rate for fiscal year 2016 by 1.02 cents per hundred dollars of assessed valuation. Sales tax revenue increased over the prior year by 7.64% which was most influenced by increases in same stores sales. While housing starts are not expected to return to pre-downturn levels, they are trending upward and are reflective of larger homes on larger tracts resulting in significantly higher price points. Developers started infrastructure work on several new subdivisions including phases of Stone Creek, Breezy Hill, and Lakes of Somerset in 2016. The permit revenues decreased by 2.7% after increasing more than 25% in the previous fiscal year. Housing starts were strong in fiscal year 2016 but commercial permits did not increase as significantly as the year past. Over the past several years, Rockwall County, of which the City of Rockwall is the County seat, was one of the fastest growing counties in America, and named the wealthiest county in Texas.

## Comparative Expenses – Governmental Activities

The total cost of all programs and services were \$44,253,356. Of this total, \$11,001,835 (24.9%) was for the Police Department. The department increased expenditures for fiscal year 2016 when compared to the prior year. Staffing was realigned in the Police Department and an officer was promoted to a Sergeant position without filling the vacancy he created. In addition, officer salaries were increased to stay competitive in our area job market. Public Works costs were \$12,889,840 (29.1%) and reflected ongoing road reconstruction

projects, the final expenses associated with the downtown improvements and an increase in the ongoing street maintenance focused projects. A study was funded to evaluate the pavement condition of all streets, alleys and sidewalks in the City limits. The results will be evaluated in the coming year and used to determine priorities for future capital projects. Administrative departments including Administration, Human Resources, and Internal Operations which is responsible for building maintenance, the public safety radio system and IT had combined costs of \$6,145,346 (13.9%).

### **Business-Type Activities**

The City's business-type activities recorded an increase of \$4,744,270 in net position. Retail water sales increased by 24.64% in part due to raising rates by 10% in January. Despite the lack of mandatory conservation measures, the City's water consumption has not returned to pre-drought levels and remains a source of concern. Consumption levels remain more than 30% below the last non-drought year which was 2012. The City's rates were increased in 2013, 2014, 2015 and 2016 with another increase expected for 2017. The City implemented a conservation focused water rate structure in 2001 and increases the rate tiers each time new rates are adopted. The rates for sewer were also increased and total sewer charges increased by 15.4% for the fiscal year. The City employs winter averaging to calculate sewer billing, so revenues are largely not affected by restrictions on irrigating lawns. Water and sewer charges were \$19,099,038.

Water and wastewater impact fees (Capital recovery fees) revenue totaled \$1,154,040 for the fiscal year. Impact fees, paid by developers, are designed to reduce the system's initial costs in building assets to serve new growth. Residential development is assessed an impact fee at the building permit stage while commercial projects are assessed at the beginning of site development.

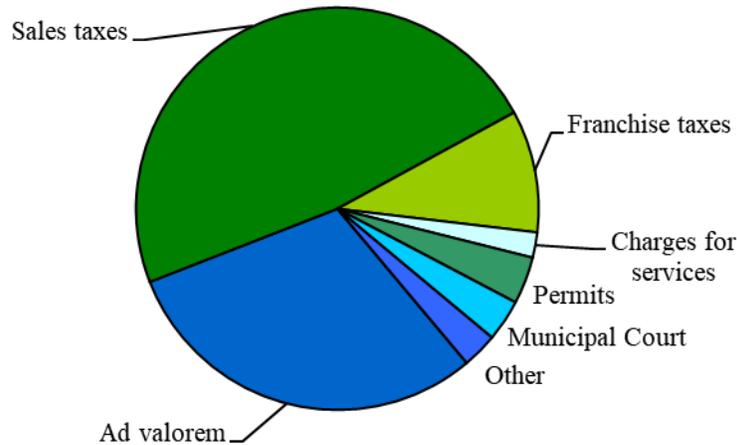

### **Component Units**

The Rockwall Economic Development Corporation (REDC) reported revenues including the ½-cent sales tax, authorized under the Type A Corporation statutes, of \$5,212,617. Assets managed by the corporation include an inventory of over 263 acres of land, zoned for light industrial uses and available for sale. The REDC continues to attract companies to the City through its marketing efforts and ability to match businesses to available land.

### **ANALYSIS OF INDIVIDUAL FUNDS**

The City's *General Fund* reported an ending unassigned fund balance of \$11,165,872. The largest source of general fund revenue is sales tax, it accounted for \$15,574,733 (47.98%) of total general fund revenue. Ad valorem property taxes account for \$9,801,470 (30.2%) of general fund revenues. The City's property tax rate is split between maintenance/operations and debt service. The City maintains the unassigned fund balance at or above acceptable levels as defined within the City's financial policies. This "reserve" balance allows the City Council to elect to fund projects unforeseen during the budgeting process and provides a measure of security against changes in the economy and the timing of cash flows. The City Council elected to use reserves to purchase equipment for the Police and Fire departments as well as additional funding for street maintenance. This planned use of reserves totaled \$2,029,731. The City's planned expenditures during fiscal year 2016 included capital equipment and maintenance projects in order to reduce the general fund unassigned balance. The unassigned balance decreased by \$311,057 or 2.8%.

## Revenues by Source – General Fund

The City's *Debt Service Fund* reported an increase in fund balance of 1,264,688. Property tax collections for debt service requirements were \$10,513,294. This is required in order to pay debt service payments on bonds issued to construct numerous road and parks projects completed since the City's bond election in 2005 authorized more than \$65,031,000 in projects. After extensive study, the City adopted a Roadway Impact Fee which was updated in 2014 and which provided \$421,113 in new revenue to this fund in fiscal year 2016. The City Council chooses to budget a portion of this fund balance each year toward meeting the debt service obligations. This allows the use of the debt service fund reserves to lessen the effect of new debt issues on the property tax rate each year.

The *G.O. Bonds Capital Projects Fund* reported an assigned fund balance of \$9,919,654, an increase of \$5,330,817 from the prior year. Downtown improvements were completed in fiscal year 2016. Funding for the access ramp improvements on Interstate 30 at John King were incurred in 2016 as well. Work should be completed on the ramps in 2017.

## GENERAL FUND BUDGETARY HIGHLIGHTS

During fiscal year 2016, the City Council of the City of Rockwall amended the budget to provide funding for several unforeseen projects and to recognize salary savings over the year, as well as increases or decreases in revenues when compared to original projections. With the adjustments made to the budget, the original budgeted expenditures of \$29,315,300 increased to \$30,446,270 while revenue estimates increased from \$31,512,800 to \$32,571,200. The City of Rockwall had originally estimated the ending general fund unassigned balance to be \$10,857,929 however due to the budget adjustments mentioned above the fund balance was re-estimated to be \$10,591,759.

General fund revenues ultimately were \$32,462,481, a negative variance of \$108,719 over the amended budget estimate, reflecting a smaller than anticipated increase in sales tax collections late in the budget year. Actual general fund total expenditures were \$29,703,438 or \$742,832 less than final projections. Final expenditures in each department were generally less than anticipated. The City ended the year with a fund balance of \$11,165,872, or \$311,057 less than the prior year. The lower fund balance is due to planned expenditures of capital items to reduce a fund balance which remains in excess of stated financial policies. City Council intended to reduce the fund balance by more than \$600,000 but the conservative projections of both revenues and expenditures resulted in a lesser change in fund balance.

## CAPITAL ASSET AND DEBT ADMINISTRATION

### Capital Assets

At the end of the fiscal year 2016 the City had \$296,366,903 (Table 3) invested in a broad range of capital assets, including buildings, parks facilities, roads, police and fire equipment and water and sewer lines. The balances shown below are net of accumulated depreciation.

**Table 3**  
**Capital Assets at Year-End**

	Governmental Activities		Business-Type Activities		Total Primary Government	
	2016	2015	2016	2015	2016	2015
Land	\$ 17,238,772	\$ 17,238,772	\$ 799,533	\$ 799,533	\$ 18,038,305	\$ 18,038,305

	<u>\$ 194,092,167</u>	<u>\$ 196,053,217</u>	<u>\$ 102,274,731</u>	<u>\$ 100,319,376</u>	<u>\$ 296,366,898</u>	<u>\$ 296,372,593</u>

The City held a bond election in May 2012 during which voters approved propositions to fund several street reconstruction projects as well as infrastructure and accessibility projects in the downtown area in excess of \$27,800,000. Construction was completed in 2016 and the renewed area was celebrated in a grand opening event on April 16th. The interstate ramp reversal project approved by voters was under construction in 2016 with opening slated for early 2017. The remaining roadway rehabilitation projects are under design and will be ready for bidding in 2017.

Additional information regarding the City's capital assets is found in note III-D on pages 47-50.

### Debt

At year-end, the City had \$134,781,724 in bonds and capitalized leases shown in Table 4.

<b>Table 4</b>						
<b>City of Rockwall Outstanding Debt</b>						
	Governmental Activities		Business-Type Activities		Total Primary Government	
	2016	2015	2016	2015	2016	2015

Certificates of obligation	8,580,000	14,610,000	10,690,000	26,220,000	19,270,000	40,830,000
Revenue bonds	-	-	-	3,235,000	-	3,235,000
Capital Lease obligations	-	51,525	4,571,724	5,041,729	4,571,724	5,093,254
	<u>\$ 98,585,000</u>	<u>\$ 100,451,525</u>	<u>\$ 35,801,724</u>	<u>\$ 34,496,729</u>	<u>\$ 134,386,724</u>	<u>\$ 134,948,254</u>

The City is permitted by Article XI, Section 5, of the State of Texas Constitution to levy taxes up to \$2.50 per \$100 of assessed valuation for general governmental services including the payment of principal and interest on general obligation long-term debt. The current ratio of net tax-supported bonded debt to assessed value of all taxable property is 3.02% or \$3,124 per capita.

The City’s bond ratings at September 30, 2016 were as follows:

	<u>General Obligation</u>	<u>Revenue</u>	<u>Sales Tax(REDUC)</u>
Standard & Poor’s Rating Group	AA+	A+	A-
Moody’s Investor Service Inc.	Aa2	A1	A1

Additional information on the City of Rockwall’s long-term debt may be found in note III-F, on pages 52-58 of this report.

**ECONOMIC FACTORS AND NEXT YEAR’S BUDGETS AND RATES**

The City’s elected and appointed officials considered many factors when setting the fiscal year 2017 budget, tax rate, and fees that will be charged for the business-type activities. The major factor affecting all decisions in 2015 was the impact that mandatory water conservation has caused to revenues. With consumption increasing again, after drought restrictions were lifted, the City Council was able to budget for previously delayed equipment replacement and design of several needed water and sewer line projects. Having chosen to discontinue the management transfer from the enterprise fund to the general fund in 2015, this has not been reinstated yet in order to help restore the reserve levels, which were severely depleted. The City conservatively budgeted a 2% increase in sales tax revenue and modest increases in franchise fees. Increases are expected in construction related activity as new subdivision phases are beginning and housing sales are improving. Local builders continue to encourage the City to project continued improvement in home starts for the coming year.

The City of Rockwall’s citizens enjoy above-average income levels per household. This combined with the City’s proximity to major highways, and the Dallas-Ft.Worth SMSA make Rockwall an attractive city in which to locate. The City prides itself on a quality school district and “hometown” atmosphere. The Rockwall Economic Development Corporation works to attract businesses with relocation incentives as well as business retention incentives such as workforce training opportunities. The City’s unemployment rate was 3.1%, well below the national levels.

The City of Rockwall considered these factors when adopting the General Fund budget for fiscal year 2017. The budgeted revenues for fiscal year 2017 total \$34,019,150 for the general fund. Ad valorem tax revenue is determined by two factors, the total assessed value established by the Rockwall Central Appraisal District and the tax rate established by the Rockwall City Council. The property tax rate was reduced to 45.43 cents per hundred dollars of assessed value.

The City adopted written financial policies in 2001, which require that revenues and expenditures be projected conservatively. The policies include debt level guidelines. These policies were reviewed by the City Council in 2009 and certain provisions related to the City’s fund balance were changed. The amended policy provides that the General Fund reserves should be no less than 3 months of recurring operating appropriations. In addition, the policies provide that should an audited fund balance at the end of the fiscal year exceed 3.5 months, the City Council may elect to transfer a portion to a Capital Projects Fund. The projected ending general fund balance for 2017 provides approximately 4.25 months of

reserves for the City. The City Council elected to purchase capital equipment including city specific components of a new county-wide radio system, upgrades to building security at the Police Station, police vehicles, fire safety equipment and street patching equipment, normally financed with short-term debt obligations, due in large part to the healthy fund balance. The 2017 budget reflects continued funding for street maintenance projects and begins the process to fund future vehicle purchases through transfers to a Vehicle Acquisition fund.

The 2017 budget expenditures include the addition of three Fire Drivers, a Police Captain and Field Supervisor in the Street department. An additional \$400,000 was included in the Street department budget for maintenance projects.

The water and sewer rate study has been updated to reflect increased charges from the North Texas Municipal Water District for treated water and the budget anticipates a significant increase in those rates. A number of capital projects to design replacement systems for older lines were undertaken in 2016 with projects slated to begin in 2017. A staged program to add generators to each wastewater lift station will continue in 2017 and infrastructure asset management software will be purchased. Operational costs were increased in order to complete deferred maintenance and the purchases discussed above.

## **REQUESTS FOR INFORMATION**

This financial report is designed to provide our citizens, taxpayers, customers, and creditors with a general overview of the City's finances. For more information, contact the City's Assistant City Manager/Director of Finance, Mary Smith at (972) 771-7701; City of Rockwall; 385 South Goliad Street, Rockwall TX 75087. Email: [msmith@rockwall.com](mailto:msmith@rockwall.com).

CITY OF ROCKWALL, TEXAS  
RECONCILIATION OF THE STATEMENT OF REVENUES, EXPENDITURES,  
AND CHANGES IN FUND BALANCES OF GOVERNMENTAL FUNDS  
TO THE STATEMENT OF ACTIVITIES  
FOR THE YEAR ENDED SEPTEMBER 30, 2016

Net change in fund balances - governmental funds	\$ 5,754,992
Amounts reported for governmental activities in the statement of activities are different because:	
The net revenue (expense) of internal service funds is reported with governmental activities in the statement of net assets.	(70,213)
Certain assets are not available to pay for current period expenditures and are not reported as revenues in the funds. The following amounts represent the changes in these assets during the year:	
Property taxes receivable	42,602
Assessments receivable	6,033
Franchise taxes receivable	15,328
Court fines receivable	(26,036)
Governmental funds report capital outlays as expenditures. However, in the statement of activities the cost of these assets is allocated over their estimated useful lives and reported as depreciation expense. This is the amount by which depreciation (\$10,911,999) exceeded capital outlays (\$8,970,423) and retirements (\$19,472) in the current period.	(1,961,048)
Donations of capital assets increase net assets in the statement of activities, but are not reported in the funds because they do not provide current financial resources.	2,169,720
Governmental funds report debt issuance costs as expenditures. However, in the statement of activities these costs are allocated over the term of the underlying debt and reported as amortization expense. This is the amount of amortization in the current period, net of additions for debt issue cost incurred.	105,276
Governmental funds report proceeds of debt as other financing sources and payments to the escrow agent for refunding of debt as other financing uses. This is the net of other financing sources (\$68,066,951) less other financing uses (\$59,060,574).	(9,006,377)
Expenditures are recognized in the governmental fund when paid. However, the Statement of Activities is presented on an accrual basis and expenses are reported when incurred. The following is the net difference in pension costs	847,805
Accrued interest payable on long-term debt does not require the use of current financial resources and is not reported in the funds. This is the amount of the change in accrued interest payable during the year.	81,246
Bond proceeds provide current financial resources to governmental funds, but issuing debt increases long-term liabilities in the statement of net assets. Repayment of debt principal is an expenditure in the governmental funds, but the repayment reduces long-term liabilities in the statement of net assets. This is the amount of repayments (\$6,560,000) and bond premium amortization (\$13,941) in the current period.	6,573,941
Compensated absences payable do not require the use of current financial resources and are not reported as expenditures in governmental funds. This is the amount of the change in accrued compensated absences during the year.	<u>(297,209)</u>
	<u>\$ 4,236,060</u>

CITY OF ROCKWALL, TEXAS

NOTES TO FINANCIAL STATEMENTS

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

*Reporting Entity*

The City of Rockwall, Texas (the "City") was founded in 1854 and incorporated in 1874. The City operates under the Council-Manager form of government as adopted by a home rule charter approved January 21, 1985. The City provides a full range of municipal services including public safety (police and fire), highway and streets, parks and recreation, health and social services, planning and zoning, and general administrative services. In addition, the City provides water and sewer services as a proprietary function of the City.

The accounting policies of the City conform to generally accepted accounting principles issued by the Governmental Accounting Standards Board (GASB) which is the recognized financial accounting standard setting body for governmental entities. The notes to the financial statements are an integral part of the City's basic financial statements.

The City is a home rule municipality governed by an elected Mayor and six-member City Council who appoint a City Manager. The City's (primary government) financial statements include its component units. The accompanying basic financial statements comply with the provisions of GASB Statement No. 14, *The Financial Reporting Entity*, in that the financial statements include all organizations, activities, functions and component units for which the City (the "primary government") is financially accountable. Financial accountability is defined as the appointment of a voting majority of a legally separate organization's governing body and either: (1) the City's ability to impose its will on the organization, or (2) the potential that the organization will provide a financial benefit to, or impose a financial burden on, the City.

*Discretely Presented Component Units*

The Rockwall Economic Development Corporation (REDC) is governed by a seven member Board of Directors appointed, at will, by the City Council. REDC represents the City by promoting it as a location for new business; it also acquires and develops land for that purpose. REDC collects a half-cent sales tax to support its activities.

The Rockwall Technology Park Association (RTPA) provides repair and maintenance of the common area within the park being developed by REDC. RTPA's Board of Directors is composed of representatives of the landowners. At September 30, 2016, REDC owned the majority of the land and the Board was therefore composed of REDC board members. When the park becomes 75% or more owned by private landowners, it will become an entity independent of the City. Until then, it is controlled by REDC, a discrete component unit of the City. RTPA, is effectively controlled by the City through REDC and thus provides a potential financial benefit or burden to the City.

The funds of both REDC and RTPA are composed of governmental fund types. Stand alone financial statements for REDC and RTPA as of and for the fiscal year ended September 30, 2016 are not prepared.

CITY OF ROCKWALL, TEXAS

NOTES TO FINANCIAL STATEMENTS

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES – continued

*Government-wide and Fund Financial Statements*

The government-wide financial statements (i.e. the statement of net position and the statement of activities) report information on all of the non-fiduciary activities of the primary government and its component units. For the most part, the effect of inter-fund activity has been removed from these statements. *Governmental activities*, which normally are supported by taxes and intergovernmental revenues, are reported separately from *business-type activities*, which rely, to a significant extent, on fees and charges for support. Likewise, the *primary government* is reported separately from certain legally separate *component units* for which the primary government is financially accountable.

The statement of activities demonstrates the degree to which the direct expenses of a given function or segment are offset by program revenues. *Direct expenses* are those that are clearly identifiable with a specific function or segment. *Program revenues* include: (1) charges to customers or applicants who purchase, use, or directly benefit from goods, services, or privileges provided by a given function or segment, and (2) grants and contributions that are restricted to meeting the operational or capital requirements of a particular function or segment. Taxes and other items not properly included among program revenues are reported instead as *general revenues*.

Separate financial statements are provided for governmental funds, proprietary funds, and fiduciary funds, even though the latter are excluded from the government-wide financial statements. Major individual governmental funds and major individual enterprise funds are reported as separate columns in the fund financial statements.

*Measurement Focus, Basis of Accounting, and Financial Statement Presentation*

The government-wide financial statements are reported using the *economic resources measurement focus* and the *accrual basis of accounting*, as are the proprietary fund and fiduciary fund financial statements. Revenues are recorded when earned and expenses are recorded when a liability is incurred, regardless of the timing of related cash flows. Property taxes are recognized as revenues in the year for which they are levied. Grants and similar items are recognized as revenue as soon as all eligibility requirements imposed by the provider have been met.

Governmental fund financial statements are reported using the *current financial resources measurement focus* and the *modified accrual basis of accounting*. Revenues are recognized as soon as they are both measurable and available. Revenues are considered to be *available* when they are collectible within the current period or soon enough thereafter to pay liabilities of the current period. For this purpose, the City considers revenues to be available if they are collected within 60 days of the end of the current fiscal period. Expenditures generally are recorded when a liability is incurred, as under accrual accounting. However, debt service expenditures, as well as expenditures related to compensated absences and claims and judgments, are recorded only when payment is due.

Property taxes, franchise taxes, licenses, and interest associated with the current fiscal period are all considered to be susceptible to accrual and so have been recognized as revenues of the current fiscal period. Only the portion of special assessments receivable due within the current fiscal period is considered to be susceptible to accrual as revenue of the current period. All other revenue items are considered to be measurable and available only when cash is received by the City.

CITY OF ROCKWALL, TEXAS

NOTES TO FINANCIAL STATEMENTS

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES – continued

*Measurement Focus, Basis of Accounting, and Financial Statement Presentation – continued*

The City reports the following major governmental funds:

The *General Fund* is the City's primary operating fund. It accounts for all financial resources of the general government, except those required to be accounted for in another fund.

The *Debt Service Fund* accounts for the resources accumulated and payments made for principal and interest on long-term debt of governmental funds.

The *G.O. Bonds Capital Projects Fund* accounts for the acquisition or construction of capital assets used in the operation of governmental funds.

The City reports the following major proprietary fund:

The *Water and Sewer Fund* operates the water distribution system and the wastewater treatment plants, wastewater pumping stations, and collection systems.

Additionally, the City reports the following fund types:

Internal Service Funds account for employees' health insurance and workers' compensation coverage services provided to other departments or agencies of the government on a cost-reimbursement basis.

Special Revenue Funds account for specific revenue sources that are legally restricted to expenditures for specified purposes (not including expendable trusts or major capital projects).

Capital Projects Funds account for the acquisition of capital assets or the construction of major capital projects (such as streets and sidewalks) not being financed by proprietary funds.

Fiduciary Funds account for assets held by the City in a trustee capacity or as an agent on behalf of others. The Agency Fund is custodial in nature and does not present results of operations or have a measurement focus. Agency funds are accounted for using the accrual basis of accounting. This fund is used to account for developer contributions for infrastructure projects related to various developments to be constructed at a later date.

Private-sector standards of accounting and financial reporting issued prior to December 1, 1989, generally are followed in both the government-wide and proprietary fund financial statements to the extent that those standards do not conflict with or contradict guidance of the Governmental Accounting Standards Board. Governments also have the *option* of following subsequent private-sector guidance for their business-type activities and enterprise funds, subject to this same limitation. The City has elected not to follow subsequent private-sector guidance.

CITY OF ROCKWALL, TEXAS

NOTES TO FINANCIAL STATEMENTS

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES – continued

*Measurement Focus, Basis of Accounting, and Financial Statement Presentation – continued*

As a general rule the effect of inter-fund activity has been eliminated from the government-wide financial statements. Exceptions to this general rule are payments-in-lieu of taxes and other charges between the City's water and sewer function and various other functions of the City. Elimination of these charges would distort the direct costs and program revenues reported for the various functions concerned.

Amounts reported as *program revenues* include: (1) charges to customers or applicants for goods, services, or privileges provided, (2) operating grants and contributions, and (3) capital grants and contributions, including special assessments. Internally dedicated resources are reported as *general revenues* rather than as program revenues. Likewise, general revenues include all taxes, miscellaneous revenue, and interest income.

Proprietary funds distinguish *operating* revenues and expenses from *non-operating* items. Operating revenues and expenses generally result from providing services and producing and delivering goods in connection with a proprietary fund's principal ongoing operations. The principal operating revenues of the Water and Sewer enterprise fund are charges to customers for sales and services. The enterprise utility fund also recognizes as operating revenue the portion of tap fees intended to recover the cost of connecting new customers to the system. Operating expenses for the enterprise fund include the cost of sales and services, administrative expenses, and depreciation on capital assets. All revenues and expenses not meeting this definition are reported as non-operating revenues and expenses.

*Assets, liabilities, and net position or equity*

Deposits and investments

The City maintains various accounts for each fund at its depository. The City also has cash maintained by agents for debt payments and reserves, construction reserves and workers' compensation claims. For purposes of the statement of cash flows, the City considers all highly liquid debt instruments purchased with a maturity of three months or less to be cash equivalents.

The City's investment policy authorizes the Director of Finance to invest in the following types of investments:

- a. Obligations of the United States or its agencies and instrumentalities with finite maturity dates, with a maximum maturity of not greater than five (5) years. Laddering of investments should be considered.
- b. Direct obligations of the State of Texas or its agencies and instrumentalities, with stated finite maturity dates.
- c. Other obligations, with finite maturity dates, the principal and interest of which are unconditionally guaranteed or insured by the State of Texas or the United States or their respective agencies or instrumentalities.
- d. Obligations of states, agencies, counties, cities and other political subdivisions of any state having been rated as to investment quality by a nationally recognized investment rating firm and having received a rating of not less than "A" or its equivalent.

CITY OF ROCKWALL, TEXAS

NOTES TO FINANCIAL STATEMENTS

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES – continued

*Assets, liabilities, and net assets or equity – continued*

Deposits and investments - continued

- e. Certificates of deposit issued by a state or national bank domiciled in the State of Texas or a savings bank domiciled in the State of Texas provided that they are:
  - (1) Guaranteed or insured by the Federal Deposit Insurance Corporation or its successor,
  - (2) Secured by obligations outlined in items "a" through "d" above. The market value of all collateral must be marked to market on a daily basis and shall not be less than 102% of the principal amount of the certificate plus accrued interest, or
  - (3) Secured in any other manner in an amount provided by law for deposits of the City.
- f. Repurchase agreements which are fully collateralized by obligations of the United States or its agencies and instrumentalities, marked to market on a daily basis with a market value of at least 102% of the principal invested, including accrued interest. The securities being purchased must be pledged to the City and held in the City's name by a third party selected and approved by the City. The repurchase agreement must have a defined termination date and be placed through a primary government securities dealer or a financial institution doing business in the State of Texas. The repurchase agreements should be secured by obligations approved in this policy.
- g. Banker's acceptances having a stated maturity of 270 days or less, to be liquidated in full at maturity, which are rated not less than "A-1" or "P-1" (or an equivalent rating) by at least one nationally recognized credit rating agency provided that it is eligible for borrowing from a Federal Reserve Bank.
- h. Commercial paper having a stated maturity of 270 days or less and rated not less than "A-1" or "P-1" (or an equivalent rating) by at least two nationally recognized rating agencies or one nationally recognized rating agency and is fully secured by an irrevocable letter of credit issued by a bank organized and existing under the laws of the United States.
- i. No-load money market mutual fund registered with and regulated by the SEC, which has a dollar-weighted average stated maturity of 90 days or less. It must have included in its investment objectives its intent to maintain a stable net asset value of \$1 for each share. The fund must provide the City with a prospectus and other information required by the SEC.
- j. No-load mutual funds, registered with and regulated by the SEC, having weighted maturity of less than two years, and which invests exclusively in investments approved by this policy.
- k. Investment pools which are approved by the City Council, provided they meet all the criteria for investment pools outlined in Chapter 2256, Texas Local Government Code, and maintain a continuous rating not lower than AAA or AAA-m (or an equivalent rating) from at least one nationally recognized rating service.

CITY OF ROCKWALL, TEXAS

NOTES TO FINANCIAL STATEMENTS

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES – continued

*Assets, liabilities, and net assets or equity – continued*

Deposits and investments - continued

The City holds various mortgage-backed securities that offer higher yields but are sensitive to changes in interest rates and other market conditions. Timely payment of interest and principal are guaranteed by federal agencies. The City will not be required to sell these securities prior to maturity barring an event that would be isolated, nonrecurring, unusual, and could not reasonably be anticipated by the City. The City has no borrowed funds used for investing or reverse repurchase agreements.

Investments having a maturity of one year or more, when purchased, are stated at fair value. Short-term investments are stated at cost or amortized cost.

Receivables and payables

Activity between funds that are representative of lending/borrowing arrangements outstanding at the end of the fiscal year are referred to as either "due to/from other funds" (i.e., the current portion of interfund loans) or "advances to/from other funds" (i.e., the non-current portion of interfund loans). All other outstanding balances between funds are reported as "due to/from other funds." Any residual balances outstanding between the governmental activities and business-type activities are reported in the government-wide financial statements as "internal balances."

Advances between funds, as reported in the fund financial statements, are offset by a fund balance reserve account in applicable governmental funds to indicate that they are not available for appropriation and are not expendable available financial resources.

All trade receivables are shown net of an allowance for un-collectibles. Trade accounts receivable in excess of 60 days comprise the trade accounts receivable allowance for un-collectibles.

Property taxes are levied on October 1st by the City based on the January 1st property values as assessed by the Rockwall Central Appraisal District. Taxes are due without penalty until January 31st of the next calendar year. After January 31st the City has an enforceable lien with respect to both real and personal property. Under state law, property taxes levied on real property constitute a perpetual lien on the real property which cannot be forgiven without specific approval of the State Legislature. Taxes applicable to personal property can be deemed uncollectible by the City.

Inventories and prepaid items

All inventories are valued at cost using the first in/first out (FIFO) method. Inventories of governmental funds are recorded as expenditures when consumed rather than when purchased.

Certain payments to vendors reflect costs applicable to future accounting periods and are recorded as prepaid items in both government-wide and fund financial statements.

CITY OF ROCKWALL, TEXAS

NOTES TO FINANCIAL STATEMENTS

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES – continued

*Assets, liabilities, and net assets or equity – continued*

Restricted assets

Certain proceeds of enterprise fund revenue bonds are classified as restricted assets on the statement of net assets because their use is limited by applicable bond covenants.

Capital assets

Capital assets, which include property, plant, equipment, and infrastructure assets (e.g., roads, bridges, sidewalks, and similar items), are reported in the applicable governmental or business-type activities columns in the government-wide financial statements. Capital assets are defined by the City as assets with an initial individual cost of more than \$5,000 (amount not rounded) and an estimated useful life in excess of two years. Such assets are recorded at historical cost or estimated historical cost if purchased or constructed. Donated capital assets are recorded at estimated fair market value at the date of donation.

The costs of normal maintenance and repairs that do not add to the value of the asset or materially extend asset lives are not capitalized.

Major outlays for capital assets and improvements are capitalized as projects are constructed. Interest incurred during the construction phase of capital assets of business-type activities is included as part of the capitalized value of the assets constructed.

Capital assets of the primary government, as well as the component units, are depreciated using the straight-line method over the following estimated useful lives:

Buildings	20 - 30 years
Building improvements	20 - 50 years
Public domain infrastructure	20 years
System infrastructure	50 years
Equipment	3 - 10 years

Compensated absences

It is the City's policy to permit employees to accumulate earned but unused vacation pay benefits up to specified limits. Sick leave is accrued at 6.67 hours per month. However, once an employee has accrued 120 days of sick leave, earned sick leave in excess of 120 days may be converted to vacation leave at a ratio of three days of sick leave to one day of vacation leave up to a maximum of 15 sick leave days per year. Upon termination, any accumulated sick leave over 120 days shall be converted to vacation leave at a ratio of three days of sick leave to one day of vacation leave to be paid to the employee in accordance with the vacation leave policy. Upon retirement from the City, all accrued sick leave shall be converted to vacation pay at a ratio of three days of sick leave to one day of vacation leave and shall be paid to the employee if he/she has 10 or more years of service to the City. Unused compensatory time for nonexempt employees is paid on termination. All vacation pay is accrued when incurred in the government-wide, proprietary, and fiduciary fund financial statements. Compensated absences are reported in governmental funds only if they have matured for example, as a result of employee's resignation and retirement.

CITY OF ROCKWALL, TEXAS

NOTES TO FINANCIAL STATEMENTS

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES – continued

*Assets, liabilities, and net assets or equity – continued*

Long-term obligations

In the government-wide financial statements, and proprietary fund type in the fund financial statements, long-term debt and other long-term obligations are reported as liabilities in the applicable governmental activities, business-type activities, or proprietary fund type statement of net position. Bond premiums and discounts, as well as issuance costs, are deferred and amortized over the life of the bonds using the straight-line method which approximates the effective interest method. Bonds payable are reported net of the applicable bond premium or discount. Bond issuance costs are reported as deferred charges and amortized over the term of the related debt.

In the fund financial statements, governmental fund types recognize bond premiums and discounts, as well as bond issuance costs, during the current period. The face amount of debt issued is reported as other financing sources. Premiums received on debt issuances are reported as other financing sources while discounts on debt issuances are reported as other financing uses. Issuance costs, whether or not withheld from the actual debt proceeds received, are reported as debt service expenditures.

Fund equity

Fund balance of governmental funds is reported in various categories based on the nature of any limitations requiring the use of resources for specific purposes. The government itself can establish limitations on the use of resources through either a commitment (committed fund balance) or an assignment (assigned fund balance). The committed fund balance classification includes amounts that can be used only for the specific purposes determined by a formal action of the government's highest level of decision-making authority. The governing council is the highest level of decision-making authority for the government that can, by adoption of an ordinance prior to the end of the fiscal year, commit fund balance. Once adopted, the limitation imposed by the ordinance remains in place until a similar action is taken (the adoption of another ordinance) to remove or revise the limitation.

Amounts in the assigned fund balance classification are intended to be used by the government for specific purposes but do not meet the criteria to be classified as committed. The Council may also assign fund balance as it does when appropriating fund balance to cover a gap between estimated revenue and appropriations in the subsequent year's appropriated budget. Unlike commitments, assignments generally only exist temporarily. In other words, an additional action does not normally have to be taken for the removal of an assignment. Conversely, as discussed above, an additional action is essential to either remove or revise a commitment.

Amounts that cannot be spent because they are either not in a spendable form or are legally or contractually required to be maintained intact are classified as non-spendable fund balance.

Amounts that can be spent only for specific purposes because of constraints imposed by external providers, or imposed by constitutional provisions or enabling legislation are classified as restricted fund balance.

Amounts that are available for any purpose are classified as unassigned fund balance; these amounts can be reported only in the City's General Fund.

CITY OF ROCKWALL, TEXAS

NOTES TO FINANCIAL STATEMENTS

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES – continued

*Assets, liabilities, and net assets or equity – continued*

Fund equity - continued

Fund balance amounts represent the nature of the net resources that are reported in a governmental fund. The City fund balance classifications include non-spendable resources, restricted, and non-restricted (committed, assigned and unassigned) amounts. When the City incurs an expenditure and both restricted and unrestricted amounts are available, the City considers restricted amounts to have been spent first. When the City incurs an expenditure for an unrestricted amount, committed amounts are reduced first, followed by assigned amounts and then unassigned amounts for purposes in which any of those unrestricted fund balance classifications could be used. The City has not established a formal policy to set forth a minimum level for fund balances.

2. STEWARDSHIP, COMPLIANCE, AND ACCOUNTABILITY

A. Budgetary information

The City follows the following procedures in establishing the budgetary data reflected in the financial statements:

1. Public hearings are conducted to obtain taxpayer comments.
2. Prior to October 1st, the budget is legally enacted through passage of an ordinance.
3. The City Manager is authorized to transfer budgeted amounts between departments within any fund; however, any revisions that alter the total expenditures of any fund must be approved by the City Council. Therefore the fund level is the legal level of control.
4. Formal budgetary integration is employed as a management control device during the year. The legally adopted budgets for the General Fund, certain special revenue funds and the Debt Service Fund are adopted on a basis consistent with generally accepted accounting principles.

CITY OF ROCKWALL, TEXAS

NOTES TO FINANCIAL STATEMENTS

2. STEWARDSHIP, COMPLIANCE, AND ACCOUNTABILITY – continued

A. Budgetary information – continued

5. Budgeted amounts are as originally adopted or as amended by the City Council. During 2016, individual amendments were not material in relation to the original appropriations. Any budgeted amounts appropriated at fiscal year-end and not spent automatically lapse.

6. The City did not adopt budgets for certain Special Revenue Funds. These unbudgeted Special Revenue Funds were as follows:

Emergency Siren Fund  
Art in Public Places Fund

7. Capital project funds were not budgeted. Since project-length financial plans usually extend into two or more fiscal years, annual comparisons would be confusing and misleading.

B. Excess of expenditures over appropriations

Expenditures exceeded appropriations by \$15,100 in the Cemetery Fund due to a tree removal project which was undertaken to clean up storm damage.

Expenditures exceeded appropriations by \$17,163 in the Public Safety Fund as ongoing costs for data connections to the Court building were calculated incorrectly as budgets were amended.

Expenditures exceeded appropriations by \$175,465 in the Narcotics Fund as purchases in this fund are highly discretionary and the budget is fluid.

C. Deficit fund equity

The Harbor Debt Service Fund had a deficit fund balance in the amount of \$86,775 at September 30, 2016, as a result of slower than expected growth in sales tax revenues in the Harbor District. New ownership in 2017 is expected to make upgrades to the property and increase marketing efforts.

The Recreation Development Fund reported a deficit fund balance of \$175,578 due to the timing of grant proceeds which were delayed beyond the measurement period.

The Workers Compensation Fund, an internal service fund for the City's self-funded worker safety programs reported a deficit balance of \$80,747 due to higher than expected injury claims late in the fiscal year.

3. DETAILED NOTES ON ALL FUNDS

A. Deposits and investments

Deposits

Custodial credit risk for deposits is the risk that in the event of a bank failure, the City's deposits may not be returned or the City will not be able to recover collateral securities in the possession of an outside party. At September 30, 2016, the City's deposits were entirely insured or collateralized with securities held by the pledging financial institution's trust department or agent in the City's name; as a result, the City's deposits were not exposed to custodial credit risk.

CITY OF ROCKWALL, TEXAS

NOTES TO FINANCIAL STATEMENTS

3. DETAILED NOTES ON ALL FUNDS – continued

A. Deposits and investments – continued

Deposits - continued

Under a contractual agreement with North Texas Municipal Water District (NTMWD), depository accounts are maintained by NTMWD for interest and sinking, debt, and construction reserves totaling \$777,500, which are separately insured or secured by collateral pledged by NTMWD's depository. This amount is included in restricted cash on the statement of net assets.

The deposits of REDC and RTPA are covered by the City's depository contract and, therefore, at September 30, 2016, these deposits were entirely insured or collateralized with securities held by the pledging financial institution's trust department or agent in the City's name; as a result, the deposits of REDC and RTPA were not exposed to custodial credit risk.

Investments

At September 30, 2016, the City's investments were as follows:

	Carrying Value	Maturity (months)

The City categorizes its fair value measurements within the fair value hierarchy established by generally accepted accounting principles. The hierarchy is based on the valuation inputs used to measure the fair value of the asset. Level 1 inputs are quoted prices in active markets for identical assets; Level 2 inputs are significant other observable inputs; Level 3 inputs are significant unobservable inputs.

As of September 30, 2016, all of the City's investments are valued using quoted prices for similar assets in active markets. (Level 2 inputs).

Discretely Presented Component Unit	<u>490,918</u>	<u>1,190,882</u>
Totals	<u>\$ 2,856,208</u>	<u>\$ 2,856,208</u>

CITY OF ROCKWALL, TEXAS

NOTES TO FINANCIAL STATEMENTS

3. DETAILED NOTES ON ALL FUNDS – continued

E. Inter-fund receivables, payables, and transfers – continued

The outstanding balances between funds result primarily from the time delay between the dates that inter-fund goods and services are provided and payments between funds are made. Also, working capital loans are made to capital projects funds in advance of debt issuances. These are expected to be collected within one year.

The composition of inter-fund transfers for the year ended September 30, 2016 is as follows:

<u>Fund</u>	<u>Transfer In</u>	<u>Transfer Out</u>
Major Governmental Funds		
General Fund	\$ 30,500	\$ 3,100,600
Non-major Governmental Funds	509,850	30,500
Water and Sewer Enterprise Fund	-	949,250
Internal Service Funds	<u>3,540,000</u>	<u>-</u>
Total	<u>\$ 4,080,350</u>	<u>\$ 4,080,350</u>

Transfers are used to move unrestricted revenues to finance various programs or capital projects that the City must account for in other funds in accordance with budgetary authorizations.

CITY OF ROCKWALL, TEXAS

NOTES TO FINANCIAL STATEMENTS

Capitalized lease obligations

The City has entered into contracts with North Texas Municipal Water District (NTMWD), a conservation and reclamation district and political subdivision of the State of Texas, for the construction and operation of certain water and plants and to provide treated water to the City. The contractual obligations have been treated as capitalized lease obligations.

4. OTHER INFORMATION

A. Risk management

The City is exposed to various risks of loss related to torts; theft of, damage to, and destruction of assets; errors and omissions; injuries to employees; employee health benefits; and other claims of various natures.

The City uses a medical self-insurance fund to pay medical and dental claims of City employees and their covered dependents and minimize the total cost of annual medical insurance to the City. Medical claims in any one year exceeding \$100,000 per covered individual, or approximately \$2,012,561 in the aggregate for the group, are covered through a private insurance carrier. Additionally, life insurance policy premiums for each employee are paid through the fund. The self-insurance fund is funded by operating transfers from other funds and charges to employees for extended benefits at their option. The City does not believe there are material claims incurred but not reported as of September 30, 2016.

The City uses a Self-Insurance and Risk Management Program (as permitted by law and its home rule charter) to insure itself against the various risks of liability or loss to which it is exposed, either through an insurance provider or through a defined self-insurance program. The City issued certificates of obligation, based on an actuarial analysis, to fund a self-insured workers' compensation plan. Under this plan, workers' compensation insurance is provided in accordance with state statutes to all City employees. To protect the assets of the plan from a catastrophic claim, the City has purchased stop loss coverage in the amount of \$200,000 per occurrence with a maximum City liability of \$600,000 per year.

CITY OF ROCKWALL, TEXAS

NOTES TO FINANCIAL STATEMENTS

4. OTHER INFORMATION – continued

A. Risk management – continued

The Workers' Compensation Fund (an internal service fund) accounts for the activity of this plan. The City establishes claim liabilities based on estimates of the ultimate cost of claims reported but unsettled and of claims incurred but not reported. Any claims incurred and not reported are not believed to be significant to the City's financial statements.

Changes in the balances of claims liabilities during the past two years are as follows:

	Employee Benefits		Worker's Compensation	
	2016	2015	2016	2015
Claims payable beginning of the year	\$ 242,921	\$ 475,175	\$ 82,450	\$ 5,085
Claims incurred	3,927,007	2,973,898	273,662	122,797
Payment on claims	<u>(3,990,638)</u>	<u>(3,206,152)</u>	<u>(203,739)</u>	<u>(45,432)</u>
	<u>\$ 179,290</u>	<u>\$ 242,921</u>	<u>\$ 152,373</u>	<u>\$ 82,450</u>

Commercial insurance is purchased for the other risks of loss to which the City is exposed. There have been no significant reductions in insurance coverage and settlement amounts have not exceeded insurance coverage for the current year or the three prior years.

B. North Texas Municipal Water District

The District is a conservation and reclamation district and political subdivision of the State of Texas, created and functioning under Chapter 62, Acts of 1951, 52nd Legislature, Regular Session, as amended, originally compiled as Vernon's Article 8270-141 (the "Act"), pursuant to Article 16, Section 59 of the Texas Constitution. The District comprises all of the territory of its member cities, viz., Allen, Garland, Princeton, Plano, Mesquite, Wylie, Rockwall, Farmersville, McKinney, Richardson, Forney, Royse City, and Frisco (the "Member Cities"). The District was created for the purpose of providing a source of water supply for municipal, domestic and industrial use and for the treatment, processing, and transportation of such water to its Member Cities and to its other customers located in North Central Texas, all within the Dallas Standard Metropolitan Statistical Area.

Under the Act, including specifically Section 27 thereof, and under the Constitution and Statutes of the State of Texas, the District has broad powers to: (1) impound, control, store, preserve, treat, transmit and use storm and flood water, the water of rivers and streams, and underground water for irrigation, power and all other useful purposes and to supply water for municipal, domestic, power, industrial and commercial uses and purposes and all other beneficial uses and purposes; and (2) collect, transport, process, treat, dispose of, and control all municipal, domestic, industrial or commercial waste whether in fluid, solid or composite state, including specifically the control, abatement or reduction of all types of pollution. The City retains no ongoing financial interest, equity investments, and/or responsibilities for the District other than the contractual arrangements discussed more fully herein.

CITY OF ROCKWALL, TEXAS

NOTES TO FINANCIAL STATEMENTS

4. OTHER INFORMATION – continued

B. North Texas Municipal Water District – continued

The District has long-term contracts with the City to supply treated water and sewer treatment. The City's water contract with the District provides that the City pay a predetermined annual amount for treated water in twelve monthly installments. The amount of this annual payment is based upon an annually established rate per thousand gallons and the largest annual amount of water consumption of past years. The City owns one sewage treatment facility, Squabble Creek, and in 1978 entered into an agreement with the District for the construction of a second facility, Buffalo Creek. Under the terms of this agreement, the District issued contractually secured bonds in its name to construct and operate this sewage disposal plant for the City. In subsequent years, similar contractual agreements have been made to enable the District to expand the sewage treatment facilities and continue to provide sewage treatment services to the City. Under the terms of these contracts, the City's payments, which began when the facilities were first utilized, are equal to the operating and maintenance expenses for the next ensuing calendar year, as shown in the annual budget. The contracts further provide that the debt service payments will be equal to the principal and/or interest coming due on the bonds on the next succeeding interest payment date, plus the fees and charges of the paying agent and the registrar.

These contractual obligations have been included as capital lease obligations in amounts equal to the bonds outstanding under these agreements. Accordingly, the related assets have been capitalized and are being depreciated over the estimated life of the facilities.

The outstanding principal balance on the bond issues as of September 30, 2016 is \$4,571,724. See Note 4F for the annual requirements to amortize the bonds as of September 30, 2016.

With respect to the ground storage reservoir discussed above, the Cities of Rockwall and Heath are contractually obligated to make timely payments to the District representing 66.67% and 33.33%, respectively, of the related operating expenses and debt service payments. While the City anticipates its share of these payments to be 66.67%, the Cities of Rockwall and Heath are each contractually obligated to make any payments which the other party is required, but is unable, to make to the District.

C. Contingent liabilities and commitments

Amounts received or receivable from grantor agencies are subject to audit and adjustment by such agencies. Any disallowed claims, including amounts already collected, may constitute a liability of the applicable funds. The amounts, if any, of expenditures which may be disallowed by the grantor cannot be determined at this time although the City expects such amounts, if any, to be immaterial.

The City is a defendant in various lawsuits. Although the outcome of these lawsuits is not presently determinable, it is the opinion of the City's management that the resolution of these matters will not have a material adverse effect on the financial condition of the City.

As described in Note 4F above, the general revenues of the City are contingently liable in the amount of \$31,230,000 for general obligation bonds and certificates of obligation which are currently outstanding and recorded as obligations of the Enterprise Fund.

CITY OF ROCKWALL, TEXAS

NOTES TO FINANCIAL STATEMENTS

4. OTHER INFORMATION – continued

C. Contingent liabilities and commitments – continued

The City contracts for solid waste disposal with a third party. Under the terms of the agreement, the City bills and collects the residential billing and remits that amount to the contracting party. The contractor bills the commercial customers and remits a franchise fee to the City based on total revenues received from the contract.

The Rockwall Economic Development Corporation provides monetary incentives to companies to relocate within the City of Rockwall. At September 30, 2016, these commitments totaled \$3,099,896.

D. Defined Benefit Pension Plans

Plan Description:

The City participates as one of 866 plans in the nontraditional, joint contributory, hybrid defined benefit pension plan administered by the Texas Municipal Retirement System (TMRS). TMRS is an agency created by the State of Texas and administered in accordance with the TMRS Act, Subtitle G, Title 8, Texas Government Code (the TMRS Act) as an agent multiple-employer retirement system for municipal employees in the State of Texas. The TMRS Act places the general administration and management of the System with a six-member Board of Trustees. Although the Governor, with the advice and consent of the Senate, appoints the Board, TMRS is not fiscally dependent on the State of Texas. TMRS's defined benefit pension plan is a tax-qualified plan under Section 401 (a) of the Internal Revenue Code. TMRS issues a publicly available comprehensive annual financial report (CAFR) that can be obtained at [www.tmr.com](http://www.tmr.com).

All eligible employees of the City are required to participate in TMRS.

Benefits Provided:

TMRS provides retirement, disability, and death benefits. Benefit provisions are adopted by the governing body of the City, within the options available in the state statutes governing TMRS.

At retirement, the benefit is calculated as if the sum of the employee's contributions, with interest, and the city-financed monetary credits with interest were used to purchase an annuity. Members may choose to receive their retirement benefit in one of seven actuarially equivalent payments options. Members may also choose to receive a portion of their benefit as a Partial Lump Sum Distribution in an amount equal to 12, 24, or 36 monthly payments, which cannot exceed 75% of the member's deposits and interest.

At the date the plan began, the City granted monetary credits for service rendered before the plan began of a theoretical amount equal to two times what would have been contributed by the employee, with interest, prior to establishment of the plan. Monetary credits, also known as the matching ratio, are 200% of the employee's accumulated contributions and are only payable in the form of an annuity.

CITY OF ROCKWALL, TEXAS

NOTES TO FINANCIAL STATEMENTS

4. OTHER INFORMATION – continued

D. Defined Benefit Pension Plans - continued

Benefits Provided - continued:

Beginning in 1993, the City granted an annually repeating (automatic) basis for a monetary credit referred to as an updated service credit (USC) which is a theoretical amount which takes into account salary increases or plan improvements. If at any time during their career an employee earns a USC, this amount remains in their account earning interest at 5% until retirement. At retirement, the benefit is calculated as if the sum of the employee’s accumulated contributions with interest and the employer match plus employer-financed monetary credits, such as USC, with interest were used to purchase an annuity. Additionally, initiated in 1993, the City provided an annually repeating (automatic) basis cost of living adjustments (COLA) for retirees equal to a percentage of the change in the consumer price index. (CPI).

A summary of plan provisions for the City are as follows:

Employee Deposit Rate	7%
Matching Ratio (City to Employee)	2 to 1
Years required for vesting	5
Service retirement eligibility	20 years at any age, 5 years at age 60 and above
Updated Service Cost	100% Repeating
Annuity Increase to retirees	70% of CPI Repeating

The City does not participate in Social Security.

Employees covered by benefit terms –

At the December 31, 2015 valuation and measurement date, the following employees were covered by the benefit terms:

Retirees or beneficiaries currently receiving benefits	79
Inactive employees entitled to but not yet receiving benefits	80
Active employees	260
	<u>419</u>

Contributions:

Under the state law governing TMRS, the contribution rate for each city is determined annually by the consulting actuary, using the Entry Age Normal (EAN) actuarial cost method. The actuarially determined rate is the estimated amount necessary to finance the cost of benefits earned by employees during the year, with an additional amount to finance any unfunded accrued liability.

CITY OF ROCKWALL, TEXAS

NOTES TO FINANCIAL STATEMENTS

4. OTHER INFORMATION – continued

D. Defined Benefit Pension Plans - continued

Contributions - continued:

Employees for the City of Rockwall were required to contribute 7% of their annual gross earnings during the fiscal year. For fiscal year 2016, the City made contributions of 16.36%, for calendar year 2015 and 16.58% in 2016 which was the actuarially determined city contribution.

Net Pension Liability:

The City's Net Pension Liability (NPL) was measured as of December 31, 2015, and the Total Pension Liability (TPL) used to calculate the Net Pension Liability was determined by an actuarial valuation as of that date.

Actuarial assumptions –

The Total Pension Liability in the December 31, 2015 actuarial valuation was determined using the following actuarial assumptions:

Inflation	2.5% per year
Overall payroll growth	2.9% per year
Investment Rate of Return	7.0%, net of pension plan investment expense, including inflation through December 31, 2015, 6.75% thereafter

Salary increases were based on a service-related table. Mortality rates for active members, retirees, and beneficiaries were based on the gender-distinct RP2000 Combined Healthy Mortality Table, with male rates multiplied by 109% and female rates multiplied by 103%. The rates are projected on a fully generational basis by scale BB to account for future mortality improvements. For disabled annuitants, the gender-distinct RP2000 Combined Health Mortality Tables with Blue Collar Adjustment are used with males rates multiplied by 109% and female rates multiplied by 103% with a 3-year set-forward for both males and females. In addition, a 3% minimum mortality rate is applied to reflect the impairment for younger members who become disabled. The rates are projected on a fully generational basis by scale BB to account for future mortality improvements subject to the 3% floor.

Actuarial assumptions used in the December 31, 2015 valuation were based on the results of actuarial experience studies. This experience study was for the period December 31, 2010 through December 31, 2014. Healthy post-retirement mortality rates and annuity purchase rates were updated based on a Mortality Experience Investigation Study covering 2009 through 2011, and dated December 31, 2013. These assumptions were first used in the December 31, 2013 valuation, along with a change to the Entry Age Normal (EAN) actuarial cost method. Assumptions are reviewed annually. No additional changes were made for the 2015 valuation. After the Asset Allocation Study analysis and experience investigation study, the Board amended the long-term expected rate of return on pension plan investments from 7% to 6.75% effective January 1, 2016. Plan assets are managed on a total return basis with an emphasis on both capital appreciation as well as the production of income, in order to satisfy the short-term and long-term needs of TMRS.

CITY OF ROCKWALL, TEXAS

NOTES TO FINANCIAL STATEMENTS

4. OTHER INFORMATION – continued

The pension plan’s policy in regard to the allocation of invested assets is established and may be amended by the TMRS Board of Trustees.

The long-term expected rate of return on pension plan investments was determine using a building-block method in which best estimate ranges of expected future real rates of return (expected returns, net of pension plan investment expense and inflation) are developed for each major asset class. These ranges are combined to produce the long-term expected rate of return by weighting the expected future real rates of return by the target asset allocation percentage and by adding expected inflation. The target allocation and best estimates of arithmetic real rates of return for each major asset class are summarized in the following table:

<u>Asset Class</u>	<u>Target Allocation</u>
Domestic Equity	17.50%
International Equity	17.50%
Core Fixed Income	10.00%
Non-Core Fixed Income	20.00%
Real Return	10.00%
Real Estate	10.00%
Absolute Return	10.00%
Private Equity	<u>5.00%</u>
Total	<u><u>100.00%</u></u>

Discount Rate –

The discount rate used to measure the Total Pension Liability was 6.75%. The projection of each cash flows used to determine the discount rate assumed that employee contributions will remain at the current 7% and employer contributions will be made at the rates specified in statute. Based on that assumption, the pension plan’s Fiduciary Net Position was projected to be available to make all projected future benefit payments of current plan members. Therefore, the long-term expected rate of return on pension plan investments was applied to all periods of projected benefit payments to determine the Total Pension Liability.

Pension Plan Fiduciary Net Position –

Detailed information about the pension plan’s Fiduciary Net Position is available in a separately-issued TMRS financial report. That report may be obtained on the Internet at [www.tmr.com](http://www.tmr.com).

Pension Expense and Deferred Outflows of Resources and Deferred Inflows of Resources Related to Pensions -:

For the year ended September 30, 2016, the City recognized pension expense of \$2,904,705. This amount is included as part of Personnel Services expenses within the functional program activities.

At September 30, 2016, the City reported deferred outflow and inflows of resources related to pensions from the following sources:

	<u>Deferred Outflows of Resources</u>	<u>Deferred Inflows of Resources</u>
Contributions subsequent to the measurement date	\$ 2,064,392	\$ -
Difference between projected and actual investment earnings	3,628,550	-
Differences between actuarial assumptions and actual experience	-	475,291
Changes in actuarial assumptions used	-	92,591
Total	<u>\$ 5,692,942</u>	<u>\$ 567,882</u>

Deferred outflows of resources related to pensions resulting from contributions subsequent to the measurement date of \$2,064,392 will be recognized as a reduction of the net pension liability for the measurement year ending December 31, 2016 (i.e. recognized in the City’s financial statements September 30, 2017). Other amounts reported as deferred outflows and inflows of resources related to pensions will be recognized in pension expense as follows:

<u>Measurement Year Ended December 31,</u>	<u>Amount</u>
2016	\$ 844,300
2017	844,300
2018	844,299
2019	707,238
2020	(97,103)
Thereafter	(82,367)
Total	<u>\$ 3,060,667</u>

Texas Statewide Emergency Services Personnel Retirement Fund

The City acts as agent for the Texas Statewide Emergency Services Personnel Retirement Fund (the "Fund") which is a component unit of the State of Texas. The City reimbursed the Fund \$62,675 for benefits paid on a pay-as-you-go basis during the year in recognition of services provided to the City by volunteer emergency services personnel. The Fund has a Board of Directors not designated by City officials and is administered by the State Fire Fighters' Pension Commissioner. There are 30 active participants currently covered by the Fund and payments are being made to 25 retirees or their survivors. The Fund does not prepare separate financial statements for participating departments; however, financial statements for the Fund as a whole may be obtained from the administrator at Fire Fighters' Pension Commissioner, P.O. Box 12577, Austin, Texas 78711.

 SCHEDULE OF CHANGES IN NET PENSION LIABILITY (ASSET) AND RELATED RATIOS  
 LAST TWO FISCAL YEAR (PREVIOUS YEARS ARE NOT AVAILABLE)

<b>Plan Year</b>	<u><b>2014</b></u>	<u><b>2015</b></u>
Actuarially Determined Contribution	\$ 2,761,413	\$ 2,950,480
Contributions in relation to the actuarially determined contribution	<u>2,761,413</u>	<u>2,950,480</u>
Contribution deficiency (excess)	<u>\$ -</u>	<u>\$ -</u>
Covered employee payroll	\$ \$16,626,112	\$ \$17,936,037
Contributions as a percentage of covered employee payroll	16.61%	16.45%

**Notes to Schedule of Contributions**

Notes Actuarially determined contribution rates are calculated as of December 31 and become effective in January 13, months later

**Methods and Assumptions Used to Determine Contribution Rates:**

Actuarial Cost Method	Entry Age Normal
Amortization Method	Level Percentage of Payroll, Closed
Remaining Amortization Period	30 years
Asset Valuation Method	10 Year smoothed market; 15% soft corridor
Inflation	2.50%
Salary Increases	3.50% to 10.50% including inflation
Investment Rate of Return	6.75%
Retirement Age	Experienced-based table of rates that are specific to the City's plan of benefits. Last updated for the 2010 valuation pursuant to an experience study of the period 2005 - 2009.
Mortality	RP2000 Combined Mortality Table with Blue Collar Adjustment with males rates multiplied by 109% and female rates multiplied by 103% and projected on a fully generational basis with scale BB.

**Other Information**

Notes There were no benefit changes during the year.

## NONMAJOR GOVERNMENTAL FUNDS

### *SPECIAL REVENUE FUNDS*

**Special revenue funds are used to account for specific revenues that are legally restricted to expenditures for particular purposes.**

Cemetery – established to account for the annual income from the sale of plots and cemetery maintenance costs.

Public Safety – established to account for donations, court fees, and other public safety committed revenues.

Recreational Development – established to account for the annual lease income from marinas and golf course.

Radio System – established to account for revenues and expenditures for the support of the City's radio system.

Street Improvements – established to account for the proceeds of street improvement assessments.

Hotel Occupancy Tax – established to account for the annual income from hotel occupancy taxes.

Fire Equipment – established to account for funds to be used for the purchase of fire equipment for the volunteer fire department.

Aviation – established to account for funds received from airport operations and related expenses.

Recycling – established to account for funds to be used for the City's recycling program.

Emergency Siren – established to account for revenues accumulated and expenditures to add emergency sirens within the City.

Downtown Improvement – established to account for revenues and expenditures related to the City's efforts to revitalize the downtown square.

Art in Public Places – established to account for donations received for developing art displays in public areas such as parks.

Narcotics Unit – established to account for revenues and expenditures related to a seized funds and forfeitures.

## *CAPITAL PROJECTS FUNDS*

**Capital projects funds are used to account for the acquisition and construction of major capital facilities other than those financed by proprietary funds and trust funds.**

Capital Projects – established to account for miscellaneous street and drainage projects which are financed with contributions from the General Fund and the Rockwall Economic Development Corporation.

Equipment Acquisition – established to account for capital equipment acquisition using operating transfers from benefiting funds and residual proceeds from miscellaneous debt.

205 Bypass Project – established to account for revenues and expenditures related to the construction of the 205 Bypass roadway project.

The Harbor/TIF Capital Projects Fund – established to account for improvements in the Tax Increment Reinvestment Zone using the proceeds from the issuance of bonds.

CITY OF ROCKWALL, TEXAS  
RECONCILIATION OF THE STATEMENT OF REVENUES, EXPENDITURES,  
AND CHANGES IN FUND BALANCES OF DISCRETELY PRESENTED  
COMPONENT UNITS TO THE STATEMENT OF ACTIVITIES  
FOR THE YEAR ENDED SEPTEMBER 30, 2016

Net change in fund balances - discretely presented component units	\$ (4,256,257)
<p>Amounts reported for discretely presented component units in the Statement of Activities ("SOA") are different because:</p>	
<p>Expenditures are recognized in the governmental funds when paid. The SOA is presented on an accrual basis and expenses are reported when incurred. This is the net difference in pension costs.</p>	(19,528)
<p>The depreciation of capital assets used in governmental activities is not reported in the funds.</p>	(6,574)
<p>Repayment of bond principal is an expenditure in the funds but is not an expense in the SOA.</p>	1,625,000
<p>Bond issuance costs and similar items are amortized in the SOA but not in the funds.</p>	86,875
<p>Increase (decrease) in accrued interest from beginning of period to end of period.</p>	(26,697)
<p>Compensated absences are reported as the amount earned in the SOA but as the amount paid in the funds.</p>	(6,918)
<p>Governmental funds report debt issuance costs as expenditures. However, in the statement of activities these costs are allocated over the term of the underlying debt and reported as amortization expense. This is the amount of amortization in the current period, net of additions for debt issue cost incurred.</p>	86,234
<p>Governmental funds report proceeds of debt as other financing sources and payments to the escrow agent for refunding of debt as other financing uses. This is the net of other financing sources (\$7,133,805) less other financing uses (\$7,678,323).</p>	544,518
<p>Bond premiums are reported in the funds but not in the SOA.</p>	<u>(588,525)</u>
Change in net assets of discretely presented component units	<u><u>\$ (2,561,872)</u></u>

Jurisdiction	Net General Obligation Bonded Debt Outstanding (1)	Percentage Applicable to the City of Rockwall (2)	Amounts Applicable to the City of Rockwall
Direct:			
City of Rockwall - debt repaid with property taxes	\$ 90,400,000	100.00%	\$ 90,400,000
Indirect:			
Rockwall Independent School District	547,581,172	52.70%	288,575,278
Rockwall County	<u>110,730,160</u>	61.76%	<u>68,386,947</u>
Total Indirect	<u>658,311,332</u>		<u>356,962,224</u>
Total Direct and Overlapping Bonded Debt	<u><u>\$ 748,711,332</u></u>		<u><u>\$ 447,362,224</u></u>
Average debt per capita			<u><u>\$ 11,543</u></u>

Source: Assessed value data used to estimate applicable percentages provided by Rockwall Central Appraisal District. Debt Outstanding data is provided by each governmental unit.

(1) Includes all Governmental Activities General Obligation Bonds, Contractual Obligations, Certificates of Obligation and Capital Leases

(2) The percentage of overlapping debt applicable is estimated using taxable assessed property values. Applicable percentages were estimated by determining the portion of each governmental unit's taxable value that is within the city's boundaries and dividing it by each unit's total taxable value.

CITY OF ROCKWALL, TEXAS  
 COMPUTATION OF LEGAL DEBT MARGIN  
 LAST TEN FISCAL YEARS  
 (unaudited)

TABLE D-18

The City of Rockwall, Texas does not have a legal debt limit prescribed by state law. However, Article XI, Section 5 of the Texas Constitution applicable to cities of more than 5,000 population limits ad valorem tax rates to \$2.50 per \$100 assessed valuation for cities operating under a Home Rule Charter. Accordingly, the City's tax margin for the previous ten years was:

	Fiscal Year

***INTRODUCTORY SECTION***

City of Rockwall  
*The New Horizon*

May 6, 2016

To the Honorable Mayor,  
Members of the City Council,  
and the Citizens of the City of Rockwall, Texas:

The Comprehensive Annual Financial Report (CAFR) of the City of Rockwall for the fiscal year ended September 30, 2015, is hereby submitted in accordance with Section 7.18 of the City Charter. The financial statements are presented in conformity with generally accepted accounting principles (GAAP) and audited in accordance with generally accepted auditing standards by a firm of licensed certified public accountants.

Management assumes full responsibility for both the completeness and reliability of all of the information presented in this report. Fairness of the presentation, including all disclosures, rests with the City. To the best of our knowledge and belief, the enclosed data is accurate in all material respects and is reported in a manner designed to present fairly the financial position and results of operations of the various funds in the City. All disclosures necessary to enable the reader to gain an understanding of the City's financial activities have been included.

To provide a reasonable basis for making these representations, management of the City of Rockwall has established a comprehensive internal control framework that is designed both to protect the government's assets from loss, theft, or misuse and to compile sufficient reliable information for the preparation of the City of Rockwall's financial statements in conformity with GAAP. The internal control structure is designed to provide reasonable, but not absolute, assurance that these objectives are met. The concept of reasonable assurance recognizes that:

- (1) the cost of a control should not exceed the benefits likely to be derived; and
- (2) the valuation of costs and benefits requires estimates and judgments by management.

Because the cost of internal controls should not outweigh their benefits, the City of Rockwall's comprehensive framework of internal controls has been designed to provide reasonable rather than absolute assurance that the financial statements will be free from material misstatement. As management, we assert that, to the best of our knowledge and belief, this financial report is complete and reliable in all material respects. The internal control structure is subject to periodic evaluation by City management.

The City of Rockwall's financial statements have been audited by Fox, Byrd & Company P.C., PC, a firm of licensed certified public accountants. The goal of the independent audit was to provide reasonable assurance that the financial statements of the City of Rockwall for the fiscal year ended September 30, 2015, are free of material misstatement. The independent audit involved examining, on a test basis, evidence supporting the amounts and disclosures in the

financial statements; assessing the accounting principles used and significant estimates made by management; and evaluating the overall financial statement presentation. The independent auditor concluded, based upon the audit, that there was a reasonable basis for rendering an unqualified opinion that the City of Rockwall's financial statements for the fiscal year ended September 30, 2015, are fairly presented in conformity with GAAP. The independent auditors' report is presented as the first component of the financial section of this report.

Management's discussion and analysis (MD&A) immediately follows the independent auditor's report and provides a narrative introduction, overview and analysis of the financial statements as required by GAAP. MD&A complements this letter of transmittal and should be read in conjunction with it.

## **PROFILE OF THE GOVERNMENT**

The City of Rockwall, Texas, county seat of Rockwall County, Texas was incorporated in 1874. Its name is derived from an underground rock wall discovered in 1854. The unusual rock formations are found throughout the county. The City is located on the eastern shore of Lake Ray Hubbard, 22 miles east of downtown Dallas on Interstate Highway 30. The Dallas/Fort Worth area is recognized as one of the top growth areas in the country. The Dallas/Fort Worth International Airport and Love Field in Dallas meet the air transportation needs of the region.

The City currently has a land area of approximately 29.79 square miles and an estimated population of 40,620.

The City of Rockwall adopted a home rule charter in 1985 which established a council-manager form of government. Charter amendments were adopted in 2005 and again in 2015. Policy making and legislative authority is vested in the City Council, which consists of a Mayor and six Council Members, all elected at large. The City Manager is responsible for carrying out the policies and ordinances of the City Council, overseeing the day-to-day operations of the City and for appointing the heads of the various departments. The mayor and six council members are elected to two year staggered terms. The government is empowered to levy a property tax on both real and personal property located within its boundaries. The government also has the power by state statute to extend its corporate limits by annexation, which is done periodically when deemed appropriate by the City Council.

The City of Rockwall provides a full range of services, including police and fire protection; the construction and maintenance of streets and other infrastructure; planning and zoning, parks and recreational activities and general administrative services. Additionally, the City provides water and sewer services as an enterprise function.

Discretely presented component units are legally separate entities and are not part of the primary government's operations. The City of Rockwall is financially accountable for its component units. Accordingly, the Rockwall Economic Development Corporation (REDC) and Rockwall Technology Park Association are included in these financial statements and are explained in more detail in Note 1 of the Notes to the Financial Statements.

## **Factors Affecting Financial Condition**

The information presented in the financial statements is best understood when considered from the broader perspective of the specific environment within which the City of Rockwall operates.

### **Local Economy**

The City of Rockwall is situated in the Dallas/Fort Worth Consolidated Metropolitan Statistical Area. With its concentration of commercial and retail development, the City of Rockwall has long drawn shoppers from surrounding areas. As the national economy began to improve over the last year, Rockwall's local economy benefitted from a mix of new businesses and the renewed success of others. Rockwall saw an increase of 5.78% in our local sales tax revenues. The city has a varied tax base including a mix of residential, commercial and light industrial properties. Total property values rose by 11.79%. The most recent five-year average is 4.27% per annum. During the downturn in the economy growth in the tax base slowed but remained positive each year. The City's largest taxpayers are varied and include industry, retail developments, multi-family properties, and medical facilities. Table D-12 in the Statistical Section provides further information on the principal taxpayers. The Rockwall Economic Development Corporation continues to successfully market Rockwall and assist companies looking to locate their business in the City. The year's highlights included:

- Channell Commercial Corporation has begun construction on their new corporate headquarters and manufacturing facility, choosing to relocate their nearly 100-year old business to Rockwall from their location in southern California. The rail-served facility will be 175,000 square feet and will include the largest structural foam machine in Texas. They are an industry leader in thermoplastic enclosures for the telecommunications and broadband industries. The company will begin operations in summer 2016.
- Col-Met Paint Booths will move their state of the art operations from a leased facility to their new 150,000 square foot building in phase II of the Rockwall Technology Park. This move allows the company to expand current operations and provides room to expand the building further in the future.
- A number of new retailers opened in 2015 including Chico, Soma, and James Avery adding to the extensive retail mix in town.
- Medical office construction continues adding Spine Team Texas to the number of physicians and specialty medical offices located near Presbyterian Hospital of Rockwall.
- Downtown Rockwall is undergoing extensive reconstruction during 2015 but still saw several new retail businesses opened including Uptown Downtown Gallery and Studio, Sara Duckworth Photography and Embellished on the Square. The School of Rock opened their new facility in an older building which once housed the City's first fire station. The old rolling doors remain and the school opens the doors for some performances. The school welcomes youth and adult students to learn music in a performance based environment. The City benefits from the attention garnered from Rockwall's being a Texas Main Street City. The City has seen a 13.1% increase in sales taxes in the downtown area in the last fiscal year and 78.2% in the last five years.

## Long-term Planning

The City Council and staff recognize the need for long-range planning. It is the goal of the City government to provide responsible leadership, services, and infrastructure to achieve a safe environment and provide for a high quality of life.

## Financial Policies

The City Council adopted financial policies in 2001 which have guided the City, allowing us to build a strong fund balance, and reinforcing the city's philosophy to budget conservatively for both revenues and expenditures. The general fund reserve policy is reviewed annually and updated most recently in 2009. The policy states the City should maintain no less than 3 months of reserves and will allow reserves in excess of 3.5 months of recurring operating expenditures to be transferred to a capital projects fund to be used to fund future projects. The City has maintained reserves at or above this level for many years. This allows the City to respond to emergencies or downturns while not overburdening the taxpayers. Reserves over the 3.5 month level were available to fund capital projects in 2015 which included the improvement of parking facilities at the Tuttle ballfield complex and the addition of a new traffic signal at Mims Road and Ralph Hall Parkway. The City had, for many years, financed vehicle additions and replacements with short-term debt. A healthy reserve allowed the City to purchase all vehicles on a pay-as-you-go basis. In addition, street maintenance expenditures increased by more than \$265,000 from excess reserves.

## Budget Overview

The City Manager proposes a balanced budget to the City Council each year by August 1. Public hearings are conducted to receive comments and priorities of the community at large. The City Council must adopt the operating budget and set the City's tax rate for the next year by October 1<sup>st</sup> of each year.

## Planning Projects

Having identified the downtown area as a critical component of our long range plan, the City and business and community leaders work with the City's Texas Main Street Manager to coordinate planning efforts and develop interest in locating business downtown and to bring events to the Square. The Main Street program has afforded opportunities for businesses to qualify for façade restoration grants which are funded by the City and local financial institution, Community Bank.

## Capital Improvement Planning

In May 2012, voters approved propositions to provide downtown accessibility projects, roadway rehabilitation and Interstate 30 ramp adjustments. The City hired design and construction management professionals to work with staff and City Council to develop the vision for the projects and cost estimates to ensure the projects as approved can move forward expeditiously and be completed within budget. Improvements began on the Downtown Square in early 2014. Walkability and accessibility are key components of the project as well as the construction of the San Jacinto plaza which will add an outdoor venue to the area. Work should be completed in April 2016. Engineering firms were selected for each of the street rehabilitation projects in 2015

and their work is beginning. This work will continue through 2016 with construction starting shortly after.

### Strategic Planning

The City Council and staff began work on an updated strategic planning document with the goal of a simplified, easy to understand final product. The initial stage of the plan included looking at the current breakdown between the residential and commercial tax base and whether or not the current land use plan will allow that mix to be maintained or improved in order to decrease the tax burden on residential properties. It was determined that sufficient non-residential land uses are planned but that any change from non-residential to residential zoning needs to be evaluated in light of the city's strategic goals. The City receives higher sales taxes per capita than other area cities, pointing to the City's long standing status as a regional shopping destination. As cities to the east grow and add retailers the City will strive to add specialty retailers to continue the regional draw. The remaining I-30 corridor development will need to be well-planned and executed. The long-term infrastructure needs of the City including streets, water and sewer will need to be planned and funded. A study will be conducted in 2016 to assess the condition of each street and alley in the city to determine the remaining useful life of each one. Improvements will be key to the future of the City. The next stages of the strategic planning will focus on the individual departments of the City and how they address both the goals of the larger plan and strategic needs within the department. The plan is expected to be a significant tool in the budget planning process in 2106.

### Future Development

#### Transportation

The majority of the City's main thoroughfares are state facilities. TxDOT has completed design work on the FM3549 overpass project which had unexpected delays due to problems with the construction contract but after rebidding should get underway in mid-2016. FM 3097 – Horizon Road – a heavily traveled roadway in the retail and medical corridor is slated for reconstruction and widening with utility work begun, the 24-month construction project will continue into 2017. The City and TxDOT have jointly funded the project. The City has funded and TxDOT will shortly begin a project to reverse two ramps on I-30 improving access to John King Boulevard and alleviating pressure on other intersections during the FM 3549 overpass project. In addition, the City will begin design shortly on a new I-30 access ramp in an area of heavy congestion near the existing Horizon Road ramp.

The City is a member of a County-wide Consortium which allows County government officials to work with officials of each of the seven cities in the county to further transportation planning efforts. The Consortium meets monthly to discuss funding alternatives for the County's transportation needs, which also involve planning and state participation. The County's bond initiatives allow funding for the advance planning and design of 5 major roadway projects. This allows the projects to be ready to commence as soon as state funding is allocated for construction. The Consortium was successful in securing new state funding for both SH275 and FM 3549 widening projects after the state-wide referendums provided new dollars for the state's highway system. The fact that the projects were in design and would be ready to bid when dollars were made available was crucial in getting these new funds. The Consortium is continuing to look at other roadways in the County to get the next list of projects vetted.

## Medical Services

The presence of acute care at Presbyterian Hospital of Rockwall kicked off growth in the medical corridor. Several new medical buildings with Doctor's suites and state of the art out-patient diagnostic imaging facilities have allowed Rockwall to become a regional medical services destination with new offices continuing to open each year. The medical destination drives other growth in the area and is an important boost to the City as visitors spend time dining and shopping while in the area.

## Retail / Entertainment

"The Harbor" development is situated on the shores of Lake Ray Hubbard at I-30. A public/private partnership provided opportunities for new retailers in the Bella Harbor development as well as public open space and a full-service Hilton Hotel and Conference Center. The Conference Center continues to attract events including numerous corporate training and retreat sessions and expects many which are scheduled for 2016. A new Marriott Springhill Suites with 105 suites and conference space broke ground in late 2015. The hotel will be locally owned and operated and will employ a sales director to market the property to mid-size regional conferences and meetings.

In conjunction with private development, the City established a tax increment financing (TIF) zone on an approximately 103 acre tract which allowed the financing and development of public open space to complement the development and allow citizens access to the Lake Ray Hubbard shore line. The City partnered with Rockwall County, and the Rockwall Economic Development Corporation to establish the TIF to finance the public projects. In a second project, the City collaborated with the Trend Tower developer on construction of the seven-story, 85,000 square foot office tower overlooking the lake. Trend Tower offered Class-A office space to its corporate tenants as it opened in 2014. The City has signed a lease agreement with Trend on use of the parking garage offering much needed public parking for the Harbor events.

The City's extremely successful 12-week Concert on the Lake Series managed by the City's Recreation Department draws more than 5,000 attendees each Thursday evening for a free concert. Surveys conducted during the events gather data regarding the distance from which visitors traveled and approximate retail and restaurant dollars expended while here. The term "Live Music Capital of North Texas" has been coined to describe the many opportunities available year round in both public and restaurant venues.

Founder's Day, which was moved back to Myers Park, due to the downtown construction project drew visitors to shop merchant's wares, see artist's exhibits, and enjoy free concerts all day. The event culminates with a concert by a nationally recognized artist, also free to all who attend. Due to great reviews on the 2014 and 2015 events, the City made the decision to continue to sponsor Founder's Day at the park in the years to come.

A Farmer's Market brings visitors downtown Saturdays from May to October. The annual "Rib Rub and Run" BBQ contest draws more than 50 teams to the downtown square. The Main Street Advisory Board and "Friends of Downtown Rockwall", citizen volunteer group, worked to plan more special events to bring shoppers downtown. A late evening shopping event called "Night Owls" added late evening hours and live musical entertainment each Friday and Saturday evening on the newly opened San Jacinto Plaza added in summer 2015 brought good crowds out to enjoy

a relaxing evening downtown. In April 2016, the Downtown merchants will partner with the City to sponsor a day-long grand re-opening of the downtown as the construction project is completed.

Utilities

The water and wastewater rates were increased in 2015 and the City intends to raise rates in 2016. The City purchases treated water as a founding member city of the North Texas Municipal Water District. With extremely heavy spring 2015 rains the drought which had extended over several years and seemed to be worsening was broken and the area lakes filled completely. Excess water was released from Lake Lavon, the City’s principal water source was released for the first time in years. As the drought had worsened the NTMWD asked its member and customer cities to reduce consumption by a minimum of 10%. Rockwall residents were so receptive to the call for conservation that actual consumption was reduced by more than 37%. It was discussed often by city staff whether this represented an adjustment to the perceived need for outdoor watering and whether previous levels of consumption would return when restrictions were lifted. When the lakes filled all mandatory conservation limits were lifted and residents across the region did indeed return to significantly greater outdoor watering. Sales for the City’s water system increased by 25.5%. During the several year periods where sales decreased so significantly, water and wastewater system improvements and large equipment purchases were delayed. Equipment acquisition and improvement design is expected to resume in 2016.

The City’s water system is recognized with the Texas Commission on Environmental Quality’s “Superior” rating.

The City actively works to acquire the right to serve recently annexed areas which are currently served by wholesale water supply corporations. It remains the City’s desire to be the provider for all residents in our city limits.

Debt Administration: Two ratios traditionally used to analyze the debt structure of municipalities are presented below. Revenue debt has been excluded since system charges are used to retire the debt.

Outstanding General Obligation Debt at 9-30-15(net of Debt Service)	\$127,676,086
Estimated Population	40,620
G.O. Debt Per Capita	\$3,143
Net G.O. Debt per Assessed Value	3.11%

The City seeks a bond rating update as new debt is issued. The current ratings are shown below:

	<u>General Obligation</u>	<u>Revenue</u>	<u>Sales Tax(REDC)</u>
Standard & Poor’s Rating Group	AA+	A-	A-
Moody’s Investor Service Inc.	Aa2	Aa3	A1

ACKNOWLEDGEMENTS

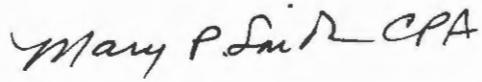

The preparation of the comprehensive annual financial report on a timely basis was made possible by the dedicated service of the entire staff of the Finance Department. Each member of the department has our sincere appreciation for the contributions made in the preparation of this report.

In closing, without the leadership and support of the governing body of the City, preparation of this report would not have been possible.

Sincerely,

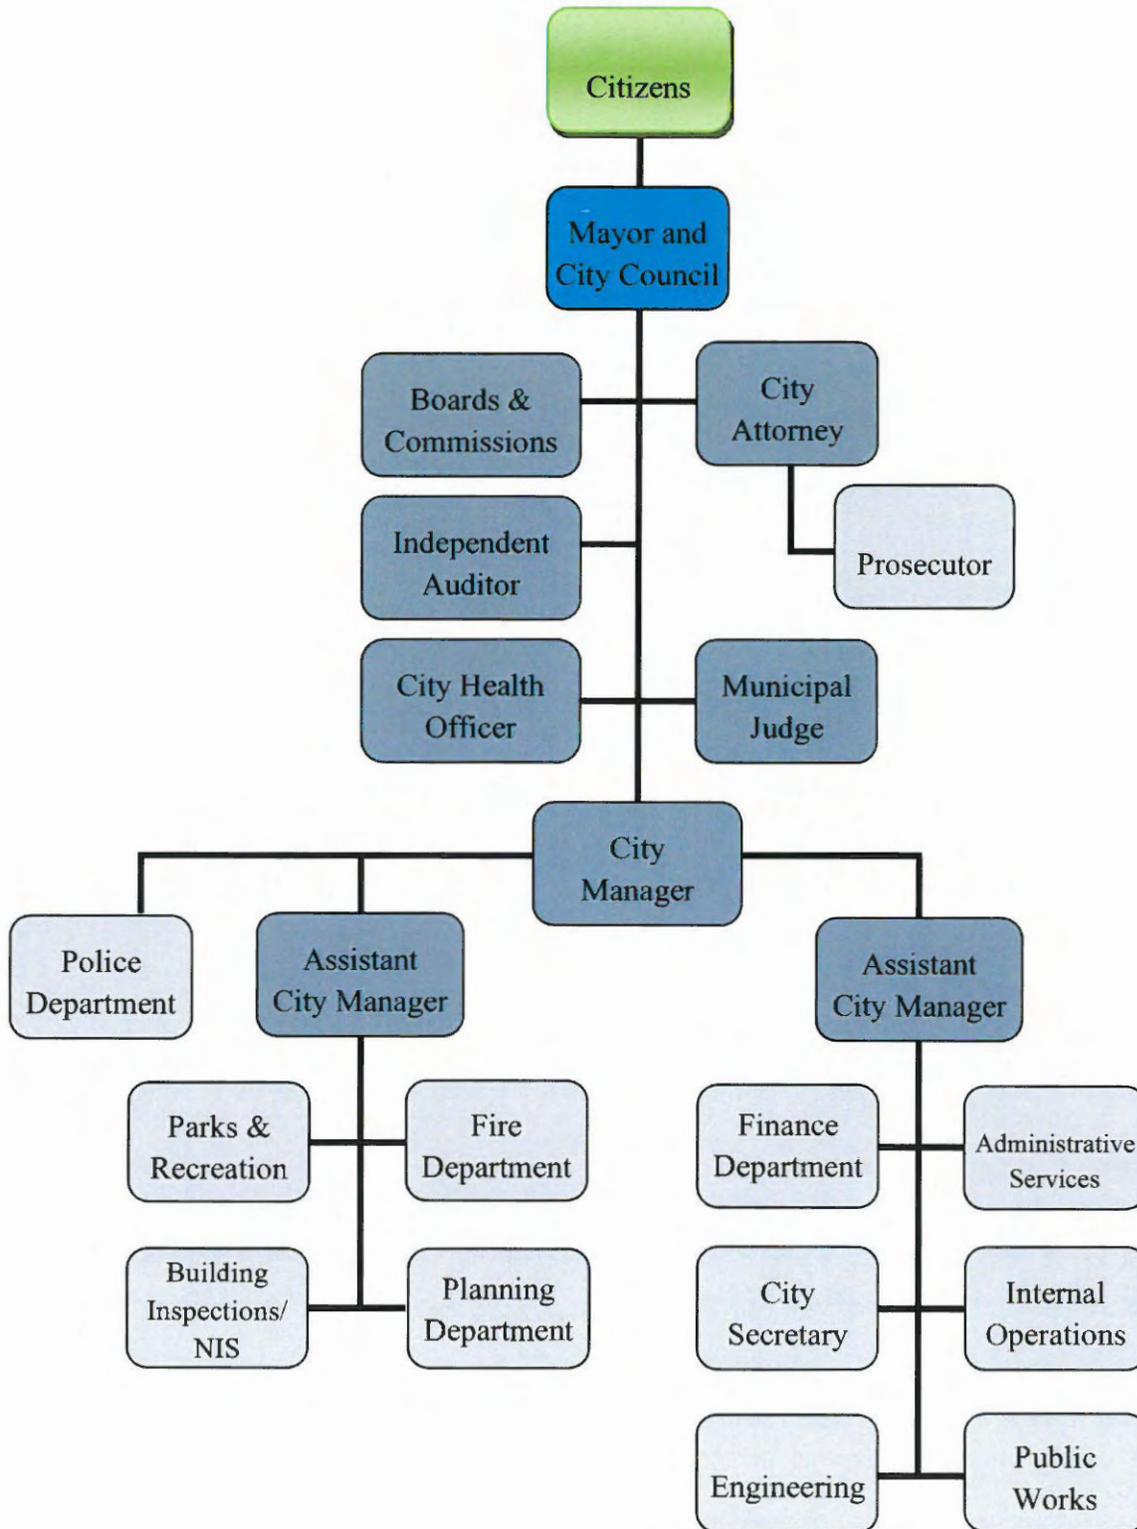

Richard R. Crowley

## INDEPENDENT AUDITOR'S REPORT

To the City Council  
City of Rockwall, Texas

We have audited the accompanying financial statements of the governmental activities, the business-type activities, the aggregate discretely presented component units, each major fund, and the aggregate remaining fund information of the City of Rockwall, Texas, as of and for the year ended September 30, 2015, and the related notes to the financial statements, which collectively comprise the City's basic financial statements as listed in the table of contents.

### **Management's Responsibility for the Financial Statements**

Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

### **Auditor's Responsibility**

Our responsibility is to express opinions on these financial statements based on our audit. We conducted our audit in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditors' judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessment, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinions.

## Opinions

In our opinion, the financial statements referred to above present fairly, in all material respects, the respective financial position of the governmental activities, the business-type activities, the aggregate discretely presented component units, each major fund, and the aggregate remaining fund information of the City of Rockwall, Texas, as of September 30, 2015, and the respective changes in financial position and, where applicable, cash flows thereof for the year then ended in accordance with accounting principles generally accepted in the United States of America.

## Other Matters

### *Required Supplementary Information*

Accounting principles generally accepted in the United States of America require that the management's discussion and analysis, the budgetary comparison information and the changes in net pension liability (asset) and related ratios on pages 13-24 and 70-72 be presented to supplement the basic financial statements. Such information, although not a part of the basic financial statements, is required by the Governmental Accounting Standards Board, who considers it to be an essential part of financial reporting for placing the basic financial statements in an appropriate operational, economic, or historical context. We have applied certain limited procedures to the required supplementary information in accordance with auditing standards generally accepted in the United States of America, which consisted of inquiries of management about the methods of preparing the information and comparing the information for consistency with management's responses to our inquiries, the basic financial statements, and other knowledge we obtained during our audit of the basic financial statements. We do not express an opinion or provide any assurance on the information because the limited procedures do not provide us with sufficient evidence to express an opinion or provide any assurance.

### *Other Information*

Our audit was conducted for the purpose of forming opinions on the financial statements that collectively comprise the City of Rockwall, Texas' basic financial statements. The introductory section, combining and individual nonmajor fund financial statements and schedules, and statistical section are presented for purposes of additional analysis and are not a required part of the basic financial statements.

In our opinion, the combining, individual nonmajor fund financial statements and the budgetary comparison schedules are fairly stated, in all material respects, in relation to the basic financial statements as a whole. The combining, individual nonmajor fund financial statements and the budgetary comparison schedules are the responsibility of management and were derived from and relate directly to the underlying accounting and other records used to prepare the basic financial statements. Such information has been subjected to the auditing procedures applied in the audit of the basic financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the basic financial statements or to the basic financial statements themselves, and other additional procedures in accordance with auditing standards generally accepted in the United States of America.

The introductory and statistical section have not been subjected to the auditing procedures applied in the audit of the basic financial statements, and accordingly, we do not express an opinion or provide any assurance on them.

## MANAGEMENT'S DISCUSSION AND ANALYSIS

The discussion and analysis of the City of Rockwall's financial performance provides an overview and analysis of the City's financial activities for the fiscal year ended September 30, 2015. Please read it in conjunction with the City's financial statements, which follow this section.

### FINANCIAL HIGHLIGHTS

- The City's total net position was \$180,206,701 at September 30, 2015.
- During the year, the City's governmental activities expenses were \$7,446,392 less than the \$40,852,760 generated in program revenues, taxes, other revenues and transfers.
- The assets of the City of Rockwall attributable to governmental activities exceeded its liabilities, net of deferred inflows and deferred outflows of resources at the close of the fiscal year ending September 30, 2015 by \$107,864,207 (net position).
- At the end of this fiscal year, the unassigned fund balance for the general fund was \$11,476,929 or approximately 38.6 percent of the total general fund operating expenditures and transfers out.
- The City's total outstanding general obligation bonds and certificates of obligation (excluding enterprise and component unit debt) decreased by \$6,939,632 during fiscal year 2015. More detailed information is given in the notes section.

### OVERVIEW OF THE FINANCIAL STATEMENTS

This annual report consists of three parts—management's discussion and analysis (this section), the basic financial statements, and required supplementary information. The basic financial statements include two kinds of statements presenting different views of the City:

The first two statements are government-wide financial statements that provide both long-term and short-term information about the City's overall financial status.

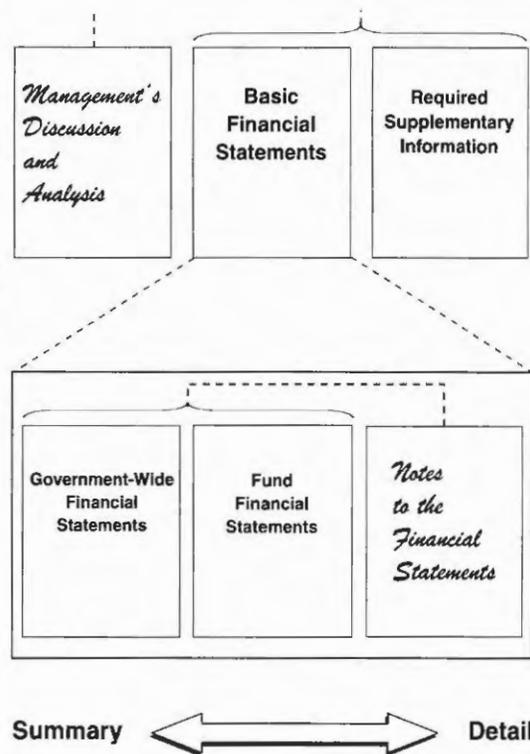

The remaining statements are fund financial statements that focus on individual parts of the government, reporting the City's operations in more detail than the government-wide statements.

The governmental fund statements tell how general government services were financed in the short-term as well as what remains for future spending.

Proprietary fund statements offer short-term and long-term financial information about the activities the government operates like businesses.

Fiduciary fund statements provide information about the financial relationships in which the City acts solely as a trustee or agent for the benefit of others, to whom the resources in question belong.

Figure A-1, Required Components of the City's Annual Financial Report

The financial statements also include notes that explain some of the information in the financial statements and provide more detailed data. The statements, followed by a section of required supplementary information, further explain and support the information in the financial statements. Figure A-1 shows how the required parts of this annual report are arranged and relate to one another.

**Figure A-2. Major Features of the City of Rockwall’s Government-wide and Fund Financial Statements**

<i>Type of Statements</i>	<b>Fund Statements</b>		
	<b>Government-wide</b>	<b>Governmental Funds</b>	<b>Proprietary Funds</b>
<i>Scope</i>	Entire City government (except fiduciary funds) and the City's component units	Activities of the City that are not proprietary or fiduciary, such as police, fire and parks	Activities the City operates similar to private business.
<i>Required financial statements</i>	◆ Statement of net position	◆ Balance Sheet	◆ Statement of net position
	◆ Statement of activities	◆ Statement of revenues, expenditures & changes in fund balances	◆ Statement of revenues, expenses & changes in fund net position ◆ Statement of cash flows
<i>Accounting basis and measurement focus</i>	Accrual accounting and economic resources focus	Modified accrual accounting and current financial resources focus	Accrual accounting and economic resources focus
<i>Type of asset/liability information</i>	All assets and liabilities, both financial and capital, short-term and long-term	Only assets expected to be used up and liabilities that come due during the year or soon thereafter; no capital assets included	All assets and liabilities, both financial and capital, short-term and long-term
<i>Type of inflow/outflow information</i>	All revenues and expenses during year, regardless of when cash is received or paid	Revenues for which cash is received during or soon after the end of the year; expenditures when goods or services have been received and payment is due during the year or soon thereafter	All revenues and expenses during year, regardless of when cash is received or paid

### **Government-wide Financial Statements**

The government-wide statements are designed to provide readers with a broad overview of the City of Rockwall’s finances, in a manner similar to private-sector business.

The *statement of net positions* presents information on all of the city of Rockwall’s assets and liabilities, with the difference between the two reported as *net position*. Over time, increases or decreases in net position may serve as a useful indicator of whether the financial condition of the City of Rockwall is improving or deteriorating. The statement of net position combines and consolidates governmental funds current financial resources (short-term spendable resources) with capital assets and long-term obligations. Other non-financial factors should also be taken into consideration, such as changes in the City’s property tax base and the condition of the City’s infrastructure, to assess the overall health or financial condition of the City.

The *statement of activities* presents information showing how the City’s net position changed during the most recent fiscal year. All of the current year’s revenues and expenses are taken into account regardless of when cash is received or paid. Thus, revenues and expenses are reported in this statement for some items that will only result in cash flows in future fiscal periods; for example uncollected taxes and earned but unused vacation leave. Both the statement of net position and the statement of activities are prepared utilizing the accrual basis of accounting.

In the Statement of Net Position and the Statement of Activities, the City is divided into three kinds of activities:

*Governmental activities* – Most of the City’s basic services are reported here, including administration, police, fire, planning and zoning, finance, parks and recreation, municipal court and engineering. Property taxes, sales taxes, franchise fees and charges for services provide funds for most of the activities.

*Business-type activities* – The City charges fees to customers to help it cover all or most of the cost of certain services it provides. We report the City’s water and sewer system here.

*Component Units* – The City of Rockwall (the primary government) includes two discretely presented component units. The City’s Type A Sales Tax Corporation known as the Rockwall Economic Development Corporation and the Rockwall Technology Park Association. Although legally separate, The City of Rockwall is financially accountable for these component units. The City Council appoints the component unit’s Board of Directors, sets the budget and approves any debt issuance.

The government-wide financial statements are found on pages 25-26 of this report.

## **Reporting the City’s Most Significant Funds**

### Fund Financial Statements

The fund financial statements provide more detailed information about the City’s most significant funds—not the City as a whole. *Funds* are accounting devices the City uses to keep track of specific sources of funding and spending for particular purposes. Some funds are required by State law and by bond covenants. However, the City establishes other funds to control and manage money for particular purposes or to show that it is properly using certain taxes and grants.

The City has the following types of funds:

*Governmental funds*—Most of the City’s basic services are included in governmental funds, which focus on (1) how cash and other financial assets that can readily be converted to cash flow in and out and (2) the balances left at year-end that are available for spending. Consequently, the governmental fund statements provide a detailed short-term view that helps users of the financial statements determine whether there are more or fewer financial resources that can be spent in the near future to finance the City’s programs. By comparing information presented for governmental funds with similar information presented for governmental activities in the government-wide financial statements, readers may better understand the long-term impact of the government’s near-term financing decisions. Because this information does not encompass the additional long-term focus of the government-wide statements, we provide additional information at the bottom of the governmental funds statement, or on the subsequent page, that explain the relationship (or differences) between them.

The City of Rockwall maintains 22 individual governmental funds. Information is presented separately in the governmental funds balance sheet and in the governmental funds statement of revenues, expenditures and changes in fund balances for the General fund, Debt Service fund, and G.O. Bonds Capital Projects fund, which are considered major funds. Data from the other 19 governmental funds are combined into a single, aggregated presentation. Individual fund data for each of these non-major governmental funds is provided in the form of combining statements elsewhere in this report.

*Proprietary funds*—Services for which the City charges customers a fee are generally reported in proprietary funds. Proprietary funds, like the government-wide statements, provide both long-term and short-term financial information. The City's enterprise funds (a component of proprietary funds) are identical to the business type activities that are reported in the governmental-wide statement but provide more detail and additional information such as cash flows, for proprietary funds. The Internal Service funds (the other component of proprietary funds) are utilized to report activities that provide services for the City's self-insurance funds. The Internal Service funds are reported as governmental activities in the government-wide financial statements.

The City of Rockwall maintains an Enterprise Fund to account for water and sewer services provided to the City's retail and wholesale customers. All activities associated with providing such services are accounted for in this fund, including administration, operations, maintenance, debt service, capital improvements, billing and collection. The City's intent is that all costs of providing the services to the public on a continuing basis are financed through user charges in a manner similar to a private business enterprise.

The City maintains two internal service funds to account for funds accumulated to self-insure for health and workers compensation claims. Individual fund data for each of these business-type funds is provided in the form of combining statements elsewhere in this report.

*Fiduciary funds*—The City is the trustee, or *fiduciary*, for certain funds. It is also responsible for other assets that - because of a trust arrangement - can be used only for the trust beneficiaries. The City is responsible for ensuring that the assets reported in these funds are used for their intended purposes. All of the City's fiduciary activities are reported in a separate statement of assets and liabilities of the agency fund. We exclude these activities from the City's government-wide financial statements because the City cannot use these assets to finance its operations.

*Notes to the financial statements*-The notes provide additional information that is essential to a full understanding of the data provided in the government-wide and fund financial statements.

## **Other Information**

In addition to the basic financial statements and accompanying notes, this report presents certain *required supplementary information* concerning the City of Rockwall. This information is required by accounting principles generally accepted in the United States of America.

## CONDENSED GOVERNMENT-WIDE FINANCIAL INFORMATION

At the end of fiscal year 2015, the City's net position (assets exceeding liabilities) totaled \$180,206,701. This analysis focuses on the net position (Table 1) and changes in net position (Table 2).

The largest portion of the City's net position (88.3 percent) reflects its investment in capital assets (i.e., land, buildings, machinery, equipment, and infrastructure); less any related debt used to acquire those assets, which is still outstanding. The City uses these capital assets to provide services to citizens; consequently, these assets are not available for future spending. Although the City's investment in its capital assets is reported net of related debt, it should be noted that the resources needed to repay this debt must be provided from other sources, since the capital assets themselves cannot be used to liquidate these liabilities.

Table 1  
Net Position

## Governmental Activities

The City's total revenues of governmental activities were \$46,329,184. A significant portion 44.10%, of the City's revenues came from property taxes. Another 32.74% of revenue came from sales taxes. Ad valorem property tax revenues as a percent of revenues continue to increase each year due to the addition of new properties and increases in assessed valuation throughout the City. The City Council has chosen to either maintain the current rate or lower the tax rate each of the last five years. Total assessed values of the properties in the City increased by 11.79%. The City adopted a property tax rate of 49.55 cents per \$100 of assessed valuation for fiscal year 2015. Growth in the assessed valuation and conservative budgets allowed the City to lower the rate for fiscal year 2016 by .70 cents per hundred dollars of assessed valuation. Sales tax revenue increased over the prior year by 5.79% and while a few retailers were added for 2015, it was most influenced by increases in same stores sales. While housing starts are not expected to return to pre-downturn levels, they are trending upward. Developers started infrastructure work on several new subdivisions including phases of Stone Creek, Breezy Hill, Rockwall Downes and others in 2014. These new phases or neighborhoods began selling lots in 2015. The permit revenues increased overall by 25.2% due to significantly increased housing starts seen in 2105 along with new industrial buildings in the Rockwall Technology Park and other industrial areas of the City permitted during the fiscal year. Over the past several years, Rockwall County, of which the City of Rockwall is the County seat, was one of the fastest growing counties in America, and the fastest growing county in Texas.

## Comparative Expenses – Governmental Activities

The total cost of all programs and services were \$39,819,292. Of this total, \$10,222,333 (25.7%) was for the Police Department. The department had a slight decrease in expenditures for fiscal year 2015 when compared to the prior year. Staffing is being realigned in the Police Department and an officer was promoted to a Sergeant position without filling the vacancy he created. Generally, expenditures from seized funds, which are used for specialized equipment purchases, were decreased in 2015 when compared to the prior year as well.

Public Works costs were \$5,438,890 (13.7%) and reflected ongoing road reconstruction projects, the downtown improvements and ongoing street maintenance focused projects Administrative departments including Administration, Human Resources, and Internal Operations which is responsible for building maintenance, the public safety radio system and IT had combined costs of \$8,298,012 (20.8%).

### **Business-Type Activities**

The City's business-type activities recorded an increase of \$4,254,854 in net assets. Retail water sales increased by 25.5% in part due to raising rates by 10% in January and the long-awaited break in the drought allowed the resumption of outdoor water consumption in the last few months of the fiscal year. Rockwall residents responded to the call for conservation well ahead of stated goals, which significantly reduced the first 8 months revenues though. The City's rates were increased in 2013, 2014, 2015 and another increase is expected for 2016. The City implemented a conservation focused water rate structure in 2001 and increases the rate tiers each time new rates are adopted. The rates for sewer were also increased and total sewer charges increased by 12.5% for the fiscal year. The city employs winter averaging to calculate sewer billing so revenues are largely not affected by restrictions on irrigating lawns. Water and sewer charges were \$15,791,793. The ending working capital, excluding restricted assets and liabilities payable from restricted assets, for the water and sewer fund was \$2,240,816.

Water and wastewater impact fees (Capital recovery fees) revenue totaled \$1,163,000 for the fiscal year. Impact fees, paid by developers, are designed to reduce the system's initial costs in building assets to serve new growth. Residential development is assessed an impact fee at the building permit stage while commercial projects are assessed at the beginning of site development.

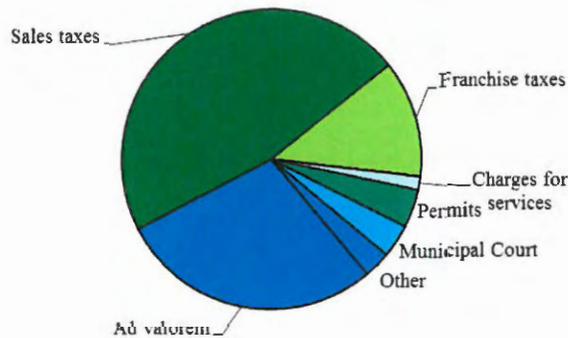

### **Component Units**

The Rockwall Economic Development Corporation (REDC) reported revenues including the ½-cent sales tax, authorized under the Type A Corporation statutes, of \$4,858,633. Assets managed by the corporation include an inventory of over 294 acres of land, zoned for light industrial uses and available for sale. The REDC continues to attract companies to the City through its marketing efforts and ability to match businesses to available land.

### **ANALYSIS OF INDIVIDUAL FUNDS**

The City's *General Fund* reported an ending unassigned fund balance of \$11,476,929. The largest source of general fund revenue is sales tax, it accounted for \$14,545,372 (46.9%) of total general fund revenue. Ad valorem property taxes account for \$8,823,094 (28.4%) of general fund revenues. The City's property tax rate is split between maintenance/operations and debt service. For fiscal year 2015, the debt service portion of the rate increased but the increased assessed valuations caused the dollars assigned to the general fund to increase by 4.9% when compared to the prior year. The City maintains the unassigned fund balance at or above acceptable levels as defined within the City's financial policies. This "reserve" balance allows the City Council to elect to fund projects unforeseen during the budgeting process and provides a measure of security against changes in the economy and the timing of cash flows. The City Council elected to use reserves to fund an increase in street maintenance, a new traffic signal at Ralph Hall and Mims roads, the improvement of the parking surface at Tuttle ballfields and equipment for Police and other departments. This planned use of reserves totaled \$900,921. The City's revenues increased sufficiently during the year to see the general fund unassigned balance increase by \$1,171,289 or 11.4%.

## Revenues by Source – General Fund

The City's *Debt Service Fund* reported an increase in fund balance of \$476,122. Property tax collections for debt service requirements were \$10,939,266. This is required in order to pay debt service payments on bonds issued to construct numerous road and parks projects completed since the City's bond election in 2005 authorized more than \$65,031,000 in projects. After extensive study, the City adopted a Roadway Impact Fee which was further studied and updated in 2014 and which provided \$725,092 in new revenue to this fund in fiscal year 2015. The City Council chooses to budget a portion of this fund balance each year toward meeting the debt service obligations. This allows the use of the debt service fund reserves to lessen the effect of new debt issues on the property tax rate each year.

The *G.O. Bonds Capital Projects Fund* reported an assigned fund balance of \$4,588,837, a decrease of \$3,407,460 from the prior year. Downtown improvements were well underway in fiscal year 2015. Initial funding for access ramp improvements on Interstate 30 at John King was incurred in 2015. Work should begin on the ramps in 2016.

## GENERAL FUND BUDGETARY HIGHLIGHTS

During fiscal year 2015, the City Council of the City of Rockwall amended the budget to provide funding for several unforeseen projects and to recognize salary savings over the year, as well as increases or decreases in revenues when compared to original projections. With the adjustments made to the budget, the original budgeted expenditures of \$26,883,800 increased to \$27,459,350 while revenue estimates increased from \$28,864,250 to \$30,002,750. The City of Rockwall had originally estimated the ending general fund unassigned balance to be \$9,475,040 however due to the budget adjustments mentioned above the fund balance was re-estimated to be \$10,008,590.

General fund revenues ultimately were \$31,021,781, a positive variance of \$1,019,031 over the amended budget estimate, reflecting stronger than anticipated sales tax collections, cable franchise fees and building permits in the remaining months of the fiscal year. Actual general fund total expenditures were \$27,048,584 or \$410,766 less than final projections. Final expenditures in each department were generally less than anticipated. The City ended the year with a fund balance of \$11,476,929, or \$1,171,289 over the prior year's balance. The higher fund balance is attributable to management's conservative projections of both revenues and expenditures.

## CAPITAL ASSET AND DEBT ADMINISTRATION

### Capital Assets

At the end of the fiscal year 2015 the City had \$296,372,593 (Table 3) invested in a broad range of capital assets, including buildings, parks facilities, roads, police and fire equipment and water and sewer lines. The balances shown below are net of accumulated depreciation.

**Table 3**  
**Capital Assets at Year-End**

	Governmental Activities		Business-Type Activities		Total Primary Government	
	2015	2014	2015	2014	2015	2014
Land	\$ 17,238,772	\$ 17,238,772	\$ 799,533	\$ 799,533	\$ 18,038,305	\$ 18,038,305
Buildings & systems	13,743,910	14,264,225	98,344,141	95,272,166	112,088,051	109,536,391
Improvements other than buildings	18,801,718	19,776,623	-	-	18,801,718	19,776,623
Machinery & equipment	4,732,316	5,872,337	1,036,338	670,568	5,768,654	6,542,905
Infrastructure	132,229,621	130,288,217	-	-	132,229,621	130,288,217
Construction in progress	9,306,880	6,865,523	139,364	1,958,700	9,446,244	8,824,223
	<u>\$ 196,053,217</u>	<u>\$ 194,305,697</u>	<u>\$ 100,319,376</u>	<u>\$ 98,700,967</u>	<u>\$ 296,372,593</u>	<u>\$ 293,006,664</u>

The City held a bond election in May 2012 during which voters approved propositions to fund several street reconstruction projects as well as infrastructure and accessibility projects in the downtown area in excess of \$27,800,000. Design was completed and construction has commenced on the phased approach to replacing sidewalks and paving in the area as well as the construction of a new events plaza. The interstate ramp projects approved by voters will be under design in 2015 and design of the remaining roadway rehabilitation projects should commence in 2016.

Notably, the construction in progress at fiscal year end for business-type funds reflects the slowdown in beginning new projects as revenues for the water system were reduced due to extremely successful conservation efforts on the part of our residents. With the break in the drought and lifting of restrictions in Summer 2015 revenues increased and design of several water line and wastewater lift station projects will be on the table for 2016.

Additional information regarding the City's capital assets is found in note IV-D on pages 48-51.

### Debt

At year-end, the City had \$134,948,524 in bonds and capitalized leases shown in Table 4.

**Table 4**  
**City of Rockwall Outstanding Debt**

	Governmental Activities		Business-Type Activities		Total Primary Government	
	2015	2014	2015	2014	2015	2014
General obligation bonds	\$ 85,790,000	\$ 87,404,632	\$ -	\$ 25,638	\$ 85,790,000	\$ 87,430,270
Certificates of obligation	14,610,000	16,935,000	26,220,000	27,900,000	40,830,000	44,835,000
Revenue bonds	-	-	3,235,000	3,495,000	3,235,000	3,495,000
Capital Lease obligations	51,525	100,855	5,041,729	5,485,067	5,093,254	5,585,922
	<u>\$ 100,451,525</u>	<u>\$ 104,440,487</u>	<u>\$ 34,496,729</u>	<u>\$ 36,905,705</u>	<u>\$ 134,948,254</u>	<u>\$ 141,346,192</u>

The City is permitted by Article XI, Section 5, of the State of Texas Constitution to levy taxes up to \$2.50 per \$100 of assessed valuation for general governmental services including the payment of principal and interest on general obligation long-term debt. The current ratio of net tax-supported bonded debt to assessed value of all taxable property is 3.11% or \$3,143 per capita. This is a decrease since the City did not issue new money bonds this fiscal year.

The City’s bond ratings at September 30, 2015 were as follows:

	<u>General Obligation</u>	<u>Revenue</u>	<u>Sales Tax(REDC)</u>
Standard & Poor’s Rating Group	AA+	A+	A-
Moody’s Investor Service Inc.	Aa2	A1	A1

Additional information on the City of Rockwall’s long-term debt may be found in note IV-F, on pages 53-60 of this report.

**ECONOMIC FACTORS AND NEXT YEAR’S BUDGETS AND RATES**

The City’s elected and appointed officials considered many factors when setting the fiscal year 2016 budget, tax rate, and fees that will be charged for the business-type activities. The major factor affecting all decisions in 2015 was the impact that mandatory water conservation has caused to revenues. With consumption increasing again, after drought restrictions were lifted the City Council was able to budget for previously delayed equipment replacement and design of several needed water and sewer line projects. Having chosen to discontinue the management transfer from the enterprise fund to the general fund in 2015, this was not reinstated in 2016 budget in order to help restore the reserve levels, which were severely depleted. The City conservatively budgeted a 4% increase in sales tax revenue and modest increases in franchise fees. Increases are expected in construction related activity as new subdivision phases are beginning and housing sales are improving. Interviews with local builders led the City to project continued improvement in home starts for the coming year.

The City of Rockwall’s citizens enjoy above-average income levels per household. This combined with the City’s proximity to major highways, and the Dallas-Ft.Worth SMSA make Rockwall an attractive city in which to locate. The City prides itself on a quality school district and “hometown” atmosphere. The Rockwall Economic Development Corporation works to attract businesses with relocation incentives as well as business retention incentives such as workforce training opportunities. The City’s unemployment rate was 3.3%, well below the national levels.

The City of Rockwall considered these factors when adopting the General Fund budget for fiscal year 2016. The budgeted revenues for fiscal year 2016 total \$31,589,800 for the general fund. Ad valorem tax revenue is determined by two factors, the total assessed value established by the Rockwall Central Appraisal District and the tax rate established by the Rockwall City Council. The property tax rate was reduced to 48.53 cents per hundred dollars of assessed value.

The City adopted written financial policies in 2001, which require that revenues and expenditures be projected conservatively. The policies include debt level guidelines. These policies were reviewed by the City Council in 2009 and certain provisions related to the City’s fund balance were changed. The amended policy provides that the General Fund reserves should be no less than 3 months of recurring operating appropriations. In addition, the policies provide that should an audited fund balance at the end of the fiscal year exceed 3.5 months, the City Council may elect to transfer a portion to a Capital Projects Fund. The ending general fund balance for 2015 provides approximately 5.1 months of reserves for the City. The City Council elected to purchase capital equipment including police vehicles, fire safety

equipment and street patching equipment, normally financed with short-term debt obligations, due in large part to the healthy fund balance. The budget as adopted for fiscal year 2016 projects a fund balance of approximately 4.0 months of recurring operating expenditures. The 2016 budget reflects continued funding for street maintenance projects and continuing to purchase vehicles on a pay-as-you-go basis.

The 2016 budget expenditures include the reassignment of several Police officers to a new deployment unit, which will be able to focus on problem areas as they arise in a focused manner. A new Public Relations/Marketing Manager position was added as well.

The water and sewer rate study has been updated to reflect increased charges from the North Texas Municipal Water District for treated water and the budget anticipates a significant increase in those rates. A number of capital projects to replace older lines were completed in 2015 and new projects were not started due to the decreased reserves and anticipated revenue levels in fiscal year 2015. With the replenishment of area lakes, revenues should more in line with previous years. The last year without some level of restrictions was 2012. Operational costs were increased in order to complete deferred maintenance and the equipment purchases discussed above.

### **REQUESTS FOR INFORMATION**

This financial report is designed to provide our citizens, taxpayers, customers, and creditors with a general overview of the City's finances. For more information, contact the City's Assistant City Manager/Director of Finance, Mary Smith at (972) 771-7701; City of Rockwall; 385 South Goliad Street, Rockwall TX 75087. Email: [msmith@rockwall.com](mailto:msmith@rockwall.com).

CITY OF ROCKWALL, TEXAS  
 RECONCILIATION OF THE GOVERNMENTAL FUNDS BALANCE SHEET  
 TO THE STATEMENT OF NET POSITION  
 SEPTEMBER 30, 2015

Total fund balances - governmental funds balance sheet	\$ 21,400,566
Amounts reported for governmental activities in the statement of net assets are different because:	
The assets and liabilities of internal service funds are included in governmental activities in the statement of net position	889,476
The following assets are not available to pay for current period expenditures and are deferred in the funds:	
Property taxes receivable	385,304
Franchise taxes receivable	390,000
Assessments receivable	88,680
Intergovernmental receivable	98,916
Contributions receivable	185,565
Court fines receivable	106,299
Revenues earned but not available within sixty days of the year end are not recognized as revenue in the fund financial statements	115,870
Deferred outflows or resources are not considered available funds and are not recorded in governmental funds:	
Pension contributions after 12/31/14	1,888,560
Investment experience - Pensions	485,305
Deferred inflows of resources are not considered available funds and are not recorded in governmental funds	(87,278)
The following assets are not current financial resources and are not reported in the funds:	
Capital assets used in governmental activities (net of accumulated depreciation of \$111,785,314)	196,053,217

CITY OF ROCKWALL, TEXAS  
RECONCILIATION OF THE STATEMENT OF REVENUES, EXPENDITURES,  
AND CHANGES IN FUND BALANCES OF GOVERNMENTAL FUNDS  
TO THE STATEMENT OF ACTIVITIES  
FOR THE YEAR ENDED SEPTEMBER 30, 2015

Net change in fund balances - governmental funds	\$ (1,673,799)
Amounts reported for governmental activities in the statement of activities are different because:	
The net revenue (expense) of internal service funds is reported with governmental activities in the statement of net assets	198,158
Certain assets are not available to pay for current period expenditures and are not reported as revenues in the funds. The following amounts represent the changes in these assets during the year:	
Property taxes receivable	(9,045)
Assessments receivable	2,000
Franchise taxes receivable	108,322
Court fines receivable	855
Governmental funds report capital outlays as expenditures. However, in the statement of activities the cost of these assets is allocated over their estimated useful lives and reported as depreciation expense. This is the amount by which depreciation (\$10,749,162) exceeded capital outlays (\$12,993,669) and retirements (\$ 152,130) in the current period	2,396,637
Governmental funds report debt issuance costs as expenditures. However, in the statement of activities these costs are allocated over the term of the underlying debt and reported as amortization expense. This is the amount of amortization in the current period, net of additions for debt issue cost incurred.	(115,773)
Expenditures are recognized in the governmental funds when paid. However, the Statement of Activities is presented on an accrual basis and expenses are reported when incurred. The following is the net difference in pension costs.	(181,937)
Accrued interest payable on long-term debt does not require the use of current financial resources and is not reported in the funds. This is the amount of the change in accrued interest payable during the year.	(68,683)
Bond proceeds provide current financial resources to governmental funds, but issuing debt increases long-term liabilities in the statement of net assets. Repayment of debt principal is an expenditure in the governmental funds, but the repayment reduces long-term liabilities in the statement of net assets. This is the amount of repayments (\$6,809,632) and bond premium amortization (\$12,434 ) in the current period.	6,822,066
Compensated absences payable do not require the use of current financial resources and are not reported as expenditures in governmental funds. This is the amount of the change in accrued compensated absences during the year.	<u>(32,409)</u>
	<u>\$ 7,446,392</u>

CITY OF ROCKWALL, TEXAS  
NOTES TO FINANCIAL STATEMENTS

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

*Reporting Entity*

The City of Rockwall, Texas (the "City") was founded in 1854 and incorporated in 1874. The City operates under the Council-Manager form of government as adopted by a home rule charter approved January 21, 1985. The City provides a full range of municipal services including public safety (police and fire), highway and streets, parks and recreation, health and social services, planning and zoning, and general administrative services. In addition, the City provides water and sewer services as a proprietary function of the City.

The accounting policies of the City conform to generally accepted accounting principles issued by the Governmental Accounting Standards Board (GASB) which is the recognized financial accounting standard setting body for governmental entities. The notes to the financial statements are an integral part of the City's basic financial statements.

The City is a home rule municipality governed by an elected Mayor and six-member City Council who appoint a City Manager. The City's (primary government) financial statements include its component units. The accompanying basic financial statements comply with the provisions of GASB Statement No. 14, *The Financial Reporting Entity*, in that the financial statements include all organizations, activities, functions and component units for which the City (the "primary government") is financially accountable. Financial accountability is defined as the appointment of a voting majority of a legally separate organization's governing body and either: (1) the City's ability to impose its will on the organization, or (2) the potential that the organization will provide a financial benefit to, or impose a financial burden on, the City.

*Discretely Presented Component Units*

The Rockwall Economic Development Corporation (REDC) is governed by a seven member Board of Directors appointed, at will, by the City Council. REDC represents the City by promoting it as a location for new business; it also acquires and develops land for that purpose. REDC collects a half-cent sales tax to support its activities.

The Rockwall Technology Park Association (RTPA) provides repair and maintenance of the common area within the park being developed by REDC. RTPA's Board of Directors is composed of representatives of the landowners. At September 30, 2015, REDC owned the majority of the land and the Board was therefore composed of REDC board members. When the park becomes 75% or more owned by private landowners, it will become an entity independent of the City. Until then, it is controlled by REDC, a discrete component unit of the City. RTPA, is effectively controlled by the City through REDC and thus provides a potential financial benefit or burden to the City.

The funds of both REDC and RTPA are composed of governmental fund types. Stand alone financial statements for REDC and RTPA as of and for the fiscal year ended September 30, 2015, are not prepared.

CITY OF ROCKWALL, TEXAS

NOTES TO FINANCIAL STATEMENTS

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES – continued

*Government-wide and Fund Financial Statements*

The government-wide financial statements (i.e. the statement of net position and the statement of activities) report information on all of the non-fiduciary activities of the primary government and its component units. For the most part, the effect of inter-fund activity has been removed from these statements. *Governmental activities*, which normally are supported by taxes and intergovernmental revenues, are reported separately from *business-type activities*, which rely, to a significant extent, on fees and charges for support. Likewise, the *primary government* is reported separately from certain legally separate *component units* for which the primary government is financially accountable.

The statement of activities demonstrates the degree to which the direct expenses of a given function or segment are offset by program revenues. *Direct expenses* are those that are clearly identifiable with a specific function or segment. *Program revenues* include: (1) charges to customers or applicants who purchase, use, or directly benefit from goods, services, or privileges provided by a given function or segment, and (2) grants and contributions that are restricted to meeting the operational or capital requirements of a particular function or segment. Taxes and other items not properly included among program revenues are reported instead as *general revenues*.

Separate financial statements are provided for governmental funds, proprietary funds, and fiduciary funds, even though the latter are excluded from the government-wide financial statements. Major individual governmental funds and major individual enterprise funds are reported as separate columns in the fund financial statements.

*Measurement Focus, Basis of Accounting, and Financial Statement Presentation*

The government-wide financial statements are reported using the *economic resources measurement focus* and the *accrual basis of accounting*, as are the proprietary fund and fiduciary fund financial statements. Revenues are recorded when earned and expenses are recorded when a liability is incurred, regardless of the timing of related cash flows. Property taxes are recognized as revenues in the year for which they are levied. Grants and similar items are recognized as revenue as soon as all eligibility requirements imposed by the provider have been met.

Governmental fund financial statements are reported using the *current financial resources measurement focus* and the *modified accrual basis of accounting*. Revenues are recognized as soon as they are both measurable and available. Revenues are considered to be *available* when they are collectible within the current period or soon enough thereafter to pay liabilities of the current period. For this purpose, the City considers revenues to be available if they are collected within 60 days of the end of the current fiscal period. Expenditures generally are recorded when a liability is incurred, as under accrual accounting. However, debt service expenditures, as well as expenditures related to compensated absences and claims and judgments, are recorded only when payment is due.

Property taxes, franchise taxes, licenses, and interest associated with the current fiscal period are all considered to be susceptible to accrual and so have been recognized as revenues of the current fiscal period. Only the portion of special assessments receivable due within the current fiscal period is considered to be susceptible to accrual as revenue of the current period. All other revenue items are considered to be measurable and available only when cash is received by the City.

CITY OF ROCKWALL, TEXAS  
NOTES TO FINANCIAL STATEMENTS

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES – continued

*Measurement Focus, Basis of Accounting, and Financial Statement Presentation – continued*

The City reports the following major governmental funds:

The *General Fund* is the City's primary operating fund. It accounts for all financial resources of the general government, except those required to be accounted for in another fund.

The *Debt Service Fund* accounts for the resources accumulated and payments made for principal and interest on long-term debt of governmental funds.

The *G.O. Bonds Capital Projects Fund* accounts for the acquisition or construction of capital assets used in the operation of governmental funds.

The City reports the following major proprietary fund:

The *Water and Sewer Fund* operates the water distribution system and the wastewater treatment plants, wastewater pumping stations, and collection systems.

Additionally, the City reports the following fund types:

Internal Service Funds account for employees' health insurance and workers' compensation coverage services provided to other departments or agencies of the government on a cost-reimbursement basis.

Special Revenue Funds account for specific revenue sources that are legally restricted to expenditures for specified purposes (not including expendable trusts or major capital projects).

Capital Projects Funds account for the acquisition of capital assets or the construction of major capital projects (such as streets and sidewalks) not being financed by proprietary funds.

Fiduciary Funds account for assets held by the City in a trustee capacity or as an agent on behalf of others. The Agency Fund is custodial in nature and does not present results of operations or have a measurement focus. Agency funds are accounted for using the accrual basis of accounting. This fund is used to account for developer contributions for infrastructure projects related to various developments to be constructed at a later date.

Private-sector standards of accounting and financial reporting issued prior to December 1, 1989, generally are followed in both the government-wide and proprietary fund financial statements to the extent that those standards do not conflict with or contradict guidance of the Governmental Accounting Standards Board. Governments also have the *option* of following subsequent private-sector guidance for their business-type activities and enterprise funds, subject to this same limitation. The City has elected not to follow subsequent private-sector guidance.

CITY OF ROCKWALL, TEXAS

NOTES TO FINANCIAL STATEMENTS

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES – continued

*Measurement Focus, Basis of Accounting, and Financial Statement Presentation – continued*

As a general rule the effect of inter-fund activity has been eliminated from the government-wide financial statements. Exceptions to this general rule are payments-in-lieu of taxes and other charges between the City's water and sewer function and various other functions of the City. Elimination of these charges would distort the direct costs and program revenues reported for the various functions concerned.

Amounts reported as *program revenues* include: (1) charges to customers or applicants for goods, services, or privileges provided, (2) operating grants and contributions, and (3) capital grants and contributions, including special assessments. Internally dedicated resources are reported as *general revenues* rather than as program revenues. Likewise, general revenues include all taxes, miscellaneous revenue, and interest income.

Proprietary funds distinguish *operating* revenues and expenses from *non-operating* items. Operating revenues and expenses generally result from providing services and producing and delivering goods in connection with a proprietary fund's principal ongoing operations. The principal operating revenues of the Water and Sewer enterprise fund are charges to customers for sales and services. The enterprise utility fund also recognizes as operating revenue the portion of tap fees intended to recover the cost of connecting new customers to the system. Operating expenses for the enterprise fund include the cost of sales and services, administrative expenses, and depreciation on capital assets. All revenues and expenses not meeting this definition are reported as non-operating revenues and expenses.

*Assets, liabilities, and net position or equity*

Deposits and investments

The City maintains various accounts for each fund at its depository. The City also has cash maintained by agents for debt payments and reserves, construction reserves and workers' compensation claims. For purposes of the statement of cash flows, the City considers all highly liquid debt instruments purchased with a maturity of three months or less to be cash equivalents.

The City's investment policy authorizes the Director of Finance to invest in the following types of investments:

- a. Obligations of the United States or its agencies and instrumentalities with finite maturity dates, with a maximum maturity of not greater than five (5) years. Laddering of investments should be considered.
- b. Direct obligations of the State of Texas or its agencies and instrumentalities, with stated finite maturity dates.
- c. Other obligations, with finite maturity dates, the principal and interest of which are unconditionally guaranteed or insured by the State of Texas or the United States or their respective agencies or instrumentalities.
- d. Obligations of states, agencies, counties, cities and other political subdivisions of any state having been rated as to investment quality by a nationally recognized investment rating firm and having received a rating of not less than "A" or its equivalent.

NOTES TO FINANCIAL STATEMENTS

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES – continued

*Assets, liabilities, and net assets or equity – continued*

Deposits and investments - continued

- e. Certificates of deposit issued by a state or national bank domiciled in the State of Texas or a savings bank domiciled in the State of Texas provided that they are:
  - (1) Guaranteed or insured by the Federal Deposit Insurance Corporation or its successor,
  - (2) Secured by obligations outlined in items "a" through "d" above. The market value of all collateral must be marked to market on a daily basis and shall not be less than 102% of the principal amount of the certificate plus accrued interest, or
  - (3) Secured in any other manner in an amount provided by law for deposits of the City.
- f. Repurchase agreements which are fully collateralized by obligations of the United States or its agencies and instrumentalities, marked to market on a daily basis with a market value of at least 102% of the principal invested, including accrued interest. The securities being purchased must be pledged to the City and held in the City's name by a third party selected and approved by the City. The repurchase agreement must have a defined termination date and be placed through a primary government securities dealer or a financial institution doing business in the State of Texas. The repurchase agreements should be secured by obligations approved in this policy.
- g. Banker's acceptances having a stated maturity of 270 days or less, to be liquidated in full at maturity, which are rated not less than "A-1" or "P-1" (or an equivalent rating) by at least one nationally recognized credit rating agency provided that it is eligible for borrowing from a Federal Reserve Bank.
- h. Commercial paper having a stated maturity of 270 days or less and rated not less than "A-1" or "P-1" (or an equivalent rating) by at least two nationally recognized rating agencies or one nationally recognized rating agency and is fully secured by an irrevocable letter of credit issued by a bank organized and existing under the laws of the United States.
- i. No-load money market mutual fund registered with and regulated by the SEC, which has a dollar-weighted average stated maturity of 90 days or less. It must have included in its investment objectives its intent to maintain a stable net asset value of \$1 for each share. The fund must provide the City with a prospectus and other information required by the SEC.
- j. No-load mutual funds, registered with and regulated by the SEC, having weighted maturity of less than two years, and which invests exclusively in investments approved by this policy.
- k. Investment pools which are approved by the City Council, provided they meet all the criteria for investment pools outlined in Chapter 2256, Texas Local Government Code, and maintain a continuous rating not lower than AAA or AAA-m (or an equivalent rating) from at least one nationally recognized rating service.

CITY OF ROCKWALL, TEXAS  
NOTES TO FINANCIAL STATEMENTS

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES – continued

*Assets, liabilities, and net assets or equity – continued*

Deposits and investments - continued

The City holds various mortgage-backed securities that offer higher yields but are sensitive to changes in interest rates and other market conditions. Timely payment of interest and principal are guaranteed by federal agencies. The City will not be required to sell these securities prior to maturity barring an event that would be isolated, nonrecurring, unusual, and could not reasonably be anticipated by the City. The City has no borrowed funds used for investing or reverse repurchase agreements.

Investments having a maturity of one year or more, when purchased, are stated at fair value. Short-term investments are stated at cost or amortized cost.

Receivables and payables

Activity between funds that are representative of lending/borrowing arrangements outstanding at the end of the fiscal year are referred to as either "due to/from other funds" (i.e., the current portion of interfund loans) or "advances to/from other funds" (i.e., the non-current portion of interfund loans). All other outstanding balances between funds are reported as "due to/from other funds." Any residual balances outstanding between the governmental activities and business-type activities are reported in the government-wide financial statements as "internal balances."

Advances between funds, as reported in the fund financial statements, are offset by a fund balance reserve account in applicable governmental funds to indicate that they are not available for appropriation and are not expendable available financial resources.

All trade receivables are shown net of an allowance for uncollectibles. Trade accounts receivable in excess of 60 days comprise the trade accounts receivable allowance for uncollectibles.

Property taxes are levied on October 1st by the City based on the January 1st property values as assessed by the Rockwall Central Appraisal District. Taxes are due without penalty until January 31st of the next calendar year. After January 31st the City has an enforceable lien with respect to both real and personal property. Under state law, property taxes levied on real property constitute a perpetual lien on the real property which cannot be forgiven without specific approval of the State Legislature. Taxes applicable to personal property can be deemed uncollectible by the City.

Inventories and prepaid items

All inventories are valued at cost using the first in/first out (FIFO) method. Inventories of governmental funds are recorded as expenditures when consumed rather than when purchased.

Certain payments to vendors reflect costs applicable to future accounting periods and are recorded as prepaid items in both government-wide and fund financial statements.

CITY OF ROCKWALL, TEXAS

NOTES TO FINANCIAL STATEMENTS

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES – continued

*Assets, liabilities, and net assets or equity – continued*

Restricted assets

Certain proceeds of enterprise fund revenue bonds are classified as restricted assets on the statement of net assets because their use is limited by applicable bond covenants.

Capital assets

Capital assets, which include property, plant, equipment, and infrastructure assets (e.g., roads, bridges, sidewalks, and similar items), are reported in the applicable governmental or business-type activities columns in the government-wide financial statements. Capital assets are defined by the City as assets with an initial individual cost of more than \$5,000 (amount not rounded) and an estimated useful life in excess of two years. Such assets are recorded at historical cost or estimated historical cost if purchased or constructed. Donated capital assets are recorded at estimated fair market value at the date of donation.

The costs of normal maintenance and repairs that do not add to the value of the asset or materially extend asset lives are not capitalized.

Major outlays for capital assets and improvements are capitalized as projects are constructed. Interest incurred during the construction phase of capital assets of business-type activities is included as part of the capitalized value of the assets constructed.

Capital assets of the primary government, as well as the component units, are depreciated using the straight-line method over the following estimated useful lives:

Buildings	20 - 30 years
Building improvements	20 - 50 years
Public domain infrastructure	20 years
System infrastructure	50 years
Equipment	3 - 10 years

Compensated absences

It is the City's policy to permit employees to accumulate earned but unused vacation pay benefits up to specified limits. Sick leave is accrued at 6.67 hours per month. However, once an employee has accrued 120 days of sick leave, earned sick leave in excess of 120 days may be converted to vacation leave at a ratio of three days of sick leave to one day of vacation leave up to a maximum of 15 sick leave days per year. Upon termination, any accumulated sick leave over 120 days shall be converted to vacation leave at a ratio of three days of sick leave to one day of vacation leave to be paid to the employee in accordance with the vacation leave policy. Upon retirement from the City, all accrued sick leave shall be converted to vacation pay at a ratio of three days of sick leave to one day of vacation leave and shall be paid to the employee if he/she has 10 or more years of service to the City. Unused compensatory time for nonexempt employees is paid on termination. All vacation pay is accrued when incurred in the government-wide, proprietary, and fiduciary fund financial statements. Compensated absences are reported in governmental funds only if they have matured for example, as a result of employee's resignation and retirement.

CITY OF ROCKWALL, TEXAS  
NOTES TO FINANCIAL STATEMENTS

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES – continued

*Assets, liabilities, and net assets or equity – continued*

Long-term obligations

In the government-wide financial statements, and proprietary fund type in the fund financial statements, long-term debt and other long-term obligations are reported as liabilities in the applicable governmental activities, business-type activities, or proprietary fund type statement of net position. Bond premiums and discounts, as well as issuance costs, are deferred and amortized over the life of the bonds using the straight-line method which approximates the effective interest method. Bonds payable are reported net of the applicable bond premium or discount. Bond issuance costs are reported as deferred charges and amortized over the term of the related debt.

In the fund financial statements, governmental fund types recognize bond premiums and discounts, as well as bond issuance costs, during the current period. The face amount of debt issued is reported as other financing sources. Premiums received on debt issuances are reported as other financing sources while discounts on debt issuances are reported as other financing uses. Issuance costs, whether or not withheld from the actual debt proceeds received, are reported as debt service expenditures.

Fund equity

Fund balance of governmental funds is reported in various categories based on the nature of any limitations requiring the use of resources for specific purposes. The government itself can establish limitations on the use of resources through either a commitment (committed fund balance) or an assignment (assigned fund balance). The committed fund balance classification includes amounts that can be used only for the specific purposes determined by a formal action of the government's highest level of decision-making authority. The governing council is the highest level of decision-making authority for the government that can, by adoption of an ordinance prior to the end of the fiscal year, commit fund balance. Once adopted, the limitation imposed by the ordinance remains in place until a similar action is taken (the adoption of another ordinance) to remove or revise the limitation.

Amounts in the assigned fund balance classification are intended to be used by the government for specific purposes but do not meet the criteria to be classified as committed. The Council may also assign fund balance as it does when appropriating fund balance to cover a gap between estimated revenue and appropriations in the subsequent year's appropriated budget. Unlike commitments, assignments generally only exist temporarily. In other words, an additional action does not normally have to be taken for the removal of an assignment. Conversely, as discussed above, an additional action is essential to either remove or revise a commitment.

Amounts that cannot be spent because they are either not in a spendable form or are legally or contractually required to be maintained intact are classified as non-spendable fund balance.

Amounts that can be spent only for specific purposes because of constraints imposed by external providers, or imposed by constitutional provisions or enabling legislation are classified as restricted fund balance.

Amounts that are available for any purpose are classified as unassigned fund balance; these amounts can be reported only in the City's General Fund.

CITY OF ROCKWALL, TEXAS

NOTES TO FINANCIAL STATEMENTS

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES – continued

*Assets, liabilities, and net assets or equity – continued*

Fund equity - continued

Fund balance amount represent the nature of the net resources that are reported in a governmental fund. The City fund balance classifications include non-spendable resources, restricted, and non-restricted (committed, assigned and unassigned) amounts. When the City incurs an expenditure and both restricted and unrestricted amounts are available, the City considers restricted amounts to have been spent first. When the City incurs an expenditure for an unrestricted amount, committed amounts are reduced first, followed by assigned amounts and then unassigned amounts for purposes in which any of those unrestricted fund balance classifications could be used. The City has not established a formal policy to set forth a minimum level for fund balances.

2. RECONCILIATION OF GOVERNMENT-WIDE AND FUND FINANCIAL STATEMENTS

Explanation of certain differences between the governmental fund balance sheet and the government-wide statement of net position:

The governmental fund balance sheet includes a reconciliation between fund balance-total governmental funds and net position-governmental activities as reported in the government-wide statement of net position. One element of that reconciliation explains that "Deferred outflow of resources are not available to pay for current-period expenditures and are deferred in the funds." The details of this \$115,870 difference are as follows:

Deferred outflow of resources:	
Bond issue costs – insurance	\$ 11,392
Loss on refunding	<u>104,478</u>
Total	<u>\$ 115,870</u>

3. STEWARDSHIP, COMPLIANCE, AND ACCOUNTABILITY

A. Budgetary information

The City follows the following procedures in establishing the budgetary data reflected in the financial statements:

1. Public hearings are conducted to obtain taxpayer comments.
2. Prior to October 1st, the budget is legally enacted through passage of an ordinance.
3. The City Manager is authorized to transfer budgeted amounts between departments within any fund; however, any revisions that alter the total expenditures of any fund must be approved by the City Council. Therefore the fund level is the legal level of control.
4. Formal budgetary integration is employed as a management control device during the year. The legally adopted budgets for the General Fund, certain special revenue funds and the Debt Service Fund are adopted on a basis consistent with generally accepted accounting principles.

CITY OF ROCKWALL, TEXAS  
NOTES TO FINANCIAL STATEMENTS

3. STEWARDSHIP, COMPLIANCE, AND ACCOUNTABILITY – continued

A. Budgetary information – continued

5. Budgeted amounts are as originally adopted or as amended by the City Council. During 2015, individual amendments were not material in relation to the original appropriations. Any budgeted amounts appropriated at fiscal year-end and not spent automatically lapse.
6. The City did not adopt budgets for certain Special Revenue Funds. These unbudgeted Special Revenue Funds were as follows:

Emergency Siren Fund  
Art in Public Places Fund

7. Capital project funds were not budgeted. Since project-length financial plans usually extend into two or more fiscal years, annual comparisons would be confusing and misleading.

B. Excess of expenditures over appropriations

Expenditures exceeded appropriations by \$3,563 in the Public Safety Fund due to expenses related to finalizing software changes to enable the Court to begin to accept credit card payments which were not anticipated to be incurred until the next fiscal year.

4. DETAILED NOTES ON ALL FUNDS

A. Deposits and investments

Deposits

Custodial credit risk for deposits is the risk that in the event of a bank failure, the City's deposits may not be returned or the City will not be able to recover collateral securities in the possession of an outside party. At September 30, 2015, the City's deposits were entirely insured or collateralized with securities held by the pledging financial institution's trust department or agent in the City's name; as a result, the City's deposits were not exposed to custodial credit risk.

CITY OF ROCKWALL, TEXAS

NOTES TO FINANCIAL STATEMENTS

4. DETAILED NOTES ON ALL FUNDS – continued

A. Deposits and investments – continued

Deposits - continued

Under a contractual agreement with North Texas Municipal Water District (NTMWD), depository accounts are maintained by NTMWD for interest and sinking, debt, and construction reserves totaling \$922,271, which are separately insured or secured by collateral pledged by NTMWD's depository. This amount is included in restricted cash on the statement of net assets.

The deposits of REDC and RTPA are covered by the City's depository contract and, therefore, at September 30, 2015, these deposits were entirely insured or collateralized with securities held by the pledging financial institution's trust department or agent in the City's name; as a result, the deposits of REDC and RTPA were not exposed to custodial credit risk.

Investments

At September 30, 2015, the City's investments were as follows:

E. Inter-fund receivables, payables, and transfers

The composition of inter-fund balances as of September 30, 2015, is as follows:

<u>Fund</u>	<u>Receivable</u>	<u>Payable</u>
General Fund	\$ 25,165	\$ -
Debt Service	435,747	-
Non-major Governmental Funds	-	435,747
Discretely Presented Component Unit	<u>-</u>	<u>25,165</u>
Totals	<u>\$ 460,912</u>	<u>\$ 460,912</u>

The outstanding balances between funds result primarily from the time delay between the dates that inter-fund goods and services are provided and payments between funds are made. Also, working capital loans are made to capital projects funds in advance of debt issuances. These are expected to be collected within one year.

CITY OF ROCKWALL, TEXAS  
NOTES TO FINANCIAL STATEMENTS

4. DETAILED NOTES ON ALL FUNDS – continued

E. Inter-fund receivables, payables, and transfers – continued

The composition of inter-fund transfers for the year ended September 30, 2015, is as follows:

<u>Fund</u>	<u>Transfer In</u>	<u>Transfer Out</u>
Major Governmental Funds		
General Fund	\$ 90,500	\$ 2,682,000
G.O. Bonds Capital Projects	-	260,000
Non-major Governmental Funds	598,500	90,500
Water and Sewer Enterprise Fund	-	936,500
Internal Service Funds	<u>3,280,000</u>	<u>-</u>
Total	<u>\$ 3,969,000</u>	<u>\$ 3,969,000</u>

Transfers are used to move unrestricted revenues to finance various programs or capital projects that the City must account for in other funds in accordance with budgetary authorizations.

F. Long-term debt

General obligation debt

The City issues general obligation debt (in the form of general obligation bonds, certificates of obligation, contractual obligations, and notes payable) to provide funds for the acquisition and construction of major capital facilities. General obligation debt has been issued for both governmental and business-type activities. These issues are direct obligations and pledge the full faith and credit of the City. General obligation debt outstanding as of September 30, 2015, is as follows:

<u>Purpose</u>	<u>Original Amount</u>	<u>Year of Issue</u>	<u>Final Maturity</u>	<u>Interest Rate</u>	<u>Balance 9/30/2015</u>

Capitalized lease obligations

The City has entered into a contract with a software vendor for an upgrade to the public safety software system. This contract has been treated as a capitalized lease.

The City has entered into contracts with North Texas Municipal Water District (NTMWD), a conservation and reclamation district and political subdivision of the State of Texas, for the construction and operation of certain water and plants and to provide treated water to the City. The contractual obligations have been treated as capitalized lease obligations.

G. Subsequent Events - Long-term debt

On December 17, 2015, the City refunded Water and Sewer Revenue bonds originally issued in 2005 in the amount of \$2,800,000 and Certificates of Obligation originally issued in 2006 in the amount of \$5,905,000 by issuing new General Obligation Bonds in the amount of \$8,705,000 to be repaid at 1.79% interest with final maturity on August 1, 2026.

On March 1, 2016, the City refunded the Certificates of Obligation originally issued in 2005 for \$12,415,000; in 2007 for \$10,310,000 and in 2008 for \$16,895,000 and General Obligation Bonds originally issued in 2005 for \$13,345,000; in 2006 for \$35,775,000; in 2007 for \$21,765,000 and in 2008 for \$9,515,000 by issuing \$8,775,000 in new General Obligation Bonds and \$5,570,000 of new Certificates of Obligation. The newly issued General Obligation Bonds bear interest ranging from 2% to 5% and mature on August 1, 2037. The newly issued Certificates of Obligation bear interest ranging from 2% to 3% and mature on August 1, 2035.

CITY OF ROCKWALL, TEXAS  
NOTES TO FINANCIAL STATEMENTS

5. OTHER INFORMATION

A. Risk management

The City is exposed to various risks of loss related to torts; theft of, damage to, and destruction of assets; errors and omissions; injuries to employees; employee health benefits; and other claims of various natures.

The City uses a medical self-insurance fund to pay medical and dental claims of City employees and their covered dependents and minimize the total cost of annual medical insurance to the City. Medical claims in any one year exceeding \$75,000 per covered individual, or approximately \$2,395,196 in the aggregate for the group, are covered through a private insurance carrier. Additionally, life insurance policy premiums for each employee are paid through the fund. The self-insurance fund is funded by operating transfers from other funds and charges to employees for extended benefits at their option. The City does not believe there are material claims incurred but not reported as of September 30, 2015.

The City uses a Self-Insurance and Risk Management Program (as permitted by law and its home rule charter) to insure itself against the various risks of liability or loss to which it is exposed, either through an insurance provider or through a defined self-insurance program. The City issued certificates of obligation, based on an actuarial analysis, to fund a self-insured workers' compensation plan. Under this plan, workers' compensation insurance is provided in accordance with state statutes to all City employees. To protect the assets of the plan from a catastrophic claim, the City has purchased stop loss coverage in the amount of \$200,000 per occurrence with a maximum City liability of \$600,000 per year.

The Workers' Compensation Fund (an internal service fund) accounts for the activity of this plan. The City establishes claim liabilities based on estimates of the ultimate cost of claims reported but unsettled and of claims incurred but not reported. Any claims incurred and not reported are not believed to be significant to the City's financial statements.

Changes in the balances of claims liabilities during the past two years are as follows:

	<u>Employee Benefits</u>		<u>Worker's Compensation</u>	
	<u>2015</u>	<u>2014</u>	<u>2015</u>	<u>2014</u>
Claims payable beginning of the year	\$ 475,175	\$ 439,333	\$ 5,085	\$ 10,830
Claims incurred	2,973,898	3,062,330	122,797	40,705
Payment on claims	<u>(3,206,152)</u>	<u>(3,026,488)</u>	<u>(45,432)</u>	<u>(46,450)</u>
	<u>\$ 242,921</u>	<u>\$ 475,175</u>	<u>\$ 82,450</u>	<u>\$ 5,085</u>

Commercial insurance is purchased for the other risks of loss to which the City is exposed. There have been no significant reductions in insurance coverage and settlement amounts have not exceeded insurance coverage for the current year or the three prior years.

B. North Texas Municipal Water District

The District is a conservation and reclamation district and political subdivision of the State of Texas, created and functioning under Chapter 62, Acts of 1951, 52nd Legislature, Regular Session, as amended, originally compiled as Vernon's Article 8270-141 (the "Act"), pursuant to Article 16, Section 59 of the Texas Constitution. The District comprises all of the territory of its member cities, viz., Allen, Garland, Princeton, Plano, Mesquite, Wylie, Rockwall, Farmersville, McKinney, Richardson, Forney, Royse City, and Frisco (the "Member Cities"). The District was created for the purpose of providing a source of water supply for municipal, domestic and industrial use and for the treatment, processing, and transportation of such water to its Member Cities and to its other customers located in North Central Texas, all within the Dallas Standard Metropolitan Statistical Area.

Under the Act, including specifically Section 27 thereof, and under the Constitution and Statutes of the State of Texas, the District has broad powers to: (1) impound, control, store, preserve, treat, transmit and use storm and flood water, the water of rivers and streams, and underground water for irrigation, power and all other useful purposes and to supply water for municipal, domestic, power, industrial and commercial uses and purposes and all other beneficial uses and purposes; and (2) collect, transport, process, treat, dispose of, and control all municipal, domestic, industrial or commercial waste whether in fluid, solid or composite state, including specifically the control, abatement or reduction of all types of pollution. The City retains no ongoing financial interest, equity investments, and/or responsibilities for the District other than the contractual arrangements discussed more fully herein.

The District has long-term contracts with the City to supply treated water and sewer treatment. The City's water contract with the District provides that the City pay a predetermined annual amount for treated water in twelve monthly installments. The amount of this annual payment is based upon an annually established rate per thousand gallons and the largest annual amount of water consumption of past years. The City owns one sewage treatment facility, Squabble Creek, and in 1978 entered into an agreement with the District for the construction of a second facility, Buffalo Creek. Under the terms of this agreement, the District issued contractually secured bonds in its name to construct and operate this sewage disposal plant for the City. In subsequent years, similar contractual agreements have been made to enable the District to expand the sewage treatment facilities and continue to provide sewage treatment services to the City. Under the terms of these contracts, the City's payments, which began when the facilities were first utilized, are equal to the operating and maintenance expenses for the next ensuing calendar year, as shown in the annual budget. The contracts further provide that the debt service payments will be equal to the principal and/or interest coming due on the bonds on the next succeeding interest payment date, plus the fees and charges of the paying agent and the registrar.

These contractual obligations have been included as capital lease obligations in amounts equal to the bonds outstanding under these agreements. Accordingly, the related assets have been capitalized and are being depreciated over the estimated life of the facilities.

The outstanding principal balance on the bond issues as of September 30, 2015, is \$5,485,067. See Note 4F for the annual requirements to amortize the bonds as of September 30, 2015.

With respect to the ground storage reservoir discussed above, the Cities of Rockwall and Heath are contractually obligated to make timely payments to the District representing 66.67% and 33.33%, respectively, of the related operating expenses and debt service payments. While the City anticipates its share of these payments to be 66.67%, the Cities of Rockwall and Heath are each contractually obligated to make any payments which the other party is required, but is unable, to make to the District.

CITY OF ROCKWALL, TEXAS

NOTES TO FINANCIAL STATEMENTS

5. OTHER INFORMATION - continued

C. Contingent liabilities and commitments

Amounts received or receivable from grantor agencies are subject to audit and adjustment by such agencies. Any disallowed claims, including amounts already collected, may constitute a liability of the applicable funds. The amounts, if any, of expenditures which may be disallowed by the grantor cannot be determined at this time although the City expects such amounts, if any, to be immaterial.

The City is a defendant in various lawsuits. Although the outcome of these lawsuits is not presently determinable, it is the opinion of the City's management that the resolution of these matters will not have a material adverse effect on the financial condition of the City.

As described in Note 4F above, the general revenues of the City are contingently liable in the amount of \$26,220,000 for general obligation bonds and certificates of obligation which are currently outstanding and recorded as obligations of the Enterprise Fund.

The City contracts for solid waste disposal with a third party. Under the terms of the agreement, the City bills and collects the residential billing and remits that amount to the contracting party. The contractor bills the commercial customers and remits a franchise fee to the City based on total revenues received from the contract.

The Rockwall Economic Development Corporation provides monetary incentives to companies to relocate within the City of Rockwall. At September 30, 2015, these commitments totaled \$5,490,340.

D. Defined Benefit Pension Plans

Plan Description:

The City participates as one of 860 plans in the nontraditional, joint contributory, hybrid defined benefit pension plan administered by the Texas Municipal Retirement System (TMRS). TMRS is an agency created by the State of Texas and administered in accordance with the TMRS Act, Subtitle G, Title 8, Texas Government Code (the TMRS Act) as an agent multiple-employer retirement system for municipal employees in the State of Texas. The TMRS Act places the general administration and management of the System with a six-member Board of Trustees. Although the Governor, with the advice and consent of the Senate, appoints the Board, TMRS is not fiscally dependent on the State of Texas. TMRS's defined benefit pension plan is a tax-qualified plan under Section 401 (a) of the Internal Revenue Code. TMRS issues a publicly available comprehensive annual financial report (CAFR) that can be obtained at [www.tmr.com](http://www.tmr.com).

All eligible employees of the City are required to participate in TMRS.

CITY OF ROCKWALL, TEXAS  
NOTES TO FINANCIAL STATEMENTS

5. OTHER INFORMATION - continued

D. Defined Benefit Pension Plans - continued

Benefits Provided:

TMRS provides retirement, disability, and death benefits. Benefit provisions are adopted by the governing body of the City, within the options available in the state statutes governing TMRS.

At retirement, the benefit is calculated as if the sum of the employee's contributions, with interest, and the city-financed monetary credits with interest were used to purchase an annuity. Members may choose to receive their retirement benefit in one of seven actuarially equivalent payments options. Members may also choose to receive a portion of their benefit as a Partial Lump Sum Distribution in an amount equal to 12, 24, or 36 monthly payments, which cannot exceed 75% of the member's deposits and interest.

At the date the plan began, the City granted monetary credits for service rendered before the plan began of a theoretical amount equal to two times what would have been contributed by the employee, with interest, prior to establishment of the plan. Monetary credits, also known as the matching ratio, are 200% of the employee's accumulated contributions and are only payable in the form of an annuity.

Beginning in 1993, the City granted an annually repeating (automatic) basis for a monetary credit referred to as an updated service credit (USC) which is a theoretical amount which takes into account salary increases or plan improvements. If at any time during their career an employee earns a USC, this amount remains in their account earning interest at 5% until retirement. At retirement, the benefit is calculated as if the sum of the employee's accumulated contributions with interest and the employer match plus employer-financed monetary credits, such as USC, with interest were used to purchase an annuity. Additionally, initiated in 1993, the City provided an annually repeating (automatic) basis cost of living adjustments (COLA) for retirees equal to a percentage of the change in the consumer price index. (CPI).

A summary of plan provisions for the City are as follows:

Employee deposit rate	7%
Matching ratio (City to employee)	2 to 1
Year required for vesting	5
Service retirement eligibility	20 years at any age, 5 years at age 60 and above
Updated Service Credit	100% Repeating
Annuity Increase to retirees	70% of CPI Repeating

The City does not participate in Social Security.

D. Defined Benefit Pension Plans - continued

Employees covered by benefit terms –

At the December 31, 2014 valuation and measurement date, the following employees were covered by the benefit terms:

Retirees or beneficiaries currently receiving benefits	69
Inactive employees entitled to but not yet receiving benefits	73
Active employees	259
	401
	401

Contributions:

Under the state law governing TMRS, the contribution rate for each city is determined annually by the consulting actuary, using the Entry Age Normal (EAN) actuarial cost method. The actuarially determined rate is the estimated amount necessary to finance the cost of benefits earned by employees during the year, with an additional amount to finance any unfunded accrued liability.

Employees for the City of Rockwall were required to contribute 7% of their annual gross earnings during the fiscal year. For fiscal year 2015, the City made contributions of 16.16%, for calendar year 2014 and 16.58% in 2015 which was the actuarially determined city contribution.

Net Pension Liability:

The City's Net Pension Liability (NPL) was measured as of December 31, 2014, and the Total Pension Liability (TPL) used to calculate the Net Pension Liability was determined by an actuarial valuation as of that date.

Actuarial assumptions –

The Total Pension Liability in the December 31, 2014 actuarial valuation was determined using the following actuarial assumptions:

Inflation	3.0% per year	
Overall payroll growth	3.0% per year	
Investment Rate of Return	7.0%, net of pension plan investment expense, including inflation	

Salary increases were based on a service-related table. Mortality rates for active members, retirees, and beneficiaries were based on the gender-distinct RP2000 Combined Healthy Mortality Table, with male rates multiplied by 109% and female rates multiplied by 103%. The rates are projected on a fully generational basis by scale BB to account for future mortality improvements. For disabled annuitants, the gender-distinct RP2000 Disabled Retiree Mortality Table is used, with slight adjustments.

D. Defined Benefit Pension Plans - continued

Actuarial assumptions – continued

Actuarial assumptions used in the December 31, 2014 valuation were based on the results of actuarial experience studies. This experience study was for the period January 1, 2006 through December 31, 2009, first used in the December 31, 2010 valuation. Healthy post-retirement mortality rates and annuity purchase rates were updated based on a Mortality Experience Investigation Study covering 2009 through 2011, and dated December 31, 2013. These assumptions were first used in the December 31, 2013 valuation, along with a change to the Entry Age Normal (EAN) actuarial cost method. Assumptions are reviewed annually. No additional changes were made for the 2014 valuation.

The long-term expected rate of return on pension plan investments is 7.0%. The pension plan's policy in regard to the allocation of invested assets is established and may be amended by the TMRS Board of Trustees. Plan assets are managed on a total return basis with an emphasis on both capital appreciation as well as the production of income, in order to satisfy the short-term and long-term funding needs of TMRS.

The long-term expected rate of return on pension plan investments was determine using a building-block method in which best estimate ranges of expected future real rates of return (expected returns, net of pension plan investment expense and inflation) are developed for each major asset class. These ranges are combined to produce the long-term expected rate of return by weighting the expected future real rates of return by the target asset allocation percentage and by adding expected inflation. The target allocation and best estimates of arithmetic real rates of return for each major asset class are summarized in the following table:

<u>Asset Class</u>	<u>Target Allocation</u>	<u>Long-Term Expected Real Rate of Return (Arithmetic)</u>
Domestic Equity	17.5%	4.80%
International Equity	17.5%	6.05%
Core Fixed Income	30.0%	1.50%
Non-Core Fixed Income	10.0%	3.50%
Real Return	5.0%	1.75%
Real Estate	10.0%	5.25%
Absolute Return	5.0%	4.25%
Private Equity	5.0%	8.50%
Total	<u>100.0%</u>	

CITY OF ROCKWALL, TEXAS

D. Defined Benefit Pension Plans - continued

Discount Rate –

The discount rate used to measure the Total Pension Liability was 7.0%. The projection of each cash flows used to determine the discount rate assumed that employee contributions will remain at the current 7% and employer contributions will be made at the rates specified in statute. Based on that assumption, the pension plan's Fiduciary Net Position was projected to be available to make all projected future benefit payments of current plan members. Therefore, the long-term expected rate of return on pension plan investments was applied to all periods of projected benefit payments to determine the Total Pension Liability.

Changes in the Net Pension Liability –

	Increase (Decrease)		
	Total Pension Liability (a)	Plan Fiduciary Net Position (b)	Net Pension Liability (a) - (b)
Balance at 12/31/2013	\$ 64,414,139	\$ 53,613,949	\$ 10,800,190

Sensitivity of the net pension liability to changes in the discount rate –

The following presents the net pension liability of the City, calculated using the discount rate of 7.0%, as well as what the City's net pension liability would be if it were calculated using a discount rate that is 1-percentage-point lower (6.0%) or 1-percentage-point higher (8.0%) than the current rate:

	1% Decrease in Discount Rate 6%	Current Single Rate Assumption 7%	1% Increase in Discount Rate 8%
City's net pension liability	\$ 22,442,338	\$ 11,181,133	\$ 2,038,482

Pension Plan Fiduciary Net Position –

Detailed information about the pension plan Fiduciary Net Position is available in a separately-issued TMRS financial report. That report may be obtained on the Internet at [www.tmr.com](http://www.tmr.com).

Pension Expense and Deferred Outflows of Resources and Deferred Inflows of Resources Related to Pensions -

For the year ended September 30, 2015, the City recognized pension expense of \$2,692,710. This amount is included as part of Personal Services expenses within the functional program activities.

At September 30, 2015, the City reported deferred outflow and inflows of resources related to pensions from the following sources:

	Deferred Outflows of Resources	Deferred Inflows of Resources
Contributions subsequent to the measurement date	\$ 2,133,484	\$ -
Difference between projected and actual investment earnings	548,244	-
Differences between actuarial assumptions and actual experience	-	98,597
Changes in actuarial assumptions used	-	-
Total	\$ 2,681,728	\$ 98,597

CITY OF ROCKWALL, TEXAS

NOTES TO FINANCIAL STATEMENTS

5. OTHER INFORMATION – continued

D. Defined Benefit Pension Plans - continued

Deferred outflows of resources related to pensions resulting from contributions subsequent to the measurement date of \$2,133,484 will be recognized as a reduction of the net pension liability for the measurement year ending December 31, 2015 (i.e. recognized in the City's financial statements September 30, 2016). Other amounts reported as deferred outflows and inflows of resources related to pensions will be recognized in pension expense as follows:

Measurement Year Ended December 31,	Amount
2015	\$ 121,335
2016	121,335
2017	121,335
2018	121,334
2019	(15,726)
Thereafter	(19,967)
Total	<u>\$ 449,646</u>

Subsequent event:

Pursuant to TMRS policy of conducting experience studies every four years, the TMRS Board at their July 31, 2015 meeting determined that they would be changing certain actuarial assumptions including reducing the long term expected rate of return from the current 7% to 6.75% and changing the inflation assumption from 3% to 2.5%. Reduction of expected investment return and related discount rate will increase projected pension liabilities. Reducing the inflation assumption reduces liabilities as future annuity levels and future cost of living adjustments are not projected to be as large as originally projected. While the actual impact on the City's valuation for December 31, 2015, is not known, the City does expect some upward pressure on its total pension liability and upward pressure on its 2017 actuarially determine contribution (ADC) due to this change. Accordingly the City has included in its approved fiscal year 2016 budget to continue to fund pension contributions above the required ADC which will help smooth impacts of any increases in the required ADC for fiscal year 2017.

Texas Statewide Emergency Services Personnel Retirement Fund

The City acts as agent for the Texas Statewide Emergency Services Personnel Retirement Fund (the "Fund") which is a component unit of the State of Texas. The City reimbursed the Fund \$50,525 for benefits paid on a pay-as-you-go basis during the year in recognition of services provided to the City by volunteer emergency services personnel. The Fund has a Board of Directors not designated by City officials and is administered by the State Fire Fighters' Pension Commissioner. There are 32 active participants currently covered by the Fund and payments are being made to 26 retirees or their survivors. The Fund does not prepare separate financial statements for participating departments; however, financial statements for the Fund as a whole may be obtained from the administrator at Fire Fighters' Pension Commissioner, P.O. Box 12577, Austin, Texas 78711.

## NONMAJOR GOVERNMENTAL FUNDS

### *SPECIAL REVENUE FUNDS*

**Special revenue funds are used to account for specific revenues that are legally restricted to expenditures for particular purposes.**

Cemetery – established to account for the annual income from the sale of plots and cemetery maintenance costs.

Public Safety – established to account for donations, court fees, and other public safety committed revenues.

Recreational Development – established to account for the annual lease income from marinas and golf course.

Radio System – established to account for revenues and expenditures for the support of the City's radio system.

Street Improvements – established to account for the proceeds of street improvement assessments.

Hotel Occupancy Tax – established to account for the annual income from hotel occupancy taxes.

Fire Equipment – established to account for funds to be used for the purchase of fire equipment for the volunteer fire department.

Aviation – established to account for funds received from airport operations and related expenses.

Recycling – established to account for funds to be used for the City's recycling program.

Emergency Siren – established to account for revenues accumulated and expenditures to add emergency sirens within the City.

Downtown Improvement – established to account for revenues and expenditures related to the City's efforts to revitalize the downtown square.

Art in Public Places – established to account for donations received for developing art displays in public areas such as parks.

Narcotics Unit – established to account for revenues and expenditures related to seized funds and forfeitures.

## ***CAPITAL PROJECTS FUNDS***

**Capital projects funds are used to account for the acquisition and construction of major capital facilities other than those financed by proprietary funds and trust funds.**

Capital Projects – established to account for miscellaneous street and drainage projects which are financed with contributions from the General Fund and the Rockwall Economic Development Corporation.

Equipment Acquisition – established to account for capital equipment acquisition using operating transfers from benefiting funds and residual proceeds from miscellaneous debt.

205 Bypass Project – established to account for revenues and expenditures related to the construction of the new 205 Bypass roadway project.

The Harbor/TIF Capital Projects Fund – established to account for improvements in the Tax Increment Reinvestment Zone using the proceeds from the issuance of bonds.

 RECONCILIATION OF THE STATEMENT OF REVENUES, EXPENDITURES,  
 AND CHANGES IN FUND BALANCES OF DISCRETELY PRESENTED  
 COMPONENT UNITS TO THE STATEMENT OF ACTIVITIES  
 FOR THE YEAR ENDED SEPTEMBER 30, 2015

Net change in fund balances - discretely presented component units	\$ (5,604,852)
<p>Amounts reported for discretely presented component units in the statement of activities ("SOA") are different because:</p>	
The depreciation of capital assets used in governmental activities is not reported in the funds.	(6,033)
Repayment of bond principal is an expenditure in the funds but is not an expense in the SOA.	1,830,000
Bond issuance costs and similar items are amortized in the SOA but not in the funds.	18,851
(Increase) decrease in accrued interest from beginning of period to end of period.	1,971
Compensated absences are reported as the amount earned in the SOA but as the amount paid in the funds.	10,850
Expenditures are recognized in the governmental funds when paid. However, the Statement of Activities is presented on an accrual basis and expenses are reported when incurred. This is the net difference in pension costs.	<u>4,255</u>
Change in net assets of discretely presented component units	<u><u>\$ (3,744,958)</u></u>

Total Direct and Overlapping Bonded Debt	<u>\$ 527,142,986</u>		<u>\$ 334,418,695</u>
Average debt per capita			<u>\$ 8,629</u>

Source: Assessed value data used to estimate applicable percentages provided by Rockwall Central Appraisal District. Debt Outstanding data is provided by each governmental unit.

- (1) Includes all Governmental Activities General Obligation Bonds, Contractual Obligations, Certificates of Obligation and Capital Leases
- (2) The percentage of overlapping debt applicable is estimated using taxable assessed property values. Applicable percentages were estimated by determining the portion of each governmental unit's taxable value that is within the city's boundaries and dividing it by each unit's total taxable value.

CITY OF ROCKWALL, TEXAS  
 COMPUTATION OF LEGAL DEBT MARGIN  
 LAST TEN FISCAL YEARS  
 (unaudited)

TABLE D-18

The City of Rockwall, Texas does not have a legal debt limit prescribed by state law. However, Article XI, Section 5 of the Texas Constitution applicable to cities of more than 5,000 population limits ad valorem tax rates to \$2.50 per \$100 assessed valuation for cities operating under a Home Rule Charter. Accordingly, the City's tax margin for the previous ten years was:

	Fiscal Year

*INTRODUCTORY SECTION*

City of Rockwall  
*The New Horizon*

April 20, 2015

To the Honorable Mayor,  
Members of the City Council,  
and the Citizens of the City of Rockwall, Texas:

The Comprehensive Annual Financial Report (CAFR) of the City of Rockwall for the fiscal year ended September 30, 2014, is hereby submitted in accordance with Section 7.18 of the City Charter. The financial statements are presented in conformity with generally accepted accounting principles (GAAP) and audited in accordance with generally accepted auditing standards by a firm of licensed certified public accountants.

Management assumes full responsibility for both the completeness and reliability of all of the information presented in this report. Fairness of the presentation, including all disclosures, rests with the City. To the best of our knowledge and belief, the enclosed data is accurate in all material respects and is reported in a manner designed to present fairly the financial position and results of operations of the various funds in the City. All disclosures necessary to enable the reader to gain an understanding of the City's financial activities have been included.

To provide a reasonable basis for making these representations, management of the City of Rockwall has established a comprehensive internal control framework that is designed both to protect the government's assets from loss, theft, or misuse and to compile sufficient reliable information for the preparation of the City of Rockwall's financial statements in conformity with GAAP. The internal control structure is designed to provide reasonable, but not absolute, assurance that these objectives are met. The concept of reasonable assurance recognizes that:

- (1) the cost of a control should not exceed the benefits likely to be derived; and
- (2) the valuation of costs and benefits requires estimates and judgments by management.

Because the cost of internal controls should not outweigh their benefits, the City of Rockwall's comprehensive framework of internal controls has been designed to provide reasonable rather than absolute assurance that the financial statements will be free from material misstatement. As management, we assert that, to the best of our knowledge and belief, this financial report is complete and reliable in all material respects. The internal control structure is subject to periodic evaluation by City management.

The City of Rockwall's financial statements have been audited by Fox, Byrd & Company P.C., PC, a firm of licensed certified public accountants. The goal of the independent audit was to provide reasonable assurance that the financial statements of the City of Rockwall for the fiscal year ended September 30, 2014, are free of material misstatement. The independent audit involved examining, on a test basis, evidence supporting the amounts and disclosures in the

financial statements; assessing the accounting principles used and significant estimates made by management; and evaluating the overall financial statement presentation. The independent auditor concluded, based upon the audit, that there was a reasonable basis for rendering an unqualified opinion that the City of Rockwall's financial statements for the fiscal year ended September 30, 2014, are fairly presented in conformity with GAAP. The independent auditors' report is presented as the first component of the financial section of this report.

Management's discussion and analysis (MD&A) immediately follows the independent auditor's report and provides a narrative introduction, overview and analysis of the financial statements as required by GAAP. MD&A complements this letter of transmittal and should be read in conjunction with it.

## **PROFILE OF THE GOVERNMENT**

The City of Rockwall, Texas, county seat of Rockwall County, Texas was incorporated in 1874. Its name is derived from an underground rock wall discovered in 1854. The unusual rock formations are found throughout the county. The City is located on the eastern shore of Lake Ray Hubbard, 22 miles east of downtown Dallas on Interstate Highway 30. The Dallas/Fort Worth area is recognized as one of the top growth areas in the country. The Dallas/Fort Worth International Airport and Love Field in Dallas meet the air transportation needs of the region.

The City currently has a land area of approximately 29.79 square miles and an estimated population of 40,008.

The City of Rockwall adopted a home rule charter in 1985 which established a council-manager form of government. Charter amendments were adopted in 2005. Policy making and legislative authority is vested in the City Council, which consists of a Mayor and six Council Members, all elected at large. The City Manager is responsible for carrying out the policies and ordinances of the City Council, overseeing the day-to-day operations of the City and for appointing the heads of the various departments. The mayor and six council members are elected to two year staggered terms. The government is empowered to levy a property tax on both real and personal property located within its boundaries. The government also has the power by state statute to extend its corporate limits by annexation, which is done periodically when deemed appropriate by the City Council.

The City of Rockwall provides a full range of services, including police and fire protection; the construction and maintenance of streets and other infrastructure; planning and zoning, parks and recreational activities and general administrative services. Additionally, the City provides water and sewer services as an enterprise function.

Discretely presented component units are legally separate entities and are not part of the primary government's operations. The City of Rockwall is financially accountable for its component units. Accordingly, the Rockwall Economic Development Corporation (REDC) and Rockwall Technology Park Association are included in these financial statements and are explained in more detail in Note 1 of the Notes to the Financial Statements.

## **Factors Affecting Financial Condition**

The information presented in the financial statements is best understood when considered from the broader perspective of the specific environment within which the City of Rockwall operates.

### Local Economy

The City of Rockwall is situated in the Dallas/Fort Worth Consolidated Metropolitan Statistical Area. With its concentration of commercial and retail development, the City of Rockwall has long drawn shoppers from surrounding areas. As the national economy began to improve over the last year, Rockwall's local economy benefitted from a mix of new businesses and the renewed success of others. Rockwall saw an increase of 10.4% in our local sales tax revenues. The city has a varied tax base including a mix of residential, commercial and light industrial properties. Total property values rose by 4.91%. The most recent five-year average is 2.56% per annum. During the downturn in the economy growth in the tax base slowed but remained positive each year. The City's largest taxpayers are varied and include retail developments, industry, and medical facilities. Table D-12 in the Statistical Section provides further information on the principal taxpayers. The Rockwall Economic Development Corporation continues to successfully market Rockwall and assist companies looking to locate their business in the City. The year's highlights included:

- Trend Tower, completed in 2014, brought the first class-A office space to Rockwall. Tenants include the locally owned and fast growing personnel outsourcing firm Trend HR, as well as medical and corporate offices. The building rises seven stories on the hillside above Lake Ray Hubbard providing impressive views of the area.
- Texas A&M Commerce, having opened a Rockwall campus with classes beginning in 2013, welcomed Collin College students to classes in the Rockwall Technology Park in 2014. Training partnerships are being developed to educate the area's workforce to meet the demand for careers with area industrial and medical employers.
- A number of new restaurants opened for business in 2014 adding to the extensive restaurant mix in town.
- Lake Pointe Medical Center opened a new acute care facility in North Rockwall and Baylor opened a surgical and emergency care facility.
- Downtown Rockwall is undergoing extensive reconstruction during 2014 but still saw several new retail businesses opened including Hazel & Olive, Southern Roots, Simply Kate and restaurants providing new options for downtown dining including 66 BBQ, The Londoner and Oscar Delta. The City benefits from the attention garnered from Rockwall's being a Texas Main Street City. The City has seen a 17.67% increase in sales taxes in the downtown area in the last fiscal year and 91.37% in the last five years.

### Long-term Planning

The City Council and staff recognize the need for long-range planning. It is the goal of the City government to provide responsible leadership, services, and infrastructure to achieve a safe environment and provide for a high quality of life.

## Financial Policies

The City Council adopted financial policies in 2001 which have guided the City, allowing us to build a strong fund balance, and reinforcing the city's philosophy to budget conservatively for both revenues and expenditures. The general fund reserve policy is reviewed annually and updated most recently in 2009. The policy states the City should maintain no less than 3 months of reserves and will allow reserves in excess of 3.5 months of recurring operating expenditures to be transferred to a capital projects fund to be used to fund future projects. The City has maintained reserves at or above this level for many years. This allows the City to respond to emergencies or downturns while not overburdening the taxpayers. Reserves over the 3.5 month level were available to fund capital projects in 2014 which included the City's participation in the funding of a joint use parking garage facility for the Harbor entertainment area with general fund reserves over that 3.5 month level. The City has, for many years, financed vehicle additions and replacements with short-term debt. A healthy reserve allowed the City to purchase all vehicles on a pay-as-you-go basis. In addition, street maintenance expenditures increased by more than \$300,000 from excess reserves.

## Budget Overview

The City Manager proposes a balanced budget to the City Council each year by August 1. Public hearings are conducted to receive comments and priorities of the community at large. The City Council must adopt the operating budget and set the City's tax rate for the next year by October 1<sup>st</sup> of each year.

## Planning Projects

Having identified the downtown area as a critical component of our long range plan, the City and business and community leaders work with the City's Texas Main Street Manager to coordinate planning efforts and develop interest in locating business downtown and to bring events to the Square. The Main Street program has afforded opportunities for businesses to qualify for façade restoration grants which are funded by the City and local financial institution, Community Bank.

The City worked with a consulting firm to prepare an extensive conceptual plan for Planned Development 32 (PD32) which encompasses 60 acres of undeveloped land inside the City's tax increment financing zone and adjacent to the Harbor development. Having recognized the need to have the conceptual plan ready when the economy improved, the area has benefited from the Trend Tower project as well as a proposed condominium project and heightened interest from DFW area development firms has resulted. The City initiated the zoning process to establish a form based code for the area. The area is ready to see the realization of the mixed-use concept with retail, restaurants, office and residential spaces. The new office tower will shortly be joined by condominiums as well as several restaurant sites.

The Rockwall Economic Development Corporation in conjunction with their Destination 2020 plan has refined the focus and role of their planning committee as well. Their marketing program now includes social media components and targeted marketing aimed at site selectors working with desired industries.

## Capital Improvement Planning

In May 2012, voters approved propositions to provide downtown accessibility projects, roadway rehabilitation and Interstate 30 ramp adjustments. The City hired design and construction management professionals to work with staff and City Council to develop the vision for the projects and cost estimates to ensure the projects as approved can move forward expeditiously and be completed within budget. Improvements began on the Downtown Square in early 2014. Walkability and accessibility are key components of the project as well as the construction of the San Jacinto plaza which will add an outdoor venue to the area. Voters did not support a new athletic complex but excess reserves allowed the completion of rehabilitation work on the existing complex which allowed the realignment of fields adding two additional fields for youth games.

## Strategic Planning

Periodically the City conducts a Citizen Satisfaction Survey to document our progress meeting the needs of our citizens. The City continues to receive good marks on our survey, and positive feedback from our citizens regarding our progress on adopted goals and strategies.

## Future Development

### Transportation

The majority of the City's main thoroughfares are state facilities. TxDOT has completed design work on the FM3549 overpass project which is expected to get underway in late calendar 2014. FM 3097 – Horizon Road – a heavily traveled roadway in the retail and medical corridor is slated for reconstruction and widening. Utility work has begun with the 24-month construction project expected to begin in 2015. The City and TxDOT have jointly funded the project. The City has funded and TxDOT will shortly begin a project to reverse two ramps on I-30 improving access to the new John King Boulevard and alleviating pressure on other intersections during the FM 3549 overpass project. In addition, the City will begin design in 2015 of a new I-30 access ramp in an area of heavy congestion on the existing Horizon Road ramp.

The City is a member of a County-wide Consortium which allows County government officials to work with officials of each of the seven cities in the county to further transportation planning efforts. The Consortium meets monthly to discuss funding alternatives for the County's transportation needs, which also involve planning and state participation. The County's bond initiatives allow funding for the advance planning and design of 5 major roadway projects. This allows the projects to be ready to commence as soon as state funding is allocated for construction. The Consortium looked at potential additions to the plan and reorganization of priorities in 2013 and will further that effort after the upcoming state transportation funding referendum vote.

### Medical Services

The presence of acute care at Presbyterian Hospital of Rockwall kicked off growth in the medical corridor. Several new medical buildings with Doctor's suites and state of the art out-patient diagnostic imaging facilities have allowed Rockwall to become a regional medical services destination with new offices continuing to open each year. Presbyterian Hospital emergency medical facility having opened in 2013 was joined by Lake Pointe Medical Center's new urgent care facility and Baylor Hospital's new surgical center and emergency room which opened in 2014.

## Retail / Entertainment

“The Harbor” development is situated on the shores of Lake Ray Hubbard at I-30. A public/private partnership provided opportunities for new retailers in the Bella Harbor development as well as public open space and a full-service Hilton Hotel and Conference Center. The Conference Center continues to attract events including numerous corporate training and retreat sessions and expects many which are scheduled for 2015.

In conjunction with private development, the City established a tax increment financing (TIF) zone on an approximately 103 acre tract which allowed the financing and development of public open space to complement the development and allow citizens access to the Lake Ray Hubbard shore line. The City partnered with Rockwall County, and the Rockwall Economic Development Corporation to establish the TIF to finance the public projects. In a second project, the City collaborated with the Trend Tower developer on construction of the seven-story, 85,000 square foot office tower overlooking the lake. Trend Tower offered Class-A office space to its corporate tenants as it opened in 2014. The City has signed a lease agreement with Trend on use of the parking garage offering much needed public parking for the Harbor events.

The City’s extremely successful Concert on the Lake Series managed by the City’s Recreation Department draws approximately 5,000 attendees each Thursday evening for a free concert. The series extended 13 weeks in 2014. Surveys conducted during the events gather data regarding the distance from which visitors traveled and approximate retail and restaurant dollars expended while here. The term “Live Music Capital of North Texas” has been coined to describe the many opportunities available year round in both public and restaurant venues.

Founder’s Day, which was moved back to Myers Park, due to the downtown construction project drew visitors to shop merchant’s wares, see artist’s exhibits, and enjoy free concerts all day. The event culminates with a concert by a nationally recognized artist, also free to all who attend. Due to great reviews on the 2014 event, the City intends to continue to sponsor Founder’s Day at the park in the years to come.

A Farmer’s Market brings visitors downtown Saturdays from May to October. The annual “Rib Rub and Run” fall 2014 added a car show component this year. The BBQ contest draws more than 50 teams to the downtown square. The Main Street Advisory Board and “Friends of Downtown Rockwall”, citizen volunteer group, are working to plan more special events to bring shoppers downtown. A late evening shopping event called “Night Owls” added late evening hours and musical entertainment once a month to bring shoppers out to enjoy all the area has to offer. 2015 is expected to bring an addition of live music each Friday and Saturday evening May through September on the newly renovated San Jacinto Plaza.

Having completed work on the rehabilitation of Tuttle Park ball fields, the City resumed coordination of the baseball and softball programs which had previously been managed by local non-profit organizations. The Rockwall Baseball and Softball Association inaugural season saw more than 1,625 players. This was a 96% increase over previous seasons.

## Utilities

The water and wastewater rates were increased in 2014 and the City intends to raise rates in 2015. The City purchases treated water as a founding member city of the North Texas Municipal Water District. Continued extreme drought and the inability to use water from Lake Texoma due to

ongoing effort to control invasive species, reduced lakes to low levels which would not have been sustainable without the extraordinary efforts of all the member city customers to conserve water. The District asked for a 10-percent reduction in usage and Rockwall customers achieved more than 30 percent in our City. A number of main rehabilitation and wastewater lift station upgrades were begun in 2014.

The City's water system is recognized with the Texas Commission on Environmental Quality's "Superior" rating.

The City actively works to acquire the right to serve recently annexed areas which are currently served by wholesale water supply corporations. It remains the City's desire to be the provider for all residents in our city limits.

Debt Administration: Two ratios traditionally used to analyze the debt structure of municipalities are presented below. Revenue debt has been excluded since system charges are used to retire the debt.

Outstanding General Obligation Debt at 9-30-14(net of Debt Service)	\$135,759,632
Estimated Population	40,008
G.O. Debt Per Capita	\$3,434
Net G.O. Debt per Assessed Value	3.75%

The City seeks a bond rating update as new debt is issued. The current ratings are shown below:

	<u>General Obligation</u>	<u>Revenue</u>	<u>Sales Tax(REDC)</u>
Standard & Poor's Rating Group	AA+	A-	A-
Moody's Investor Service Inc.	Aa2	Aa3	A1

**AWARDS AND ACKNOWLEDGEMENTS**

Awards:

The Government Finance Officers Association of the United States and Canada (GFOA) awarded a Certificate of Achievement for Excellence in Financial Reporting to the City for its comprehensive annual financial report for the fiscal year ended September 30, 2014. The Certificate of Achievement is a prestigious national award recognizing conformance with the highest standards for preparation of state and local government financial reports. In order to be awarded a Certificate of Achievement, the City must publish an easily readable and efficiently organized comprehensive annual financial report, whose contents conform to program standards. This report must satisfy both generally accepted accounting principles and applicable legal requirements.

A Certificate of Achievement is valid for a period of one year only. The City has received a Certificate of Achievement for each of the last twenty-four consecutive fiscal years. We believe our current report continues to conform to the Certificate of Achievement program requirements and we are submitting it to the GFOA to determine its eligibility for another certificate.

Acknowledgement:

The preparation of the comprehensive annual financial report on a timely basis was made possible by the dedicated service of the entire staff of the Finance Department. Each member of the department has our sincere appreciation for the contributions made in the preparation of this report.

In closing, without the leadership and support of the governing body of the City, preparation of this report would not have been possible.

Sincerely,

Richard R. Crowley  
City Manager

## INDEPENDENT AUDITOR'S REPORT

To the City Council  
City of Rockwall, Texas

We have audited the accompanying financial statements of the governmental activities, the business-type activities, the aggregate discretely presented component units, each major fund, and the aggregate remaining fund information of the City of Rockwall, Texas, as of and for the year ended September 30, 2014, and the related notes to the financial statements, which collectively comprise the City's basic financial statements as listed in the table of contents.

### **Management's Responsibility for the Financial Statements**

Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

### **Auditor's Responsibility**

Our responsibility is to express opinions on these financial statement based on our audit. We conducted our audit in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditors' judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessment, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinions.

## Opinions

In our opinion, the financial statements referred to above present fairly, in all material respects, the respective financial position of the governmental activities, the business-type activities, the aggregate discretely presented component units, each major fund, and the aggregate remaining fund information of the City of Rockwall, Texas, as of September 30, 2014, and the respective changes in financial position and, where applicable, cash flows thereof for the year then ended in accordance with accounting principles generally accepted in the United States of America.

## Other Matters

### *Required Supplementary Information*

Accounting principles generally accepted in the United States of America require that the management's discussion and analysis and budgetary comparison information on pages 19-30 and 74 be presented to supplement the basic financial statements. Such information, although not a part of the basic financial statements, is required by the Governmental Accounting Standards Board, who considers it to be an essential part of financial reporting for placing the basic financial statements in an appropriate operational, economic, or historical context. We have applied certain limited procedures to the required supplementary information in accordance with auditing standards generally accepted in the United States of America, which consisted of inquiries of management about the methods of preparing the information and comparing the information for consistency with management's responses to our inquiries, the basic financial statements, and other knowledge we obtained during our audit of the basic financial statements. We do not express an opinion or provide any assurance on the information because the limited procedures do not provide us with sufficient evidence to express an opinion or provide any assurance.

### *Other Information*

Our audit was conducted for the purpose of forming opinions on the financial statements that collectively comprise the City of Rockwall, Texas' basic financial statements. The introductory section, combining and individual nonmajor fund financial statements and schedules, and statistical section are presented for purposes of additional analysis and are not a required part of the basic financial statements.

The combining and individual nonmajor fund financial statement and schedules are the responsibility of management and were derived from and relate directly to the underlying accounting and other records used to prepare the basic financial statements. Such information has been subjected to the auditing procedures applied in the audit of the basic financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the basic financial statements or to the basic financial statements themselves, and other additional procedures in accordance with auditing standards generally accepted in the United states of America. In our opinion, the combining and individual nonmajor fund financial statements are fairly stated, in all material respects, in relation to the basic financial statements as a whole.

The introductory and statistical section have not been subjected to the auditing procedures applied in the audit of the basic financial statements, and accordingly, we do not express an opinion or provide any assurance on them.

MANAGEMENT'S DISCUSSION & ANALYSIS

This page is left blank intentionally

## MANAGEMENT’S DISCUSSION AND ANALYSIS

The discussion and analysis of the City of Rockwall’s financial performance provides an overview and analysis of the City’s financial activities for the fiscal year ended September 30, 2014. Please read it in conjunction with the City’s financial statements, which follow this section.

### FINANCIAL HIGHLIGHTS

- The City’s total net position was \$176,298,343 at September 30, 2014.
- During the year, the City’s governmental activities expenses were \$2,080,564 less than the \$37,237,442 generated in program revenues, taxes, other revenues and transfers.
- The assets of the City of Rockwall attributable to governmental activities exceeded its liabilities, net of deferred inflows and deferred outflows of resources at the close of the fiscal year ending September 30, 2014 by \$108,210,703 (net position).
- At the end of this fiscal year, the unassigned fund balance for the general fund was \$10,305,640 or approximately 36.04 percent of the total general fund operating expenditures and transfers out.
- The City’s total outstanding general obligation bonds and certificates of obligation (excluding enterprise and component unit debt) decreased by \$6,246,377 during fiscal year 2014 with only a refunding debt issued for savings during the year. More detailed information is given in the notes section.

### OVERVIEW OF THE FINANCIAL STATEMENTS

This annual report consists of three parts—management’s discussion and analysis (this section), the basic financial statements, and required supplementary information. The basic financial statements include two kinds of statements presenting different views of the City:

The first two statements are government-wide financial statements that provide both long-term and short-term information about the City’s overall financial status.

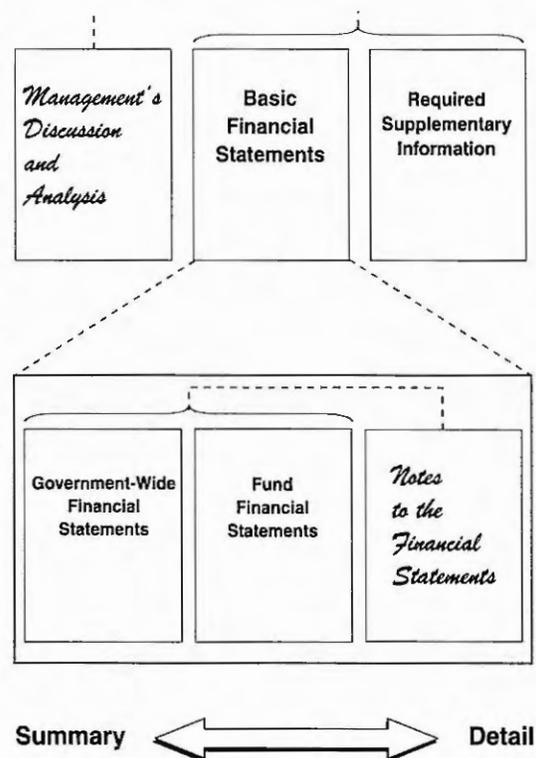

The remaining statements are fund financial statements that focus on individual parts of the government, reporting the City’s operations in more detail than the government-wide statements.

The governmental fund statements tell how general government services were financed in the short-term as well as what remains for future spending.

Proprietary fund statements offer short-term and long-term financial information about the activities the government operates like businesses.

Fiduciary fund statements provide information about the financial relationships in which the City acts solely as a trustee or agent for the benefit of others, to whom the resources in question belong.

Figure A-1, Required Components of the City’s Annual Financial Report

The financial statements also include notes that explain some of the information in the financial statements and provide more detailed data. The statements, followed by a section of required supplementary information, further explain and support the information in the financial statements. Figure A-1 shows how the required parts of this annual report are arranged and relate to one another.

**Figure A-2. Major Features of the City of Rockwall’s Government-wide and Fund Financial Statements**

<i>Type of Statements</i>	<b>Fund Statements</b>		
	<b>Government-wide</b>	<b>Governmental Funds</b>	<b>Proprietary Funds</b>
<i>Scope</i>	Entire City government (except fiduciary funds) and the City's component units	Activities of the City that are not proprietary or fiduciary, such as police, fire and parks	Activities the City operates similar to private business.
<i>Required financial statements</i>	<ul style="list-style-type: none"> <li>◆ Statement of net position</li> <li>◆ Statement of activities</li> </ul>	<ul style="list-style-type: none"> <li>◆ Balance Sheet</li> <li>◆ Statement of revenues, expenditures &amp; changes in fund balances</li> </ul>	<ul style="list-style-type: none"> <li>◆ Statement of net position</li> <li>◆ Statement of revenues, expenses &amp; changes in fund net position</li> <li>◆ Statement of cash flows</li> </ul>
<i>Accounting basis and measurement focus</i>	Accrual accounting and economic resources focus	Modified accrual accounting and current financial resources focus	Accrual accounting and economic resources focus
<i>Type of asset/liability information</i>	All assets and liabilities, both financial and capital, short-term and long-term	Only assets expected to be used up and liabilities that come due during the year or soon thereafter; no capital assets included	All assets and liabilities, both financial and capital, short-term and long-term
<i>Type of inflow/outflow information</i>	All revenues and expenses during year, regardless of when cash is received or paid	Revenues for which cash is received during or soon after the end of the year; expenditures when goods or services have been received and payment is due during the year or soon thereafter	All revenues and expenses during year, regardless of when cash is received or paid

**Government-wide Financial Statements**

The government-wide statements are designed to provide readers with a broad overview of the City of Rockwall’s finances, in a manner similar to private-sector business.

The *statement of net positions* presents information on all of the city of Rockwall’s assets and liabilities, with the difference between the two reported as *net position*. Over time, increases or decreases in net position may serve as a useful indicator of whether the financial condition of the City of Rockwall is improving or deteriorating. The statement of net position combines and consolidates governmental funds current financial resources (short-term spendable resources) with capital assets and long-term obligations. Other non-financial factors should also be taken into consideration, such as changes in the City’s property tax base and the condition of the City’s infrastructure, to assess the overall health or financial condition of the City.

The *statement of activities* presents information showing how the City’s net position changed during the most recent fiscal year. All of the current year’s revenues and expenses are taken into account regardless of when cash is received or paid. Thus, revenues and expenses are reported in this statement for some items that will only result in cash flows in future fiscal periods; for example uncollected taxes and earned but unused vacation leave. Both the statement of net position and the statement of activities are prepared utilizing the accrual basis of accounting.

In the Statement of Net Position and the Statement of Activities, the City is divided into three kinds of activities:

*Governmental activities* – Most of the City’s basic services are reported here, including administration, police, fire, planning and zoning, finance, parks and recreation, municipal court and engineering. Property taxes, sales taxes, franchise fees and charges for services provide funds for most of the activities.

*Business-type activities* – The City charges fees to customers to help it cover all or most of the cost of certain services it provides. We report the City’s water and sewer system here.

*Component Units* – The City of Rockwall (the primary government) includes two discretely presented component units. The City’s Type A Sales Tax Corporation known as the Rockwall Economic Development Corporation and the Rockwall Technology Park Association. Although legally separate, The City of Rockwall is financially accountable for these component units. The City Council appoints the component unit’s Board of Directors, sets the budget and approves any debt issuance.

The government-wide financial statements are found on pages 33-34 of this report.

## **Reporting the City’s Most Significant Funds**

### Fund Financial Statements

The fund financial statements provide more detailed information about the City’s most significant funds—not the City as a whole. *Funds* are accounting devices the City uses to keep track of specific sources of funding and spending for particular purposes. Some funds are required by State law and by bond covenants. However, the City establishes other funds to control and manage money for particular purposes or to show that it is properly using certain taxes and grants.

The City has the following types of funds:

*Governmental funds*—Most of the City’s basic services are included in governmental funds, which focus on (1) how cash and other financial assets that can readily be converted to cash flow in and out and (2) the balances left at year-end that are available for spending. Consequently, the governmental fund statements provide a detailed short-term view that helps users of the financial statements determine whether there are more or fewer financial resources that can be spent in the near future to finance the City’s programs. By comparing information presented for governmental funds with similar information presented for governmental activities in the government-wide financial statements, readers may better understand the long-term impact of the government’s near-term financing decisions. Because this information does not encompass the additional long-term focus of the government-wide statements, we provide additional information at the bottom of the governmental funds statement, or on the subsequent page, that explain the relationship (or differences) between them.

The City of Rockwall maintains 22 individual governmental funds. Information is presented separately in the governmental funds balance sheet and in the governmental funds statement of revenues, expenditures and changes in fund balances for the General fund, Debt Service fund, and G.O. Bonds Capital Projects fund, which are considered major funds. Data from the other 19 governmental funds are combined into a single, aggregated presentation. Individual fund data for each of these non-major governmental funds is provided in the form of combining statements elsewhere in this report.

*Proprietary funds*—Services for which the City charges customers a fee are generally reported in proprietary funds. Proprietary funds, like the government-wide statements, provide both long-term and short-term financial information. The City’s enterprise funds (a component of proprietary funds) are identical to the business type activities that are reported in the governmental-wide statement but provide more detail and additional information such as cash flows, for proprietary funds. The Internal Service funds (the other component of proprietary funds) are utilized to report activities that provide services for the City’s self insurance funds. The Internal Service funds are reported as governmental activities in the government-wide financial statements.

The City of Rockwall maintains an Enterprise Fund to account for water and sewer services provided to the City’s retail and wholesale customers. All activities associated with providing such services are accounted for in this fund, including administration, operations, maintenance, debt service, capital improvements, billing and collection. The City’s intent is that all costs of providing the services to the public on a continuing basis are financed through user charges in a manner similar to a private business enterprise.

The City maintains two internal service funds to account for funds accumulated to self-insure for health and workers compensation claims. Individual fund data for each of these business-type funds is provided in the form of combining statements elsewhere in this report.

*Fiduciary funds*—The City is the trustee, or *fiduciary*, for certain funds. It is also responsible for other assets that - because of a trust arrangement - can be used only for the trust beneficiaries. The City is responsible for ensuring that the assets reported in these funds are used for their intended purposes. All of the City’s fiduciary activities are reported in a separate statement of assets and liabilities of the agency fund. We exclude these activities from the City’s government-wide financial statements because the City cannot use these assets to finance its operations.

*Notes to the financial statements*-The notes provide additional information that is essential to a full understanding of the data provided in the government-wide and fund financial statements.

## **Other Information**

In addition to the basic financial statements and accompanying notes, this report presents certain *required supplementary information* concerning the City of Rockwall. This information is required by accounting principles generally accepted in the United States of America.

## CONDENSED GOVERNMENT-WIDE FINANCIAL INFORMATION

At the end of fiscal year 2014, the City's net position (assets exceeding liabilities) totaled \$176,298,343. This analysis focuses on the net position (Table 1) and changes in net position (Table 2).

The largest portion of the City's net position (77.02 percent) reflects its investment in capital assets (i.e., land, buildings, machinery, equipment, and infrastructure); less any related debt used to acquire those assets, which is still outstanding. The City uses these capital assets to provide services to citizens; consequently, these assets are not available for future spending. Although the City's investment in its capital assets is reported net of related debt, it should be noted that the resources needed to repay this debt must be provided from other sources, since the capital assets themselves cannot be used to liquidate these liabilities.

Table 1  
Net Position

	Governmental Activities		Business-Type Activities		Total Primary Government	
	2014	2013	2014	2013	2014	2013

## Governmental Activities

The City's total revenues of governmental activities were \$41,845,996. A significant portion 44.06%, of the City's revenues came from property taxes. Another 34.27% of revenue came from sales taxes. Ad valorem property tax revenues as a percent of revenues continue to increase each year due to the addition of new properties and minor increases in assessed valuation throughout the City. The City has chosen to either maintain the current rate or lower the tax rate each of the last five years. Despite the economic downturn, the City's assessed value has increased each year. Total assessed values of the properties in the City increased by 4.91%. The City adopted a property tax rate of 50.25 cents per \$100 of assessed valuation for fiscal year 2014. Growth in the assessed valuation and conservative budgets allowed the City to lower the rate for fiscal year 2015 by .70 cents per hundred dollars of assessed valuation. Sales tax revenue increased over the prior year by 2.1% and while a few retailers were added for 2014, it was most influenced by increases in same stores sales. While housing starts are not expected to return to pre-downturn levels, they are trending upward. Developers

have started infrastructure work on several new subdivisions including phases of Stone Creek, Breezy Hill, Rockwall Downes and others. These phases will begin selling lots in 2015. The permit revenues decreased overall by 9.8% due primarily to new industrial buildings for which permits were paid in 2013 which increased that year's revenues. Over the past several years, Rockwall County, of which the City of Rockwall is the County seat, was one of the fastest growing counties in America, and the fastest growing county in Texas.

### Comparative Expenses – Governmental Activities

The total cost of all programs and services were \$40,857,382. Of these costs, \$10,251,116 (25.1%) was for the Police Department. The department has increased the number of telecommunication operators as another adjacent city contracted with Rockwall for dispatch services. In addition, two sworn officers were added in the patrol division to maintain minimum staffing numbers per shift and coverage per population goals of the City. Public Works costs were \$7,653,406 (18.7%) and reflected ongoing road reconstruction projects, the downtown improvements and ongoing street maintenance focused projects Administrative departments including Administration, Human Resources, and Internal Operations which is responsible for building maintenance, the public safety radio system and IT had combined costs of \$8,515,273 (20.8%).

### Business-Type Activities

The City's business-type activities recorded an increase of \$2,195,254 in net assets. Retail water sales decreased by 1.78% despite raising rates by 10% in January. Residential consumption remained down due to the significant water conservation measures necessary as extremely hot and dry weather coupled with water supply restrictions from one of the area's supply lakes constrained sales. The City's rates were increased in 2013, 2014 and another increase is expected for 2015. The City implemented a conservation focused water rate structure in 2001 and increases the rate tiers each time new rates are adopted. The rates for sewer were also increased and total sewer charges increased by 15.2% for the fiscal year. The city employs winter averaging to calculate sewer billing so revenues are not affected by restrictions on irrigating lawns. Water and sewer charges were \$15,506,885. The ending working capital, excluding restricted assets and liabilities payable from restricted assets, for the water and sewer fund was \$1,913,101.

Water and wastewater impact fees (Capital recovery fees) revenue totaled \$838,703 for the fiscal year. Impact fees, paid by developers, are designed to reduce the system's initial costs in building assets to serve new growth. Residential development is assessed an impact fee at the building permit stage while commercial projects are assessed at the beginning of site development.

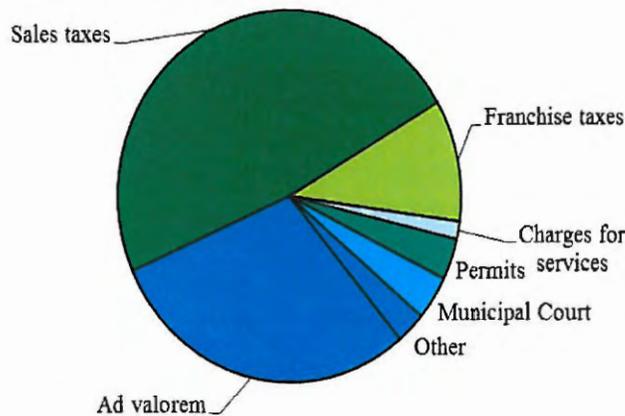

**Component Units**

The Rockwall Economic Development Corporation (REDC) reported revenues including the ½ cent sales tax, authorized under the Type A Corporation statutes, of \$4,613,509. Assets managed by the corporation include an inventory of over 305 acres of land, zoned for light industrial uses and available for sale. The REDC continues to attract companies to the City through its marketing efforts and ability to match businesses to available land.

**ANALYSIS OF INDIVIDUAL FUNDS**

The City's *General Fund* reported an ending unassigned fund balance of \$10,305,640. The largest source of general fund revenue is sales tax, it accounted for \$13,729,967 (48.2%) of total general fund revenue. Ad valorem property taxes account for \$8,413,555 (29.5%) of general fund revenues. The City's property tax rate is split between maintenance/operations and debt service. For fiscal year 2014, the debt service portion of the rate increased causing the dollars assigned to the general fund to decrease when compared to the prior year. The City maintains the unassigned fund balance at or above acceptable levels as defined within the City's financial policies. This "reserve" balance allows the City Council to elect to fund projects unforeseen during the budgeting process and provides a measure of security against changes in the economy and the timing of cash flows. The City Council elected to use reserves to fund a portion of a shared use parking garage facility adjacent to the Harbor entertainment area in addition to increasing street maintenance funding. This planned use of reserves totaled \$1,283,450. The City's revenues increased sufficiently during the year to see the general fund unassigned balance decrease by only \$970,344 or 8.6%.

**Revenues by Source – General Fund**

The City's *Debt Service Fund* reported a reduction in fund balance of \$311,397. Property tax collections for debt service requirements were \$9,487,408. This is required in order to pay debt service payments on bonds issued to construct numerous road and parks projects completed since the City's bond election in 2005 authorized more than \$65,031,000 in projects. After extensive study, the City adopted a Roadway Impact Fee

which was further studied and updated in 2014 and which provided \$318,921 in new revenue to this fund in fiscal year 2014. The City Council chooses to budget a portion of this fund balance each year toward meeting the debt service obligations. This allows the use of the debt service fund reserves to lessen the effect of new debt issues on the property tax rate each year.

The *G.O. Bonds Capital Projects Fund* reported an assigned fund balance of \$7,996,297, a decrease of \$2,991,502 from the prior year. Downtown improvements were well underway in fiscal year 2014. Design work for access ramp improvements on Interstate 30 will begin shortly.

## GENERAL FUND BUDGETARY HIGHLIGHTS

During fiscal year 2014, the City Council of the City of Rockwall amended the budget to provide funding for several unforeseen projects and to recognize salary savings over the year, as well as increases or decreases in revenues when compared to original projections. With the adjustments made to the budget, the original budgeted expenditures of \$25,872,650 increased to \$26,017,500 while revenue estimates increased from \$27,232,450 to \$28,001,300. The City of Rockwall had originally estimated the ending general fund unassigned balance to be \$9,481,134 however due to the budget adjustments mentioned above offset by the parking garage participation and street materials increase, the fund balance was re-estimated to be \$9,283,284.

General fund revenues ultimately were \$28,503,084, a positive variance of \$501,784 over the amended budget estimate, reflecting stronger than anticipated sales tax collections and cable franchise fees in the remaining months of the fiscal year. Actual general fund total expenditures were \$25,573,423 or \$444,077 less than final projections. Final expenditures in each department were less than anticipated with no negative variances reported. The City ended the year with a fund balance of \$10,305,640, or \$1,022,456 over the projected balance. The higher fund balance is attributable to management's conservative projections of both revenues and expenditures.

## CAPITAL ASSET AND DEBT ADMINISTRATION

### Capital Assets

At the end of the fiscal year 2014 the City had \$293,006,664 (Table 3) invested in a broad range of capital assets, including buildings, parks facilities, roads, police and fire equipment and water and sewer lines. The balances shown below are net of accumulated depreciation.

**Table 3**  
**Capital Assets at Year-End**

	Governmental Activities		Business-Type Activities		Total Primary Government	
	2014	2013	2014	2013	2014	2013
Land	\$ 17,238,772	\$ 14,377,674	\$ 799,533	\$ 799,533	\$ 18,038,305	\$ 15,177,207

	<u>\$ 194,305,697</u>	<u>\$ 191,362,677</u>	<u>\$ 98,700,967</u>	<u>\$ 94,760,405</u>	<u>\$293,006,664</u>	<u>\$286,123,082</u>

The City held a bond election in May 2012 at which voters approved propositions to fund several street reconstruction projects as well as infrastructure and accessibility projects in the downtown area in excess of \$27,800,000. Design was completed and construction has commenced on the phased approach to replacing sidewalks and paving in the area as well as the construction of a new events plaza. The interstate ramp projects approved by voters will be under design in 2015 and design of the remaining roadway rehabilitation projects should commence in 2015.

Notably, the construction in progress at fiscal year end for business-type funds reflects the construction of improvements to water and wastewater lines in older areas of the city as well as the rehabilitation of a major wastewater lift station, which is underway. These projects will continue in 2015.

Additional information regarding the City’s capital assets is found in note IV-D on pages 56-59.

Debt

At year-end, the City had \$144,866,192 in bonds and capitalized leases shown in Table 4.

**Table 4**  
**City of Rockwall Outstanding Debt**

	Governmental Activities		Business-Type Activities		Total Primary Government	
	2014	2013	2014	2013	2014	2013
General obligation bonds	\$ 87,404,632	\$ 88,562,670	\$ 25,638	\$ 47,330	\$ 87,430,270	\$ 88,610,000
Certificates of obligation	20,455,000	25,440,000	27,900,000	29,510,000	48,355,000	54,950,000
Revenue bonds	-	-	3,495,000	3,865,000	3,495,000	3,865,000
Capital Lease obligations	100,855	148,083	5,485,067	5,910,072	5,585,922	6,058,155
	<u>\$ 107,960,487</u>	<u>\$ 114,150,753</u>	<u>\$ 36,905,705</u>	<u>\$ 39,332,402</u>	<u>\$ 144,866,192</u>	<u>\$ 153,483,155</u>

The City is permitted by Article XI, Section 5, of the State of Texas Constitution to levy taxes up to \$2.50 per \$100 of assessed valuation for general governmental services including the payment of principal and interest on general obligation long-term debt. The current ratio of net tax-supported bonded debt to assessed value of all taxable property is 3.75% or \$3,434 per capita. This is a decrease since the City did not issue new money bonds this fiscal year.

The City’s bond ratings at September 30, 2014 were as follows:

	<u>General Obligation</u>	<u>Revenue</u>	<u>Sales Tax(REDC)</u>
Standard & Poor’s Rating Group	AA+	A-	A-
Moody’s Investor Service Inc.	Aa2	Aa3	A1

Additional information on the City of Rockwall’s long-term debt may be found in note IV-F, on pages 61-68 of this report.

## **ECONOMIC FACTORS AND NEXT YEAR'S BUDGETS AND RATES**

The City's elected and appointed officials considered many factors when setting the fiscal year 2015 budget, tax rate, and fees that will be charged for the business-type activities. The major factor affecting all decisions is the impact that mandatory water conservation has caused to revenues. The City Council chose to discontinue the management transfer from the enterprise fund to the general fund as well as approving appropriations, which will pay a portion (\$700,000) of enterprise debt from property taxes. The City conservatively budgeted a 2% increase in sales tax revenue and modest increases in franchise fees. Increases are expected in construction related activity as new subdivision phases are beginning and housing sales are improving. Interviews with local builders led the City to project continued improvement in home starts for the coming year.

The City of Rockwall's citizens enjoy above-average income levels per household. This combined with the City's proximity to major highways, and the Dallas-Ft. Worth SMSA make Rockwall an attractive city in which to locate. The City prides itself on a quality school district and "hometown" atmosphere. The Rockwall Economic Development Corporation works to attract businesses with relocation incentives as well as business retention incentives such as workforce training opportunities. The City's unemployment rate was 4.2%, well below the national levels.

The City of Rockwall considered these factors when adopting the General Fund budget for fiscal year 2015. The budgeted revenues for fiscal year 2015 total \$28,864,250 for the general fund. Ad valorem tax revenue is determined by two factors, the total assessed value established by the Rockwall Central Appraisal District and the tax rate established by the Rockwall City Council. The property tax rate was reduced to 49.55 cents per hundred dollars of assessed value.

The City adopted written financial policies in 2001, which require that revenues and expenditures be projected conservatively. The policies include debt level guidelines. These policies were reviewed by the City Council in 2009 and certain provisions related to the City's fund balance were changed. The amended policy provides that the General Fund reserves should be no less than 3 months of recurring operating appropriations. In addition, the policies provide that should an audited fund balance at the end of the fiscal year exceed 3.5 months, the City Council may elect to transfer a portion to a Capital Projects Fund. The ending general fund balance for 2014 provides approximately 5 months of reserves for the City. The City Council elected to purchase capital equipment normally financed with short-term debt obligations due in large part to the healthy fund balance. The budget as adopted for fiscal year 2014 projects a fund balance of approximately 4.53 months of recurring operating expenditures. The 2015 budget reflects continued funding for street maintenance projects and continuing to purchase vehicles on pay-as-you-go basis.

The 2015 budget expenditures include the addition of two firefighters. The City continues to transition the Fire Department from predominately volunteer, to a combination department, and the new budget will include the addition of three new Fire Driver positions. A new family violence criminal investigator position was added with grant funding for the first year.

The water and sewer rate study has been updated to reflect increased charges from the North Texas Municipal Water District for treated water and the budget anticipates a significant increase in those rates. A number of capital projects to replace older lines are ongoing into fiscal year 2015. The City's revenues will be impacted by mandatory conservation measures in effect, as the drought persists. System revenues will be affected until lake levels improve and conservation measures are lifted. Operational costs will be closely monitored and controlled to be ready to react to any further reduction in available revenues.

## **REQUESTS FOR INFORMATION**

This financial report is designed to provide our citizens, taxpayers, customers, and creditors with a general overview of the City's finances. For more information, contact the City's Assistant City Manager/Director of Finance, Mary Smith at (972) 771-7701; City of Rockwall; 385 South Goliad Street, Rockwall TX 75087. Email: [msmith@rockwall.com](mailto:msmith@rockwall.com).

The accompanying notes are an integral part of this statement.

CITY OF ROCKWALL, TEXAS  
 RECONCILIATION OF THE STATEMENT OF REVENUES, EXPENDITURES,  
 AND CHANGES IN FUND BALANCES OF GOVERNMENTAL FUNDS  
 TO THE STATEMENT OF ACTIVITIES  
 FOR THE YEAR ENDED SEPTEMBER 30, 2014

Net change in fund balances - governmental funds	\$ (7,810,968)
Amounts reported for governmental activities in the statement of activities are different because:	
The net revenue (expense) of internal service funds is reported with governmental activities in the statement of net assets	325,910
Certain assets are not available to pay for current period expenditures and are not reported as revenues in the funds. The following amounts represent the changes in these assets during the year:	
Property taxes receivable	23,079
Assessments receivable	2,728
Franchise taxes receivable	76,811
Court fines receivable	(43,816)
Governmental funds report capital outlays as expenditures. However, in the statement of activities the cost of these assets is allocated over their estimated useful lives and reported as depreciation expense. This is the amount by which depreciation (\$10,481,437) exceeded capital outlays (\$8,323,244) and retirements (\$-0-) in the current period	2,943,018
Donations of capital assets increase net assets in the statement of activities, but are not reported in the funds because they do not provide current financial resources.	
Governmental funds report debt issuance costs as expenditures. However, in the statement of activities these costs are allocated over the term of the underlying debt and reported as amortization expense. This is the amount of amortization in the current period, net of additions for debt issue cost incurred.	(115,773)
Governmental funds report proceeds of debt as other financing sources and payments to the escrow agent for refunding of debt as other financing uses. This is the net of other financing sources (\$9,200,000) less other financing uses (\$9,745,419).	(74,581)
Accrued interest payable on long-term debt does not require the use of current financial resources and is not reported in the funds. This is the amount of the change in accrued interest payable during the year.	(29,583)
Bond proceeds provide current financial resources to governmental funds, but issuing debt increases long-term liabilities in the statement of net assets. Repayment of debt principal is an expenditure in the governmental funds, but the repayment reduces long-term liabilities in the statement of net assets. This is the amount of repayments (\$6,803,038) and bond premium amortization (\$12,434) in the current period.	6,815,472
Compensated absences payable do not require the use of current financial resources and are not reported as expenditures in governmental funds. This is the amount of the change in accrued compensated absences during the year.	<u>(31,733)</u>
	<u>\$ 2,080,564</u>

The accompanying notes are an integral part of this statement.

CITY OF ROCKWALL, TEXAS  
NOTES TO FINANCIAL STATEMENTS

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

*Reporting Entity*

The City of Rockwall, Texas (the "City") was founded in 1854 and incorporated in 1874. The City operates under the Council-Manager form of government as adopted by a home rule charter approved January 21, 1985. The City provides a full range of municipal services including public safety (police and fire), highway and streets, parks and recreation, health and social services, planning and zoning, and general administrative services. In addition, the City provides water and sewer services as a proprietary function of the City.

The accounting policies of the City conform to generally accepted accounting principles issued by the Governmental Accounting Standards Board (GASB) which is the recognized financial accounting standard setting body for governmental entities. The notes to the financial statements are an integral part of the City's basic financial statements.

The City is a home rule municipality governed by an elected Mayor and six-member City Council who appoint a City Manager. The City's (primary government) financial statements include its component units. The accompanying basic financial statements comply with the provisions of GASB Statement No. 14, *The Financial Reporting Entity*, in that the financial statements include all organizations, activities, functions and component units for which the City (the "primary government") is financially accountable. Financial accountability is defined as the appointment of a voting majority of a legally separate organization's governing body and either: (1) the City's ability to impose its will on the organization, or (2) the potential that the organization will provide a financial benefit to, or impose a financial burden on, the City.

*Discretely Presented Component Units*

The Rockwall Economic Development Corporation (REDC) is governed by a seven member Board of Directors appointed, at will, by the City Council. REDC represents the City by promoting it as a location for new business; it also acquires and develops land for that purpose. REDC collects a half-cent sales tax to support its activities.

The Rockwall Technology Park Association (RTPA) provides repair and maintenance of the common area within the park being developed by REDC. RTPA's Board of Directors is composed of representatives of the landowners. At September 30, 2014, REDC owned the majority of the land and the Board was therefore composed of REDC board members. When the park becomes 75% or more owned by private landowners, it will become an entity independent of the City. Until then, it is controlled by REDC, a discrete component unit of the City. RTPA, is effectively controlled by the City through REDC and thus provides a potential financial benefit or burden to the City.

The funds of both REDC and RTPA are composed of governmental fund types. Stand alone financial statements for REDC and RTPA as of and for the fiscal year ended September 30, 2014, are not prepared.

CITY OF ROCKWALL, TEXAS

NOTES TO FINANCIAL STATEMENTS

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES – continued

*Government-wide and Fund Financial Statements*

The government-wide financial statements (i.e. the statement of net position and the statement of activities) report information on all of the non-fiduciary activities of the primary government and its component units. For the most part, the effect of inter-fund activity has been removed from these statements. *Governmental activities*, which normally are supported by taxes and intergovernmental revenues, are reported separately from *business-type activities*, which rely, to a significant extent, on fees and charges for support. Likewise, the *primary government* is reported separately from certain legally separate *component units* for which the primary government is financially accountable.

The statement of activities demonstrates the degree to which the direct expenses of a given function or segment are offset by program revenues. *Direct expenses* are those that are clearly identifiable with a specific function or segment. *Program revenues* include: (1) charges to customers or applicants who purchase, use, or directly benefit from goods, services, or privileges provided by a given function or segment, and (2) grants and contributions that are restricted to meeting the operational or capital requirements of a particular function or segment. Taxes and other items not properly included among program revenues are reported instead as *general revenues*.

Separate financial statements are provided for governmental funds, proprietary funds, and fiduciary funds, even though the latter are excluded from the government-wide financial statements. Major individual governmental funds and major individual enterprise funds are reported as separate columns in the fund financial statements.

*Measurement Focus, Basis of Accounting, and Financial Statement Presentation*

The government-wide financial statements are reported using the *economic resources measurement focus* and the *accrual basis of accounting*, as are the proprietary fund and fiduciary fund financial statements. Revenues are recorded when earned and expenses are recorded when a liability is incurred, regardless of the timing of related cash flows. Property taxes are recognized as revenues in the year for which they are levied. Grants and similar items are recognized as revenue as soon as all eligibility requirements imposed by the provider have been met.

Governmental fund financial statements are reported using the *current financial resources measurement focus* and the *modified accrual basis of accounting*. Revenues are recognized as soon as they are both measurable and available. Revenues are considered to be *available* when they are collectible within the current period or soon enough thereafter to pay liabilities of the current period. For this purpose, the City considers revenues to be available if they are collected within 60 days of the end of the current fiscal period. Expenditures generally are recorded when a liability is incurred, as under accrual accounting. However, debt service expenditures, as well as expenditures related to compensated absences and claims and judgments, are recorded only when payment is due.

Property taxes, franchise taxes, licenses, and interest associated with the current fiscal period are all considered to be susceptible to accrual and so have been recognized as revenues of the current fiscal period. Only the portion of special assessments receivable due within the current fiscal period is considered to be susceptible to accrual as revenue of the current period. All other revenue items are considered to be measurable and available only when cash is received by the City.

CITY OF ROCKWALL, TEXAS  
NOTES TO FINANCIAL STATEMENTS

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES – continued

*Measurement Focus, Basis of Accounting, and Financial Statement Presentation – continued*

The City reports the following major governmental funds:

The *General Fund* is the City's primary operating fund. It accounts for all financial resources of the general government, except those required to be accounted for in another fund.

The *Debt Service Fund* accounts for the resources accumulated and payments made for principal and interest on long-term debt of governmental funds.

The *G.O. Bonds Capital Projects Fund* accounts for the acquisition or construction of capital assets used in the operation of governmental funds.

The City reports the following major proprietary fund:

The *Water and Sewer Fund* operates the water distribution system and the wastewater treatment plants, wastewater pumping stations, and collection systems.

Additionally, the City reports the following fund types:

Internal Service Funds account for employees' health insurance and workers' compensation coverage services provided to other departments or agencies of the government on a cost-reimbursement basis.

Special Revenue Funds account for specific revenue sources that are legally restricted to expenditures for specified purposes (not including expendable trusts or major capital projects).

Capital Projects Funds account for the acquisition of capital assets or the construction of major capital projects (such as streets and sidewalks) not being financed by proprietary funds.

Fiduciary Funds account for assets held by the City in a trustee capacity or as an agent on behalf of others. The Agency Fund is custodial in nature and does not present results of operations or have a measurement focus. Agency funds are accounted for using the accrual basis of accounting. This fund is used to account for developer contributions for infrastructure projects related to various developments to be constructed at a later date.

Private-sector standards of accounting and financial reporting issued prior to December 1, 1989, generally are followed in both the government-wide and proprietary fund financial statements to the extent that those standards do not conflict with or contradict guidance of the Governmental Accounting Standards Board. Governments also have the *option* of following subsequent private-sector guidance for their business-type activities and enterprise funds, subject to this same limitation. The City has elected not to follow subsequent private-sector guidance.

CITY OF ROCKWALL, TEXAS  
NOTES TO FINANCIAL STATEMENTS

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES – continued

*Measurement Focus, Basis of Accounting, and Financial Statement Presentation – continued*

As a general rule the effect of inter-fund activity has been eliminated from the government-wide financial statements. Exceptions to this general rule are payments-in-lieu of taxes and other charges between the City's water and sewer function and various other functions of the City. Elimination of these charges would distort the direct costs and program revenues reported for the various functions concerned.

Amounts reported as *program revenues* include: (1) charges to customers or applicants for goods, services, or privileges provided, (2) operating grants and contributions, and (3) capital grants and contributions, including special assessments. Internally dedicated resources are reported as *general revenues* rather than as program revenues. Likewise, general revenues include all taxes, miscellaneous revenue, and interest income.

Proprietary funds distinguish *operating* revenues and expenses from *non-operating* items. Operating revenues and expenses generally result from providing services and producing and delivering goods in connection with a proprietary fund's principal ongoing operations. The principal operating revenues of the Water and Sewer enterprise fund are charges to customers for sales and services. The enterprise utility fund also recognizes as operating revenue the portion of tap fees intended to recover the cost of connecting new customers to the system. Operating expenses for the enterprise fund include the cost of sales and services, administrative expenses, and depreciation on capital assets. All revenues and expenses not meeting this definition are reported as non-operating revenues and expenses.

*Assets, liabilities, and net position or equity*

Deposits and investments

The City maintains various accounts for each fund at its depository. The City also has cash maintained by agents for debt payments and reserves, construction reserves and workers' compensation claims. For purposes of the statement of cash flows, the City considers all highly liquid debt instruments purchased with a maturity of three months or less to be cash equivalents.

The City's investment policy authorizes the Director of Finance to invest in the following types of investments:

- a. Obligations of the United States or its agencies and instrumentalities with finite maturity dates, with a maximum maturity of not greater than five (5) years. Laddering of investments should be considered.
- b. Direct obligations of the State of Texas or its agencies and instrumentalities, with stated finite maturity dates.
- c. Other obligations, with finite maturity dates, the principal and interest of which are unconditionally guaranteed or insured by the State of Texas or the United States or their respective agencies or instrumentalities.
- d. Obligations of states, agencies, counties, cities and other political subdivisions of any state having been rated as to investment quality by a nationally recognized investment rating firm and having received a rating of not less than "A" or its equivalent.

CITY OF ROCKWALL, TEXAS  
NOTES TO FINANCIAL STATEMENTS

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES – continued

*Assets, liabilities, and net assets or equity – continued*

Deposits and investments - continued

- e. Certificates of deposit issued by a state or national bank domiciled in the State of Texas or a savings bank domiciled in the State of Texas provided that they are:
  - (1) Guaranteed or insured by the Federal Deposit Insurance Corporation or its successor,
  - (2) Secured by obligations outlined in items "a" through "d" above. The market value of all collateral must be marked to market on a daily basis and shall not be less than 102% of the principal amount of the certificate plus accrued interest, or
  - (3) Secured in any other manner in an amount provided by law for deposits of the City.
- f. Repurchase agreements which are fully collateralized by obligations of the United States or its agencies and instrumentalities, marked to market on a daily basis with a market value of at least 102% of the principal invested, including accrued interest. The securities being purchased must be pledged to the City and held in the City's name by a third party selected and approved by the City. The repurchase agreement must have a defined termination date and be placed through a primary government securities dealer or a financial institution doing business in the State of Texas. The repurchase agreements should be secured by obligations approved in this policy.
- g. Banker's acceptances having a stated maturity of 270 days or less, to be liquidated in full at maturity, which are rated not less than "A-1" or "P-1" (or an equivalent rating) by at least one nationally recognized credit rating agency provided that it is eligible for borrowing from a Federal Reserve Bank.
- h. Commercial paper having a stated maturity of 270 days or less and rated not less than "A-1" or "P-1" (or an equivalent rating) by at least two nationally recognized rating agencies or one nationally recognized rating agency and is fully secured by an irrevocable letter of credit issued by a bank organized and existing under the laws of the United States.
- i. No-load money market mutual fund registered with and regulated by the SEC, which has a dollar-weighted average stated maturity of 90 days or less. It must have included in its investment objectives its intent to maintain a stable net asset value of \$1 for each share. The fund must provide the City with a prospectus and other information required by the SEC.
- j. No-load mutual funds, registered with and regulated by the SEC, having weighted maturity of less than two years, and which invests exclusively in investments approved by this policy.
- k. Investment pools which are approved by the City Council, provided they meet all the criteria for investment pools outlined in Chapter 2256, Texas Local Government Code, and maintain a continuous rating not lower than AAA or AAA-m (or an equivalent rating) from at least one nationally recognized rating service.

CITY OF ROCKWALL, TEXAS  
NOTES TO FINANCIAL STATEMENTS

I. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES – continued

*Assets, liabilities, and net assets or equity – continued*

Deposits and investments - continued

The City holds various mortgage-backed securities that offer higher yields but are sensitive to changes in interest rates and other market conditions. Timely payment of interest and principal are guaranteed by federal agencies. The City will not be required to sell these securities prior to maturity barring an event that would be isolated, nonrecurring, unusual, and could not reasonably be anticipated by the City. The City has no borrowed funds used for investing or reverse repurchase agreements.

Investments having a maturity of one year or more, when purchased, are stated at fair value. Short-term investments are stated at cost or amortized cost.

Receivables and payables

Activity between funds that are representative of lending/borrowing arrangements outstanding at the end of the fiscal year are referred to as either "due to/from other funds" (i.e., the current portion of interfund loans) or "advances to/from other funds" (i.e., the non-current portion of interfund loans). All other outstanding balances between funds are reported as "due to/from other funds." Any residual balances outstanding between the governmental activities and business-type activities are reported in the government-wide financial statements as "internal balances."

Advances between funds, as reported in the fund financial statements, are offset by a fund balance reserve account in applicable governmental funds to indicate that they are not available for appropriation and are not expendable available financial resources.

All trade receivables are shown net of an allowance for un-collectibles. Trade accounts receivable in excess of 60 days comprise the trade accounts receivable allowance for un-collectibles.

Property taxes are levied on October 1st by the City based on the January 1st property values as assessed by the Rockwall Central Appraisal District. Taxes are due without penalty until January 31st of the next calendar year. After January 31st the City has an enforceable lien with respect to both real and personal property. Under state law, property taxes levied on real property constitute a perpetual lien on the real property which cannot be forgiven without specific approval of the State Legislature. Taxes applicable to personal property can be deemed uncollectible by the City.

Inventories and prepaid items

All inventories are valued at cost using the first in/first out (FIFO) method. Inventories of governmental funds are recorded as expenditures when consumed rather than when purchased.

Certain payments to vendors reflect costs applicable to future accounting periods and are recorded as prepaid items in both government-wide and fund financial statements.

CITY OF ROCKWALL, TEXAS  
NOTES TO FINANCIAL STATEMENTS

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES – continued

*Assets, liabilities, and net assets or equity – continued*

Restricted assets

Certain proceeds of enterprise fund revenue bonds are classified as restricted assets on the statement of net assets because their use is limited by applicable bond covenants.

Capital assets

Capital assets, which include property, plant, equipment, and infrastructure assets (e.g., roads, bridges, sidewalks, and similar items), are reported in the applicable governmental or business-type activities columns in the government-wide financial statements. Capital assets are defined by the City as assets with an initial individual cost of more than \$5,000 (amount not rounded) and an estimated useful life in excess of two years. Such assets are recorded at historical cost or estimated historical cost if purchased or constructed. Donated capital assets are recorded at estimated fair market value at the date of donation.

The costs of normal maintenance and repairs that do not add to the value of the asset or materially extend asset lives are not capitalized.

Major outlays for capital assets and improvements are capitalized as projects are constructed. Interest incurred during the construction phase of capital assets of business-type activities is included as part of the capitalized value of the assets constructed.

Capital assets of the primary government, as well as the component units, are depreciated using the straight-line method over the following estimated useful lives:

Buildings	20 - 30 years
Building improvements	20 - 50 years
Public domain infrastructure	20 years
System infrastructure	50 years
Equipment	3 - 10 years

Compensated absences

It is the City's policy to permit employees to accumulate earned but unused vacation pay benefits up to specified limits. Sick leave is accrued at 6.67 hours per month. However, once an employee has accrued 120 days of sick leave, earned sick leave in excess of 120 days may be converted to vacation leave at a ratio of three days of sick leave to one day of vacation leave up to a maximum of 15 sick leave days per year. Upon termination, any accumulated sick leave over 120 days shall be converted to vacation leave at a ratio of three days of sick leave to one day of vacation leave to be paid to the employee in accordance with the vacation leave policy. Upon retirement from the City, all accrued sick leave shall be converted to vacation pay at a ratio of three days of sick leave to one day of vacation leave and shall be paid to the employee if he/she has 10 or more years of service to the City. Unused compensatory time for nonexempt employees is paid on termination. All vacation pay is accrued when incurred in the government-wide, proprietary, and fiduciary fund financial statements. Compensated absences are reported in governmental funds only if they have matured for example, as a result of employee's resignation and retirement.

CITY OF ROCKWALL, TEXAS

NOTES TO FINANCIAL STATEMENTS

I. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES – continued

*Assets, liabilities, and net assets or equity – continued*

Long-term obligations

In the government-wide financial statements, and proprietary fund type in the fund financial statements, long-term debt and other long-term obligations are reported as liabilities in the applicable governmental activities, business-type activities, or proprietary fund type statement of net position. Bond premiums and discounts, as well as issuance costs, are deferred and amortized over the life of the bonds using the straight-line method which approximates the effective interest method. Bonds payable are reported net of the applicable bond premium or discount. Bond issuance costs are reported as deferred charges and amortized over the term of the related debt.

In the fund financial statements, governmental fund types recognize bond premiums and discounts, as well as bond issuance costs, during the current period. The face amount of debt issued is reported as other financing sources. Premiums received on debt issuances are reported as other financing sources while discounts on debt issuances are reported as other financing uses. Issuance costs, whether or not withheld from the actual debt proceeds received, are reported as debt service expenditures.

Fund equity

Fund balance of governmental funds is reported in various categories based on the nature of any limitations requiring the use of resources for specific purposes. The government itself can establish limitations on the use of resources through either a commitment (committed fund balance) or an assignment (assigned fund balance). The committed fund balance classification includes amounts that can be used only for the specific purposes determined by a formal action of the government's highest level of decision-making authority. The governing council is the highest level of decision-making authority for the government that can, by adoption of an ordinance prior to the end of the fiscal year, commit fund balance. Once adopted, the limitation imposed by the ordinance remains in place until a similar action is taken (the adoption of another ordinance) to remove or revise the limitation.

Amounts in the assigned fund balance classification are intended to be used by the government for specific purposes but do not meet the criteria to be classified as committed. The Council may also assign fund balance as it does when appropriating fund balance to cover a gap between estimated revenue and appropriations in the subsequent year's appropriated budget. Unlike commitments, assignments generally only exist temporarily. In other words, an additional action does not normally have to be taken for the removal of an assignment. Conversely, as discussed above, an additional action is essential to either remove or revise a commitment.

Amounts that cannot be spent because they are either not in a spendable form or are legally or contractually required to be maintained intact are classified as non-spendable fund balance.

Amounts that can be spent only for specific purposes because of constraints imposed by external providers, or imposed by constitutional provisions or enabling legislation are classified as restricted fund balance.

Amounts that are available for any purpose are classified as unassigned fund balance; these amounts can be reported only in the City's General Fund.

CITY OF ROCKWALL, TEXAS  
NOTES TO FINANCIAL STATEMENTS

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES – continued

*Assets, liabilities, and net assets or equity – continued*

Fund equity - continued

Fund balance amount represent the nature of the net resources that are reported in a governmental fund. The City fund balance classifications include non-spendable resources, restricted, and non-restricted (committed, assigned and unassigned) amounts. When the City incurs an expenditure and both restricted and unrestricted amounts are available, the City considers restricted amounts to have been spent first. When the City incurs an expenditure for an unrestricted amount, committed amounts are reduced first, followed by assigned amounts and then unassigned amounts for purposes in which any of those unrestricted fund balance classifications could be used. The City has not established a formal policy to set forth a minimum level for fund balances.

2. RECONCILIATION OF GOVERNMENT-WIDE AND FUND FINANCIAL STATEMENTS

Explanation of certain differences between the governmental fund balance sheet and the government-wide statement of net position:

The governmental fund balance sheet includes a reconciliation between fund balance-total governmental funds and net position-governmental activities as reported in the government-wide statement of net position. One element of that reconciliation explains that “Deferred outflow of resources are not available to pay for current-period expenditures and are deferred in the funds.” The details of this \$115,870 difference are as follows:

Deferred outflow of resources:	
Bond issue costs – insurance	\$ 11,392
Loss on refunding	<u>104,478</u>
Total	<u>\$ 115,870</u>

3. STEWARDSHIP, COMPLIANCE, AND ACCOUNTABILITY

A. Budgetary information

The City follows the following procedures in establishing the budgetary data reflected in the financial statements:

1. Public hearings are conducted to obtain taxpayer comments.
2. Prior to October 1st, the budget is legally enacted through passage of an ordinance.
3. The City Manager is authorized to transfer budgeted amounts between departments within any fund; however, any revisions that alter the total expenditures of any fund must be approved by the City Council. Therefore the fund level is the legal level of control.
4. Formal budgetary integration is employed as a management control device during the year. The legally adopted budgets for the General Fund, certain special revenue funds and the Debt Service Fund are adopted on a basis consistent with generally accepted accounting principles.

CITY OF ROCKWALL, TEXAS

NOTES TO FINANCIAL STATEMENTS

3. STEWARDSHIP, COMPLIANCE, AND ACCOUNTABILITY – continued

A. Budgetary information – continued

5. Budgeted amounts are as originally adopted or as amended by the City Council. During 2014, individual amendments were not material in relation to the original appropriations. Any budgeted amounts appropriated at fiscal year-end and not spent automatically lapse.
6. The City did not adopt budgets for certain Special Revenue Funds. These unbudgeted Special Revenue Funds were as follows:

Emergency Siren Fund  
Art in Public Places Fund

7. Capital project funds were not budgeted. Since project-length financial plans usually extend into two or more fiscal years, annual comparisons would be confusing and misleading.

B. Excess of expenditures over appropriations

Expenditures exceeded appropriations by \$39,091 in the Recreation Development Fund due to advanced planning costs incurred on the Phelps Lake project appropriated in fiscal year 2015.

Expenditures exceeded appropriations by \$216,574 in the Debt Service Fund and \$67,588 in the Harbor Debt Service Fund due to a computation error made during the amended budget process related to the 2014 refunding bond issue.

C. Deficit fund equity

The Harbor Debt Service Fund had a deficit fund balance in the amount of \$88,096 at September 30, 2014, as a result of slower than expected growth in sales tax revenues in the Harbor zone. This will be corrected as new businesses are planned for opening in 2015.

4. DETAILED NOTES ON ALL FUNDS

A. Deposits and investments

Deposits

Custodial credit risk for deposits is the risk that in the event of a bank failure, the City's deposits may not be returned or the City will not be able to recover collateral securities in the possession of an outside party. At September 30, 2014, the City's deposits were entirely insured or collateralized with securities held by the pledging financial institution's trust department or agent in the City's name; as a result, the City's deposits were not exposed to custodial credit risk.

CITY OF ROCKWALL, TEXAS  
NOTES TO FINANCIAL STATEMENTS

4. DETAILED NOTES ON ALL FUNDS – continued

A. Deposits and investments – continued

Deposits - continued

Under a contractual agreement with North Texas Municipal Water District (NTMWD), depository accounts are maintained by NTMWD for interest and sinking, debt, and construction reserves totaling \$968,743, which are separately insured or secured by collateral pledged by NTMWD's depository. This amount is included in restricted cash on the statement of net assets.

The deposits of REDC and RTPA are covered by the City's depository contract and, therefore, at September 30, 2014, these deposits were entirely insured or collateralized with securities held by the pledging financial institution's trust department or agent in the City's name; as a result, the deposits of REDC and RTPA were not exposed to custodial credit risk.

Investments

At September 30, 2014, the City's investments were as follows:

	Carrying Value	Maturity (months)

E. Inter-fund receivables, payables, and transfers

The composition of inter-fund balances as of September 30, 2014, is as follows:

<u>Fund</u>	<u>Receivable</u>	<u>Payable</u>
General Fund	\$ 324,656	\$ -
Internal Service	-	40,829
Non-major Governmental Funds	-	269,221
Discretely Presented Component Unit	<u>-</u>	<u>14,605</u>
Totals	<u>\$ 324,656</u>	<u>\$ 324,655</u>

The outstanding balances between funds result primarily from the time delay between the dates that interfund goods and services are provided and payments between funds are made. Also, working capital loans are made to capital projects funds in advance of debt issuances. These are expected to be collected within one year.

CITY OF ROCKWALL, TEXAS  
NOTES TO FINANCIAL STATEMENTS

Capitalized lease obligations

The City has entered into a contract with a software vendor for an upgrade to the public safety software system. This contract has been treated as a capitalized lease.

The City has entered into contracts with North Texas Municipal Water District (NTMWD), a conservation and reclamation district and political subdivision of the State of Texas, for the construction and operation of certain water and plants and to provide treated water to the City. The contractual obligations have been treated as capitalized lease obligations.

4. DETAILED NOTES ON ALL FUNDS – continued

F. Long-term debt – continued

Long-term liability activity of the REDC for the year ended September 30, 2014, was as follows:

	Balance 9/30/2013	Additions	Retirements	Balance 9/30/2014	Due Within One Year
Sales tax revenue bonds	\$ 10,545,000	\$ -	\$ (650,000)	\$ 9,895,000	\$ 660,000
Certificates of obligation	17,590,000	-	(1,135,000)	16,455,000	1,170,000
Unamortized premium (discount)	<u>274,298</u>	<u>-</u>	<u>(19,443)</u>	<u>254,855</u>	<u>22,236</u>
Total bonds payable	28,409,298	-	(1,804,443)	26,604,855	1,852,236
Compensated absences	<u>24,379</u>	<u>13,984</u>	<u>(15,618)</u>	<u>22,745</u>	<u>5,686</u>
Total	<u>\$ 28,433,677</u>	<u>\$ 13,984</u>	<u>\$ (1,820,061)</u>	<u>\$ 26,627,600</u>	<u>\$ 1,857,922</u>

5. OTHER INFORMATION

A. Risk management

The City is exposed to various risks of loss related to torts; theft of, damage to, and destruction of assets; errors and omissions; injuries to employees; employee health benefits; and other claims of various natures.

The City uses a medical self-insurance fund to pay medical and dental claims of City employees and their covered dependents and minimize the total cost of annual medical insurance to the City. Medical claims in any one year exceeding \$75,000 per covered individual, or approximately \$2,395,196 in the aggregate for the group, are covered through a private insurance carrier. Additionally, life insurance policy premiums for each employee are paid through the fund. The self-insurance fund is funded by operating transfers from other funds and charges to employees for extended benefits at their option. The City does not believe there are material claims incurred but not reported as of September 30, 2014.

The City uses a Self-Insurance and Risk Management Program (as permitted by law and its home rule charter) to insure itself against the various risks of liability or loss to which it is exposed, either through an insurance provider or through a defined self-insurance program. The City issued certificates of obligation, based on an actuarial analysis, to fund a self-insured workers' compensation plan. Under this plan, workers' compensation insurance is provided in accordance with state statutes to all City employees. To protect the assets of the plan from a catastrophic claim, the City has purchased stop loss coverage in the amount of \$200,000 per occurrence with a maximum City liability of \$600,000 per year.

CITY OF ROCKWALL, TEXAS

NOTES TO FINANCIAL STATEMENTS

5. OTHER INFORMATION – continued

A. Risk management – continued

The Workers' Compensation Fund (an internal service fund) accounts for the activity of this plan. The City establishes claim liabilities based on estimates of the ultimate cost of claims reported but unsettled and of claims incurred but not reported. Any claims incurred and not reported are not believed to be significant to the City's financial statements.

Changes in the balances of claims liabilities during the past two years are as follows:

	Employee Benefits		Worker's Compensation	
	2014	2013	2014	2013
Claims payable beginning of the year	\$ 439,333	\$ 187,894	\$ 10,830	\$ 37,968
Claims incurred	3,062,330	3,693,080	40,705	92,479
Payment on claims	<u>(3,026,488)</u>	<u>(3,441,641)</u>	<u>(46,450)</u>	<u>(119,617)</u>
	<u>\$ 475,175</u>	<u>\$ 439,333</u>	<u>\$ 5,085</u>	<u>\$ 10,830</u>

Commercial insurance is purchased for the other risks of loss to which the City is exposed. There have been no significant reductions in insurance coverage and settlement amounts have not exceeded insurance coverage for the current year or the three prior years.

B. North Texas Municipal Water District

The District is a conservation and reclamation district and political subdivision of the State of Texas, created and functioning under Chapter 62, Acts of 1951, 52nd Legislature, Regular Session, as amended, originally compiled as Vernon's Article 8270-141 (the "Act"), pursuant to Article 16, Section 59 of the Texas Constitution. The District comprises all of the territory of its member cities, viz., Allen, Garland, Princeton, Plano, Mesquite, Wylie, Rockwall, Farmersville, McKinney, Richardson, Forney, Royse City, and Frisco (the "Member Cities"). The District was created for the purpose of providing a source of water supply for municipal, domestic and industrial use and for the treatment, processing, and transportation of such water to its Member Cities and to its other customers located in North Central Texas, all within the Dallas Standard Metropolitan Statistical Area.

Under the Act, including specifically Section 27 thereof, and under the Constitution and Statutes of the State of Texas, the District has broad powers to: (1) impound, control, store, preserve, treat, transmit and use storm and flood water, the water of rivers and streams, and underground water for irrigation, power and all other useful purposes and to supply water for municipal, domestic, power, industrial and commercial uses and purposes and all other beneficial uses and purposes; and (2) collect, transport, process, treat, dispose of, and control all municipal, domestic, industrial or commercial waste whether in fluid, solid or composite state, including specifically the control, abatement or reduction of all types of pollution. The City retains no ongoing financial interest, equity investments, and/or responsibilities for the District other than the contractual arrangements discussed more fully herein.

CITY OF ROCKWALL, TEXAS

NOTES TO FINANCIAL STATEMENTS

5. OTHER INFORMATION – continued

B. North Texas Municipal Water District – continued

The District has long-term contracts with the City to supply treated water and sewer treatment. The City's water contract with the District provides that the City pay a predetermined annual amount for treated water in twelve monthly installments. The amount of this annual payment is based upon an annually established rate per thousand gallons and the largest annual amount of water consumption of past years. The City owns one sewage treatment facility, Squabble Creek, and in 1978 entered into an agreement with the District for the construction of a second facility, Buffalo Creek. Under the terms of this agreement, the District issued contractually secured bonds in its name to construct and operate this sewage disposal plant for the City. In subsequent years, similar contractual agreements have been made to enable the District to expand the sewage treatment facilities and continue to provide sewage treatment services to the City. Under the terms of these contracts, the City's payments, which began when the facilities were first utilized, are equal to the operating and maintenance expenses for the next ensuing calendar year, as shown in the annual budget. The contracts further provide that the debt service payments will be equal to the principal and/or interest coming due on the bonds on the next succeeding interest payment date, plus the fees and charges of the paying agent and the registrar.

These contractual obligations have been included as capital lease obligations in amounts equal to the bonds outstanding under these agreements. Accordingly, the related assets have been capitalized and are being depreciated over the estimated life of the facilities.

The outstanding principal balance on the bond issues as of September 30, 2014, is \$5,485,067. See Note 4F for the annual requirements to amortize the bonds as of September 30, 2014.

With respect to the ground storage reservoir discussed above, the Cities of Rockwall and Heath are contractually obligated to make timely payments to the District representing 66.67% and 33.33%, respectively, of the related operating expenses and debt service payments. While the City anticipates its share of these payments to be 66.67%, the Cities of Rockwall and Heath are each contractually obligated to make any payments which the other party is required, but is unable, to make to the District.

C. Contingent liabilities and commitments

Amounts received or receivable from grantor agencies are subject to audit and adjustment by such agencies. Any disallowed claims, including amounts already collected, may constitute a liability of the applicable funds. The amounts, if any, of expenditures which may be disallowed by the grantor cannot be determined at this time although the City expects such amounts, if any, to be immaterial.

The City is a defendant in various lawsuits. Although the outcome of these lawsuits is not presently determinable, it is the opinion of the City's management that the resolution of these matters will not have a material adverse effect on the financial condition of the City.

As described in Note 4F above, the general revenues of the City are contingently liable in the amount of \$29,925,368 for general obligation bonds and certificates of obligation which are currently outstanding and recorded as obligations of the Enterprise Fund.

CITY OF ROCKWALL, TEXAS

NOTES TO FINANCIAL STATEMENTS

5. OTHER INFORMATION – continued

C. Contingent liabilities and commitments – continued

The City contracts for solid waste disposal with a third party. Under the terms of the agreement, the City bills and collects the residential billing and remits that amount to the contracting party. The contractor bills the commercial customers and remits a franchise fee to the City based on total revenues received from the contract.

The Rockwall Economic Development Corporation provides monetary incentives to companies to relocate within the City of Rockwall. At September 30, 2014, these commitments totaled \$6,490,518.

D. Employee retirement systems and pension plans

Texas Municipal Retirement System

Plan Description – The City provides pension benefits for all of its full-time employees through a nontraditional, joint contributory, hybrid defined benefit plan in the state-wide Texas Municipal Retirement System (TMRS), one of 850 administered by TMRS, an agent multiple-employer public employee retirement system. The plan provisions that have been adopted by the City are within the options available in the governing state statutes of TMRS.

TMRS issues a publically available comprehensive annual financial report that includes financial statements and required supplementary information (RSI) for TMRS; the report also provides detailed explanations of the contributions, benefits and actuarial methods and assumptions used by the system. This report may be obtained by writing to TMRS, P.O. Box 149153, Austin, Texas 78714-9153 or by calling 800-924-8677; in addition, the report is available on TMRS' website at [www.TMRS.com](http://www.TMRS.com).

The plan provisions are adopted by the governing body of the City, within the options available in the state statutes governing TMRS. Plan provisions for the City were as follows:

Benefits – Benefits depend upon the sum of the employee's contributions to the plan, with interest, and the City-financed monetary credits, with interest. At the date the plan began, the City granted monetary credits for service rendered before the plan began of a theoretical amount at least equal to two times what would have been contributed by the employee, with interest, prior to establishment of the plan. Monetary credits for service since the plan began are a percent (100%) of the employee's accumulated contributions. In addition, the City can grant, as often as annually, another type of monetary credit referred to as an updated service credit which is a theoretical amount which, when added to the employee's accumulated contributions and the monetary credits for service since the plan began, would be the total monetary credits and employee contributions accumulated with interest if the current employee contribution rate and City matching percent had always been in existence and if the employee's salary had always been the average of his/her salary in the last three years that are one year before the effective date. At retirement, the benefit is calculated as if the sum of the employee's accumulated contributions with interest and the employer-financed monetary credits with interest were used to purchase an annuity.

Members can retire at ages 60 and above with five or more years of service or with 20 years of service regardless of age. A member is vested after five years. The plan provisions are adopted by the governing body of the City, within the options available in the state statutes governing TMRS and within the actuarial constraints also in the statutes.

CITY OF ROCKWALL, TEXAS  
NOTES TO FINANCIAL STATEMENTS

5. OTHER INFORMATION – continued

D. Employee retirement systems and pension plans – continued

Contributions – The contribution rate for the employees is 7% , and the City matching ratio is currently 2 to 1, both as adopted by the governing body of the City. Under the state law governing TMRS, the actuary annually determines the City contribution rate. This rate consists of the normal cost contribution rate and the prior service cost contribution rate, both of which are calculated to be a level percent of payroll from year to year. The normal cost contribution rate finances the currently accruing monetary credits due to the City matching percent, which are the obligation of the City as of an employee's retirement date, not at the time the employee's contributions are made. The normal cost contribution rate is the actuarially determined percent of payroll necessary to satisfy the obligation of the City to each employee at the time his/her retirement becomes effective. The prior service contribution rate amortizes the unfunded (overfunded) actuarial liability (asset) over the remainder of the plan's amortization period. The Projected Unit Credit actuarial cost method is used for determining the City contribution rate. Both the employees and the City make contributions monthly. Since the City needs to know its contribution rate in advance for budgetary purposes, there is a one-year delay between the actuarial valuation that serves as the basis for the rate and the calendar year when the rate goes into effect, i.e. December 31, 2012 valuation is effective for rates beginning January 2014.

	Actuarial Assumptions
Actuarial Cost Method	Entry Age Normal
Amortization Method	Level Percent of Payroll
GASB 24 Equivalent Single Amortization Period	30.0 Years - Closed Period
Amortization Period for New Gains/Losses	30 Years
Asset Valuation Method	10 Year Smoothed Market
Investment Rate of Return	7%
Projected Salary Increases	Varies by age and service
Includes Inflation at	3.0%
Cost of Living Adjustments	2.1%

Texas Statewide Emergency Services Personnel Retirement Fund

The City acts as agent for the Texas Statewide Emergency Services Personnel Retirement Fund (the "Fund") which is a component unit of the State of Texas. The City reimbursed the Fund \$40,700 for benefits paid on a pay-as-you-go basis during the year in recognition of services provided to the City by volunteer emergency services personnel. The Fund has a Board of Directors not designated by City officials and is administered by the State Fire Fighters' Pension Commissioner. There are 30 active participants currently covered by the Fund and payments are being made to 25 retirees or their survivors. The Fund does not prepare separate financial statements for participating departments; however, financial statements for the Fund as a whole may be obtained from the administrator at Fire Fighters' Pension Commissioner, P.O. Box 12577, Austin, Texas 78711.

## NONMAJOR GOVERNMENTAL FUNDS

### *SPECIAL REVENUE FUNDS*

**Special revenue funds are used to account for specific revenues that are legally restricted to expenditures for particular purposes.**

Cemetery – established to account for the annual income from the sale of plots and cemetery maintenance costs.

Public Safety – established to account for donations, court fees, and other public safety committed revenues.

Recreational Development – established to account for the annual lease income from marinas and golf course.

Radio System – established to account for revenues and expenditures for the support of the City's radio system.

Street Improvements – established to account for the proceeds of street improvement assessments.

Hotel Occupancy Tax – established to account for the annual income from hotel occupancy taxes.

Fire Equipment – established to account for funds to be used for the purchase of fire equipment for the volunteer fire department.

Aviation – established to account for funds received from airport operations and related expenses.

Recycling – established to account for funds to be used for the City's recycling program.

Emergency Siren – established to account for revenues accumulated and expenditures to add emergency sirens within the City.

Downtown Improvement – established to account for revenues and expenditures related to the City's efforts to revitalize the downtown square.

Art in Public Places – established to account for donations received for developing art displays in public areas such as parks.

Narcotics Unit – established to account for revenues and expenditures related to a seized funds and forfeitures.

## *CAPITAL PROJECTS FUNDS*

**Capital projects funds are used to account for the acquisition and construction of major capital facilities other than those financed by proprietary funds and trust funds.**

Capital Projects – established to account for miscellaneous street and drainage projects which are financed with contributions from the General Fund and the Rockwall Economic Development Corporation.

Equipment Acquisition – established to account for capital equipment acquisition using operating transfers from benefiting funds and residual proceeds from miscellaneous debt.

205 Bypass Project – established to account for revenues and expenditures related to the construction of the new 205 Bypass roadway project.

The Harbor/TIF Capital Projects Fund – established to account for improvements in the Tax Increment Reinvestment Zone using the proceeds from the issuance of bonds.

### *INTERNAL SERVICE FUNDS*

**Internal service funds are used to account for the financing of goods or services provided by one department or agency to other departments or agencies of the government and to other government units, on a cost reimbursement basis.**

Employee Benefits Fund – established to account for the financing of a medical self-insurance fund to pay medical and dental claims of the City's employees and their covered dependents.

Workers' Compensation Fund – established to account for the costs of the workers' compensation self-insurance program for the City.

*STATISTICAL SECTION*

## STATISTICAL SECTION

Tables in the statistical section present detailed information as a context for understanding what the information in the financial statements, note disclosures, and required supplementary information says about the overall financial health of the City.

	<u>Pages</u>
Financial Trends - These schedules contain trend information to help the reader understand how the City's financial performance and well-being have changed over time.	112
Revenue Capacity - These schedules contain information to help the reader assess the City's most significant local revenue source, the property tax.	118
Debt Capacity - These schedules present information to help the reader assess the affordability of the City's current levels of outstanding debt and the City's ability to issue additional debt in the future.	126
Demographic and Economic Information - These schedules offer demographics and economic indicators to help the reader understand the environment within which the City's financial activities take place.	131
Operating Information - These schedules contain service and infrastructure data to help the reader understand how the information in the City's financial report relates to the services the City provides and the activities it performs.	134

Sources: Unless otherwise noted, the information in these schedules is derived from the comprehensive annual financial reports for the relevant year.

 COMPUTATION OF DIRECT AND OVERLAPPING DEBT  
 SEPTEMBER 30, 2013  
 (unaudited)

TABLE D-17

Jurisdiction	Net General Obligation Bonded Debt Outstanding (1)	Percentage Applicable to the City of Rockwall (2)	Amounts Applicable to the City of Rockwall
Direct:			
City of Rockwall - debt repaid with property taxes	\$ 107,960,487	100.00%	\$ 107,960,487
Indirect:			
Rockwall Independent School District	337,278,257	59.72%	201,422,575
Rockwall County	103,989,525	50.68%	52,701,891
Total Indirect	441,267,782		254,124,466
Total Direct and Overlapping Bonded Debt	\$ 549,228,269		\$ 362,084,953
Average debt per capita			\$ 9,343

Source: Assessed value data used to estimate applicable percentages provided by Rockwall Central Appraisal District. Debt Outstanding data is provided by each governmental unit.

- (1) Includes all Governmental Activities General Obligation Bonds, Contractual Obligations, Certificates of Obligation and Capital Leases
- (2) The percentage of overlapping debt applicable is estimated using taxable assessed property values. Applicable percentages were estimated by determining the portion of each governmental unit's taxable value that is within the city's boundaries and dividing it by each unit's total taxable value.

CITY OF ROCKWALL, TEXAS  
 COMPUTATION OF LEGAL DEBT MARGIN  
 LAST TEN FISCAL YEARS  
 (unaudited)

TABLE D-18

The City of Rockwall, Texas does not have a legal debt limit prescribed by state law. However, Article XI, Section 5 of the Texas Constitution applicable to cities of more than 5,000 population limits ad valorem tax rates to \$2.50 per \$100 assessed valuation for cities operating under a Home Rule Charter. Accordingly, the City's tax margin for the previous ten years was:

	Fiscal Year

## City of Rockwall

*The New Horizon*

March 25, 2013

To the Honorable Mayor,  
Members of the City Council,  
and the Citizens of the City of Rockwall, Texas:

The Comprehensive Annual Financial Report (CAFR) of the City of Rockwall for the fiscal year ended September 30, 2013, is hereby submitted in accordance with Section 7.18 of the City Charter. The financial statements are presented in conformity with generally accepted accounting principles (GAAP) and audited in accordance with generally accepted auditing standards by a firm of licensed certified public accountants.

Management assumes full responsibility for both the completeness and reliability of all of the information presented in this report. Fairness of the presentation, including all disclosures, rests with the City. To the best of our knowledge and belief, the enclosed data is accurate in all material respects and is reported in a manner designed to present fairly the financial position and results of operations of the various funds in the City. All disclosures necessary to enable the reader to gain an understanding of the City's financial activities have been included.

To provide a reasonable basis for making these representations, management of the City of Rockwall has established a comprehensive internal control framework that is designed both to protect the government's assets from loss, theft, or misuse and to compile sufficient reliable information for the preparation of the City of Rockwall's financial statements in conformity with GAAP. The internal control structure is designed to provide reasonable, but not absolute, assurance that these objectives are met. The concept of reasonable assurance recognizes that:

- (1) the cost of a control should not exceed the benefits likely to be derived; and
- (2) the valuation of costs and benefits requires estimates and judgments by management.

Because the cost of internal controls should not outweigh their benefits, the City of Rockwall's comprehensive framework of internal controls has been designed to provide reasonable rather than absolute assurance that the financial statements will be free from material misstatement. As management, we assert that, to the best of our knowledge and belief, this financial report is complete and reliable in all material respects. The internal control structure is subject to periodic evaluation by City management.

The City of Rockwall's financial statements have been audited by Rutledge, Crain & Company, PC, a firm of licensed certified public accountants. The goal of the independent audit was to provide reasonable assurance that the financial statements of the City of Rockwall for the fiscal year ended September 30, 2013, are free of material misstatement. The independent audit involved examining, on a test basis, evidence supporting the amounts and disclosures in the

financial statements; assessing the accounting principles used and significant estimates made by management; and evaluating the overall financial statement presentation. The independent auditor concluded, based upon the audit, that there was a reasonable basis for rendering an unqualified opinion that the City of Rockwall's financial statements for the fiscal year ended September 30, 2013, are fairly presented in conformity with GAAP. The independent auditors' report is presented as the first component of the financial section of this report.

Management's discussion and analysis (MD&A) immediately follows the independent auditor's report and provides a narrative introduction, overview and analysis of the financial statements as required by GAAP. MD&A complements this letter of transmittal and should be read in conjunction with it.

## **PROFILE OF THE GOVERNMENT**

The City of Rockwall, Texas, county seat of Rockwall County, Texas was incorporated in 1874. Its name is derived from an underground rock wall discovered in 1854. The unusual rock formations are found throughout the county. The City is located on the eastern shore of Lake Ray Hubbard, 22 miles east of downtown Dallas on Interstate Highway 30. The Dallas/Fort Worth area is recognized as one of the top growth areas in the country. The Dallas/Fort Worth International Airport and Love Field in Dallas meet the air transportation needs of the region.

The City currently has a land area of approximately 29.79 square miles and an estimated population of 38,755.

The City of Rockwall adopted a home rule charter in 1985 which established a council-manager form of government. Charter amendments were adopted in 2005. Policy making and legislative authority is vested in the City Council, which consists of a Mayor and six Council Members, all elected at large. The City Manager is responsible for carrying out the policies and ordinances of the City Council, overseeing the day-to-day operations of the City and for appointing the heads of the various departments. The mayor and six council members are elected to two year staggered terms. The government is empowered to levy a property tax on both real and personal property located within its boundaries. The government also has the power by state statute to extend its corporate limits by annexation, which is done periodically when deemed appropriate by the City Council.

The City of Rockwall provides a full range of services, including police and fire protection; the construction and maintenance of streets and other infrastructure; planning and zoning, parks and recreational activities and general administrative services. Additionally, the City provides water and sewer services as an enterprise function.

Discretely presented component units are legally separate entities and are not part of the primary government's operations. The City of Rockwall is financially accountable for its component units. Accordingly, the Rockwall Economic Development Corporation (REDC) and Rockwall Technology Park Association are included in these financial statements and are explained in more detail in Note 1 of the Notes to the Financial Statements.

## **Factors Affecting Financial Condition**

The information presented in the financial statements is best understood when considered from the broader perspective of the specific environment within which the City of Rockwall operates.

### **Local Economy**

The City of Rockwall is situated in the Dallas/Fort Worth Consolidated Metropolitan Statistical Area. With its concentration of commercial and retail development, the City of Rockwall has long drawn shoppers from surrounding areas. As the national economy began to improve over the last year, Rockwall's local economy benefitted from a mix of new businesses and the renewed success of others. Rockwall saw an increase of 10.4% in our local sales tax revenues. The city has a varied tax base including a mix of residential, commercial and light industrial properties. Total property values rose by 2.1%. The most recent five-year average is 2.7% per annum. During the downturn in the economy growth in the tax base slowed but remained positive each year. The City's largest taxpayers are varied and include retail developments, industry, and medical facilities. Table D-12 in the Statistical Section provides further information on the principal taxpayers. The Rockwall Economic Development Corporation continues to market Rockwall and assist companies looking to locate their business in the City. The year's highlights included:

- Allen Foods, worked with the Rockwall Economic Development Corporation to construct a new 276,000 square foot bakery facility which opened in 2013. In addition, the REDC attracted Hatfield and Company to relocate their 25,000 square foot facility to the Technology Park. The Whitmore Manufacturing Company added 100,000 square foot to their existing Rockwall headquarters facility in 2013 as well. Nolan Power Group constructed a new 25,000 square foot facility in the Rockwall Technology Park.
- Trend Tower changed the horizon line as it grew to seven stories on the hillside above Lake Ray Hubbard. The tower will be home to several corporations and medical offices including the locally owned and fast growing personnel outsourcing firm Trend HR. The building offers the city's first class-A office spaces.
- Texas A&M Commerce announced the opening of a Rockwall campus with classes beginning in January 2013. Since then they have partnered with Collin College to offer their classes within this location in the Rockwall Technology Park. Training partnerships are being developed to educate the area's workforce to meet the demand for careers with area industrial and medical employers.
- The Presbyterian Hospital of Rockwall completed a new stand-alone emergency room facility north of downtown Rockwall to allow easier access for residents in that area. Broadmoor Medical Lodge now provides short-term rehabilitative care and Liberty Heights offers upscale senior living.
- Downtown Rockwall benefits from the attention garnered from Rockwall's being a Texas Main Street City. Local favorite L. Trevino's moved their hometown favorite tex-mex restaurant to downtown and renewed their appeal with area diners. Zanata's, Bin 303 and KE Cellars Winery provide great options for dining downtown. The City has seen a 28.91% increase in sales taxes in the downtown area in the last fiscal year.

## Long-term Planning

The City Council and staff recognize the need for long-range planning. It is the goal of the City government to provide responsible leadership, services, and infrastructure to achieve a safe environment and provide for a high quality of life.

## Financial Policies

The City Council adopted financial policies in 2001 which have guided the City, allowing us to build a strong fund balance, and reinforcing the city's philosophy to budget conservatively for both revenues and expenditures. The general fund reserve policy is reviewed annually and updated most recently in 2009. The policy states the City should maintain no less than 3 months of reserves and will allow reserves in excess of 3.5 months of recurring operating expenditures to be transferred to a capital projects fund to be used to fund future projects. The City has maintained reserves at or above this level for many years. This allows the City to respond to emergencies or downturns while not overburdening the taxpayers. Reserves over the 3.5 month level were available to fund capital projects in 2013 which included the City's participation in the funding of a joint use parking garage facility for the Harbor entertainment area with general fund reserves over the 3.5 month level.

## Budget Overview

The City Manager proposes a balanced budget to the City Council each year by August 1. Public hearings are conducted to receive comments and priorities of the community at large. The City Council must adopt the operating budget and set the City's tax rate for the next year by October 1<sup>st</sup> of each year.

## Planning Projects

Having identified the downtown area as a critical component of our long range plan, the City and business and community leaders work with the City's Texas Main Street Manager to coordinate planning efforts and develop interest in locating business downtown and to bring events to the Square. The Main Street program has afforded opportunities for businesses to qualify for façade restoration grants which are funded by the City and local financial institution Community Bank.

The City worked with a consulting firm to prepare an extensive conceptual plan for Planned Development 32 (PD32) which encompasses 60 acres of undeveloped land inside the City's tax increment financing zone and adjacent to the Harbor development. Having recognized the need to have the conceptual plan ready when the economy improved, the area has benefited from the Trend Tower project as well as a proposed condominium project and heightened interest from DFW area development firms has resulted. The City initiated the zoning process to establish a form based code for the area. The area is ready to see the expansion of the mixed-use concept with retail, restaurants, office and residential spaces.

The Rockwall Economic Development Corporation in conjunction with their Destination 2020 plan has refined the focus and role of their planning committee as well. Their marketing program now includes social media components and targeted marketing aimed at site selectors working with desired industries.

## Capital Improvement Planning

In May 2012, voters approved propositions to provide downtown accessibility projects, roadway rehabilitation and Interstate 30 ramp projects. The City hired design and construction management professionals to work with staff and City Council to develop the vision for the projects and cost estimates to ensure the projects as approved can move forward expeditiously and be completed within budget. Park improvements began in 2013 and will allow for improvements to begin in early 2014 on the Downtown Square. Walkability and accessibility are key components of the project as well as the construction of the San Jacinto plaza which will add an outdoor venue to the area.

## Strategic Planning

Bi-annually the City conducts a Citizen Satisfaction Survey to document our progress meeting the needs of our citizens. The City continues to receive good marks on our biannual survey, and positive feedback from our citizens regarding our progress on adopted goals and strategies as well as areas of interest for future projects.

## Future Development

### Transportation

The majority of the City's main thoroughfares are state facilities. TxDOT continued the project to widen FM740 in southern Rockwall with the grand opening held in December 2012. In 2013, Corporate Crossing, formerly FM549, was widened to provide improved and enhanced access to the City's light industrial area between I-30 and SH276. Design work is underway on the FM3549 overpass project which is expected to get underway in late 2014. FM 3097 – Horizon Road – a heavily traveled roadway in the retail and medical corridor is slated for reconstruction and widening in 2014 as well.

The City is a member of a County-wide Consortium which allows County government officials to work with officials of each of the seven cities in the county to further transportation planning efforts. The Consortium meets monthly to discuss funding alternatives for the County's transportation needs, which also involve planning and state participation. The County's bond initiatives allow funding for the advance planning and design of 5 major roadway projects. This allows the projects to be ready to commence as soon as state funding is allocated for construction. The Consortium looked at potential additions to the plan and reorganization of priorities in 2013 and will further that effort after the upcoming state transportation funding referendum vote.

### Medical Services

The presence of acute care at Presbyterian Hospital of Rockwall, kicked off growth in the medical corridor. Several new medical buildings with Doctor's suites and state of the art out-patient diagnostic imaging facilities have allowed Rockwall to become a regional medical services destination. The Presbyterian Hospital emergency medical facility opened in 2013. Lake Pointe Medical Center is opening an urgent care facility and Baylor is constructing a new surgical center set to open in 2014.

## Retail / Entertainment

“The Harbor” development is situated on the shores of Lake Ray Hubbard at I-30. A public/private partnership provided opportunities for new retailers in the Bella Harbor development as well as public open space and a full-service Hilton Hotel and Conference Center. The Conference Center continues to attract events including numerous corporate training and retreat sessions and expects many which are scheduled for 2014.

In conjunction with private development, the City established a tax increment financing (TIF) zone on an approximately 103 acre tract which allowed the financing and development of public open space to complement the development and allow citizens access to the Lake Ray Hubbard shore line. The City partnered with Rockwall County, and the Rockwall Economic Development Corporation to establish the TIF to finance the public projects. In a second project, the City collaborated with the Trend Tower developer on construction of the seven-story, 85,000 square foot office tower overlooking the lake. Trend Tower will offer Class-A office space to its corporate tenants as it opens in 2014. The City will partner with Trend on use of the parking garage offering much needed public parking for the Harbor events.

The City’s extremely successful Concert on the Lake Series managed by the City’s Recreation Department draws approximately 5,000 attendees each Thursday evening for a free concert. The series extended 13 weeks in 2013. Surveys conducted during the events gather data regarding the distance from which visitors traveled and approximate retail and restaurant dollars expended while here. The term “Live Music Capital of North Texas” has been coined to describe the many opportunities available year round in both public and restaurant venues.

Founder’s Day on the Downtown Square draws visitors to shop merchant’s wares, see artist’s exhibits, learn about city departments and enjoy free concerts all day. The event culminates with a concert by a nationally recognized artist, also free to all who attend.

A Farmer’s Market brings visitors downtown Saturdays from May to October. The annual “Rib Rub and Run” fall 2013 added a car show component this year. The BBQ contest draws more than 50 teams to the downtown square. The Main Street Advisory Board and “Friends of Downtown Rockwall”, citizen volunteer group, are working to plan more special events to bring shoppers downtown. A late evening shopping event is being added once a month to bring shoppers out to enjoy all the area has to offer.

The City has fast become the triathlon destination as well. In addition to several locally sponsored races, the City for the fourth time welcomed the Lifetime Fitness US Open Triathlon in fall 2013. The event saw more than 1,200 participants including a contingent of international Olympians take advantage of our lake access and terrain to complete the final event of the annual seven race series. The City will work with a west coast sports promoter on future Olympic distance triathlon US Open offerings beginning in 2014.

## Utilities

The water and sewer rates were increased in 2013 and the City is implementing a 10% rate increase for 2014. The City purchases treated water as a founding member city of the North Texas Municipal Water District. Construction was completed for the Squabble Creek sewer system which connects to the regional sewer interceptor system in early 2013. A number of main

extension projects continue to be undertaken to provide water and sewer service to annexed areas of the City.

The City's water system is recognized with the Texas Commission on Environmental Quality's "Superior" rating.

The City actively works to acquire the right to serve recently annexed areas which are currently served by wholesale water supply corporations. It remains the City's desire to be the provider for all residents in our city limits. Negotiations with an investor owned utility were completed resulting in the acquisition of their complete private water and sewer system in 2013. This has resulted in increased service levels and significantly decreased rates for a large neighborhood within the city's limits. The package sewer treatment plant associated with this area will be demolished in 2014.

Debt Administration: Two ratios traditionally used to analyze the debt structure of municipalities are presented below. Revenue debt has been excluded since system charges are used to retire the debt.

Outstanding General Obligation Debt at 9-30-13(net of Debt Service)	\$144,856,061
Estimated Population	38,755
G.O. Debt Per Capita	\$2,971
Net G.O. Debt per Assessed Value	3.54%

The City seeks a bond rating update as new debt is issued. The current ratings are shown below:

	<u>General Obligation</u>	<u>Revenue</u>	<u>Sales Tax(REDC)</u>
Standard & Poor's Rating Group	AA+	A-	A-
Moody's Investor Service Inc.	Aa2	Aa3	A1

**AWARDS AND ACKNOWLEDGEMENTS**

Awards:

The Government Finance Officers Association of the United States and Canada (GFOA) awarded a Certificate of Achievement for Excellence in Financial Reporting to the City for its comprehensive annual financial report for the fiscal year ended September 30, 2012. The Certificate of Achievement is a prestigious national award recognizing conformance with the highest standards for preparation of state and local government financial reports. In order to be awarded a Certificate of Achievement, the City must publish an easily readable and efficiently organized comprehensive annual financial report, whose contents conform to program standards. This report must satisfy both generally accepted accounting principles and applicable legal requirements.

A Certificate of Achievement is valid for a period of one year only. The City has received a Certificate of Achievement for each of the last twenty-three consecutive fiscal years. We believe our current report continues to conform to the Certificate of Achievement program requirements and we are submitting it to the GFOA to determine its eligibility for another certificate.

Acknowledgement:

The preparation of the comprehensive annual financial report on a timely basis was made possible by the dedicated service of the entire staff of the Finance Department. Each member of the department has our sincere appreciation for the contributions made in the preparation of this report.

In closing, without the leadership and support of the governing body of the City, preparation of this report would not have been possible.

Sincerely,

Richard R. Crowley  
City Manager

INDEPENDENT AUDITORS' REPORT

To the City Council  
City of Rockwall, Texas

We have audited the accompanying financial statements of the governmental activities, the business-type activities, the aggregate discretely presented component units each major fund, and the aggregate remaining fund information of the City of Rockwall, Texas as of and for the year ended September 30, 2013, and the related notes to the financial statements, which collectively comprise the City's basic financial statements as listed in the table of contents.

**Management's Responsibility for the Financial Statements**

Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

**Auditors' Responsibility**

Our responsibility is to express opinions on these financial statements based on our audit. We conducted our audit in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditors' judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinions.

**Opinions**

In our opinion, the financial statements referred to above present fairly, in all material respects, the respective financial position of the governmental activities, the business-type activities, the aggregate discretely presented component units, each major fund, and the aggregate remaining fund information of the City of Rockwall, Texas, as of September 30, 2013, and the respective changes in financial position and, where applicable, cash flows thereof for the year then ended in accordance with accounting principles generally accepted in the United States of America.

**Emphasis of Matter**

As discussed in Note V. E. to the financial statements, the City has adopted new accounting guidance, Governmental Accounting Standards Board Statement No. 63, *Financial Reporting of Deferred Outflows of Resources, Deferred Inflows of Resources, and Net Position* and Statement No. 65, *Items Previously Reported as Assets and Liabilities*. Our opinion is not modified with respect to this matter.

## Other Matters

### *Required Supplementary Information*

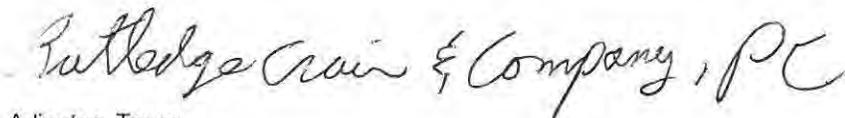

Accounting principles generally accepted in the United States of America require that the management's discussion and analysis and budgetary comparison information on pages 19–30 and 72 be presented to supplement the basic financial statements. Such information, although not a part of the basic financial statements, is required by the Governmental Accounting Standards Board, who considers it to be an essential part of financial reporting for placing the basic financial statements in an appropriate operational, economic, or historical context. We have applied certain limited procedures to the required supplementary information in accordance with auditing standards generally accepted in the United States of America, which consisted of inquiries of management about the methods of preparing the information and comparing the information for consistency with management's responses to our inquiries, the basic financial statements, and other knowledge we obtained during our audit of the basic financial statements. We do not express an opinion or provide any assurance on the information because the limited procedures do not provide us with sufficient evidence to express an opinion or provide any assurance.

### *Other Information*

Our audit was conducted for the purpose of forming opinions on the financial statements that collectively comprise the City of Rockwall, Texas' basic financial statements. The introductory section, combining and individual nonmajor fund financial statements and schedules, and statistical section are presented for purposes of additional analysis and are not a required part of the basic financial statements.

The combining and individual nonmajor fund financial statements and schedules are the responsibility of management and were derived from and relate directly to the underlying accounting and other records used to prepare the basic financial statements. Such information has been subjected to the auditing procedures applied in the audit of the basic financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the basic financial statements or to the basic financial statements themselves, and other additional procedures in accordance with auditing standards generally accepted in the United States of America. In our opinion, the combining and individual nonmajor fund financial statements are fairly stated, in all material respects, in relation to the basic financial statements as a whole.

The introductory and statistical sections have not been subjected to the auditing procedures applied in the audit of the basic financial statements and, accordingly, we do not express an opinion or provide any assurance on them.

Arlington, Texas

## Management's Discussion and Analysis

This page is left blank intentionally.

## MANAGEMENT'S DISCUSSION AND ANALYSIS

The discussion and analysis of the City of Rockwall's financial performance provides an overview and analysis of the City's financial activities for the fiscal year ended September 30, 2013. Please read it in conjunction with the City's financial statements, which follow this section.

### FINANCIAL HIGHLIGHTS

- The City's total net position was \$172,022,525 at September 30, 2013.
- During the year, the City's governmental activities expenses were \$1,461,712 less than the \$43,676,834 generated in program revenues, taxes, other revenues and transfers.
- The assets of the City of Rockwall attributable to governmental activities exceeded its liabilities at the close of the fiscal year ending September 30, 2013 by \$106,151,817 (net position).
- At the end of this fiscal year, the unassigned fund balance for the general fund was \$11,273,469 or approximately 41.18 percent of the total general fund operating expenditures and transfers out.
- The City's total outstanding general obligation bonds and certificates of obligation (excluding enterprise and component unit debt) increased by \$5,261,962 during fiscal year 2013 due to issuance of voter approved bonds. More detailed information is given in the notes section.

### OVERVIEW OF THE FINANCIAL STATEMENTS

This annual report consists of three parts—management's discussion and analysis (this section), the basic financial statements, and required supplementary information. The basic financial statements include two kinds of statements presenting different views of the City:

The first two statements are government-wide financial statements that provide both long-term and short-term information about the City's overall financial status.

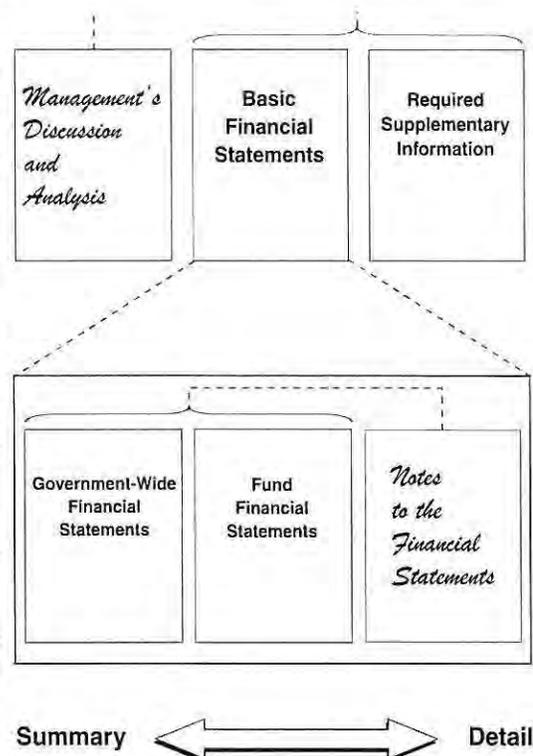

The remaining statements are fund financial statements that focus on individual parts of the government, reporting the City's operations in more detail than the government-wide statements.

The governmental fund statements tell how general government services were financed in the short-term as well as what remains for future spending.

Proprietary fund statements offer short-term and long-term financial information about the activities the government operates like businesses.

Fiduciary fund statements provide information about the financial relationships in which the City acts solely as a trustee or agent for the benefit of others, to whom the resources in question belong.

Figure A-1, Required Components of the City's Annual Financial Report

The financial statements also include notes that explain some of the information in the financial statements and provide more detailed data. The statements, followed by a section of required supplementary information, further explain and support the information in the financial statements. Figure A-1 shows how the required parts of this annual report are arranged and relate to one another.

**Figure A-2. Major Features of the City of Rockwall’s Government-wide and Fund Financial Statements**

<i>Type of Statements</i>	<b>Fund Statements</b>		
	<b>Government-wide</b>	<b>Governmental Funds</b>	<b>Proprietary Funds</b>
<i>Scope</i>	Entire City government (except fiduciary funds) and the City's component units	Activities of the City that are not proprietary or fiduciary, such as police, fire and parks	Activities the City operates similar to private business.
<i>Required financial statements</i>	<ul style="list-style-type: none"> <li>◆ Statement of net position</li> <li>◆ Statement of activities</li> </ul>	<ul style="list-style-type: none"> <li>◆ Balance Sheet</li> <li>◆ Statement of revenues, expenditures &amp; changes in fund balances</li> </ul>	<ul style="list-style-type: none"> <li>◆ Statement of net position</li> <li>◆ Statement of revenues, expenses &amp; changes in fund net position</li> <li>◆ Statement of cash flows</li> </ul>
<i>Accounting basis and measurement focus</i>	Accrual accounting and economic resources focus	Modified accrual accounting and current financial resources focus	Accrual accounting and economic resources focus
<i>Type of asset/liability information</i>	All assets and liabilities, both financial and capital, short-term and long-term	Only assets expected to be used up and liabilities that come due during the year or soon thereafter; no capital assets included	All assets and liabilities, both financial and capital, short-term and long-term
<i>Type of inflow/outflow information</i>	All revenues and expenses during year, regardless of when cash is received or paid	Revenues for which cash is received during or soon after the end of the year; expenditures when goods or services have been received and payment is due during the year or soon thereafter	All revenues and expenses during year, regardless of when cash is received or paid

### **Government-wide Financial Statements**

The government-wide statements are designed to provide readers with a broad overview of the City of Rockwall’s finances, in a manner similar to private-sector business.

The *statement of net positions* presents information on all of the city of Rockwall’s assets and liabilities, with the difference between the two reported as *net position*. Over time, increases or decreases in net position may serve as a useful indicator of whether the financial condition of the City of Rockwall is improving or deteriorating. The statement of net position combines and consolidates governmental funds current financial resources (short-term spendable resources) with capital assets and long-term obligations. Other non-financial factors should also be taken into consideration, such as changes in the City’s property tax base and the condition of the City’s infrastructure, to assess the overall health or financial condition of the City.

The *statement of activities* presents information showing how the City’s net position changed during the most recent fiscal year. All of the current year’s revenues and expenses are taken into account regardless of when cash is received or paid. Thus, revenues and expenses are reported in this statement for some items that will only result in cash flows in future fiscal periods; for example uncollected taxes and earned but unused vacation leave. Both the statement of net position and the statement of activities are prepared utilizing the accrual basis of accounting.

In the Statement of Net Position and the Statement of Activities, the City is divided into three kinds of activities:

*Governmental activities* – Most of the City’s basic services are reported here, including administration, police, fire, planning and zoning, finance, parks and recreation, municipal court and engineering. Property taxes, sales taxes, franchise fees and charges for services provide funds for most of the activities.

*Business-type activities* – The City charges fees to customers to help it cover all or most of the cost of certain services it provides. We report the City’s water and sewer system here.

*Component Units* – The City of Rockwall (the primary government) includes two discretely presented component units. The City’s Type A Sales Tax Corporation known as the Rockwall Economic Development Corporation and the Rockwall Technology Park Association. Although legally separate, The City of Rockwall is financially accountable for these component units. The City Council appoints the component unit’s Board of Directors, sets the budget and approves any debt issuance.

The government-wide financial statements are found on pages 33-35 of this report.

## **Reporting the City’s Most Significant Funds**

### Fund Financial Statements

The fund financial statements provide more detailed information about the City’s most significant funds—not the City as a whole. *Funds* are accounting devices the City uses to keep track of specific sources of funding and spending for particular purposes. Some funds are required by State law and by bond covenants. However, the City establishes other funds to control and manage money for particular purposes or to show that it is properly using certain taxes and grants.

The City has the following types of funds:

*Governmental funds*—Most of the City’s basic services are included in governmental funds, which focus on (1) how cash and other financial assets that can readily be converted to cash flow in and out and (2) the balances left at year-end that are available for spending. Consequently, the governmental fund statements provide a detailed short-term view that helps users of the financial statements determine whether there are more or fewer financial resources that can be spent in the near future to finance the City’s programs. By comparing information presented for governmental funds with similar information presented for governmental activities in the government-wide financial statements, readers may better understand the long-term impact of the government’s near-term financing decisions. Because this information does not encompass the additional long-term focus of the government-wide statements, we provide additional information at the bottom of the governmental funds statement, or on the subsequent page, that explain the relationship (or differences) between them.

The City of Rockwall maintains 22 individual governmental funds. Information is presented separately in the governmental funds balance sheet and in the governmental funds statement of revenues, expenditures and changes in fund balances for the General fund, Debt Service fund, and G.O. Bonds Capital Projects fund, which are considered major funds. Data from the other 19 governmental funds are combined into a single, aggregated presentation. Individual fund data for each of these non-major governmental funds is provided in the form of combining statements elsewhere in this report.

*Proprietary funds*—Services for which the City charges customers a fee are generally reported in proprietary funds. Proprietary funds, like the government-wide statements, provide both long-term and short-term financial information. The City's enterprise funds (a component of proprietary funds) are identical to the business type activities that are reported in the governmental-wide statement but provide more detail and additional information such as cash flows, for proprietary funds. The Internal Service funds (the other component of proprietary funds) are utilized to report activities that provide services for the City's self insurance funds. The Internal Service funds are reported as governmental activities in the government-wide financial statements.

The City of Rockwall maintains an Enterprise Fund to account for water and sewer services provided to the City's retail and wholesale customers. All activities associated with providing such services are accounted for in this fund, including administration, operations, maintenance, debt service, capital improvements, billing and collection. The City's intent is that all costs of providing the services to the general public on a continuing basis are financed through user charges in a manner similar to a private business enterprise.

The City maintains two internal service funds to account for funds accumulated to self-insure for health and workers compensation claims. Individual fund data for each of these business-type funds is provided in the form of combining statements elsewhere in this report.

*Fiduciary funds*—The City is the trustee, or *fiduciary*, for certain funds. It is also responsible for other assets that - because of a trust arrangement - can be used only for the trust beneficiaries. The City is responsible for ensuring that the assets reported in these funds are used for their intended purposes. All of the City's fiduciary activities are reported in a separate statement of assets and liabilities of the agency fund. We exclude these activities from the City's government-wide financial statements because the City cannot use these assets to finance its operations.

*Notes to the financial statements*-The notes provide additional information that is essential to a full understanding of the data provided in the government-wide and fund financial statements.

## **Other Information**

In addition to the basic financial statements and accompanying notes, this report presents certain *required supplementary information* concerning the City of Rockwall. This information is required by accounting principles generally accepted in the United States of America.

## CONDENSED GOVERNMENT-WIDE FINANCIAL INFORMATION

At the end of fiscal year 2013, the City's net position (assets exceeding liabilities) totaled \$172,022,525. This analysis focuses on the net position (Table 1) and changes in net position (Table 2).

The largest portion of the City's net position (79.08 percent) reflects its investment in capital assets (i.e., land, buildings, machinery, equipment, and infrastructure); less any related debt used to acquire those assets, which is still outstanding. The City uses these capital assets to provide services to citizens; consequently, these assets are not available for future spending. Although the City's investment in its capital assets is reported net of related debt, it should be noted that the resources needed to repay this debt must be provided from other sources, since the capital assets themselves cannot be used to liquidate these liabilities.

Table 1  
Net Position

	Governmental Activities		Business-Type Activities		Total Primary Government	
	2013	2012	2013	2012	2013	2012

### Governmental Activities

The City's total revenues of governmental activities were \$42,459,284. A significant portion 42.1%, of the City's revenues came from property taxes. Another 33.1% of revenue came from sales taxes. Ad valorem property tax revenues as a percent of revenues continue to increase each year due to the addition of new properties and minor increases in assessed valuation throughout the City. Total assessed values of the properties in the City increased by 2.1%. The City adopted a property tax rate of 50.25 cents per \$100 of assessed valuation for fiscal year 2013. Growth in the assessed valuation and conservative budgets allowed the City to lower the rate for fiscal year 2013 by .06 cents per hundred dollars of assessed valuation. Sales tax revenue increased over the prior year by 10.42% and while a minor amount of new retail was added for 2013, it was most influenced by increases in same stores sales. While housing starts are not expected to return to pre-downturn levels, they are trending

Water and sewer impact fees (Capital recovery fees) revenue totaled \$797,203 for the fiscal year. Impact fees, paid by developers, are designed to reduce the system's initial costs in building assets. Residential development is assessed an impact fee at the building permit stage while commercial projects are assessed at the beginning of site development.

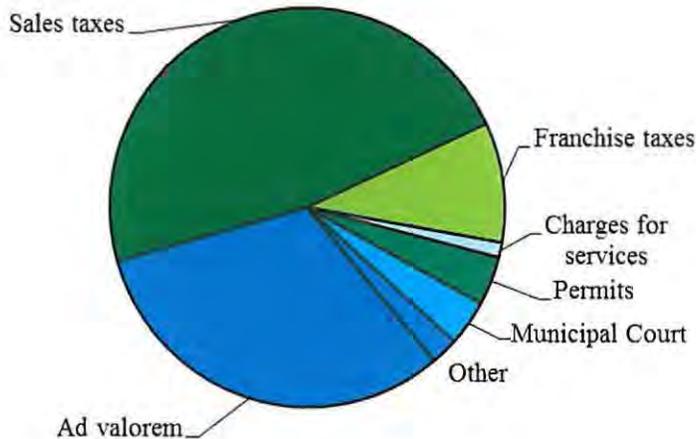

**Component Units**

The Rockwall Economic Development Corporation (REDC) reported revenues including the ½ cent sales tax, authorized under the Type A Corporation statutes, of \$4,528,427. Assets managed by the corporation include an inventory of over 325 acres of land, zoned for light industrial uses and available for sale. The REDC continues to attract companies to the City through its marketing efforts and ability to match businesses to available land.

**ANALYSIS OF INDIVIDUAL FUNDS**

The City's *General Fund* reported an ending unassigned fund balance of \$11,273,469. The largest source of general fund revenue is sales tax, it accounted for \$13,439,088 (47.5%) of total general fund revenue. Ad valorem property taxes account for \$8,988,016 (31.7%) of general fund revenues. The City maintains the unassigned fund balance at or above acceptable levels as defined within the City's financial policies. This "reserve" balance allows the City Council to elect to fund projects unforeseen during the budgeting process and provides a measure of security against changes in the economy and the timing of cash flows. The City Council elected to use reserves to fund a portion of a shared use parking garage facility adjacent to the Harbor entertainment area. This planned use of reserves totaled \$1,244,000. The City's revenues increased sufficiently during the year to see the general fund balance increase by \$1,358,022 or 13.7%.

**Revenues by Source – General Fund**

The City's *Debt Service Fund* reported a reduction in fund balance of \$449,156. Property tax collections for debt service requirements were \$8,243,186. This is required in order to pay debt service payments on bonds issued to construct numerous road and parks projects completed since the City's bond election in 2005 authorized more than \$65,031,000 in projects. After extensive study, the City adopted a Roadway Impact Fee, which provided \$444,282 in new revenue to this fund in fiscal year 2012. The City Council chooses to budget a portion of this fund balance each year toward

meeting the debt service obligations. This allows the use of the debt service fund reserves to lessen the effect of new debt issues on the property tax rate each year.

The *G.O. Bonds Capital Projects Fund* reported an assigned fund balance of \$10,987,799, an increase of \$3,042,465 from the prior year. General Obligation bonds were issued in 2013 to fund the downtown improvement project and to begin the design of access ramp improvements on IH-30.

## GENERAL FUND BUDGETARY HIGHLIGHTS

During fiscal year 2013, the City Council of the City of Rockwall amended the budget to provide funding for several unforeseen projects and to recognize salary savings over the year, as well as increases or decreases in revenues when compared to original projections. With the adjustments made to the budget, the original budgeted expenditures of \$24,927,150 decreased to \$24,797,450 while revenue estimates increased from \$26,290,750 to \$27,977,450. The City of Rockwall had originally estimated the ending general fund unassigned balance to be \$9,502,961 however due to the budget adjustments mentioned above and the planned reduction in fund balance for municipal court and police department office space remodels, the fund balance was re-estimated to be \$10,110,361.

General fund revenues were \$28,311,800, a positive variance of \$344,350 over the amended budget estimate, reflecting stronger than anticipated sales tax collections and cable franchise fees in the remaining months of the fiscal year. Actual general fund total expenditures were \$23,986,178 or \$811,272 less than final projections. Final expenditures in each department were less than anticipated with no negative variances reported. The City ended the year with a fund balance of \$11,275,983, or \$1,165,622 over the projected balance. The higher fund balance is attributable to management's conservative projections of both revenues and expenditures.

## CAPITAL ASSET AND DEBT ADMINISTRATION

### Capital Assets

At the end of the fiscal year 2013 the City had \$286,123,082 (Table 3) invested in a broad range of capital assets, including buildings, parks facilities, roads, police and fire equipment and water and sewer lines. The balances shown below are net of accumulated depreciation.

**Table 3**  
**Capital Assets at Year-End**

	Governmental Activities		Business-Type Activities		Total Primary Government	
	2013	2012	2013	2012	2013	2012
Land	\$ 14,377,674	\$ 14,102,412	\$ 799,533	\$ 799,533	\$ 15,177,207	\$ 14,901,945

	<u>\$ 191,362,677</u>	<u>\$187,014,473</u>	<u>\$ 94,760,405</u>	<u>\$ 91,249,536</u>	<u>\$286,123,082</u>	<u>\$278,264,009</u>

The City held a bond election in May 2012 at which voters approved propositions to fund several street reconstruction projects as well as infrastructure and accessibility projects in the downtown area in excess of \$27,800,000. Design was completed and the first phases of parking lot construction got underway on the downtown improvements. The interstate ramp projects approved by voters will be

under design in 2014 and design of the remaining roadway rehabilitation projects in 2015. In addition, infrastructure is being constructed within the Harbor hillside area.

Notably, the construction in progress at fiscal year end for business-type funds reflects the completion of a project to connect the Squabble Creek wastewater treatment plan to the regional wastewater interceptor project. Construction was completed and the line was put into service in 2013. Several projects to extend and improve service were being designed in 2013 with construction to begin in 2014.

Additional information regarding the City’s capital assets is found in note IV-D on pages 56-58.

Debt

At year end, the City had \$153,483,155 in bonds and capitalized leases shown in Table 4.

**Table 4**

	<u>\$ 114,150,753</u>	<u>\$ 108,934,007</u>	<u>\$ 39,332,402</u>	<u>\$ 38,086,035</u>	<u>\$ 153,483,155</u>	<u>\$ 147,020,042</u>

The City is permitted by Article XI, Section 5, of the State of Texas Constitution to levy taxes up to \$2.50 per \$100 of assessed valuation for general governmental services including the payment of principal and interest on general obligation long-term debt. The current ratio of net tax-supported bonded debt to assessed value of all taxable property is 3.54% or \$2,922 per capita. This is an increase from the prior year with the addition of new bonds for the voter-approved projects underway.

The City’s bond ratings at September 30, 2013 were as follows:

	<u>General Obligation</u>	<u>Revenue</u>	<u>Sales Tax(REDC)</u>
Standard & Poor’s Rating Group	AA+	A-	A-
Moody’s Investor Service Inc.	Aa2	Aa3	A1

Additional information on the City of Rockwall’s long-term debt may be found in note IV-F, on pages 58-65 of this report.

**ECONOMIC FACTORS AND NEXT YEAR’S BUDGETS AND RATES**

The City’s elected and appointed officials considered many factors when setting the fiscal year 2014 budget, tax rate, and fees that will be charged for the business-type activities. The major

factor affecting all decisions is the changing economy within the framework of the national economic recovery. Rockwall saw a small number of new commercial/retail business openings in 2013, which while expected to positively impact sales tax revenues in fiscal year 2014 is not expected to result in the larger sales tax growth seen in the previous two budgets. With the City's conservative budget philosophy, sales tax projections were increased by only 2%. Increases are expected in construction related activity as new subdivision phases are beginning and housing sales are improving. Interviews with local builders led the City to project continued improvement in home starts for the coming year.

The City of Rockwall's citizens enjoy above-average income levels per household. This combined with the City's proximity to major highways, and the Dallas-Ft.Worth SMSA make Rockwall an attractive city in which to locate. The City prides itself on a quality school district and "hometown" atmosphere. The Rockwall Economic Development Corporation works to attract businesses with relocation incentives as well as business retention incentives such as workforce training opportunities. The City's unemployment rate was 5.3%, well below the national levels.

The City of Rockwall considered these factors when adopting the General Fund budget for fiscal year 2014. The budgeted revenues for fiscal year 2014 total \$27,815,350 for the general fund. Ad valorem tax revenue is determined by two factors, the total assessed value established by the Rockwall Central Appraisal District and the tax rate established by the Rockwall City Council. The property tax rate remained at 50.25 cents per hundred dollars of assessed value.

The City adopted written financial policies in 2001 which require that revenues and expenditures be projected conservatively. The policies include debt level guidelines. These policies were reviewed by the City Council in 2009 and certain provisions related to the City's fund balance were changed. The amended policy provides that the General Fund reserves should be no less than 3 months of recurring operating appropriations. In addition, the policies provide that should an audited fund balance at the end of the fiscal year exceed 3.5 months, the City Council may elect to transfer a portion to a Capital Projects Fund. The ending general fund balance for 2013 provides approximately 5 months of reserves for the City. The City Council elected to purchase capital equipment normally financed with short-term debt obligations due in large part to the healthy fund balance. The budget as adopted for fiscal year 2014 projects a fund balance of approximately 4.25 months of recurring operating expenditures. The 2014 budget reflects increased funding for street maintenance projects, dock repairs at the Harbor and the purchase of new handheld citation writers from reserves.

The 2014 budget expenditures include the addition of police communication center employees, as neighboring City of Fate becomes a customer of our communication center and the addition of an athletic program coordinator position as the City establishes the new Rockwall Baseball Softball League. The City continues to transition the Fire Department from predominately volunteer to a combined department and the new budget will include the addition of two new Fire Driver positions.

The water and sewer rate study has been updated to reflect increased charges from the North Texas Municipal Water District for treated water and the budget anticipates a 10% increase in those rates. A number of capital projects to replace older lines and to provide service to new areas are being designed for construction in fiscal year 2014. The City's revenues will continue to be impacted by mandatory conservation measures in effect, as the drought persists. System revenues will continue to be affected until lake levels improve and conservation measures are lifted. Operational costs will be closely monitored and controlled to be ready to react to any further reduction in available revenues.

## **REQUESTS FOR INFORMATION**

This financial report is designed to provide our citizens, taxpayers, customers, and creditors with a general overview of the City's finances. For more information contact the City's Assistant City Manager/Director of Finance, Mary Smith at (972) 771-7701; City of Rockwall; 385 South Goliad Street, Rockwall TX 75087. The accompanying notes are an integral part of this statement.

**1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES**

**A. Reporting Entity**

The City of Rockwall, Texas, was founded in 1854 and incorporated in 1874. The City operates under the Council-Manager form of government as adopted by a home rule charter approved January 21, 1985. The City provides a full range of municipal services including public safety (police and fire), highway and streets, parks and recreation, health and social services, planning and zoning, and general administrative services. In addition, the City provides water and sewer service as a proprietary function of the City.

The accounting policies of the City of Rockwall, Texas, conform to generally accepted accounting principles issued by the Governmental Accounting Standards Board which is the recognized financial accounting standard setting body for governmental entities. The notes to the financial statements are an integral part of the City's basic financial statements.

The City of Rockwall is a home rule municipality governed by an elected mayor and six member City Council who appoint a City Manager. The City's (primary government) financial statements include its component units. The accompanying basic financial statements comply with the provisions of the GASB Statement No. 14, "The Financial Reporting Entity," in that the financial statements include all organizations, activities, functions and component units for which the City (the "primary government") is financially accountable. Financial accountability is defined as the appointment of a voting majority of a legally separate organization's governing body and either (1) the City's ability to impose its will over the organization, or (2) the potential that the organization will provide a financial benefit to or impose a financial burden on the City.

**Discretely Presented Component Units**

The Rockwall Economic Development Corporation (REDC) is governed by a seven member board of directors appointed, at will, by the City Council. REDC represents the City by promoting it as a location for new business; it also acquires and develops land for that purpose. REDC collects a half cent sales tax to support its activities.

The Rockwall Technology Park Association (RTPA) provides repair and maintenance of the common area within the park being developed by REDC. RTPA's board of directors is composed of representatives of the landowners. At September 30, 2013, REDC owned the majority of the land and the board was therefore composed of REDC board members. When the park becomes 75% or more owned by private landowners, it will become an entity independent of the City. Until then, it is controlled by REDC, a discrete component unit of the City. RTPA, is effectively controlled by the City through REDC and thus provides a potential financial benefit or burden to the City.

The funds of both REDC and RTPA are composed of governmental fund types. Stand alone financial statements for REDC and RTPA as of and for the fiscal year ended September 30, 2013 are not prepared.

**B. Government-wide and Fund Financial Statements**

The government-wide financial statements (i.e. the statement of net position and the statement of changes in net position) report information on all of the nonfiduciary activities of the primary government and its component units. For the most part, the effect of interfund activity has been removed from these statements. *Governmental activities*, which normally are supported by taxes and intergovernmental revenues, are reported separately from *business-type activities*, which rely, to a significant extent, on fees and charges for support. Likewise, the *primary government* is reported separately from certain legally separate *component units* for which the primary government is financially accountable.

The statement of activities demonstrates the degree to which the direct expenses of a given function or segment are offset by program revenues. *Direct expenses* are those that are clearly identifiable with a specific function or segment. *Program revenues* include 1) charges to customers or applicants who purchase, use, or directly benefit from goods, services, or privileges provided by a given function or segment and 2) grants and contributions that are restricted to meeting the operational or capital requirements of a particular function or segment. Taxes and other items not properly included among program revenues are reported instead as *general revenues*.

Separate financial statements are provided for governmental funds, proprietary funds, and fiduciary funds, even though the latter are excluded from the government-wide financial statements. Major individual enterprise funds are reported as separate columns in the fund financial statements.

C. Measurement Focus, Basis of Accounting, and Financial Statement Presentation

The government-wide financial statements are reported using the *economic resources measurement focus and the accrual basis of accounting*, as are the proprietary fund and fiduciary fund financial statements. Revenues are recorded when earned and expenses are recorded when a liability is incurred, regardless of the timing of related cash flows. Property taxes are recognized as revenues in the year for which they are levied. Grants and similar items are recognized as revenue as soon as all eligibility requirements imposed by the provider have been met.

Governmental fund financial statements are reported using the *current financial resources measurement focus and the modified accrual basis of accounting*. Revenues are recognized as soon as they are both measurable and available. Revenues are considered to be *available* when they are collectible within the current period or soon enough thereafter to pay liabilities of the current period. For this purpose, the City considers revenues to be available if they are collected within 60 days of the end of the current fiscal period. Expenditures generally are recorded when a liability is incurred, as under accrual accounting. However, debt service expenditures, as well as expenditures related to compensated absences and claims and judgments, are recorded only when payment is due.

Property taxes, franchise taxes, licenses, and interest associated with the current fiscal period are all considered to be susceptible to accrual and so have been recognized as revenues of the current fiscal period. Only the portion of special assessments receivable due within the current fiscal period is considered to be susceptible to accrual as revenue of the current period. All other revenue items are considered to be measurable and available only when cash is received by the City.

The City reports the following major governmental funds:

The *General Fund* is the City's primary operating fund. It accounts for all financial resources of the general government, except those required to be accounted for in another fund.

The *Debt Service Fund* accounts for the resources accumulated and payments made for principal and interest on long-term general obligation debt of governmental funds.

The *G.O. Bonds Capital Projects Fund* was established to account for street and drainage projects using proceeds from the issuance of bonds.

The City reports the following major proprietary fund:

The *Water and Sewer Fund* operates the water distribution system and the wastewater treatment plants, wastewater pumping stations, and collection systems.

Additionally, the City reports the following fund types:

Internal Service Funds account for employees' health insurance, and worker's compensation coverage services provided to other departments or agencies of the government, or to other governments on a cost-reimbursement basis.

Special Revenue Funds account for specific revenue sources that are legally restricted to expenditures for specified purposes (not including expendable trusts or major capital projects).

Capital Projects Funds account for the acquisition of capital assets or the construction of major capital projects (such as streets and sidewalks) not being financed by proprietary funds.

Fiduciary funds account for assets held by the City in a trustee capacity or as an agent on behalf of others. The Agency Fund is custodial in nature and does not present results of operations or have a measurement focus. Agency funds are accounted for using the accrual basis of accounting. This fund is used to account for developer contributions for infrastructure projects related to various developments to be constructed at a later date.

**CITY OF ROCKWALL, TEXAS**  
NOTES TO THE FINANCIAL STATEMENTS  
Year Ended September 30, 2013

Private-sector standards of accounting and financial reporting issued prior to December 1, 1989, generally are followed in both the government-wide and proprietary fund financial statements to the extent that those standards do not conflict with or contradict guidance of the Governmental Accounting Standards Board. Governments also have the *option* of following subsequent private-sector guidance for their business-type activities and enterprise funds, subject to this same limitation. The City has elected not to follow subsequent private-sector guidance.

As a general rule the effect of interfund activity has been eliminated from the government-wide financial statements. Exceptions to this general rule are payments-in-lieu of taxes and other charges between the City's water and wastewater function and various other functions of the City. Elimination of these charges would distort the direct costs and program revenues reported for the various functions concerned.

Amounts reported as *program revenues* include 1) charges to customers or applicants for goods, services, or privileges provided, 2) operating grants and contributions, and 3) capital grants and contributions, including special assessments. Internally dedicated resources are reported as *general revenues* rather than as program revenues. Likewise, general revenues include all taxes, miscellaneous revenue, and interest income.

Proprietary funds distinguish *operating* revenues and expenses from *nonoperating* items. Operating revenues and expenses generally result from providing services and producing and delivering goods in connection with a proprietary fund's principal ongoing operations. The principal operating revenues of the Water and Sewer enterprise fund are charges to customers for sales and services. The enterprise utility fund also recognizes as operating revenue the portion of tap fees intended to recover the cost of connecting new customers to the system. Operating expenses for the enterprise fund include the cost of sales and services, administrative expenses, and depreciation on capital assets. All revenues and expenses not meeting this definition are reported as nonoperating revenues and expenses.

D. Assets, liabilities, and net position or equity

1. Deposits and investments

The City maintains various accounts for each fund at its depository. The City also has cash maintained by agents for debt payments and reserves, construction reserves and worker compensation claims. For purposes of the statement of cash flows, the City considers all highly liquid debt instruments purchased with a maturity of three months or less to be cash equivalents.

The City investment policy authorizes the Director of Finance to invest in the following types of investments:

- a. Obligations of the United States or its agencies and instrumentalities with finite maturity dates, with a maximum maturity of not greater than 5 years. Laddering of investments should be considered.
- b. Direct obligations of the State of Texas or its agencies and instrumentalities, with stated finite maturity dates.
- c. Other obligations, with finite maturity dates, the principal and interest of which are unconditionally guaranteed or insured by the State of Texas or the United States or their respective agencies or instrumentalities.
- d. Obligations of states, agencies, counties, cities and other political subdivisions of any state having been rated as to investment quality by a nationally recognized investment rating firm and having received a rating of not less than "A" or its equivalent.
- e. Certificates of deposit issued by a state or national bank domiciled in the state of Texas or a savings bank domiciled in the state of Texas provided that they are:
  - (1) Guaranteed or insured by the Federal Deposit Insurance Corporation or its successor,
  - (2) Secured by obligations outlined in items 1 – 4. The market value of all collateral must be marked to market on a daily basis and shall not be less than 102% of the principal amount of the certificate plus accrued interest, or
  - (3) Secured in any other manner in an amount provided by law for deposits of the City.

**CITY OF ROCKWALL, TEXAS**  
NOTES TO THE FINANCIAL STATEMENTS  
Year Ended September 30, 2013

- f. Repurchase agreements which are fully collateralized by obligations of the United States or its agencies and instrumentalities, marked to market on a daily basis with a market value of at least of the 102% of the principal invested, including accrued interest. The securities being purchased must be pledged to the City and held in the City's name by a third party selected and approved by the City. The repurchase agreement must have a defined termination date and be placed through a primary government securities dealer or a financial institution doing business in the state of Texas. The repurchase agreements should be secured by obligations approved in this policy.
- g. Banker's acceptances having a stated maturity of 270 days or less, to be liquidated in full at maturity, which are rated not less than "A-1" or "P-1" (or an equivalent rating) by at least one nationally recognized credit rating agency provided that it is eligible for borrowing from a Federal Reserve Bank.
- h. Commercial paper having a stated maturity of 270 days or less and rated not less than "A-1" or "P-1" (or an equivalent rating) by at least two nationally recognized rating agencies or one nationally recognized rating agency and is fully secured by an irrevocable letter of credit issued by a bank organized and existing under the laws of the United States.
- i. No-load money market mutual fund registered with and regulated by the SEC, which has a dollar-weighted average stated maturity of 90 days or less. It must have included in its investment objectives its intent to maintain a stable net assets value of \$1 for each share. The fund must provide the City with a prospectus and other information required by the SEC.
- j. No-load mutual funds, registered with and regulated by the SEC, having weighted maturity of less than two years, and which invests exclusively in investments approved by this policy.
- k. Investment pools which are approved by the City Council, provided they meet all the criteria for investment pools outlined in Chapter 2256, Texas Local Government Code, and maintain a continuous rating not lower than AAA or AAA-m (or an equivalent rating) from at least one nationally recognized rating service.

The City holds various mortgage backed securities that offer higher yields but are sensitive to changes in interest rates and other market conditions. Timely payment of interest and principal are guaranteed by federal agencies. The City will not be required to sell these securities prior to maturity barring an event that would be isolated, nonrecurring, unusual, and could not reasonably be anticipated by the City. The City has no borrowed funds used for investing or reverse repurchase agreements.

Investments having a maturity of 1 year or more, when purchased, are stated at fair value. Short term investments are stated at cost or amortized cost.

2. Receivables and payables

Activity between funds that are representative of lending/borrowing arrangements outstanding at the end of the fiscal year are referred to as either "due to/from other funds" (i.e., the current portion of inter fund loans) or "advances to/from other funds" (i.e., the non-current portion of interfund loans). All other outstanding balances between funds are reported as "due to/from other funds." Any residual balances outstanding between the governmental activities and business-type activities are reported in the government-wide financial statements as "internal balances."

Advances between funds, as reported in the fund financial statements, are offset by a fund balance reserve account in applicable governmental funds to indicate that they are not available for appropriation and are not expendable available financial resources.

All trade receivables are shown net of an allowance for uncollectibles. Trade accounts receivable in excess of 60 days comprise the trade accounts receivable allowance for uncollectibles.

Property taxes are levied on October 1 by the City based on the January 1 property values as assessed by the Rockwall Central Appraisal District. Taxes are due without penalty until January 31, of the next calendar year. After January 31 the City has an enforceable lien with respect to both real and personal property. Under state law, property taxes levied on real property constitute a perpetual lien on the real property which cannot be forgiven without specific approval of the State Legislature. Taxes applicable to personal property can be deemed uncollectible by the City.

**CITY OF ROCKWALL, TEXAS**  
NOTES TO THE FINANCIAL STATEMENTS  
Year Ended September 30, 2013

3. Inventories and prepaid items

All inventories are valued at cost using the first-in/first-out (FIFO) method. Inventories of governmental funds are recorded as expenditures when consumed rather than when purchased.

Certain payments to vendors reflect costs applicable to future accounting periods and are recorded as prepaid items in both government-wide and fund financial statements.

4. Restricted assets

Certain proceeds of enterprise fund revenue bonds are classified as restricted assets on the balance sheet because their use is limited by applicable bond covenants.

5. Capital assets

Capital assets, which include property, plant, equipment, and infrastructure assets (e.g., roads, bridges, sidewalks, and similar items), are reported in the applicable governmental or business-type activities columns in the government-wide financial statements. Capital assets are defined by the City as assets with an initial, individual cost of more than \$5,000 (amount not rounded) and an estimated useful life in excess of two years. Such assets are recorded at historical cost or estimated historical cost if purchased or constructed. Donated capital assets are recorded at estimated fair market value at the date of donation.

The costs of normal maintenance and repairs that do not add to the value of the asset or materially extend assets lives are not capitalized.

Major outlays for capital assets and improvements are capitalized as projects are constructed. Interest incurred during the construction phase of capital assets of business-type activities is included as part of the capitalized value of the assets constructed.

Capital assets of the primary government, as well as the component units, is depreciated using the straight line method over the following estimated useful lives:

Buildings	20 - 30 years
Building Improvements	20 - 50 years
Public domain infrastructure	20 years
System infrastructure	50 years
Equipment	3 - 10 years

6. Compensated absences

It is the City's policy to permit employees to accumulate earned but unused vacation pay benefits up to specified limits. Sick leave is accrued at 6.67 hours per month. However, once an employee has accrued 120 days of sick leave, earned sick leave in excess of 120 days may be converted to vacation leave at a ratio of 3 days sick leave to one day of vacation leave up to a maximum of 15 sick leave days per year. Upon termination, any accumulated sick leave over 120 days shall be converted to vacation leave at a ratio of 3 days sick leave to one day vacation leave to be paid to the employee in accordance with the vacation leave policy. Upon retirement from the City, all accrued sick leave shall be converted to vacation pay at a ratio of 3 days sick leave to one day vacation leave and shall be paid to the employee if he/she has 10 or more years of service to the City. Unused compensatory time for nonexempt employees is paid on termination. All vacation pay is accrued when incurred in the government-wide, proprietary, and fiduciary fund financial statements. Compensated absences are reported in governmental funds only if they have matured for example, as a result of employee's resignation and retirement.

7. Long-term obligations

In the government-wide financial statements, and proprietary fund type in the fund financial statements, long-term debt and other long-term obligations are reported as liabilities in the applicable governmental activities, business-type activities, or proprietary fund type statement of net position. Bond premiums and discounts, as well as issuance costs, are deferred and amortized over the life of the bonds using the straight line method which approximates the effective interest method. Bonds payable are reported net of the

applicable bond premium or discount. Bond issuance costs are reported as deferred charges and amortized over the term of the related debt.

In the fund financial statements, governmental fund types recognize bond premiums and discounts, as well as bond issuance costs, during the current period. The face amount of debt issued is reported as other financing sources. Premiums received on debt issuances are reported as other financing sources while discounts on debt issuances are reported as other financing uses. Issuance costs, whether or not withheld from the actual debt proceeds received, are reported as debt service expenditures.

8. Fund equity

Fund balance of governmental funds is reported in various categories based on the nature of any limitations requiring the use of resources for specific purposes. The government itself can establish limitations on the use of resources through either a commitment (committed fund balance) or an assignment (assigned fund balance). The committed fund balance classification includes amounts that can be used only for the specific purposes determined by a formal action of the government's highest level of decision-making authority. The governing council is the highest level of decision-making authority for the government that can, by adoption of an ordinance prior to the end of the fiscal year, commit fund balance. Once adopted, the limitation imposed by the ordinance remains in place until a similar action is taken (the adoption of another ordinance) to remove or revise the limitation.

Amounts in the assigned fund balance classification are intended to be used by the government for specific purposes but do not meet the criteria to be classified as committed. The council may also assign fund balance as it does when appropriating fund balance to cover a gap between estimated revenue and appropriations in the subsequent year's appropriated budget. Unlike commitments, assignments generally only exist temporarily. In other words, an additional action does not normally have to be taken for the removal of an assignment. Conversely, as discussed above, an additional action is essential to either remove or revise a commitment.

Amounts that cannot be spent because they are either not in a spendable form or are legally or contractually required to be maintained intact are classified as nonspendable fund balance.

Amounts that can be spent only for specific purposes because of constraints imposed by external providers, or imposed by constitutional provisions or enabling legislation are classified as restricted fund balance.

Amounts that are available for any purpose are classified as unassigned fund balance; these amounts can be reported only in the City's General Fund.

Fund balance amounts represent the nature of the net resources that are reported in a governmental fund. The City fund balance classifications include non-spendable resources, restricted, and non-restricted (committed, assigned and unassigned) amounts. When the City incurs an expenditure and both restricted and unrestricted amounts are available, the City considers restricted amounts to have been spent first. When the City incurs an expenditure for an unrestricted amount, committed amounts are reduced first, followed by assigned amounts and then unassigned amounts for purposes in which any of those unrestricted fund balance classifications could be used. The City has not established a formal policy to set forth a minimum level for fund balances.

**II. RECONCILIATION OF GOVERNMENT-WIDE AND FUND FINANCIAL STATEMENTS**

Explanation of certain differences between the governmental fund balance sheet and the government-wide statement of net position:

The governmental fund balance sheet includes a reconciliation between *fund balance-total governmental funds* and *net position – governmental activities* as reported in the government-wide statement of net position. One element of that reconciliation explains that "Deferred outflow of resources are not available to pay for current-period expenditures and are deferred in the funds." The details of this \$115,870 difference are as follows:

Deferred outflow of resources:	
Bond issue costs - insurance	\$ 11,392
Loss on refunding	104,478
Total	<u>\$115,870</u>

**III. STEWARDSHIP, COMPLIANCE, AND ACCOUNTABILITY**

A. Budgetary information

The City follows the following procedures in establishing the budgetary data reflected in the financial statements:

1. Public hearings are conducted to obtain taxpayer comments
2. Prior to October 1, the budget is legally enacted through passage of an ordinance.
3. The City Manager is authorized to transfer budgeted amounts between departments within any fund; however, any revisions that alter the total expenditures of any fund must be approved by the City Council. Therefore the fund level is the legal level of control.
4. Formal budgetary integration is employed as a management control device during the year. The legally adopted budgets for the General Fund, certain Special Revenue Funds and the Debt Service Fund are adopted on a basis consistent with generally accepted accounting principles.
5. Budgeted amounts are as originally adopted or as amended by the City Council. During 2013, individual amendments were not material in relation to the original appropriations. Any budgeted amounts appropriated at fiscal year-end and not spent automatically lapse.
6. The City did not adopt budgets for certain Special Revenue Funds. These unbudgeted Special Revenue Funds were as follows:
  - Emergency Siren Fund
  - Downtown Improvement Fund
  - Art in Public Places Fund
  - Special Crimes Unit Fund
7. Capital Project funds were not budgeted. Since project length financial plans usually extend into two or more fiscal years, this makes comparisons confusing and misleading.

B. Deficit fund equity

There were no fund deficits at September 30, 2013:

**IV. DETAILED NOTES ON ALL FUNDS**

A. Deposits and investments

Deposits

Custodial credit risk for deposits is the risk that in the event of a bank failure, the City's deposits may not be returned or the City will not be able to recover collateral securities in the possession of an outside party. At September 30, 2013, the City's deposits were entirely insured or collateralized with securities held by the pledging financial institution's trust department or agent in the City's name; as a result, the City's deposits were not exposed to custodial credit risk.

Under a contractual agreement with North Texas Municipal Water District (NTMWD), depository accounts are maintained by NTMWD for interest and sinking, debt, and construction reserves totaling \$727,084 which are separately insured or secured by collateral pledged by NTMWD's depository. This amount is included in restricted cash on the statement of net position.

The deposits of REDC and RTPA are covered by the City's depository contract and, therefore, at September 30, 2013, these deposits were entirely insured or collateralized with securities held by the pledging financial institution's trust department or agent in the City's name; as a result, the deposits of REDC and RTPA were not exposed to custodial credit risk.

Other receivables	\$170,182	\$ --	\$ --	\$ --	\$ --	\$183,147

C. Deferred/Unearned Revenue

Governmental funds report *deferred revenue* in connection with receivables for revenues that are not considered to be available to liquidate liabilities of the current period. Governmental funds also defer revenue recognition in connection with resources that have been received, but not yet earned. At the end of the current fiscal year, the various components of *deferred revenue* and *unearned revenue* reported in the governmental funds were as follows:

	Unavailable	Unearned
Delinquent property taxes receivable (General Fund)	\$188,521	\$ --
Contract receivable not yet due (General Fund)	160,002	--
Fines receivable (General Fund)	161,672	--
Delinquent property taxes receivable (Debt Service Fund)	182,507	--
Delinquent property taxes receivable (Harbor Debt Service)	9,337	--
Assessments receivable not yet due (Street improvements)	83,951	--
Seizures not awarded (Special Crimes Unit)	21,679	21,678
Total deferred/unearned revenue for governmental funds	\$807,669	\$21,678

E. Interfund receivables, payables, and transfers

The composition of interfund balances as of September 30, 2013, is as follows:

Fund	Receivable	Payable
General Fund	\$284,836	\$ --
Debt Service	--	281,044
Nonmajor Governmental Funds	70,001	73,793
Totals	<u>\$354,837</u>	<u>\$354,837</u>

The outstanding balances between funds result primarily from the time delay between the dates that interfund goods and services are provided and payments between funds are made. These are expected to be collected within one year.

**CITY OF ROCKWALL, TEXAS**  
NOTES TO THE FINANCIAL STATEMENTS  
Year Ended September 30, 2013

The composition of interfund transfers for the year ended September 30, 2013, is as follows:

Fund	Transfer In	Transfer Out
Major Governmental Funds		
General Fund	\$681,100	\$3,648,700
Debt Service	--	35,800
G.O. Bonds Capital Projects	--	451,500
Nonmajor Governmental Funds	1,596,450	79,000
Water and Sewer Enterprise Fund	451,500	1,669,050
Internal Service Funds	3,155,000	--
Totals	<u>\$5,884,050</u>	<u>\$5,884,050</u>

Transfers are used to move unrestricted revenues to finance various programs or capital projects that the City must account for in other funds in accordance with budgetary authorizations.

F. Long-term debt

The City issues general obligation debt (in the form of general obligation bonds, certificates of obligation, contractual obligations, and notes payable) to provide funds for the acquisition and construction of major capital facilities. General obligation debt has been issued for both governmental and business-type activities. These issues are direct obligations and pledge the full faith and credit of the City.

General Obligation Debt Outstanding as of September 30, 2013, is as follows:

Purpose	Original Amount	Year of Issue	Final Maturity	Interest Rate	Balance 9/30/13
Governmental Activities					
General Obligation Bonds:					
Refunding	\$4,024,394	2003	2015	2.00%-4.00%	\$667,670

**Capitalized Lease Obligations**

The City has entered into a contract with a software vendor for an upgrade to the public safety software system. This contract has been treated as a capitalized lease.

The City has entered into a contract with the North Texas Municipal Water District, a conservation and reclamation district and political subdivision of the state of Texas, for construction and operation of sewer plants and to provide treated water to the City. The contractual obligations have been treated as capitalized leases.

**CITY OF ROCKWALL, TEXAS**

V. OTHER INFORMATION

A. Risk management

The City is exposed to various risks of loss related to torts, theft of, damage to, and destruction of assets; errors and omissions; injuries to employees; employee health benefits; and other claims of various natures.

The City uses a medical self-insurance fund to pay medical and dental claims of the City employees and their covered dependents and minimize the total cost of annual medical insurance to the municipality. Medical claims in any one year exceeding \$75,000 per covered individual or, approximately \$3,238,610 in the aggregate for the group, are covered through a private insurance carrier. Additionally, life insurance policy premiums for each employee are paid through the fund. The self-insurance fund is funded by operating transfers from other funds and charges to employees for extended benefits at their option. The City does not believe there are material claims incurred but not reported as of September 30, 2013.

The City uses a Self-Insurance and Risk Management Program (as permitted by law and its home rule charter) to insure itself against the various risks of liability or loss to which it is exposed, either through an insurance provider or through a defined self-insurance program. The City issued certificates of

**CITY OF ROCKWALL, TEXAS**  
 NOTES TO THE FINANCIAL STATEMENTS  
 Year Ended September 30, 2013

obligation, based on an actuarial analysis, to fund a self-insured workers compensation plan. Under this plan, worker compensation insurance is provided in accordance with State statutes to all City employees. To protect the assets of the plan from a catastrophic claim the City has purchased stop loss coverage in the amount of \$200,000 per occurrence with a cap of \$600,000 per year.

The Worker's Compensation fund (an internal service fund) accounts for the activity of this plan. The City establishes claim liabilities based on estimates of the ultimate cost of claims reported but unsettled and of claims incurred but not reported. Any claims incurred and not reported, are not believed to be significant to the City's financial statements.

	Employee Benefits		Worker's Compensation	
	2013	2012	2013	2012
Claims payable beginning of the year	\$187,894	\$181,850	\$37,968	\$33,407
Claims incurred	3,693,090	3,193,314	92,479	183,041
Payment on claims	(3,441,641)	(3,187,270)	(119,617)	(178,480)
	<u>\$439,343</u>	<u>\$187,894</u>	<u>\$10,830</u>	<u>\$37,968</u>

Commercial insurance is purchased for the other risks of losses to which the City is exposed. There have been no significant reductions in insurance coverage and settlement amounts have not exceeded insurance coverage for the current year or the three prior years.

B. North Texas Municipal Water District

The District is a conservation and reclamation district and political subdivision of the State of Texas, created and functioning under Chapter 62, Acts of 1951, 52nd Legislature, Regular Session, as amended, originally compiled as Vernon's Article 8270-141 (the "Act"), pursuant to Article 16, Section 59 of the Texas Constitution. The District comprises all of the territory of its member cities, viz., Allen, Garland, Princeton, Plano, Mesquite, Wylie, Rockwall, Farmersville, McKinney, Richardson, Forney and Royse City (the "Member Cities"). The District was created for the purpose of providing a source of water supply for municipal, domestic and industrial use and for the treatment processing and transportation of such water to its Member Cities and to its other customers located in North Central Texas, all within the Dallas Standard Metropolitan Statistical Area.

Under the Act, including specifically Section 27 thereof, and under the Constitution and Statutes of the State of Texas, the District has broad powers to (1) impound, control, store, preserve, treat, transmit and use storm and flood water, the water of rivers and streams and underground water, for irrigation, power and all other useful purposes and to supply water for municipal, domestic, power, industrial and commercial uses and purposes and all other beneficial uses and purposes; and (2) collect, transport, process, treat, dispose of, and control all municipal, domestic, industrial or commercial waste whether in fluid, solid or composite state, including specifically the control, abatement or reduction of all types of pollution. The City retains no ongoing financial interest equity investments and/or responsibilities for the District other than the contractual arrangements discussed more fully herein.

The District has long-term contracts with the City to supply treated water and sewer treatment. The City's water contract with the District provides that the City pay a predetermined annual amount for treated water in twelve monthly installments. The amount of this annual payment is based upon an annually established rate per thousand gallons and the largest annual amount of water consumption of past years. The City owns one sewage treatment facility, Squabble Creek and, in 1978 entered into an agreement with the District for the construction of a second facility, Buffalo Creek. Under the terms of this agreement, the District issued contractually secured bonds in its name to construct and operate this sewage disposal plant for the City. In subsequent years, similar contractual agreements have been made to enable NTMWD to expand the sewage treatment facilities and continue to provide sewage treatment services to the City. Under the terms of these contracts, the City's payments, which began when the facilities were first utilized, are equal to the operating and maintenance expenses for the next

ensuing calendar year, as shown in the Annual Budget. The contracts further provide that the debt service payments will be equal to the principal and/or interest coming due on the bonds on the next succeeding interest payment date, plus the fees and charges of the Paying Agent and the Registrar.

These contractual obligations have been included as capital lease obligations in amounts equal to the bonds outstanding under these agreements. Accordingly, the related sewage treatment facilities have been capitalized and are being depreciated over the estimated life of the facilities.

The outstanding principal balance on the bond issues as of September 30, 2013, is \$5,910,072. See Note IV F for the annual requirements to amortize the bonds as of September 30, 2013.

With respect to the ground storage reservoir discussed above, the Cities of Rockwall and Heath are contractually obligated to make timely payments to the District representing 66.67% and 33.33%, respectively, of the related operating expenses and debt service payments. While the City anticipates its share of these payments to be 66.67%, the Cities of Rockwall and Heath are each contractually obligated to make any payments which the other party is required, but is unable, to make to the District.

**C. Contingent Liabilities and Commitments**

Amounts received or receivable from grantor agencies are subject to audit and adjustment by such agencies. Any disallowed claims, including amounts already collected may constitute a liability of the applicable funds. The amounts, if any, of expenditures which may be disallowed by the grantor cannot be determined at this time although the City expects such amounts, if any, to be immaterial.

The City is a defendant in various lawsuits. Although the outcome of these lawsuits is not presently determinable, it is the opinion of the City's management that the resolution of these matters will not have a material adverse effect on the financial condition of the City.

As described in Note 5 above, the general revenues of the City are contingently liable for the \$29,557,330 payable in General Obligation Bonds which are currently outstanding and recorded as obligations of the Enterprise Fund.

The City contracts for garbage disposal with a third party. Under the terms of the agreement the city bills and collects the residential billing and remits that amount to the contracting party. The contractor bills the commercial customers and remits a franchise fee to the City based on total revenues received from the contract.

The Rockwall Economic Development Corporation provides monetary incentives to companies to relocate within the City of Rockwall. At September 30, 2013, these commitments totaled \$3,231,768.

**D. Employee retirement systems and pension plans**

**1. Plan Description**

The City provides pension benefits for all of its full-time employees through a nontraditional, joint contributory, hybrid defined benefit plan in the state-wide Texas Municipal Retirement System (TMRS), one of 827 currently administered by TMRS, an agent multiple-employer public employee retirement system. The plan provisions that have been adopted by the city are within the options available within the options available in the governing state statutes of TMRS.

TMRS issues a publically available comprehensive annual financial report that includes financial statements and required supplementary information (RSI) for TMRS; the report also provides detailed explanations of the contributions, benefits and actuarial methods and assumptions used by the system. This report may be obtained by writing to TMRS, P.O. Box 149153, Austin, Texas 78714-9153 or by calling 800-924-8677; in addition, the report is available on TMRS' website at [www.TMRS.com](http://www.TMRS.com).

The plan provisions are adopted by the governing body of the City, within the options available in the state statutes governing TMRS. Plan provisions for the City were as follows:

Benefits depend upon the sum of the employee's contributions to the plan, with interest, and the City-financed monetary credits, with interest. At the date the plan began, the City granted monetary credits for service rendered before the plan began of a theoretical amount equal to two times what would have been contributed by the employee, with interest, prior to establishment of the plan. Monetary credits for service since the plan began are a percent (100%) of the employee's accumulated contributions. In addition, the City can grant as often as annually another type of monetary credit referred to as an updated service credit which is a theoretical amount which, when added to the employee's accumulated contributions and the monetary credits for service since the plan began, would be the total monetary credits and employee contributions accumulated with interest if the current employee contribution rate and City matching percent had always been in existence and if the employee's salary had always been the average of his salary in the last three years that are one year before the effective date. At retirement, the benefit is calculated as if the sum of the employee's accumulated contributions with interest and the employer-financed monetary credits with interest were used to purchase an annuity.

Members can retire at ages 60 and above with 5 or more years of service or with 20 years of service regardless of age. A member is vested after 5 years. The plan provisions are adopted by the governing body of the City, within the options available in the state statutes governing TMRS and within the actuarial constraints also in the statutes.

2. Contributions

The contribution rate for the employees is 7%, and the City matching ratio is currently 2 to 1, both as adopted by the governing body of the City. Under the state law governing TMRS, the actuary annually determines the City contribution rate. This rate consists of the normal cost contribution rate and the prior service contribution rate, both of which are calculated to be a level percent of payroll from year to year. The normal cost contribution rate finances the currently accruing monetary credits due to the City matching percent, which are the obligation of the City as of an employee's retirement date, not at the time the employee's contributions are made. The normal cost contribution rate is the actuarially determined percent of payroll necessary to satisfy the obligation of the City to each employee at the time his/her retirement becomes effective. The prior service contribution rate amortizes the unfunded (over funded) actuarial liability (asset) over the remainder of the plan's 25-year amortization period. The projected unit credit actuarial cost method is used for determining the City contribution rate. Both the employees and the City make contributions monthly. Since the City needs to know its contribution rate in advance to budget for it, there is a one-year delay between the actuarial valuation that is the basis for the rate and the calendar year when the rate goes into effect, i.e. December 31, 2011 valuation is effective for rates beginning January 2013.

Actuarial Assumptions

Actuarial Cost Method	Projected Unit Credit
Amortization Method	Level Percent of Payroll
GASB 25 Equivalent Single Amortization Period	27.2 Years - Closed Period
Amortization period for new Gains/Losses	30 Years
Asset Valuation Method	10 Year Smoothed Market
Investment Rate of Return	7%
Projected Salary Increases	Varies by age and service
Includes Inflation At	3.0%
Cost of Living Adjustments	0.0%

**Texas Statewide Emergency Services Personnel Retirement Fund**

The City acts as agent for the Texas Statewide Emergency Services Personnel Retirement Fund (the "Fund") which is a component unit of the State of Texas. The City reimbursed the Fund \$50,500 for benefits paid on a pay-as-you-go basis during the year in recognition of services provided to the City by volunteer emergency services personnel. The Fund has a board of directors not designated by City officials and is administered by the State Fire Fighters' Pension Commissioner. There are 38 active participants currently covered by the Fund and payments are being made to 24 retirees or their survivors. The Fund does not prepare separate financial statements for participating departments, however, financial statements for the Fund as a whole may be obtained from the administrator at Fire Fighters' Pension Commissioner, P. O. Box 12577, Austin, Texas, 78711.

**CITY OF ROCKWALL, TEXAS**  
 NOTES TO THE FINANCIAL STATEMENTS  
 Year Ended September 30, 2013

E. Implementation of new GASB Accounting Standards/Restatement of Prior Year Amounts

The City has implemented new GASB Statement No. 63, *Financial Reporting of Deferred Outflows of Resources, Deferred Inflows of Resources, and Net Position* and GASB Statement No. 65, *Items Previously Reported as Assets and Liabilities*. Under GASB-63, amounts previously reported as deferred charges as a part of total assets and deferred amounts from refunded debt have been reported in a separate section as deferred outflows of resources and amounts previously reported as deferred revenue as a part of total liabilities have been reported in a separate section as deferred inflows of resources. Under GASB-65, bond issue costs (excluding bond insurance) are recognized as expenses in the period incurred rather than as assets to be amortized.

GASB 63 resulted in the reclassification of \$890,697 (deferred ad valorem tax revenue, deferred assessments revenue, deferred contract revenue, deferred seizures, and deferred fine revenue, which use is restricted to a subsequent fiscal year) to deferred inflows of resources for governmental funds.

Prior year financial statements have been restated to apply GASB Statement No. 65 with respect to nonrecognition of deferred bond issue costs. The effect of the restatements were, as follows:

	<u>Governmental</u>	<u>Business-type</u>	<u>Component Unit</u>
Net position as reported 9/30/12	\$106,184,132	\$65,495,435	(\$979,126)
Implementation of GASB Statements	<u>(1,515,706)</u>	<u>(388,041)</u>	<u>(179,534)</u>
Net position as restated 9/30/12	<u>\$104,668,426</u>	<u>\$65,107,394</u>	<u>(\$1,158,660)</u>

## Required Supplementary Information

Required supplementary information includes financial information and disclosures required by the Governmental Accounting Standards Board but not considered a part of the basic financial statements.

NOTES TO REQUIRED SUPPLEMENTARY INFORMATION

September 30, 2013

(Unaudited)

---

Information concerning the budget and budget calendar are detailed in footnote III.A. The General Fund budget is presented on a generally accepted accounting principles basis.

## Combining Statements and Budget Comparisons as Supplementary Information

This supplementary information includes financial statements and schedules not required by the Governmental Accounting Standards Board, nor a part of the basic financial statements, but are presented for purposes of additional analysis.

## NONMAJOR GOVERNMENTAL FUNDS

### SPECIAL REVENUE FUNDS

Special Revenue Funds are used to account for specific revenues that are legally restricted to expenditures for particular purposes.

Cemetery - established to account for the annual income from the sale of plots and cemetery maintenance costs.

Police Investigation - established to account for donations, court security fees, and forfeitures.

Recreational Development - established to account for the annual lease income from marinas and golf course.

Radio System - established to account for revenues and expenditures for the support of the City's radio system.

Street Improvements - established to account for the proceeds of street improvement assessments.

Hotel Motel Tax - established to account for the annual income from hotel motel taxes.

Fire Equipment - established to account for funds to be used for the purchase of fire equipment for the volunteer fire department.

Aviation - established to account for funds received from airport operations and related expenses.

Recycling - established to account for funds to be used for the City's recycling program.

Emergency Siren — established to account for revenues accumulated and expenditures to add emergency sirens within the City.

Downtown Improvement - established to account for revenues and expenditures related to the City's efforts to revitalize the downtown square.

Art in Public Places - established to account for donations received for developing art displays in public areas such as parks.

Special Crimes Unit - established to account for revenues and expenditures related to a county-wide crime task force.

### *DEBT SERVICE FUNDS*

Debt Service Funds are used to account for the accumulation of resources and payment of general, certificate, & contractual obligation bond principal and interest from governmental resources.

NONMAJOR GOVERNMENTAL FUNDS  
(Continued)

*CAPITAL PROJECTS FUNDS*

Capital projects funds are used to account for the acquisition and construction of major capital facilities other than those financed by proprietary funds and trust funds.

Capital Projects - established to account for miscellaneous street and drainage projects which are financed with contributions from the General Fund and the Rockwall Economic Development Corporation.

Equipment Acquisition — established to account for capital equipment acquisition using operating transfers from benefiting funds and residual proceeds from miscellaneous debt.

205 Bypass Project — established to account for revenues and expenditures related to the construction of the new 205 Bypass roadway project.

The Harbor/TIF Capital Projects Fund — established to account for improvements in the Tax Increment Reinvestment Zone using the proceeds from the issuance of bonds.

*INTERNAL SERVICE FUNDS*

Internal service funds are used to account for the financing of goods or services provided by one department or agency to other departments or agencies of the government and to other government units, on a cost reimbursement basis.

Employee Benefits Fund — established to account for the financing of a medical self-insurance fund to pay medical and dental claims of the City's employees and their covered dependents.

Workers' Compensation Fund — established to account for the costs of the workers' compensation self-insurance program for the City.

*AGENCY FUND*

Agency funds are used to account for assets held by the government as an agent for individuals, private organizations, other governments and/or other funds.

Special Escrow Agency Fund - established to account for developer contributions for infrastructure projects related to various developments to be constructed at a later date.

## Other Supplementary Information

This section includes financial information and disclosures not required by the Governmental Accounting Standards Board and not considered a part of the basic financial statements. It may, however, include information which is required by other entities.

### *DISCRETELY PRESENTED COMPONENT UNITS*

The Rockwall Economic Development Corporation (REDC) represents the City by promoting it as a location for new business. It also acquires and develops land for that purpose. REDC collects a half-cent sales tax to support its activities.

The Rockwall Technology Park Association (RTPA) provides repair and maintenance of the common area within the park developed by REDC.

CITY OF ROCKWALL, TEXAS  
 COMPUTATION OF DIRECT AND OVERLAPPING DEBT  
 SEPTEMBER 30, 2013  
 (unaudited)

TABLE D-17

Jurisdiction	Net General Obligation Bonded Debt Outstanding (1)	Percentage Applicable to the City of Rockwall (2)	Amounts Applicable to the City of Rockwall
Direct:			
City of Rockwall	\$ 144,856,061	100.00%	\$ 144,856,061
Indirect:			
Rockwall Independent School District	348,148,255	60.56%	210,838,583
Rockwall County	91,570,000	51.05%	46,746,485
Total Indirect	439,718,255		257,585,068
Total Direct and Overlapping Bonded Debt	\$ 584,574,316		\$ 402,441,129
Average debt per capita			\$ 10,384

Source: Assessed value data used to estimate applicable percentages provided by Rockwall Central Appraisal District. Debt Outstanding data is provided by each governmental unit.

- (1) Includes all Governmental Activities General Obligation Bonds, Contractual Obligations, Certificates of Obligation and Capital Leases and the General Obligation Debt of the Business-Type Activities.
- (2) The percentage of overlapping debt applicable is estimated using taxable assessed property values. Applicable percentages were estimated by determining the portion of each governmental unit's taxable value that is within the city's boundaries and dividing it by each unit's total taxable value.

CITY OF ROCKWALL, TEXAS  
 COMPUTATION OF LEGAL DEBT MARGIN  
 LAST TEN FISCAL YEARS  
 (unaudited)

TABLE D-18

The City of Rockwall, Texas does not have a legal debt limit prescribed by state law. However, Article XI, Section 5 of the Texas Constitution applicable to cities of more than 5,000 population limits ad valorem tax rates to \$2.50 per \$100 assessed valuation for cities operating under a Home Rule Charter. Accordingly, the City's tax margin for the previous ten years was:

	Fiscal Year									
	2013	2012	2011	2010	2009	2008	2007	2006	2005	2004
Maximum Rate	2.50	2.50	2.50	2.50	2.50	2.50	2.50	2.50	2.50	2.50
Total Tax Rate	0.5025	0.5031	0.5031	0.5031	0.5031	0.4865	0.425	0.3689	0.3600	0.3600

City of Rockwall  
*The New Horizon*

March 18, 2012

To the Honorable Mayor,  
Members of the City Council,  
and the Citizens of the City of Rockwall, Texas:

The Comprehensive Annual Financial Report (CAFR) of the City of Rockwall for the fiscal year ended September 30, 2012, is hereby submitted in accordance with Section 7.18 of the City Charter. The financial statements are presented in conformity with generally accepted accounting principles (GAAP) and audited in accordance with generally accepted auditing standards by a firm of licensed certified public accountants.

Management assumes full responsibility for both the completeness and reliability of all of the information presented in this report. Fairness of the presentation, including all disclosures, rests with the City. To the best of our knowledge and belief, the enclosed data is accurate in all material respects and is reported in a manner designed to present fairly the financial position and results of operations of the various funds in the City. All disclosures necessary to enable the reader to gain an understanding of the City's financial activities have been included.

To provide a reasonable basis for making these representations, management of the City of Rockwall has established a comprehensive internal control framework that is designed both to protect the government's assets from loss, theft, or misuse and to compile sufficient reliable information for the preparation of the City of Rockwall's financial statements in conformity with GAAP. The internal control structure is designed to provide reasonable, but not absolute, assurance that these objectives are met. The concept of reasonable assurance recognizes that:

- (1) the cost of a control should not exceed the benefits likely to be derived; and
- (2) the valuation of costs and benefits requires estimates and judgments by management.

Because the cost of internal controls should not outweigh their benefits, the City of Rockwall's comprehensive framework of internal controls has been designed to provide reasonable rather than absolute assurance that the financial statements will be free from material misstatement. As management, we assert that, to the best of our knowledge and belief, this financial report is complete and reliable in all material respects. The internal control structure is subject to periodic evaluation by City management.

The City of Rockwall's financial statements have been audited by Rutledge, Crain & Company, PC, a firm of licensed certified public accountants. The goal of the independent audit was to provide reasonable assurance that the financial statements of the City of Rockwall for the fiscal year ended September 30, 2012, are free of material misstatement. The independent audit involved examining, on a test basis, evidence supporting the amounts and disclosures in the

financial statements; assessing the accounting principles used and significant estimates made by management; and evaluating the overall financial statement presentation. The independent auditor concluded, based upon the audit, that there was a reasonable basis for rendering an unqualified opinion that the City of Rockwall's financial statements for the fiscal year ended September 30, 2012, are fairly presented in conformity with GAAP. The independent auditors' report is presented as the first component of the financial section of this report.

Management's discussion and analysis (MD&A) immediately follows the independent auditor's report and provides a narrative introduction, overview and analysis of the financial statements as required by GAAP. MD&A complements this letter of transmittal and should be read in conjunction with it.

## **PROFILE OF THE GOVERNMENT**

The City of Rockwall, Texas, county seat of Rockwall County, Texas was incorporated in 1874. Its name is derived from an underground rock wall discovered in 1854. The unusual rock formations are found throughout the county. The City is located on the eastern shore of Lake Ray Hubbard, 22 miles east of downtown Dallas on Interstate Highway 30. The Dallas/Fort Worth area is recognized as one of the top growth areas in the country. The Dallas/Fort Worth International Airport and Love Field in Dallas meet the air transportation needs of the region.

The City currently has a land area of approximately 29.78 square miles and an estimated population of 38,586.

The City of Rockwall adopted a home rule charter in 1985 which established a council-manager form of government. Charter amendments were adopted in 2005. Policy making and legislative authority is vested in the City Council, which consists of a Mayor and six Council Members, all elected at large. The City Manager is responsible for carrying out the policies and ordinances of the City Council, overseeing the day-to-day operations of the City and for appointing the heads of the various departments. The mayor and six council members are elected to two year staggered terms. The government is empowered to levy a property tax on both real and personal property located within its boundaries. The government also has the power by state statute to extend its corporate limits by annexation, which is done periodically when deemed appropriate by the City Council.

The City of Rockwall provides a full range of services, including police and fire protection; the construction and maintenance of streets and other infrastructure; planning and zoning, parks and recreational activities and general administrative services. Additionally, the City provides water and sewer services as an enterprise function.

Discretely presented component units are legally separate entities and are not part of the primary government's operations. The City of Rockwall is financially accountable for its component units. Accordingly, the Rockwall Economic Development Corporation (REDC) and Rockwall Technology Park Association are included in these financial statements and are explained in more detail in Note 1 of the Notes to the Financial Statements.

## **Factors Affecting Financial Condition**

The information presented in the financial statements is best understood when considered from the broader perspective of the specific environment within which the City of Rockwall operates.

### Local Economy

The City of Rockwall is situated in the Dallas/Fort Worth Consolidated Metropolitan Statistical Area. With its concentration of commercial and retail development, the City of Rockwall has long drawn shoppers from surrounding areas. As the national economy began to improve over the last year, Rockwall's economy benefitted from a mix of new businesses and the renewed success of others. Rockwall saw an increase of 10.35% in our local sales taxes. The city has a varied tax base including a mix of residential, commercial and light industrial properties. Total property values rose by .11%. The most recent five-year average is 3.94% per annum. The City's largest taxpayers are varied and include retail developments, industry, and medical facilities. Table 12 in the Statistical Section provides further information on the principal taxpayers. The Rockwall Economic Development Corporation continues to market Rockwall and assist companies looking to locate their business in the City. The year's highlights included:

- Allen Foods, worked with the Rockwall Economic Development Corporation to construct a new 276,000 square foot bakery facility to be open in 2013. In addition, the REDC attracted Hatfield and Company to relocate their 25,000 square foot facility to the Technology Park. The Whitmore Manufacturing Company will be adding 100,000 square foot to their existing Rockwall headquarters facility breaking ground in summer 2012. With the completed construction of the extension of Discovery Boulevard from the Technology Park to John King Boulevard increasing access to the interstate from the Park, Texas A&M Commerce announced the opening of a Rockwall campus with classes starting in January 2013. Training partnerships are expected to develop to educate the area's workforce to meet the demand for careers with area industrial and medical employers.
- The Presbyterian Hospital of Rockwall continues to attract medical offices and quality long term care to the surrounding area. Construction began on an acute care facility to serve the northern side of the City. The Presbyterian development has added more than \$61,000,000 to the City's tax rolls.
- Downtown Rockwall benefits from the attention garnered from Rockwall's being a Texas Main Street City. A number of new retail establishments including Enjoy and KE Cellars winery joined to complement the many offerings in the downtown area. The City has seen a 12.33% increase in sales taxes in the downtown area in the last year.
- New retail and restaurant openings in 2012, including Cole Mountain and Perla's Kitchen, joined the extensive mix of restaurants to choose from including locally owned favorites and nationally recognized names. Popular accessories store Charming Charlie adds to the retail offerings this year.

## Long-term Planning

The City Council and staff recognize the need for long-range planning. It is the goal of the City government to provide responsible leadership, services, and infrastructure to achieve a safe environment and provide for a high quality of life.

## Financial Policies

The City Council adopted financial policies in 2001 which have guided the City allowing us to build a strong fund balance and reinforcing the need to budget conservatively for both revenues and expenditures. The general fund reserve policy was reviewed and updated most recently in 2009. The policy states the City should maintain no less than 3 months of reserves and will allow reserves in excess of 3.5 months of recurring operating expenditures to be transferred to a capital projects fund to be used to fund future projects. The City has maintained reserves at or above this level for many years. This allows the City to respond to emergencies or downturns while not overburdening the taxpayers. Reserves over the 3.5 month level were available to fund capital projects in 2012 which included the purchase of a building to move Municipal Courts. The remodel of this facility and expansion of facilities for the Police Department will occur in 2013 with general fund reserves over the 3.5 month level.

## Budget Overview

The City Manager proposes a balanced budget to the City Council each year by August 1. Public hearings are conducted to receive comments and priorities of the community at large. The City Council must adopt the operating budget and set the City's tax rate for the next year by October 1<sup>st</sup> of each year.

## Planning Projects

The City completed annexation of several large tracts of land which are now incorporated into the City planning. The City Council completed the review of the City's Comprehensive Land Use Plan in 2012 and made necessary updates.

Having identified the downtown area as a critical component of our long range plan, the City and business and community leaders work with the City's Texas Main Street Manager to coordinate planning efforts and develop interest in locating business downtown and to bring events to the Square. The Main Street program has afforded opportunities for businesses to qualify for façade restoration grants which are funded by the City and local financial institution Community Bank.

The City worked with a consulting firm to prepare an extensive conceptual plan for Planned Development 32 (PD32) which encompasses 60 acres of undeveloped land inside the City's tax increment financing zone and adjacent to the Harbor development. The city recognized the importance of having the conceptual plan ready when the economy improves. The City initiated the zoning process to establish a form based code for the area. It is expected the area will soon see the expansion of the mixed-use concept with retail, restaurants, office and residential spaces as interest from the development community is being expressed. The first multi-story office tower project will commence construction in 2013.

The Rockwall Economic Development Corporation in conjunction with their Destination 2020 plan has refined the focus and role of their planning committee as well. Their marketing program now includes social media components and targeted marketing aimed at desired industries.

### Capital Improvement Planning

A Capital Improvements Committee (CIP) of citizens considered a slate of projects in 2011. The committee recommended projects for the bond election held in May 2012. While some initiatives were not successful, voters approved propositions to provide downtown accessibility projects roadway rehabilitation and Interstate 30 ramp projects. The City hired design and construction management professionals to work with staff and City Council to develop the vision for the projects and cost estimates to ensure the projects as approved can move forward expeditiously and be completed within budget.

### Strategic Planning

Organizationally, the City uses the Balanced Scorecard Methodology for strategic planning. Bi-annually the City conducts a Citizen Satisfaction Survey to document our progress meeting the needs of our citizens. The City continues to receive good marks on our biannual survey, most recently completed in 2011, regarding our progress on adopted goals and strategies as well as areas of interest for future projects.

### Future Development

#### Transportation

The City completed construction of John King Boulevard named in honor of our late council member. The Texas Department of Transportation completed work on the overpass which connects the northern and southern roadways and allow additional access to I-30 in August 2012. TxDOT continued the project to widen FM740 in southern Rockwall with the grand opening coming in December 2012. City projects completed in 2012 included the reconstruction of Airport Road, a much traveled east-west roadway allowing better access to John King Boulevard. In 2013, Corporate Crossing, formerly FM549, will be widened to provide improved and enhanced access to the City's light industrial area between I-30 and SH276.

The City is a member of a County-wide Consortium which allows County government officials to work with officials of each of the seven cities in the county to further transportation planning efforts. The Consortium meets monthly to discuss funding alternatives for the County's transportation needs, which also involve planning and state participation. The County's bond initiatives allow funding for the advance planning and design of 5 major roadway projects. This allows the projects to be ready to commence as soon as state funding is allocated for construction. The Consortium is looking at potential additions to the plan and reorganization of priorities in 2013 to situate projects for best funding potential in the coming years.

## Medical Services

Developments in the Horizon Road area have focused on medical services. With the availability of acute care at Presbyterian Hospital of Rockwall, the addition of several new medical buildings with Doctor's suites and state of the art out-patient diagnostic imaging facilities has allowed Rockwall to become a regional medical services destination. Additional ancillary medical office buildings and long term care facilities are planned for near term development. Construction began on the Presbyterian Hospital acute care facility.

## Retail / Entertainment

"The Harbor" development is situated on the shores of Lake Ray Hubbard at I-30. A public/private partnership provided opportunities for new retailers in the Bella Harbor development as well as public open space and a full-service Hilton Hotel and Conference Center. The Conference Center continues to attract events including numerous corporate training and retreat sessions and expects many which are scheduled for 2013.

In conjunction with private development, the City established a tax increment financing (TIF) zone on an approximately 103 acre tract which allowed the financing and development of public open space to complement the development and allow citizens access to the Lake Ray Hubbard shore line. The City partnered with Rockwall County, and the Rockwall Economic Development Corporation to establish the TIF to finance the public projects. In a second project, the City is collaborating with an office tower developer who is planning construction of a seven-story, 85,000 square foot office tower overlooking the lake. The Harbor Heights Trend Tower will offer Class-A office space to its corporate tenants with construction beginning in 2013. In addition to office space, the tower will offer needed public parking for the Harbor events.

The City's extremely successful Concert on the Lake Series managed by the City's Recreation Department draws approximately 5,000 attendees each Thursday evening for a free concert. The series extended 12 weeks in 2012. Surveys conducted during the events gather data regarding the distance from which visitors traveled and approximate retail and restaurant dollars expended while here. The term "Live Music Capital of North Texas" has been coined to describe the many opportunities available year round in both public and restaurant venues.

Founder's Day on the Downtown Square draws visitors to shop merchant's wares, see artist's exhibits, learn about city departments and enjoy free concerts all day. The event culminates with a concert by a nationally recognized artist, also free to all who attend.

A Farmer's Market brings visitors downtown Saturdays from May to October. The City sponsors an Art Fair one Saturday each month. The fourth annual "Rib Rub" was held in fall 2012 drawing more than 50 teams to the downtown square. The Main Street Advisory Board and "Friends of Downtown Rockwall", citizen volunteer group, are working to plan more special events to bring shoppers downtown.

The City is fast becoming the triathlon destination as well. In addition to several locally sponsored races, the City for the third time welcomed the Toyota US Open Triathlon in fall 2012. The event saw more than 1,200 participants including a contingent of international Olympians

take advantage of our lake access and terrain to complete the final event of the annual seven race series. The City has been notified the event plans to return for 2013. Early series races will be held in cities including Chicago, Miami, Minneapolis and Tempe culminating with the Rockwall race and the final prize standings.

Utilities

The water and sewer rates were last increased in 2012 and the City is implementing a 10% rate increase for 2013. The City purchases treated water as a founding member city of the North Texas Municipal Water District. Construction is nearing completion for the Squabble Creek sewer system which will connect to the regional sewer interceptor system in early 2013. A number of main extension projects continue to be undertaken to provide water and sewer service to annexed areas of the City.

The City’s water system is recognized with the Texas Commission on Environmental Quality’s “Superior” rating.

The City is actively working to acquire the right to serve recently annexed areas which are currently served by wholesale water supply corporations and an investor owned utility. It remains the City’s desire to be the provider for all residents in our city limits. Negotiations with the investor owned utility are nearing culmination and the City is expected to complete acquisition of the private water and sewer system in 2013 resulting in increased service levels and decreased rates for a large neighborhood within the city’s limits.

Debt Administration: Two ratios traditionally used to analyze the debt structure of municipalities are presented below. Revenue debt has been excluded since system charges are used to retire the debt.

Outstanding General Obligation Debt at 9-30-12(net of Debt Service)	\$107,543,706
Estimated Population	38,586
G.O. Debt Per Capita	\$2,787
Net G.O. Debt per Assessed Value	3.43%

The City seeks a bond rating update as new debt is issued. The current ratings are shown below:

	<u>General Obligation</u>	<u>Revenue</u>	<u>Sales Tax(REDC)</u>
Standard & Poor’s Rating Group	AA-	A-	A-
Moody’s Investor Service Inc.	Aa2	Aa3	A1

## AWARDS AND ACKNOWLEDGEMENTS

### Awards:

The Government Finance Officers Association of the United States and Canada (GFOA) awarded a Certificate of Achievement for Excellence in Financial Reporting to the City for its comprehensive annual financial report for the fiscal year ended September 30, 2011. The Certificate of Achievement is a prestigious national award recognizing conformance with the highest standards for preparation of state and local government financial reports. In order to be awarded a Certificate of Achievement, the City must publish an easily readable and efficiently organized comprehensive annual financial report, whose contents conform to program standards. This report must satisfy both generally accepted accounting principles and applicable legal requirements.

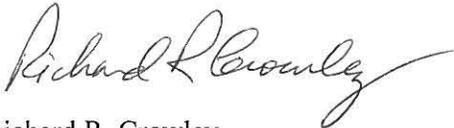

A Certificate of Achievement is valid for a period of one year only. The City has received a Certificate of Achievement for each of the last twenty-two consecutive fiscal years. We believe our current report continues to conform to the Certificate of Achievement program requirements and we are submitting it to the GFOA to determine its eligibility for another certificate.

### Acknowledgement:

The preparation of the comprehensive annual financial report on a timely basis was made possible by the dedicated service of the entire staff of the Finance Department. Each member of the department has our sincere appreciation for the contributions made in the preparation of this report.

In closing, without the leadership and support of the governing body of the City, preparation of this report would not have been possible.

Sincerely,

Richard R. Crowley  
City Manager

**Independent Auditors' Report on Financial Statements**

To the City Council  
City of Rockwall, Texas

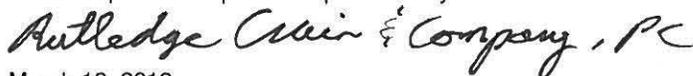

We have audited the accompanying financial statements of the governmental activities, the business-type activities, the aggregate discretely presented component units, each major fund, and the aggregate remaining fund information of The City of Rockwall, Texas, as of and for the year ended September 30, 2012, which collectively comprise the City's basic financial statements as listed in the table of contents. These financial statements are the responsibility of The City of Rockwall, Texas' management. Our responsibility is to express opinions on these financial statements based on our audit.

We conducted our audit in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinions.

In our opinion, the financial statements referred to above present fairly, in all material respects, the respective financial position of the governmental activities, the business-type activities, the aggregate discretely presented component units, each major fund, and the aggregate remaining fund information of the The City of Rockwall, Texas, as of September 30, 2012, and the respective changes in financial position and, where applicable, cash flows thereof for the year then ended in conformity with accounting principles generally accepted in the United States of America.

Accounting principles generally accepted in the United States of America require that the management's discussion and analysis and budgetary comparison information on pages 19 through 29 and 74 through 76 be presented to supplement the basic financial statements. Such information, although not a part of the basic financial statements, is required by the Governmental Accounting Standards Board, who considers it to be an essential part of financial reporting for placing the basic financial statements in an appropriate operational, economic, or historical context. We have applied certain limited procedures to the required supplementary information in accordance with auditing standards generally accepted in the United States of America, which consisted of inquiries of management about the methods of preparing the information and comparing the information for consistency with management's responses to our inquiries, the basic financial statements, and other knowledge we obtained during our audit of the basic financial statements. We do not express an opinion or provide any assurance on the information because the limited procedures do not provide us with sufficient evidence to express an opinion or provide any assurance.

Our audit was conducted for the purpose of forming opinions on the financial statements that collectively comprise the The City of Rockwall, Texas' financial statements as a whole. The introductory section, combining and individual nonmajor fund financial statements and schedules, and statistical section are presented for purposes of additional analysis and are not a required part of the financial statements. The combining and individual nonmajor fund financial statements and schedules are the responsibility of management and were derived from and relate directly to the underlying accounting and other records used to prepare the financial statements. The information has been subjected to the auditing procedures applied in the audit of the financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the financial statements or to the financial statements themselves, and other additional procedures in accordance with auditing standards generally accepted in the United States of America. In our opinion, the information is fairly stated in all material respects in relation to the financial statements as a whole. The introductory and statistical sections have not been subjected to the auditing procedures applied in the audit of the basic financial statements and, accordingly, we do not express an opinion or provide any assurance on them.

*Management's Discussion and Analysis*

*This page is left blank intentionally.*

## MANAGEMENT’S DISCUSSION AND ANALYSIS

The discussion and analysis of the City of Rockwall’s financial performance provides an overview and analysis of the City’s financial activities for the fiscal year ended September 30, 2012. Please read it in conjunction with the City’s financial statements, which follow this section.

### FINANCIAL HIGHLIGHTS

- The City’s total net assets were \$171,710,000 at September 30, 2012.
- During the year, the City’s governmental activities expenses were \$45,323 more than the \$41,504,245 generated in program revenues, taxes, other revenues and transfers.
- The assets of the City of Rockwall attributable to governmental activities exceeded its liabilities at the close of the fiscal year ending September 30, 2012 by \$106,214,565 (net assets).
- At the end of this fiscal year, the unassigned fund balance for the general fund was \$9,916,841 or approximately 41.17 percent of the total general fund operating expenditures and transfers out.
- The City’s total outstanding general obligation bonds and certificates of obligation (excluding enterprise and component unit debt) increased by \$2,783,038 during fiscal year 2012. More detailed information is given in the notes section.

### OVERVIEW OF THE FINANCIAL STATEMENTS

This annual report consists of three parts—management’s discussion and analysis (this section), the basic financial statements, and required supplementary information. The basic financial statements include two kinds of statements presenting different views of the City:

The first two statements are government-wide financial statements that provide both long-term and short-term information about the City’s overall financial status.

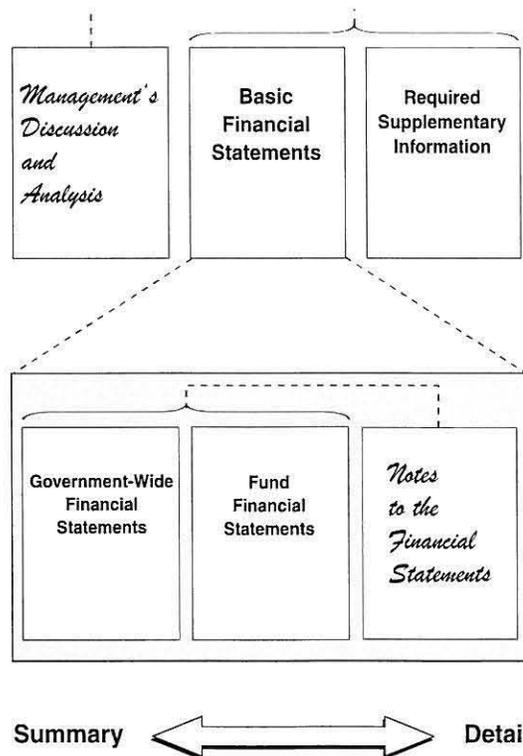

The remaining statements are fund financial statements that focus on individual parts of the government, reporting the City’s operations in more detail than the government-wide statements.

The governmental fund statements tell how general government services were financed in the short-term as well as what remains for future spending.

Proprietary fund statements offer short-term and long-term financial information about the activities the government operates like businesses.

Fiduciary fund statements provide information about the financial relationships in which the City acts solely as a trustee or agent for the benefit of others, to whom the resources in question belong.

Figure A-1, Required Components of the City’s Annual Financial Report

The financial statements also include notes that explain some of the information in the financial statements and provide more detailed data. The statements are followed by a section of required supplementary information that further explains and supports the information in the financial statements. Figure A-1 shows how the required parts of this annual report are arranged and related to one another.

**Figure A-2. Major Features of the City of Rockwall’s Government-wide and Fund Financial Statements**

<i>Type of Statements</i>	<b>Fund Statements</b>		
	<b>Government-wide</b>	<b>Governmental Funds</b>	<b>Proprietary Funds</b>
<i>Scope</i>	Entire City government (except fiduciary funds) and the City's component units	Activities of the City that are not proprietary or fiduciary, such as police, fire and parks	Activities the City operates similar to private business.
<i>Required financial statements</i>	<ul style="list-style-type: none"> <li>◆ Statement of net assets</li> <li>◆ Statement of activities</li> </ul>	<ul style="list-style-type: none"> <li>◆ Balance Sheet</li> <li>◆ Statement of revenues, expenditures &amp; changes in fund balances</li> </ul>	<ul style="list-style-type: none"> <li>◆ Statement of net assets</li> <li>◆ Statement of revenues, expenses &amp; changes in fund net assets</li> <li>◆ Statement of cash flows</li> </ul>
<i>Accounting basis and measurement focus</i>	Accrual accounting and economic resources focus	Modified accrual accounting and current financial resources focus	Accrual accounting and economic resources focus
<i>Type of asset/liability information</i>	All assets and liabilities, both financial and capital, short-term and long-term	Only assets expected to be used up and liabilities that come due during the year or soon thereafter; no capital assets included	All assets and liabilities, both financial and capital, short-term and long-term
<i>Type of inflow/outflow information</i>	All revenues and expenses during year, regardless of when cash is received or paid	Revenues for which cash is received during or soon after the end of the year; expenditures when goods or services have been received and payment is due during the year or soon thereafter	All revenues and expenses during year, regardless of when cash is received or paid

### **Government-wide Financial Statements**

The government-wide statements are designed to provide readers with a broad overview of the City of Rockwall’s finances, in a manner similar to private-sector business.

The *statement of net assets* presents information on all of the city of Rockwall’s assets and liabilities, with the difference between the two reported as *net assets*. Over time, increases or decreases in net assets may serve as a useful indicator of whether the financial position of the City of Rockwall is improving or deteriorating. The statement of net assets combines and consolidates governmental funds current financial resources (short-term spendable resources) with capital assets and long-term obligations. Other non-financial factors should also be taken into consideration, such as changes in the City’s property tax base and the condition of the City’s infrastructure, to assess the overall health or financial condition of the City.

The *statement of activities* presents information showing how the City’s net assets changed during the most recent fiscal year. All of the current year’s revenues and expenses are taken into account regardless of when cash is received or paid. Thus, revenues and expenses are reported in this statement for some items that will only result in cash flows in future fiscal periods; for example uncollected taxes and earned but unused vacation leave. Both the statement of net assets and the statement of activities are prepared utilizing the accrual basis of accounting.

In the Statement of Net Assets and the Statement of Activities, the City is divided into three kinds of activities:

*Governmental activities* – Most of the City’s basic services are reported here, including administration, police, fire, planning and zoning, finance, parks and recreation, municipal court and engineering. Property taxes, sales taxes, franchise fees and charges for services provide funds for most of the activities.

*Business-type activities* – The City charges fees to customers to help it cover all or most of the cost of certain services it provides. The City’s water and sewer system is reported here.

*Component Units* – The City of Rockwall (the primary government) includes two discretely presented component units. The City’s Type A Sales Tax Corporation known as the Rockwall Economic Development Corporation and the Rockwall Technology Park Association. Although legally separate, The City of Rockwall is financially accountable for these component units. The City Council appoints the component unit’s Board of Directors, sets the budget and approves any debt issuance.

The government-wide financial statements can be found on pages 33-35 of this report.

## **Reporting the City’s Most Significant Funds**

### Fund Financial Statements

The fund financial statements provide more detailed information about the City’s most significant funds—not the City as a whole. *Funds* are accounting devices the City uses to keep track of specific sources of funding and spending for particular purposes. Some funds are required by State law and by bond covenants. However, the City establishes other funds to control and manage money for particular purposes or to show that it is properly using certain taxes and grants.

The City has the following types of funds:

*Governmental funds*—Most of the City’s basic services are included in governmental funds, which focus on (1) how cash and other financial assets that can readily be converted to cash flow in and out and (2) the balances left at year-end that are available for spending. Consequently, the governmental fund statements provide a detailed short-term view that helps users of the financial statements determine whether there are more or fewer financial resources that can be spent in the near future to finance the City’s programs. By comparing information presented for governmental funds with similar information presented for governmental activities in the government-wide financial statements, readers may better understand the long-term impact of the government’s near-term financing decisions. Because this information does not encompass the additional long-term focus of the government-wide statements, we provide additional information at the bottom of the governmental funds statement, or on the subsequent page, that explain the relationship (or differences) between them.

The City of Rockwall maintains 21 individual governmental funds. Information is presented separately in the governmental funds balance sheet and in the governmental funds statement of revenues, expenditures and changes in fund balances for the General fund, Debt Service fund, and G.O. Bonds Capital Projects fund, which are considered major funds. Data from the other 18 governmental funds are combined into a single, aggregated presentation. Individual fund data for each of these non-major governmental funds is provided in the form of combining statements elsewhere in this report.

*Proprietary funds*—Services for which the City charges customers a fee are generally reported in proprietary funds. Proprietary funds, like the government-wide statements, provide both long-term and short-term financial information. The City’s enterprise funds (a component of proprietary funds) are identical to the business type activities that are reported in the governmental-wide statement but provide more detail and additional information such as cash flows, for proprietary funds. The Internal Service funds (the other component of proprietary funds) are utilized to report activities that provide services for the City’s self insurance funds. The Internal Service funds are reported as governmental activities in the government-wide financial statements.

The City of Rockwall maintains an Enterprise Fund to account for water and sewer services provided to the City’s retail and wholesale customers. All activities associated with providing such services are accounted for in this fund, including administration, operations, maintenance, debt service, capital improvements, billing and collection. The City’s intent is that all costs of providing the services to the general public on a continuing basis are financed through user charges in a manner similar to a private business enterprise.

The City maintains two internal service funds to account for funds accumulated to self-insure for health and workers compensation claims. Individual fund data for each of these business-type funds is provided in the form of combining statements elsewhere in this report.

*Fiduciary funds*—The City is the trustee, or *fiduciary*, for certain funds. It is also responsible for other assets that - because of a trust arrangement - can be used only for the trust beneficiaries. The City is responsible for ensuring that the assets reported in these funds are used for their intended purposes. All of the City’s fiduciary activities are reported in a separate statement of fiduciary net assets and a statement of changes in fiduciary net assets. We exclude these activities from the City’s government-wide financial statements because the City cannot use these assets to finance its operations.

*Notes to the financial statements*-The notes provide additional information that is essential to a full understanding of the data provided in the government-wide and fund financial statements.

## **Other Information**

In addition to the basic financial statements and accompanying notes, this report presents certain *required supplementary information* concerning the City of Rockwall. This information is required by accounting principles generally accepted in the United States of America.

## CONDENSED GOVERNMENT-WIDE FINANCIAL INFORMATION

At the end of fiscal year 2012, the City's net assets (assets exceeding liabilities) totaled \$171,710,000. This analysis focuses on the net assets (Table 1) and changes in net assets (Table 2).

The largest portion of the City's net assets (86.7% percent) reflects its investment in capital assets (i.e., land, buildings, machinery, equipment, and infrastructure); less any related debt used to acquire those assets which is still outstanding. The City uses these capital assets to provide services to citizens; consequently, these assets are not available for future spending. Although the City's investment in its capital assets is reported net of related debt, it should be noted that the resources needed to repay this debt must be provided from other sources, since the capital assets themselves cannot be used to liquidate these liabilities.

**Table 1**  
**Net Assets**

	Governmental Activities		Business-Type Activities		Total Primary Government	
	2012	2011	2012	2011	2012	2011
Current and other assets	\$34,910,868	\$ 37,419,515	\$13,708,924	\$16,369,447	\$ 48,619,792	\$53,788,962

### Governmental Activities

The City's total revenues of governmental activities were \$39,909,295. A significant portion 43.4% of the City's revenues came from property taxes. Another 31.9% of revenue came from sales taxes. Ad valorem property tax revenues as a percent of revenues continue to increase each year due to the addition of new properties with minor increases in assessed valuation throughout the City. Assessed values of the properties in the City increased by .11%. The City adopted a property tax rate of 50.31 cents per \$100 of assessed valuation for fiscal year 2012. The rate has remained steady for four years. Sales tax revenue increased over the prior year by 10.35% and while a small amount of retail was

added for 2012, it was most influenced by increases in same stores sales. While housing starts are not expected to be back to pre downturn levels they are trending upward. That coupled with the nearly 500,000 square feet of industrial space being added resulted in a 53.3% increase in building permit revenues. Over the past several years, Rockwall County, of which the City of Rockwall is the County seat, was one of the fastest growing counties in America, and the fastest growing county in Texas.

**Comparative Expenses – Governmental Activities**

The total cost of all programs and services were \$41,549,568. Of these costs \$8,836,213 (21.3%) was for the Police Department. The department has increased the number of sworn officers in the patrol division to maintain minimum staffing numbers per shift. Public Works costs were \$8,358,043 (20.2%) and reflected ongoing street and park maintenance focused projects. Administrative departments including Administration, Human Resources, and Internal Operations had combined costs of \$7,631,175 (18.4%).

**Business-Type Activities**

The City’s business-type activities recorded a decrease of \$1,761,800 in net assets. Retail water sales decreased by 4.35% from the prior year due to significant water conservation measures necessary due to an extremely hot and dry year coupled with unanticipated water supply restrictions from one of the area’s supply lakes. The City’s rates were increased in 2012 and another increase is expected for 2013. The City implemented conservation water rates in 2001 and increases them each time new rates are adopted. Sewer charges were not affected significantly because the City uses winter averaging to calculate sewer billing. Water and sewer charges were \$14,064,514. The ending working capital, excluding restricted assets and liabilities payable from restricted assets, for the water and sewer fund was \$2,186,509.

Water and sewer impact fees (Capital recovery fees) revenue totaled \$595,899 for the fiscal year. Impact fees, paid by developers, are designed to reduce the system’s initial costs in building assets.

Residential development is assessed an impact fee at the building permit stage while commercial projects are assessed at the beginning of site development.

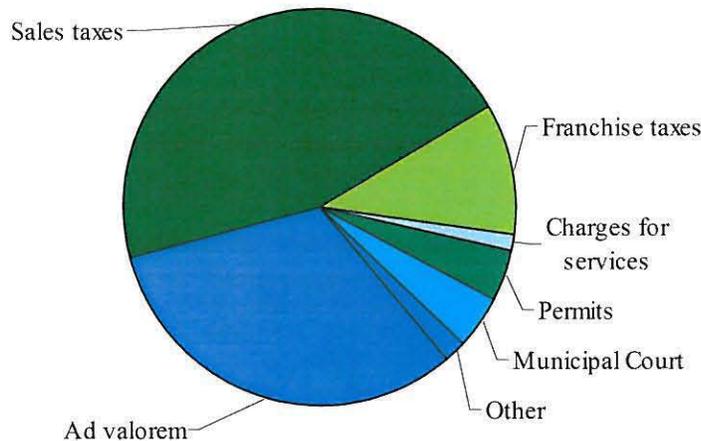

**Component Units**

The Rockwall Economic Development Corporation (REDC) reported revenues including the ½ cent sales tax, authorized under the Type A Corporation statutes, of \$4,356,285. Assets managed by the corporation include an inventory of over 310 acres of land, zoned for light industrial uses and available for sale. The REDC continues to attract companies to the City through its marketing efforts and ability to match businesses to available land.

**ANALYSIS OF INDIVIDUAL FUNDS**

The City’s *General Fund* reported an ending unassigned fund balance of \$9,916,841. The largest source of general fund revenue is sales tax, it accounted for \$12,140,716 (45.6%) of total general fund revenue. Ad valorem property taxes account for \$8,551,996 (32.0%) of general fund revenues. The City maintains the unassigned fund balance at or above acceptable levels as defined within the City’s financial policies. This “reserve” balance allows the City Council to elect to fund projects unforeseen during the budgeting process and provides a measure of security against changes in the economy and the timing of cash flows. The City Council elected to use reserves to purchase an existing building to move municipal court and to remodel the current police station. This planned use of reserves for projects totaled \$2,064,000. The City’s revenues increased sufficiently during the year that the net impact to fund balance was a reduction of only \$169,155 from the prior year.

**Revenues by Source – General Fund**

The City’s *Debt Service Fund* reported a reduction in fund balance of \$205,071. Property tax collections for debt service requirements were \$8,249,039. This is required in order to pay debt service payments on bonds issued to construct numerous road and parks projects completed since the City’s bond election in 2005 authorized more than \$65,031,000 in projects. After extensive study, the City adopted a Roadway Impact Fee which provided \$588,159 in new revenue to this fund in fiscal year 2012. The City’s budgeting practices for the debt service fund allow the use of reserves to mediate the effect of new debt issues on the property tax rate.

The *G.O. Bonds Capital Projects Fund* reported an assigned fund balance of \$8,915,955, a reduction of \$970,622 from the prior year. Bond proceeds were used to complete the construction of the Airport

Road during fiscal year 2012. Projects underway during 2013 include the reconstruction of Corporate Crossing and street lighting projects on recently completed roadways.

## GENERAL FUND BUDGETARY HIGHLIGHTS

During fiscal year 2012, the City Council of the City of Rockwall amended the budget to provide funding for several unforeseen projects and to recognize salary savings over the year, as well as increases or decreases in revenues when compared to original projections. The City purchased an existing office building to remodel for municipal court purposes which was unanticipated when the budget was prepared. With the adjustments made to the budget, the original budgeted expenditures of \$22,918,950 increased to \$24,492,400 while revenues increased from \$24,393,000 to \$25,730,200. The City of Rockwall had originally estimated the ending general fund unassigned balance to be \$10,087,116 however due to the budget adjustments mentioned above and the planned reduction in fund balance for municipal court and police department office space remodels, the fund balance was re-estimated to be \$8,572,016.

General fund revenues were \$26,621,592, a positive variance of \$891,391 over the amended budget estimate, reflecting strong than anticipated sales tax collections and increased building permit revenues resulting from new industrial projects and a small increase in housing starts. Actual general fund total expenditures were \$24,087,970 or \$404,430 less than final projections. Expenditures for administration and public works increased as a result of an internal reorganization which caused a one-time compensation increase being recognized by the City. The City ended the year with a fund balance of \$9,894,923, or \$1,322,907 over the projected balance. The higher fund balance is attributable to management's conservative projections of both revenues and expenditures.

## CAPITAL ASSET AND DEBT ADMINISTRATION

### Capital Assets

At the end of the fiscal year 2012 the City had \$278,264,009 (Table 3) invested in a broad range of capital assets, including buildings, parks facilities, roads, police and fire equipment and water and sewer lines. The balances shown below are net of accumulated depreciation.

**Table 3**  
**Capital Assets at Year-End**

	Governmental Activities		Business-Type Activities		Total Primary Government	
	2012	2011	2012	2011	2012	2011
Land	\$ 14,102,412	\$ 14,102,412	\$ 799,533	\$ 799,533	\$ 14,901,945	\$ 14,901,945
Buildings & systems	13,608,864	13,451,182	82,013,525	79,136,653	95,622,389	92,587,835
Improvements other than buildings	20,229,910	20,297,789	-	-	20,229,910	20,297,789
Machinery & equipment	4,627,960	4,358,962	1,175,931	1,064,379	5,803,891	5,423,341
Infrastructure	124,498,981	123,244,231	-	-	124,498,981	123,244,231
Construction in progress	9,946,346	11,820,588	7,260,547	11,286,154	17,206,893	23,106,742
	<u>\$187,014,473</u>	<u>\$ 187,275,164</u>	<u>\$ 91,249,536</u>	<u>\$ 92,286,719</u>	<u>\$278,264,009</u>	<u>\$279,561,883</u>

The City's capital improvement program included a number of voter authorized projects to construct new streets and reconstruct several older city streets. Many of those projects were completed prior to 2012. Airport Road was completed in 2012 causing a reduction in construction in progress. New projects underway in 2012 include the widening and reconstruction of Corporate Crossing.

The City held a bond election in May 2012 at which voters approved propositions to fund several street reconstruction projects as well as infrastructure and accessibility projects in the downtown area in excess of \$27,800,000. Design is in progress on the downtown improvements with roadway design not expected to start until later in 2014.

Notably, the construction in progress at fiscal year end for business-type funds includes the construction of a project to connect the Squabble Creek treatment plan to the regional wastewater interceptor project which is nearing completion in early 2013. Several projects to extend and improve service were completed during the year reducing construction in progress.

Additional information regarding the City’s capital assets is found in note IV-D on pages 57-59.

Debt

At year end, the City had \$147,020,035 in bonds and capitalized leases shown in Table 4.

**Table 4  
City of Rockwall Outstanding Debt**

	Governmental Activities		Business-Type Activities		Total Primary Government	
	2012	2011	2012	2011	2012	2011
General obligation bonds	\$ 84,675,708	\$ 88,473,746	\$ 69,292	\$ 91,254	\$ 84,745,000	\$ 88,565,000
Certificates of obligation	24,065,000	23,050,000	27,145,000	28,205,000	51,210,000	51,255,000

Capital Lease obligations	<u>193,292</u>	<u>236,589</u>	<u>6,321,743</u>	<u>6,710,080</u>	<u>6,515,035</u>	<u>6,946,669</u>
	<u>\$ 108,934,000</u>	<u>\$ 111,760,335</u>	<u>\$ 38,086,035</u>	<u>\$ 40,221,254</u>	<u>\$ 147,020,035</u>	<u>\$ 151,981,669</u>

The City is permitted by Article XI, Section 5, of the State of Texas Constitution to levy taxes up to \$2.50 per \$100 of assessed valuation for general governmental services including the payment of principal and interest on general obligation long-term debt. The current ratio of net tax-supported bonded debt to assessed value of all taxable property is 3.43% or \$2,787 per capita. This is a decrease from the prior year with the year’s scheduled principal payments in 2012 and limited new debt issuance.

The City’s bond ratings at September 30, 2012 were as follows:

	<u>General Obligation</u>	<u>Revenue</u>	<u>Sales Tax(REDC)</u>
Standard & Poor’s Rating Group	AA-	A-	A-
Moody’s Investor Service Inc.	Aa2	Aa3	A1

Additional information on the City of Rockwall’s long-term debt can be found in note IV-F, on pages 60-67 of this report.

**ECONOMIC FACTORS AND NEXT YEAR’S BUDGETS AND RATES**

The City’s elected and appointed officials considered many factors when setting the fiscal year 2013 budget, tax rate, and fees that will be charged for the business-type activities. The major factor affecting all decisions has been and will continue to be the slowed growth in our community and the impact of the recovering national economy. Rockwall saw a small number of new commercial/retail business openings in 2012 which would positively impact sales tax revenues in fiscal year 2013. With this in mind and to continue the City’s conservative budget philosophy, sales tax projections were increased by only 5%. Only modest increases in projecting

building permit revenues were used to continue to budget conservatively as well. Industrial building projects are in the early stages which should positively impact permit revenues in 2013. Interviews with local builders led the City to project continued slow home starts for the coming year but developers are reporting they will be beginning the infrastructure for new subdivision phases in the coming year.

The City of Rockwall's citizens enjoy above-average income levels per household. This combined with the City's proximity to major highways, and the Dallas-Ft.Worth SMSA make Rockwall an attractive city in which to locate. The City prides itself on a quality school district and "hometown" atmosphere. The Rockwall Economic Development Corporation works to attract businesses with relocation incentives as well as business retention incentives such as workforce training opportunities. The City's unemployment rate was 5.1%, well below the national levels.

The City of Rockwall considered these factors when adopting the General Fund budget for fiscal year 2013. The budgeted revenues for fiscal year 2013 total \$26,215,750 for the general fund. Ad valorem tax revenue is determined by two factors, the total assessed value established by the Rockwall Central Appraisal District and the tax rate established by the Rockwall City Council. The property tax rate was lowered slightly to 50.25 cents per hundred dollars of assessed value.

The City adopted written financial policies in 2001 which require that revenues and expenditures be projected conservatively. The policies include debt level guidelines. These policies were reviewed by the City Council in 2009 and certain provisions related to the City's fund balance were changed. The amended policy provides that the General Fund reserves should be no less than 3 months of recurring operating appropriations. In addition, the policies provide that should an audited fund balance at the end of the fiscal year exceed 3.5 months, the City Council may elect to transfer a portion to a Capital Projects Fund. The budget as adopted for fiscal year 2013 projects a fund balance of approximately 4.25 months of recurring operating expenditures. The City anticipates the construction of City hall parking and improved driveway access for the police building with a portion of these available reserves as well as additional street maintenance projects and the addition of a number of emergency weather warning sirens to our system.

The 2013 budget expenditures includes absorbing the increasing costs of employee health and retirement costs as well as increasing street maintenance expenditures and the addition of four sworn police positions and two fire driver positions. The Finance/Human Resources/Utility Billing software will be upgraded in the new budget.

The water and sewer rate study has been updated and the budget anticipates a 10% increase in those rates. A number of capital projects to replace older lines and to provide service to new areas are being planned for fiscal year 2013. The City's revenues were impacted by mandatory conservation measures in effect in 2012. With those measures eased, system consumption and sales revenues are expected to correct to more normal levels. In the event that significant conservation measures are again warranted then operational costs will be closely monitored and controlled to correspond with to reduction in available revenues.

## **REQUESTS FOR INFORMATION**

This financial report is designed to provide our citizens, taxpayers, customers, and creditors with a general overview of the City's finances. For more information contact the City's Assistant City Manager/Director of Finance, Mary Smith at (972) 771-7701; City of Rockwall; 385 South Goliad Street, Rockwall TX 75087. Email [msmith@rockwall.com](mailto:msmith@rockwall.com).

RECONCILIATION OF THE STATEMENT OF REVENUES, EXPENDITURES,  
AND CHANGES IN FUND BALANCES OF GOVERNMENTAL FUNDS  
TO THE STATEMENT OF ACTIVITIES  
FOR THE YEAR ENDED SEPTEMBER 30, 2012

Net change in fund balances - total governmental funds	\$ (2,319,004)
Amounts reported for governmental activities in the Statement of Activities ("SOA") are different because:	
Capital outlays are not reported as expenses in the SOA.	7,988,223
The depreciation of capital assets used in governmental activities is not reported in the funds.	(9,332,445)
Donations of capital assets increase net assets in the SOA but not in the funds.	1,083,532
Certain property tax revenues are deferred in the funds. This is the change in these amounts this year.	(17,783)
Expenses not requiring the use of current financial resources are not reported as expenditures in the funds.	44,305
Repayment of bond principal is an expenditure in the funds but is not an expense in the SOA.	4,933,038
Repayment of capital lease principal is an expenditure in the funds but is not an expense in the SOA.	43,290
Bond issuance costs and similar items are amortized in the SOA but not in the funds.	(95,069)
(Increase) decrease in accrued interest from beginning of period to end of period.	162,416
The net revenue (expense) of internal service funds is reported with governmental activities.	(314,102)
Compensated absences are reported as the amount earned in the SOA but as the amount paid in the funds.	67,419
Certain fine revenues are deferred in the funds. This is the change in these amounts this year.	49,887
Certain assessment revenues are deferred in the funds. This is the change in these amounts this year.	(15,456)
Revenues in the SOA for franchise taxes not providing current financial resources are not reported in the funds.	(58,134)
Proceeds of bonds do not provide revenue in the SOA, but are reported as current resources in the funds.	(2,150,000)
Certain contract revenues are deferred in the funds. This is the change in these amounts this year.	(145,873)
Change in net assets of governmental activities - Statement of Activities	\$ (75,756)

The accompanying notes are an integral part of this statement.

**1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES**

**A. Reporting Entity**

The City of Rockwall, Texas, was founded in 1854 and incorporated in 1874. The City operates under the Council-Manager form of government as adopted by a home rule charter approved January 21, 1985. The City provides a full range of municipal services including public safety (police and fire), highway and streets, parks and recreation, health and social services, planning and zoning, and general administrative services. In addition, the City provides water and sewer service as a proprietary function of the City.

The accounting policies of the City of Rockwall, Texas, conform to generally accepted accounting principles issued by the Governmental Accounting Standards Board which is the recognized financial accounting standard setting body for governmental entities. The notes to the financial statements are an integral part of the City's basic financial statements.

The City of Rockwall is a home rule municipality governed by an elected mayor and six member City Council who appoint a City Manager. The City's (primary government) financial statements include its component units. The accompanying basic financial statements comply with the provisions of the GASB Statement No. 14, "The Financial Reporting Entity," in that the financial statements include all organizations, activities, functions and component units for which the City (the "primary government") is financially accountable. Financial accountability is defined as the appointment of a voting majority of a legally separate organization's governing body and either (1) the City's ability to impose its will over the organization, or (2) the potential that the organization will provide a financial benefit to or impose a financial burden on the City.

**Discretely Presented Component Units**

The Rockwall Economic Development Corporation (REDC) is governed by a nine member board of directors appointed, at will, by the City Council. REDC represents the City by promoting it as a location for new business; it also acquires and develops land for that purpose. REDC collects a half cent sales tax to support its activities.

The Rockwall Technology Park (RTP) provides repair and maintenance of the common area within the park being developed by REDC. RTP's board of directors is composed of representatives of the landowners. At September 30, 2012, REDC owned the majority of the land and the board was therefore composed of REDC board members. When the park becomes 75% or more owned by private landowners, it will become an entity independent of the City. Until then, it is controlled by REDC, a discrete component unit of the City.

The funds of both REDC and RTP are composed of governmental fund types. Stand alone financial statements for RTP as of and for the fiscal year ended September 30, 2012 are not prepared.

**B. Government-wide and Fund Financial Statements**

The government-wide financial statements (i.e. the statement of net assets and the statement of changes in net assets) report information on all of the nonfiduciary activities of the primary government and its component units. For the most part, the effect of interfund activity has been removed from these statements. *Governmental activities*, which normally are supported by taxes and intergovernmental revenues, are reported separately from *business-type activities*, which rely, to a significant extent, on fees and charges for support. Likewise, the *primary government* is reported separately from certain legally separate *component units* for which the primary government is financially accountable.

The statement of activities demonstrates the degree to which the direct expenses of a given function or segment are offset by program revenues. *Direct expenses* are those that are clearly identifiable with a specific function or segment. *Program revenues* include 1) charges to customers or applicants who purchase, use, or directly benefit from goods, services, or privileges provided by a given function or segment and 2) grants and contributions that are restricted to meeting the operational or capital requirements of a particular function or

**CITY OF ROCKWALL, TEXAS**  
NOTES TO THE FINANCIAL STATEMENTS  
Year Ended September 30, 2012

segment. Taxes and other items not properly included among program revenues are reported instead as *general revenues*.

Separate financial statements are provided for governmental funds, proprietary funds, and fiduciary funds, even though the latter are excluded from the government-wide financial statements. Major individual enterprise funds are reported as separate columns in the fund financial statements.

C. Measurement Focus, Basis of Accounting, and Financial Statement Presentation

The government-wide financial statements are reported using the *economic resources measurement focus and the accrual basis of accounting*, as are the proprietary fund and fiduciary fund financial statements. Revenues are recorded when earned and expenses are recorded when a liability is incurred, regardless of the timing of related cash flows. Property taxes are recognized as revenues in the year for which they are levied. Grants and similar items are recognized as revenue as soon as all eligibility requirements imposed by the provider have been met.

Governmental fund financial statements are reported using the *current financial resources measurement focus and the modified accrual basis of accounting*. Revenues are recognized as soon as they are both measurable and available. Revenues are considered to be *available* when they are collectible within the current period or soon enough thereafter to pay liabilities of the current period. For this purpose, the City considers revenues to be available if they are collected within 60 days of the end of the current fiscal period. Expenditures generally are recorded when a liability is incurred, as under accrual accounting. However, debt service expenditures, as well as expenditures related to compensated absences and claims and judgments, are recorded only when payment is due.

Property taxes, franchise taxes, licenses, and interest associated with the current fiscal period are all considered to be susceptible to accrual and so have been recognized as revenues of the current fiscal period. Only the portion of special assessments receivable due within the current fiscal period is considered to be susceptible to accrual as revenue of the current period. All other revenue items are considered to be measurable and available only when cash is received by the City.

The City reports the following major governmental funds:

The *General Fund* is the City's primary operating fund. It accounts for all financial resources of the general government, except those required to be accounted for in another fund.

The *Debt Service Fund* accounts for the resources accumulated and payments made for principal and interest on long-term general obligation debt of governmental funds.

The *G.O. Bonds Capital Projects Fund* was established to account for street and drainage projects using proceeds from the issuance of bonds.

The City reports the following major proprietary fund:

The *Water and Sewer Fund* operates the water distribution system and the wastewater treatment plants, wastewater pumping stations, and collection systems.

Additionally, the City reports the following fund types:

Internal Service Funds account for employees' health insurance, and worker's compensation coverage services provided to other departments or agencies of the government, or to other governments on a cost-reimbursement basis.

**CITY OF ROCKWALL, TEXAS**  
NOTES TO THE FINANCIAL STATEMENTS  
Year Ended September 30, 2012

Special Revenue Funds account for specific revenue sources that are legally restricted to expenditures for specified purposes (not including expendable trusts or major capital projects).

Capital Projects Funds account for the acquisition of capital assets or the construction of major capital projects (such as streets and sidewalks) not being financed by proprietary funds.

Fiduciary funds account for assets held by the City in a trustee capacity or as an agent on behalf of others. The Agency Fund is custodial in nature and does not present results of operations or have a measurement focus. Agency funds are accounted for using the accrual basis of accounting. This fund is used to account for developer contributions for infrastructure projects related to various developments to be constructed at a later date.

Private-sector standards of accounting and financial reporting issued prior to December 1, 1989, generally are followed in both the government-wide and proprietary fund financial statements to the extent that those standards do not conflict with or contradict guidance of the Governmental Accounting Standards Board. Governments also have the *option* of following subsequent private-sector guidance for their business-type activities and enterprise funds, subject to this same limitation. The City has elected not to follow subsequent private-sector guidance.

As a general rule the effect of interfund activity has been eliminated from the government-wide financial statements. Exceptions to this general rule are payments-in-lieu of taxes and other charges between the City's water and wastewater function and various other functions of the City. Elimination of these charges would distort the direct costs and program revenues reported for the various functions concerned.

Amounts reported as *program revenues* include 1) charges to customers or applicants for goods, services, or privileges provided, 2) operating grants and contributions, and 3) capital grants and contributions, including special assessments. Internally dedicated resources are reported as *general revenues* rather than as program revenues. Likewise, general revenues include all taxes, miscellaneous revenue, and interest income.

Proprietary funds distinguish *operating* revenues and expenses from *nonoperating* items. Operating revenues and expenses generally result from providing services and producing and delivering goods in connection with a proprietary fund's principal ongoing operations. The principal operating revenues of the Water and Sewer enterprise fund are charges to customers for sales and services. The enterprise utility fund also recognizes as operating revenue the portion of tap fees intended to recover the cost of connecting new customers to the system. Operating expenses for the enterprise fund include the cost of sales and services, administrative expenses, and depreciation on capital assets. All revenues and expenses not meeting this definition are reported as nonoperating revenues and expenses.

D. Assets, liabilities, and net assets or equity

1. Deposits and investments

The City maintains various accounts for each fund at its depository. The City also has cash maintained by agents for debt payments and reserves, construction reserves and worker compensation claims. For purposes of the statement of cash flows, the City considers all highly liquid debt instruments purchased with a maturity of three months or less to be cash equivalents.

The City investment policy authorizes the Director of Finance to invest in the following types of investments:

- a. Obligations of the United States or its agencies and instrumentalities with finite maturity dates, with a maximum maturity of not greater than 5 years. Laddering of investments should be considered.
- b. Direct obligations of the State of Texas or its agencies and instrumentalities, with stated finite maturity dates.

**CITY OF ROCKWALL, TEXAS**  
NOTES TO THE FINANCIAL STATEMENTS  
Year Ended September 30, 2012

- c. Other obligations, with finite maturity dates, the principal and interest of which are unconditionally guaranteed or insured by the State of Texas or the United States or their respective agencies or instrumentalities.
- d. Obligations of states, agencies, counties, cities and other political subdivisions of any state having been rated as to investment quality by a nationally recognized investment rating firm and having received a rating of not less than "A" or its equivalent.
- e. Certificates of deposit issued by a state or national bank domiciled in the state of Texas or a savings bank domiciled in the state of Texas provided that they are:
  - (1) Guaranteed or insured by the Federal Deposit Insurance Corporation or its successor,
  - (2) Secured by obligations outlined in items 1 – 4. The market value of all collateral must be marked to market on a daily basis and shall not be less than 102% of the principal amount of the certificate plus accrued interest, or
  - (3) Secured in any other manner in an amount provided by law for deposits of the City.
- f. Repurchase agreements which are fully collateralized by obligations of the United States or its agencies and instrumentalities, marked to market on a daily basis with a market value of at least of the 102% of the principal invested, including accrued interest. The securities being purchased must be pledged to the City and held in the City's name by a third party selected and approved by the City. The repurchase agreement must have a defined termination date and be placed through a primary government securities dealer or a financial institution doing business in the state of Texas. The repurchase agreements should be secured by obligations approved in this policy.
- g. Banker's acceptances having a stated maturity of 270 days or less, to be liquidated in full at maturity, which are rated not less than "A-1" or "P-1" (or an equivalent rating) by at least one nationally recognized credit rating agency provided that it is eligible for borrowing from a Federal Reserve Bank.
- h. Commercial paper having a stated maturity of 270 days or less and rated not less than "A-1" or "P-1" (or an equivalent rating) by at least two nationally recognized rating agencies or one nationally recognized rating agency and is fully secured by an irrevocable letter of credit issued by a bank organized and existing under the laws of the United States.
- i. No-load money market mutual fund registered with and regulated by the SEC, which has a dollar-weighted average stated maturity of 90 days or less. It must have included in its investment objectives its intent to maintain a stable net assets value of \$1 for each share. The fund must provide the City with a prospectus and other information required by the SEC.
- j. No-load mutual funds, registered with and regulated by the SEC, having weighted maturity of less than two years, and which invests exclusively in investments approved by this policy.
- k. Investment pools which are approved by the City Council, provided they meet all the criteria for investment pools outlined in Chapter 2256, Texas Local Government Code, and maintain a continuous rating not lower than AAA or AAA-m (or an equivalent rating) from at least one nationally recognized rating service.

The City holds various mortgage backed securities that offer higher yields but are sensitive to changes in interest rates and other market conditions. Timely payment of interest and principal are guaranteed by federal agencies. The City will not be required to sell these securities prior to maturity barring an event that would be isolated, nonrecurring, unusual, and could not reasonably be anticipated by the City. The City has no borrowed funds used for investing or reverse repurchase agreements.

**CITY OF ROCKWALL, TEXAS**  
NOTES TO THE FINANCIAL STATEMENTS  
Year Ended September 30, 2012

Investments having a maturity of 1 year or more, when purchased, are stated at fair value. Short term investments are stated at cost or amortized cost.

2. Receivables and payables

Activity between funds that are representative of lending/borrowing arrangements outstanding at the end of the fiscal year are referred to as either "due to/from other funds" (i.e., the current portion of inter fund loans) or "advances to/from other funds" (i.e., the non-current portion of interfund loans). All other outstanding balances between funds are reported as "due to/from other funds." Any residual balances outstanding between the governmental activities and business-type activities are reported in the government-wide financial statements as "internal balances."

Advances between funds, as reported in the fund financial statements, are offset by a fund balance reserve account in applicable governmental funds to indicate that they are not available for appropriation and are not expendable available financial resources.

All trade receivables are shown net of an allowance for uncollectibles. Trade accounts receivable in excess of 60 days comprise the trade accounts receivable allowance for uncollectibles.

Property taxes are levied on October 1 by the City based on the January 1 property values as assessed by the Rockwall County Central Appraisal District. Taxes are due without penalty until January 31, of the next calendar year. After January 31 the City has an enforceable lien with respect to both real and personal property. Under state law, property taxes levied on real property constitute a perpetual lien on the real property which cannot be forgiven without specific approval of the State Legislature. Taxes applicable to personal property can be deemed uncollectible by the City.

3. Inventories and prepaid items

All inventories are valued at cost using the first-in/first-out (FIFO) method. Inventories of governmental funds are recorded as expenditures when consumed rather than when purchased.

Certain payments to vendors reflect costs applicable to future accounting periods and are recorded as prepaid items in both government-wide and fund financial statements.

4. Restricted assets

Certain proceeds of enterprise fund revenue bonds are classified as restricted assets on the balance sheet because their use is limited by applicable bond covenants.

5. Capital assets

Capital assets, which include property, plant, equipment, and infrastructure assets (e.g., roads, bridges, sidewalks, and similar items), are reported in the applicable governmental or business-type activities columns in the government-wide financial statements. Capital assets are defined by the City as assets with an initial, individual cost of more than \$5,000 (amount not rounded) and an estimated useful life in excess of two years. Such assets are recorded at historical cost or estimated historical cost if purchased or constructed. Donated capital assets are recorded at estimated fair market value at the date of donation.

The costs of normal maintenance and repairs that do not add to the value of the asset or materially extend assets lives are not capitalized.

Major outlays for capital assets and improvements are capitalized as projects are constructed. Interest incurred during the construction phase of capital assets of business-type activities is included as part of the capitalized value of the assets constructed.

# CITY OF ROCKWALL, TEXAS

## NOTES TO THE FINANCIAL STATEMENTS

Year Ended September 30, 2012

Capital assets of the primary government, as well as the component units, is depreciated using the straight line method over the following estimated useful lives:

Buildings	20 - 30 years
Building Improvements	20 - 50 years
Public domain infrastructure	20 years
System infrastructure	50 years
Equipment	3 - 10 years

### 6. Compensated absences

It is the City's policy to permit employees to accumulate earned but unused vacation pay benefits up to specified limits. Sick leave is accrued at 6.67 hours per month. However, once an employee has accrued 120 days of sick leave, earned sick leave in excess of 120 days may be converted to vacation leave at a ratio of 3 days sick leave to one day of vacation leave up to a maximum of 15 sick leave days per year. Upon termination, any accumulated sick leave over 120 days shall be converted to vacation leave at a ratio of 3 days sick leave to one day vacation leave to be paid to the employee in accordance with the vacation leave policy. Upon retirement from the City, all accrued sick leave shall be converted to vacation pay at a ratio of 3 days sick leave to one day vacation leave and shall be paid to the employee if he/she has 10 or more years of service to the City. Unused compensatory time for nonexempt employees is paid on termination. All vacation pay is accrued when incurred in the government-wide, proprietary, and fiduciary fund financial statements. Compensated absences are reported in governmental funds only if they have matured for example, as a result of employee's resignation and retirement.

### 7. Long-term obligations

In the government-wide financial statements, and proprietary fund type in the fund financial statements, long-term debt and other long-term obligations are reported as liabilities in the applicable governmental activities, business-type activities, or proprietary fund type statement of net assets. Bond premiums and discounts, as well as issuance costs, are deferred and amortized over the life of the bonds using the straight line method which approximates the effective interest method. Bonds payable are reported net of the applicable bond premium or discount. Bond issuance costs are reported as deferred charges and amortized over the term of the related debt.

In the fund financial statements, governmental fund types recognize bond premiums and discounts, as well as bond issuance costs, during the current period. The face amount of debt issued is reported as other financing sources. Premiums received on debt issuances are reported as other financing sources while discounts on debt issuances are reported as other financing uses. Issuance costs, whether or not withheld from the actual debt proceeds received, are reported as debt service expenditures.

### 8. Fund equity

**Nonspendable Fund Balance** Amounts that cannot be spent because they are either not in a spendable form or are legally or contractually required to be maintained intact.

**Restricted Fund Balance** - Amounts that can be spent only for specific purposes because of constraints imposed by external providers, or imposed by constitutional provisions or enabling legislation.

**Committed Fund Balance** - Amounts that can only be used for specific purposes pursuant to constraints imposed by the City Council through legislation, resolution or ordinance, unless the City Council removes or changes the specified use by taking the same type of action used to commit the amounts.

**Assigned Fund Balance** - Amounts that are constrained by the City Council, or the City Manager or Director of Finance, based upon delegation of this authority by the City Council, that are to be used for specific purposes but are neither restricted nor committed.

**CITY OF ROCKWALL, TEXAS**  
NOTES TO THE FINANCIAL STATEMENTS  
Year Ended September 30, 2012

Unassigned Fund Balance - Amounts that are available for any purpose; these amounts can be reported only in the City's General Fund.

Fund balance amounts represent the nature of the net resources that are reported in a governmental fund. The City fund balance classifications include non-spendable resources, restricted, and non-restricted (committed, assigned and unassigned) amounts. When the City incurs an expenditure and both restricted and unrestricted amounts are available, the City considers restricted amounts to have been spent first. When the City incurs an expenditure for an unrestricted amount, committed amounts are reduced first, followed by assigned amounts and then unassigned amounts for purposes in which any of those unrestricted fund balance classifications could be used. The City has not established a formal policy to set forth a minimum level for fund balances.

**II. RECONCILIATION OF GOVERNMENT-WIDE AND FUND FINANCIAL STATEMENTS**

Explanation of certain differences between the governmental fund balance sheet and the government-wide statement of net assets:

The governmental fund balance sheet includes a reconciliation between *fund balance-total governmental funds* and *net assets – governmental activities* as reported in the government-wide statement of net assets. One element of that reconciliation explains that "Other long-term assets are not available to pay for current-period expenditures and are deferred in the funds." The details of this \$1,515,706 difference are as follows:

Bonds issuance costs:	
City	<u>\$1,515,706</u>

**III. STEWARDSHIP, COMPLIANCE, AND ACCOUNTABILITY**

A. Budgetary information

The City follows the following procedures in establishing the budgetary data reflected in the financial statements:

1. Public hearings are conducted to obtain taxpayer comments.
2. Prior to October 1, the budget is legally enacted through passage of an ordinance.
3. The City Manager is authorized to transfer budgeted amounts between departments within any fund; however, any revisions that alter the total expenditures of any fund must be approved by the City Council. Therefore the fund level is the legal level of control.
4. Formal budgetary integration is employed as a management control device during the year. The legally adopted budgets for the General Fund, certain Special Revenue Funds and the Debt Service Fund are adopted on a basis consistent with generally accepted accounting principles.
5. Budgeted amounts are as originally adopted or as amended by the City Council. During 2012, individual amendments were not material in relation to the original appropriations. Any budgeted amounts appropriated at fiscal year-end and not spent automatically lapse.
6. The City did not adopt budgets for certain Special Revenue Funds. These unbudgeted Special Revenue Funds were as follows:

Emergency Siren Fund  
Downtown Improvement Fund  
Art in Public Places Fund  
Special Crimes Unit Fund

**CITY OF ROCKWALL, TEXAS**  
NOTES TO THE FINANCIAL STATEMENTS  
Year Ended September 30, 2012

7. Capital Project funds were not budgeted. Since project length financial plans usually extend into two or more fiscal years, this makes comparisons confusing and misleading.

B. Deficit fund equity

The following fund had a deficit fund balance at September 30, 2012:

Employee Benefits Internal Service Fund	\$604,726
---	-----------

The deficit in the Employee Benefits fund was caused by unanticipated health care cost increases, and will be covered by additional transfers from the general fund.

**IV. DETAILED NOTES ON ALL FUNDS**

A. Deposits and investments

Deposits

Custodial credit risk for deposits is the risk that in the event of a bank failure, the City's deposits may not be returned or the City will not be able to recover collateral securities in the possession of an outside party. At September 30, 2012, the City's deposits were entirely insured or collateralized with securities held by the pledging financial institution's trust department or agent in the City's name; as a result, the City's deposits were not exposed to custodial credit risk.

Under a contractual agreement with North Texas Municipal Water District (NTMWD), depository accounts are maintained by NTMWD for interest and sinking, debt, and construction reserves totaling \$728,857 which are separately insured or secured by collateral pledged by NTMWD's depository. This amount is included in restricted cash on the statement of net assets.

The deposits of REDC and RTPA are covered by the City's depository contract and, therefore, at September 30, 2012, these deposits were entirely insured or collateralized with securities held by the pledging financial institution's trust department or agent in the City's name; as a result, the deposits of REDC and RTPA were not exposed to custodial credit risk.

Other receivables	\$198,772	\$ --	\$ --	\$3,311	\$ --	\$93,979

C. Deferred/Unearned Revenue

Governmental funds report *deferred revenue* in connection with receivables for revenues that are not considered to be available to liquidate liabilities of the current period. Governmental funds also defer revenue recognition in connection with resources that have been received, but not yet earned. At the end of the current fiscal year, the various components of *deferred revenue* and *unearned revenue* reported in the governmental funds were as follows:

	Unavailable	Unearned
Delinquent property taxes receivable (General Fund)	\$174,384	\$ --
Contract receivable not yet due (General Fund)	189,120	--
Fines receivable (General Fund)	191,025	--

 Year Ended September 30, 2012

E. Interfund receivables, payables, and transfers

The composition of interfund balances as of September 30, 2012, is as follows:

Fund	Receivable	Payable
General Fund	\$557,092	\$ --
Nonmajor Governmental Funds	--	149,323
Internal Service Funds	--	407,769
Totals	\$557,092	\$557,092

The outstanding balances between funds result primarily from the time delay between the dates that interfund goods and services are provided and payments between funds are made. These are expected to be collected within one year.

The composition of interfund transfers for the year ended September 30, 2012, is as follows:

Fund	Transfer In	Transfer Out
Major Governmental Funds		
General Fund	\$689,185	\$3,415,000
Nonmajor Governmental Funds	1,527,850	87,085
Water and Sewer Enterprise Fund	--	1,594,950
Internal Service Funds	2,880,000	--
Totals	\$5,097,035	\$5,097,035

Transfers are used to move unrestricted revenues to finance various programs or capital projects that the City must account for in other funds in accordance with budgetary authorizations.

F. Long-term debt

The City issues general obligation debt ( in the form of general obligation bonds, certificates of obligation, contractual obligations, and notes payable) to provide funds for the acquisition and construction of major capital facilities. General obligation debt has been issued for both governmental and business-type activities. These issues are direct obligations and pledge the full faith and credit of the City.

Total bonds payable	33,363,139	--	(1,726,222)	31,636,917	1,801,222
Capital lease obligations	6,710,080	--	(388,337)	6,321,743	411,671
Compensated absences	113,930	130,140	(130,735)	113,335	22,700
Business-type activities	<u>\$40,187,149</u>	<u>\$130,140</u>	<u>(\$2,245,294)</u>	<u>\$38,071,995</u>	<u>\$2,235,593</u>

For the governmental activities, claims and judgements and compensated absences are generally liquidated by the general fund. The government-wide statement of activities includes \$685,000 of revenue bonds and \$411,671 of capital leases due within one year for business-type activities in "liabilities payable from restricted assets" on that same statement. Liabilities payable from restricted assets also includes \$34,095 of accrued interest.

Authorized and Unissued Debt

The following tables detail the status of all authorized general obligation and revenue bonded debt as of September 30, 2012:

Year Authorized	General Obligation Bonds		Balance
	Amount Authorized	Amount Issued	Unissued 9/30/12
1985	\$1,500,000	(\$600,000)	\$900,000

Current Refundings

Rockwall Economic Development Corporation issued \$2,405,000 of Sales Tax Revenue Bonds for a current refunding of \$2,675,000 of Sales tax revenue bonds. The refunding was undertaken to reduce total future debt service payments. The transaction resulted in an economic gain of \$235,265 and a reduction of \$292,909 in future debt service payments.

During the year ended September 30, 2012, the following changes occurred in liabilities reported in the capital long-term debt for REDC:

	Balance 9/30/11	Additions	Retirements	Balance 9/30/12	Due Within One Year
<b>Governmental activities:</b>					
Sales tax revenue bonds	\$6,825,000	\$2,405,000	(\$2,810,000)	\$6,420,000	\$470,000
Certificates of obligation	11,555,000	--	(770,000)	10,785,000	805,000

Total	<u>\$18,553,968</u>	<u>\$2,480,920</u>	<u>(\$3,615,528)</u>	<u>\$17,419,360</u>	<u>\$1,298,151</u>

V. OTHER INFORMATION

A. Risk management

The City is exposed to various risks of loss related to torts, theft of, damage to, and destruction of assets; errors and omissions; injuries to employees; employee health benefits; and other claims of various natures.

The City uses a medical self-insurance fund to pay medical and dental claims of the City employees and their covered dependents and minimize the total cost of annual medical insurance to the municipality. Medical claims in any one year exceeding \$75,000 per covered individual or, approximately \$3,238,610 in the aggregate for the group, are covered through a private insurance carrier. Additionally, life insurance policy premiums for each employee are paid through the fund. The self-insurance fund is funded by operating transfers from other funds and charges to employees for extended benefits at their option. The City does not believe there are material claims incurred but not reported as of September 30, 2012.

The City uses a Self-Insurance and Risk Management Program (as permitted by law and its home rule charter) to insure itself against the various risks of liability or loss to which it is exposed, either through an insurance provider or through a defined self-insurance program. The City issued certificates of obligation, based on an actuarial analysis, to fund a self-insured workers compensation plan. Under this plan, worker compensation insurance is provided in accordance with State statutes to all City employees. To protect the assets of the plan from a catastrophic claim the City has purchased stop loss coverage in the amount of \$200,000 per occurrence with a cap of \$600,000 per year.

The Worker's Compensation fund (an internal service fund) accounts for the activity of this plan. The City establishes claim liabilities based on estimates of the ultimate cost of claims reported but unsettled and of claims incurred but not reported. Any claims incurred and not reported, are not believed to be significant to the City's financial statements.

**CITY OF ROCKWALL, TEXAS**  
NOTES TO THE FINANCIAL STATEMENTS  
Year Ended September 30, 2012

	Employee Benefits		Worker's Compensation	
	2012	2011	2012	2011
Claims payable beginning of the year	\$181,850	\$148,015	\$33,407	\$15,403
Claims incurred	3,193,314	2,633,737	183,041	160,788
Payment on claims	(3,187,270)	(2,599,902)	(178,480)	(142,784)
	<u>\$187,894</u>	<u>\$181,850</u>	<u>\$37,968</u>	<u>\$33,407</u>

Commercial insurance is purchased for the other risks of losses to which the City is exposed. There have been no significant reductions in insurance coverage and settlement amounts have not exceeded insurance coverage for the current year or the three prior years.

B. North Texas Municipal Water District

The District is a conservation and reclamation district and political subdivision of the State of Texas, created and functioning under Chapter 62, Acts of 1951, 52nd Legislature, Regular Session, as amended, originally compiled as Vernon's Article 8270-141 (the "Act"), pursuant to Article 16, Section 59 of the Texas Constitution. The District comprises all of the territory of its member cities, viz., Allen, Garland, Princeton, Plano, Mesquite, Wylie, Rockwall, Farmersville, McKinney, Richardson, Forney and Royse City (the "Member Cities"). The District was created for the purpose of providing a source of water supply for municipal, domestic and industrial use and for the treatment processing and transportation of such water to its Member Cities and to its other customers located in North Central Texas, all within the Dallas Standard Metropolitan Statistical Area.

Under the Act, including specifically Section 27 thereof, and under the Constitution and Statutes of the State of Texas, the District has broad powers to (1) impound, control, store, preserve, treat, transmit and use storm and flood water, the water of rivers and streams and underground water, for irrigation, power and all other useful purposes and to supply water for municipal, domestic, power, industrial and commercial uses and purposes and all other beneficial uses and purposes; and (2) collect, transport, process, treat, dispose of, and control all municipal, domestic, industrial or commercial waste whether in fluid, solid or composite state, including specifically the control, abatement or reduction of all types of pollution. The City retains no ongoing financial interest equity investments and/or responsibilities for the District other than the contractual arrangements discussed more fully herein.

The District has long-term contracts with the City to supply treated water and sewer treatment. The City's water contract with the District provides that the City pay a predetermined annual amount for treated water in twelve monthly installments. The amount of this annual payment is based upon an annually established rate per thousand gallons and the largest annual amount of water consumption of past years. The City owns one sewage treatment facility, Squabble Creek and, in 1978 entered into an agreement with the District for the construction of a second facility, Buffalo Creek. Under the terms of this agreement, the District issued contractually secured bonds in its name to construct and operate this sewage disposal plant for the City. In subsequent years, similar contractual agreements have been made to enable NTMWD to expand the sewage treatment facilities and continue to provide sewage treatment services to the City. Under the terms of these contracts, the City's payments, which began when the facilities were first utilized, are equal to the operating and maintenance expenses for the next ensuing calendar year, as shown in the Annual Budget. The contracts further provide that the debt service payments will be equal to the principal and/or interest coming due on the bonds on the next succeeding interest payment date, plus the fees and charges of the Paying Agent and the Registrar.

**CITY OF ROCKWALL, TEXAS**  
NOTES TO THE FINANCIAL STATEMENTS  
Year Ended September 30, 2012

These contractual obligations have been included as capital lease obligations in amounts equal to the bonds outstanding under these agreements. Accordingly, the related sewage treatment facilities have been capitalized and are being depreciated over the estimated life of the facilities.

The outstanding principal balance on the bond issues as of September 30, 2012, is \$6,321,743. See Note IV F for the annual requirements to amortize the bonds as of September 30, 2012.

With respect to the ground storage reservoir discussed above, the Cities of Rockwall and Heath are contractually obligated to make timely payments to the District representing 66.67% and 33.33%, respectively, of the related operating expenses and debt service payments. While the City anticipates its share of these payments to be 66.67%, the Cities of Rockwall and Heath are each contractually obligated to make any payments which the other party is required, but is unable, to make to the District.

C. Contingent Liabilities and Commitments

Amounts received or receivable from grantor agencies are subject to audit and adjustment by such agencies. Any disallowed claims, including amounts already collected may constitute a liability of the applicable funds. The amounts, if any, of expenditures which may be disallowed by the grantor cannot be determined at this time although the City expects such amounts, if any, to be immaterial.

The City is a defendant in various lawsuits. Although the outcome of these lawsuits is not presently determinable, it is the opinion of the City's management that the resolution of these matters will not have a material adverse effect on the financial condition of the City.

As described in Note 5 above, the general revenues of the City are contingently liable for the \$27,214,292 payable in General Obligation Bonds which are currently outstanding and recorded as obligations of the Enterprise Fund.

The City contracts for garbage disposal with a third party. Under the terms of the agreement the city bills and collects the residential billing and remits that amount to the contracting party. The contractor bills the commercial customers and remits a franchise fee to the City based on total revenues received from the contract.

The Rockwall Economic Development Corporation provides monetary incentives to companies to relocate within the City of Rockwall. At September 30, 2012, these commitments totaled \$4,352,379.

E. Employee retirement systems and pension plans

1. Plan Description

The City provides pension benefits for all of its full-time employees through a nontraditional, joint contributory, hybrid defined benefit plan in the state-wide Texas Municipal Retirement System (TMRS), one of 827 currently administered by TMRS, an agent multiple-employer public employee retirement system. The plan provisions that have been adopted by the city are within the options available within the options available in the governing state statutes of TMRS.

TMRS issues a publically available comprehensive annual financial report that includes financial statements and required supplementary information (RSI) for TMRS; the report also provides detailed explanations of the contributions, benefits and actuarial methods and assumptions used by the system. This report may be obtained by writing to TMRS, P.O. Box 149153, Austin, Texas 78714-9153 or by calling 800-924-8677; in addition, the report is available on TMRS' website at [www.TMRS.com](http://www.TMRS.com).

The plan provisions are adopted by the governing body of the City, within the options available in the state statutes governing TMRS. Plan provisions for the City were as follows:

Benefits depend upon the sum of the employee's contributions to the plan, with interest, and the City-financed monetary credits, with interest. At the date the plan began, the City granted monetary credits for service rendered before the plan began of a theoretical amount equal to two times what would have been contributed by the employee, with interest, prior to establishment of the plan. Monetary credits for service since the plan began are a percent (100%) of the employee's accumulated contributions. In addition, the City can grant as often as annually another type of monetary credit referred to as an updated service credit which is a theoretical amount which, when added to the employee's accumulated contributions and the monetary credits for service since the plan began, would be the total monetary credits and employee contributions accumulated with interest if the current employee contribution rate and City matching percent had always been in existence and if the employee's salary had always been the average of his salary in the last three years that are one year before the effective date. At retirement, the benefit is calculated as if the sum of the employee's accumulated contributions with interest and the employer-financed monetary credits with interest were used to purchase an annuity.

Members can retire at ages 60 and above with 5 or more years of service or with 20 years of service regardless of age. A member is vested after 5 years. The plan provisions are adopted by the governing body of the City, within the options available in the state statutes governing TMRS and within the actuarial constraints also in the statutes.

2. Contributions

The contribution rate for the employees is 7%, and the City matching ratio is currently 2 to 1, both as adopted by the governing body of the City. Under the state law governing TMRS, the actuary annually determines the City contribution rate. This rate consists of the normal cost contribution rate and the prior service contribution rate, both of which are calculated to be a level percent of payroll from year to year. The normal cost contribution rate finances the currently accruing monetary credits due to the City matching percent, which are the obligation of the City as of an employee's retirement date, not at the time the employee's contributions are made. The normal cost contribution rate is the actuarially determined percent of payroll necessary to satisfy the obligation of the City to each employee at the time his/her retirement becomes effective. The prior service contribution rate amortizes the unfunded (over funded) actuarial liability (asset) over the remainder of the plan's 25-year amortization period. The unit credit actuarial cost method is used for determining the City contribution rate. Both the employees and the City make contributions monthly. Since the City needs to know its contribution rate in advance to budget for it, there is a one-year delay between the actuarial valuation that is the basis for the rate and the calendar year when the rate goes into effect, i.e. December 31, 2010 valuation is effective for rates beginning January 2012.

	<u>Actuarial Assumptions</u>

Texas Statewide Emergency Services Personnel Retirement Fund

The City acts as agent for the Texas Statewide Emergency Services Personnel Retirement Fund (the "Fund") which is a component unit of the State of Texas. The City reimbursed the Fund \$50,500 for benefits paid on a pay-as-you-go basis during the year in recognition of services provided to the City by volunteer emergency services personnel. The Fund has a board of directors not designated by City officials and is administered by the State Fire Fighters' Pension Commissioner. There are 38 active participants currently covered by the Fund and payments are being made to 24 retirees or their survivors. The Fund does not prepare separate financial statements for participating departments, however, financial statements for the Fund as a whole may be obtained from the administrator at Fire Fighters' Pension Commissioner, P. O. Box 12577, Austin, Texas, 78711.

*This page is left blank intentionally.*

### *Required Supplementary Information*

Required supplementary information includes financial information and disclosures required by the Governmental Accounting Standards Board but not considered a part of the basic financial statements.

NOTES TO REQUIRED SUPPLEMENTARY INFORMATION

September 30, 2012

(Unaudited)

---

Information concerning the budget and budget calendar are detailed in footnote III.A. The General Fund budget is presented on a generally accepted accounting principles basis.

*Combining Statements and Budget Comparisons  
as Supplementary Information*

This supplementary information includes financial statements and schedules not required by the Governmental Accounting Standards Board, nor a part of the basic financial statements, but are presented for purposes of additional analysis.

## NONMAJOR GOVERNMENTAL FUNDS

### SPECIAL REVENUE FUNDS

Special Revenue Funds are used to account for specific revenues that are legally restricted to expenditures for particular purposes.

Cemetery - established to account for the annual income from the sale of plots and cemetery maintenance costs.

Police Investigation - established to account for donations, court security fees, and forfeitures.

Recreational Development - established to account for the annual lease income from marinas and golf course.

Radio System - established to account for revenues and expenditures for the support of the City's radio system.

Street Improvements - established to account for the proceeds of street improvement assessments.

Hotel Motel Tax - established to account for the annual income from hotel motel taxes.

Fire Equipment - established to account for funds to be used for the purchase of fire equipment for the volunteer fire department.

Aviation - established to account for funds received from airport operations and related expenses.

Recycling - established to account for funds to be used for the City's recycling program.

Emergency Siren — established to account for revenues accumulated and expenditures to add emergency sirens within the City.

Downtown Improvement - established to account for revenues and expenditures related to the City's efforts to revitalize the downtown square.

Art in Public Places - established to account for donations received for developing art displays in public areas such as parks.

Special Crimes Unit - established to account for revenues and expenditures related to a county-wide crime task force.

### *DEBT SERVICE FUNDS*

Debt Service Funds are used to account for the accumulation of resources and payment of general, certificate, & contractual obligation bond principal and interest from governmental resources.

Debt Service Fund - established to account for the general governmental indebtedness of the City.

Harbor Debt Service Fund - established to account for debt issued in connection with the TIF.

NONMAJOR GOVERNMENTAL FUNDS  
(Continued)

*CAPITAL PROJECTS FUNDS*

Capital projects funds are used to account for the acquisition and construction of major capital facilities other than those financed by proprietary funds and trust funds.

Capital Projects - established to account for miscellaneous street and drainage projects which are financed with contributions from the General Fund and the Rockwall Economic Development Corporation.

Equipment Acquisition — established to account for capital equipment acquisition using operating transfers from benefiting funds and residual proceeds from miscellaneous debt.

205 Bypass Project — established to account for revenues and expenditures related to the construction of the new 205 Bypass roadway project.

The *Harbor/TIF Capital Projects Fund* was established to account for improvements in a Tax Increment Reinvestment Zone using proceeds from the issuance of bonds.

*INTERNAL SERVICE FUNDS*

Internal service funds are used to account for the financing of goods or services provided by one department or agency to other departments or agencies of the government and to other government units, on a cost reimbursement basis.

Employee Benefits Fund — established to account for the financing of a medical self-insurance fund to pay medical and dental claims of the City's employees and their covered dependents.

Workers' Compensation Fund — established to account for the costs of the workers' compensation self-insurance program for the City.

*AGENCY FUND*

Agency funds are used to account for assets held by the government as an agent for individuals, private organizations, other governments and/or other funds.

Special Escrow Agency Fund - established to account for developer contributions for infrastructure projects related to various developments to be constructed at a later date.
